In determining compensativeness, consideration must be given to jointness of line-haul costs incurred in performing transportation as part of round trip movement; respondents' addition of 10 percent for empty mileage does not properly reflect round-trip joint costs for entire movement; protestants' cost data, including a proper round-trip load factor developed by averaging published minimum and respondent's system average loading, indicate that proposed reduced rate fails by substantial margin to yield out-of-pocket costs of line-haul movement alone; not approved.—Printed Matter from Philadelphia Port and Sharon Hill, 318 I.C.C. 191 (194).

Respondent's cost data are not acceptable as a satisfactory estimate of the probable cost of transporting considered traffic in that they are based on one-way costs, ignoring inherent jointness of expenses of round trip movement, and do not provide for expenses of nonproductive use of equipment and personnel; moreover, where joint-line service is necessary, expenses of the connecting carrier have not been furnished, and the costs are based on short-highway distances although respondent makes extensive use of toll roads which may not be the shortest routes; not approved.—Candy and Confectionery, New York State to Midwest, 318 I.C.C. 409 (411-12).

Respondent's cost data are deficient in that they contemplate use of substituted rail-for-motor service, though there may or may not be a substitution of rail service under proposed rates; while tariff provides that carrier may substitute rail service unless shipper directs otherwise, respondent holds out to perform an all-motor transportation service and showing of compensativeness must be based on cost of performing such service over motor routes.—Candy & Confectionery, Ill. & N.Y. to Ill., Ky., N.Y. & Pa., 318 I.C.C. 540 (542-3).

Although contending she can operate at lower costs because she is a small carrier, respondent presented no cost evidence and has not met the minimum requirement of proving compensativeness; proposed rates not approved.—Heavy Mach., Equip. & Supplies between Wis. and Ill. & Minn., 318 I.C.C. 545 (548).

Respondent's cost study is inadequate to show compensativeness of proposed reduced rates when circuity factor and empty-load factors used are unsubstantiated by any evidence. Protestants' study, as restated to correct certain defects, shows out-of-pocket cost generally exceeding the proposed rates. Not approved.—Sugar from Ovid., Colo., to Iowa Points, 318 I.C.C. 636 (639, 640).

Respondents' cost studies do not show proposed reduced rates on hides, pelts, skins and related articles to be compensatory. Vehicles must be cleaned after each movement, but no allowance is made therefor or for recent wage increases. The derived space-occupancy ratios reflect only 1-week periods, and it is unlikely that any appreciable volume of other traffic would move with that considered in view of its shipping characteristics. Moreover, the space-and-weight method of computing line-haul costs fails to reflect accurate costs because density only affects line-haul expense when light and bulky lading prevents capacity loading. Not approved.—Hides or Pelts from Oklahoma to Chicago and Milwaukee, 318 I.C.C. 766 (770).

Respondents' cost studies on transporta-

tion of butter from North Dakota points to Twin Cities for rail movement beyond to the East are defective in failing to reflect actual costs of man-hours required for transfer to rail cars, increases in expenses since 1960, and refrigeration costs during hot weather. Moreover, both States traversed prohibit loads above 45,000 pounds in average vehicles, and, though proposed minimum is 40,000 pounds, to compete with all-rail service the rail factor beyond would have to be that applicable on 50,000-pound minimum, and it is not clear how advantage could be taken of that rate without transporting l.t.l. quantities. As costs developed by respondents are so little below proposed proportional rate, consideration of those defects forces conclusion that it is noncompensatory. Not approved.—Butter from Bismarck and Mandan, N. Dak., to Twin Cities, 321 I.C.C. 386 (389)*.

Respondents' cost evidence is ambiguous and lacks support of underlying data; system average costs shown are particularly deficient in specificity. Though similarly deficient, protestant's cost summary, using commission's cost section's formula, increases doubts as to reliability of respondents' cost evidence. In the circumstances, respondents have not sustained their burden of proving proposed reduced rates to be compensatory; not approved.—Powdered Iron, Camden and Pennsauken, N.J., to Dayton, 321 I.C.C. 499 (502-3).

In any precise comparison of carrier costs in accordance with a Highway From B formula, it is necessary to use certain data described in instruction 27 of the Uniform System of Accounts and required to be filed by the carrier in its annual reports. However, only general-commodity common carriers are required to comply with instruction 27, and respondent as a specific-commodity carrier is not required to, and apparently did not, file the information required to compute costs in the precise manner contemplated by Highway Form B; respondent's cost data accordingly have little probative value. Though protestants' cost study likewise has certain infirmities, they have introduced the best study they could reasonably be expected to adduce, considering the information available to them; viewed qualitatively, it is a prima facie showing that the proposed rates are not compensatory, and rate comparisons are not an adequate substitute for respondent's burden to produce cost evidence showing them to be reasonable. Proposed rates are not shown to be just and reasonable.—Cocoa Powder from New York, N.Y., to Council Bluffs, 322 I.C.C. 255 (258-9)*.

Although, even with protestant's adjustments, costs to respondent for considered movements of building materials are below revenue retained by it from proposed rates, respondent's method of computing costs by dividing its total expenses for 1962 by total number of intercity miles operated to obtain an average cost per vehicle-mile does not accurately reflect its overhead costs on involved traffic, because not all overhead costs vary with miles operated, particularly when the line haul is performed by owner-operators. Respondent has thus not met the first test of compensativeness announced in 318 ICC 567, that its share of the revenue will cover all its costs; proposed rates not approved.—Building Materials, Middle Atlantic and New England, 322 I.C.C. 710 (713-4).

Proponent's cost study based on public statement No. 1-62, submitted to show compensativeness of l.t.l. commodity rates on paper and paper articles which would replace class rates thereon following proposed elimination of tariff aggregate-weight provision, shows that resulting rates exceed out-of-pocket costs only on shipments under 2,000 pounds which would move in single-line service. There is no cost data with respect to shipments in two higher weight brackets; moreover, although the proposal is not restricted to single-line service, there is no evidence that it would be compensatory over joint-line routes on shipments in any of the three weight brackets. Proposal to eliminate minimum-tender requirement, published in connection with existing l.t.l. commodity rates, is not shown to be just and reasonable, without prejudice to its establishment on under 2,000-pound shipments moving in single-line service.—Aggregate Weight Provisions on Paper, Mass. to N.Y., N.J., 323 I.C.C. 525 (526-7, 531-2).

Proposed reduced t.l. commodity rate of 95 cents, minimum 41,000 pounds, on tea ex-

tract, published to meet plan II TOFC rates and designed to apply on mixed shipments of tea and coffee extract, are not shown to be compensatory to extent that out-of-pocket cost exceeds revenue that would be realized on certain mixed shipments. Under applicable tariff mixing provisions, an integral part of the related rate which must be considered in determining compensativeness, rate charged would be that applicable on each commodity based on actual weight, subject to highest minimum weight for any article in the mixed shipment; thus, since tariff provides a rate of 85 cents, minimum 40,000 pounds, on coffee extract, revenue per shipment will decrease in direct proportion to amount of coffee in a mixed shipment. Not approved, without prejudice to establishment of proposed rate on straight shipments of tea extract or subject to a revised mixing rule.—Tea Extract, New Orleans to Chicago, 325 I.C.C. 103 (104-5)*

Respondent failed to show that proposed reduced truckload commodity rate is just and reasonable, a minimum requirement being a convincing showing that the proposal is compensatory, when the data submitted from another extensive adjustment is not shown to be representative of the particular movement under consideration and the 1961 cost basis used by respondent, which should be reasonably current to have probative value, is not current and was not brought up to date by application of pertinent percentages of wage and price increases experienced since that time. Also, protestants' cost evidence, which shows proposed rate to be non compensatory, is not rebutted; suspended schedules ordered canceled.—Candy and Confectionery, New York, N.Y. to Rockford, Ill. 325 I.C.C. 522 (525).

The commission has frequently pointed out that rates which can be defended only on the added-traffic theory may not be found just and reasonable because of probable deleterious effect thereof upon a just and reasonable rate structure.—Petroleum and Plastics from Texas to Indiana and Ohio, 316 I.C.C. 155 (156); Lumber from Montana to Illinois and Wisconsin, 315 I.C.C. 642 (644); Clothing, in Multiple Shipments, from Nanticoke, Pa., 315 I.C.C. 181 (182).

Reduced rate proposed for local movement in connection with water-rail movement beyond destination is substantially below out-of-pocket cost for handling the traffic. While proposed rate might result in tonnage for empty or partially loaded equipment without material increase in expense, added-traffic theory affords no basis for approving rates which otherwise could not be regarded as compensatory.—Copper Anodes from El Paso to Texas City, Tex., 316 I.C.C. 51 (52, 54).

While respondent states that additional traffic could be moved in same trailer with shipments under proposed minima, thus increasing overall per-trailer revenue, compensatory nature of rates may not be determined by speculating as to probable loading of other freight in the same vehicle; not approved.—Foodstuffs from Chicago, Ill., to Detroit, Mich., 315 I.C.C. 689 (691, 692).

That shipments at proposed 30,000-pound minimum would fill only about one-half the capacity of a trailer, thus additional l.t.l. traffic could be carried in the same vehicle, does not show compensativeness of proposed rates. Truckload minimum weight is an integral part of the t.l. rate; respondent holds itself out to transport the minimum, and the rate should be compensatory for transporting that weight. In a number of proceedings t.l. rates dependent upon top loading of other traffic have been disapproved; see 303 ICC 40 and 303 ICC 184.—Plastics from Odessa, Tex., to Ill., Kans., Mo., and Wis., 315 I.C.C. 722 (723).

Respondent's initial common-carrier cement rates are compensatory for service provided with purchased transportation when, though it pays its owner-operators more than the minimum payment negotiated by labor-management committees, the remaining percentage covers its own costs.—Cement from Hudson, N.Y., to New England and Pennsylvania, 319 I.C.C. 235 (247).

Proposed reduced rates and increased minimum on meats and packinghouse products from midwestern to mountain-Pacific States, covering transportation performed almost entirely with owner-operators, are reasonably compensatory by criteria established in 318 ICC 567 when (1) data taken from respond-

ents' annual reports, separted among direct out-of-pocket, variable overhead, and fixed overhead costs, show that they are amply compensatory to each; and (2) of the hundreds of owner-operators and contractors actually performing the line-haul service, a great majority have operated under contracts with respondents for periods of 3.7 to 11 years or longer, and all respondents have waiting lists of those who desire to participate in the traffic involved; as the reduced rates will not result in any decrease in gross revenues or in payments to owner-operators in agreed percentages thereof, they satisfy requirement that the division of revenue be sufficient to retain services of owner-operators for movement of the traffic. Approved.—Meats and PHP, Central & Western to Far Western States, 319 I.C.C. 667 (674, 676).

Respondent's computation of truck-mile expense and earnings based on total expenses and vehicle miles shown in its annual report is inadequate to show that proposed rates are compensatory when most of its transportation is performed with owner-operators. Purchased transportation agreements premised on a percentage of revenue afford no sound basis for determination of compensativeness of rates, and respondent admittedly does not know the owner-operators' costs in hauling frozen foods between the points involved.—Frozen Foods from Caribou, Maine, to Midwestern Points, 314 I.C.C. 721 (723).

Respondent's cost data based largely on cost of purchased transportation, which is 60 percent of gross revenue from the traffic, do not reflect actual operating costs; in measuring compensativeness of proposed rate on castings, protestant's cost data based generally on Highway Form B formula are more representative of actual costs; those data show a resulting operating ratio of 131.1 percent. Respondent's comparison of earnings on a minimum load at proposed rate with earnings on like traffic over lines of bureau members for comparable distances are insufficient, standing alone, to establish compensativeness; not approved.—Iorn or Steel Castings, Danville, Ill., to Saginaw, Mich., 315 I.C.C. 220 (221-2).

Respondent which utilizes owner-operators to perform line-haul service and attempts to justify its rates principally on cost basis must show that division of revenue retained covers its costs and that agreed revenue division is sufficient to acquire or retain owner-operators' services. As respondent has not attempted to show its costs, proposed rate is not shown to be just and reasonable; not approved.—Sheet Steel, Galvanized—St. Louis to Marshalltown, Iowa, 318 I.C.C. 589 (590-1).

Rationale of criteria announded in 318 ICC 567, that when using owner-operators carrier has no way of verifying actual costs incurred by the owner-operators and therefore cannot supply adequate cost data, does not apply where respondent leases only tractors from the owner-operators and primarily uses its own trailers or obtains them from a subsidiary leasing company; respondent's first cost study therefore has no probative value to show compensativeness of proposed rates when it does not include cost of operating its own trailers or charges for leasing them from its affiliate. Cost data in respondent's second study are so vague and imprecise that any attempted restatement thereof would serve no useful purpose; unit costs are not related to the particular movement under consideration, and since no round-trip average load can be computed no effect can be given to jointness of line-haul expenses. Respondent has failed to show that its share of revenue from the proposed rate will cover its costs of handling the involved traffic; proposed rate not approved.—Aluminum Sheets & Scrap, Oswego, N.Y., and Warren, Ohio, 322 I.C.C. 788 (791-2).

Proposed reduced rate on rags from Winnipeg, Man., to Twin Cities is not shown to be compensatory for single-line movement by two respondents when they introduced no evidence in that respect, and protestants' evidence, which as restated constitutes the most reliable evidence of record, indicates that it would not be compensatory for those carriers; nor is compensativeness of the proposed rate for joint-line movement by two other respondents established by showing of costs to the United States carrier for performing the entire service, when it lacks authority to serve Winnipeg and there is no contention

that its costs of record are representative of those of carrier which would perform the Canadian part of the haul; no costs were shown for latter, and recomputation of former's costs by protestants indicates that the proposed rate would not be compensatory; not approved.—Rags from Winnipeg to Twin Cities, 315 I.C.C. 147 (150-1).

Though proposed l.t.l. commodity rates on magazines exceed respondents' estimate of single-line out-of-pocket costs, which reflect savings due to expeditious loading by shipper and elimination of platform handling at origin, and apparently no platform handling would be required at numerous destinations, proposed rates as published apply for both local and joint-line hauls, and as many respondents lack authority to serve all destinations involved joint hauls would probably be required to many points. Protestant's study taking into consideration such joint hauls, which would generally require platform handling at interchange points, shows that out-of-pocket costs would in all instances exceed the proposed rates for joint-line hauls, and that the same would be true for single-line hauls to several desinations. Proposed rates are thus not shown to be compensatory; not approved.—Magazines, Old Saybrook, Conn., to Middle Atlantic Ter., 315 I.C.C. 273 (275-6).

Not only does proponent's system average expense per vehicle mile have little weight to show compensativeness of proposed reduced rate, but no evidence was presented concerning costs of connecting carrier which would participate jointly in the traffic; cost of performing the joint-line service should have been computed also, including interchange expense; not approved.—Floor Covering from Lancaster, Pa., to Charleston, S.C., 315 I.C.C. 550 (552).

Proposed reduced rate for joint-line movement cannot be approved when one respondent, which would perform a substantial part of the through haul, presented no cost data and the other's data were deficient in numerous respects; further, wide spread of system average expenses over anticipated revenue indicates probability that the rate would not be compensatory.—Coolers from Fort Smith to Louisville, 318 I.C.C. 336 (337-8).

Though cost studies of both respondent and protestants contain errors, both refer to statement No. 9-58 for territorial traffic; on basis of out-of-pocket cost shown therein for shipments of 5,000-5,999 pounds and for comparable mileage, and considering light loading of involved traffic and fact that, though average costs used reflect a round-trip load that probably understates costs, pickup and delivery cost is overstated because of customer loading and unloading, proposed rate, the same as present rate but without requirement that each vehicle used to transport a shipment be charged for at the volume minimum of 10,000 pounds, or actual weight if greater, appears compensatory.—Radio & Television Cabinets, Jackson, Miss., to Chicago, 315 I.C.C. 171 (174).

Cost study based on a reasonable estimate of particular movement is usually of greater value in determining compensativeness of a rate than one based on system average expenses. Respondent being a small operator serving farm communities and having only two tractors and two trailers, study of its operations appears more representative of its costs than data based on system average costs of representative carriers used by protestants. Proposed initial rates are not shown to be unreasonable.—Fertilizer, In Bulk, from Idaho, Utah, and Colo. to Nebr., 315 I.C.C. 496 (498).

Although protestant attempts to show that respondent's costs are greater than those of common carriers of other than general freight in northwestern and central regions, record does not permit determination as to similarity of expenses between operations of respondent as an irregular-route carrier of specific commodities and those of the regional carriers. Proposed initial rates are not shown to be noncompensatory or otherwise unlawful.—Meats & Related Articles, Wis. to Chicago & Twin Cities, 315 I.C.C. 588 (589).

While a comparison of system-average expense per vehicle-mile with revenue per vehicle-mile produced by a particular rate ordinarily is of little value in determining rate compensativeness, where revenue per vehicle-mile from the proposed rate greatly exceeds the system-average expense, the wide spread indicates probability that the rate is compensatory, in absence of precise costs or

evidence to the contrary; proposed rate approved—Iron or Steel from Pennsylvania to Richmond, Va., 316 I.C.C. 402 (404).

Respondent's cost study based on application of Highway Form F to origin terminals involved is more specifically related to considered movements than protestants' study which applied that formula to expenses for respondent's entire system; operating ratios for operations to and from those terminals demonstrate that system expenses are not representative of those in area where proposed rates would apply. Respondent's data, recomputed on basis of short-line distances increased 6 percent for circuity, show that proposed rates to representative points would exceed out-of-pocket costs: approved.—Gasoline and Fuel Oil within Middlewest Territory, 316 I.C.C. 435 (437, 439).

Where neither costs calculated by protestant nor those offered by respondent are acceptable, the best cost evidence available is that based on public statement No. 1-61; these costs indicate proposed initial rate would yield something above out-of-pocket costs; approved.—Paper Articles between Chagrin Falls, Ohio & Goshen, Ind., 316 I.C.C. 393 (396).

Although respondent applied system average costs to certain activities, it used costs developed from actual study of operations for a majority of expense items, and its costs may be somewhat overstated because loading and unloading expenses are usually treated as varying with weight handled, rather than on basis of length of haul; its use of actual average load for the study period was proper, and its study shows that proposed reduced rate would yield earnings exceeding costs by over 13 cents per truck-mile, and would be compensatory whether on basis of average load or minimum weight. Approved. —Lead or Zinc Concentrates—British Columbia to Idaho, 318 I.C.C. 85 (87, 88).

Costs based on regional averages are acceptable, except where known transportation characteristics are different from the average. Record shows that type of service performed by respondent in handling dog food, representing about 80 percent of its total revenue in a representative period, is different from average service of general freight carriers. Thus, its operations are in specialized category and protestant's evidence based on regional average costs does not prove the noncompensativeness of respondent's rates. Since the rates are already in effect and burden of proof is not on respondent, its rates are not shown to be unlawful.—Dog or Cat Food from Boston to Middle Atlantic Points, 318 I.C.C. 59 (63, 64).

As to a second respondent which is a general-commodity hauler, proposed rates are below territorial average out-of-pocket costs of other general-commodity carriers in same territory, which appear representative of those incurred by that respondent in absence of evidence to the contrary. Although proposed rates do not appear compensatory, evidence indicates that considered t.l. rates from Boston to Baltimore and Washington would more than cover out-of-pocket costs if minimum were increased to 36,000 pounds; respondent may republish at that minimum.—Id., pp. 64-5.

While comparison of a carrier's system average expense per vehicle-mile with average revenue produced by proposed rates is ordinarily of little value in determining whether the rates are compensatory, as it falsely assumes that all expenses are caused by miles operated, there are two general exceptions to this principle: (1) where the margin of revenue per vehicle-mile greatly exceeds the system average expense, the wide spread indicates that the rate is compensatory in absence of precise costs or evidence to the contrary; (2) where a carrier specializes in transportation of a single commodity or group of commodities in a particular area, its system average expense may be regarded as a fairly reliable measure of cost of handling such commodity or commodities in that area in absence of contrary evidence.—Bananas, South to the Midwest and Southwest, 319 I.C.C. 51 (53).

As respondent is primarily a transporter of commodities with similar characteristics to bananas, the average revenue yield under proposed specific commodity rates on bananas substantially exceeds its system average expense, and there are no specific cost data or other evidence indicating that the rates would not be compensatory, they may properly be found so. However, as all motor rates on

formerly exempt commodities, including bananas, are under investigation in Docket No. 32912, approval of respondent's rates is without prejudice to any different conclusion in that proceeding.—Id., p. 53.

Regional averages, while entitled to some weight in absence of more accurate data, are not determinative in appraising compensativeness of proposed rates where evidence has been presented which more nearly reflects actual cost of the operations involved. Protestants' estimates of respondent's line-haul costs, based on average operating expenses of southern region general-commodity motor carriers, particularly their average load, which includes handling of all types of traffic and all sizes of shipments, do not reflect transportation conditions peculiar to considered movements of sugar.—Sugar from Louisiana to North Carolina, 319 I.C.C. 107 (111).

And protestants' cost analysis consisting mainly of division of respondent's total expenses by its total intercity miles operated, with inadequate separation of expenses unrelated to distance, is of little value in determining compensativeness of proposed rate. Although they use 95 percent of line-haul and terminal total costs to develop out-of-pocket costs, suggestion of that formula in Highway Form F is based on assumption that specialized carriers are less diversified than general-commodity carriers and can trim their plant capacity to more nearly reflect out-of-pocket costs; but respondent's overall operations on which protestants' costs were based appear to be more of general-commodity type. Also, protestants' use of respondent's system average load in reverse direction ignores bulkiness of the furniture which moved in that direction, and though they include 6 percent of short highway distance for circuity, no reason appears why respondent as an irregular-route carrier should not use the shortest available routes.—Id., p. 110.

Respondent's cost study based on application of Highway Form B formula to data in its annual report, adjusted to reflect special studies and its method of operation, shows that proposed rate will cover out-of-pocket cost and make some contribution to overhead, and is therefore clearly compensatory. While respondent did not use a return-load factor in computing a round-trip load factor, it developed an estimate of actual costs for each direction by use of same vehicle-mile cost for the round trip; and where one of its principal commodities is light and bulky, use of the system average load without a density adjustment tends to overstate the cost.—Id., pp. 112-2.

Protestants' comparison of initial rates proposed by a class III limited-commodity carrier with average costs of class I and II general-commodity carriers does not establish, prima facie, that the rates are noncompensatory and therefore unreasonable. Principle that regional average costs based on differing operations are not necessarily representative of another carrier's costs is especially pertinent where the regional figures include both t.l. and more costly l.t.l. movements, while respondent's traffic is in truckloads; nor are the compared carriers' operations shown to be similar to respondent's in other respects. Protestants were aware of the differing character of respondent's operations, and it was incumbent on them to adduce costs based on substantially the same type of operations to make a prima facie showing of non compensativeness. As respondent's cost evidence is likewise of no material aid in resolving that issue, proposed rates are not shown to be unlawful.—Animal Feed, Miss. and Tenn. to Midwest and Southwest 319 I.C.C. 257 (260)*.

Territorial average costs of class I and II general-commodity carriers cannot be considered representative of costs of class III carriers, such as respondent, who handle only a few commodities in truckloads over irregular routes. Protestants' study based on respondent's operating statistics for 1958 likewise has little probative value when he has presented more up-to-date statistics for 1961, which show lower total expense for a greater mileage. Also, as respondent's showing that his actual miles are substantially the same as short highway miles was verified by "hubometers" attached to his tractor wheels, protestants' claim that costs per trip should be computed on short-line mileage plus 6 percent for circuity is without merit. While data indicating that truck-mile earnings at proposed rates

would in all instances exceed respondent's overall truck-mile costs would ordinarily be given little weight, he hauls only a few commodities, and entire record is convincing that the proposed rates are compensatory. Nor does it appear that his own costs are not reasonably representative of those of owner-operators he has used.—Malt Beverages —Ill., Ind., Ky., & Ohio to Chattanooga, 319 I.C.C. 787 (790, 791).

Respondent's initial common-carrier rates on canned goods may not be approved when comparison of its average cost with minimum truck-mile revenue under the proposed rates shows that to most of the destinations involved they would fail to meet that cost and therefore would not be compensatory. —Canned Goods, Cincinnati, Ohio, to Ind., Ill., Ky., Mo., & Wis., 315 I.C.C. 169 (170).

Although system-average costs are not the best evidence of compensatory nature of rates for particular movements, in absence of more specific evidence such costs are entitled to weight. Respondent's latest annual report filed with the commission was that of a contract carrier, it having recently converted to common-carrier status, and was limited as to data for use in cost analysis; protestant therefore developed costs for considered traffic based on system average costs of class I carriers of general freight in eastern-central territory. Respondent's cost study, based on one allegedly representative tractor-trailer unit, appears to be predicated on its experience in handling local traffic, fails to reflect joint-line nature of movements under considered rates, and is not helpful. Protestant's cost evidence shows that proposed initial rates would not be compensatory; not approved.—Paper, Hamilton, Ohio, to Mineola, New York, and Newark, 315 I.C.C. 385 (387-8).

Although system-average costs do not necessarily represent actual cost of transporting any commodity between particular points, they represent the best cost data available to protestants, and in absence of rebuttal by respondent are acceptable as a fair approximation of its costs; such evidence indicates that proposed initial rates are not compensatory; not approved.—Fats, Tallow, & Greases between Fargo, N. Dak., & Iowa-Kans.—Neb., 315 I.C.C. 553 (554).

In proceedings involving t.l. or c.l. rates the commission has recognized two general exceptions to the principle that comparison of system-average expense with revenue produced by a particular rate is of little value in determining whether or not the rate is compensatory, as it falsely assumes that all expenses are caused by miles operated; first is where margin of revenue greatly exceeds system-average expense, indicating probability that rate is compensatory in absence of precise costs or evidence to the contrary; second is where carrier specializes in transportation of a single commodity or group of related commodities in a particular area since, in absence of evidence to the contrary, carrier's system-average expense may be regarded as a fairly reliable measure of cost of handling such traffic in that area. Proposed rates not shown to be compensatory.—Alcoholic Liquors from Boston and Hartford to S. Dak., 315 I.C.C. 616 (617-8).

Regional average costs as summarized in public statements prepared by the commission's cost finding section, which are based on expenses of class I and class II carriers, are not generally a reliable indication of costs incurred by a class III carrier, particularly if latter engages exclusively in transportation of a single commodity; this does not mean, however, that regional costs necessarily must be disregarded where they are the best evidence available to protestants and proponents of proposed rates make no serious attempt to rebut such costs. Respondents' cost data based on actual operations are in summary form and cannot be verified. Costs submitted by protestants, though not the actual expenses which respondents would incur under proposed rates, come closer to such expenses than do costs shown by respondents; proposed rates w"uld not be compensatory; not approved.—Salt, Feed, Fishmeal, Kans., La., Tex., Maine & Minn. to Fla., 315 I.C.C. 748 (750)*.

Respondent's cost evidence consists only of a showing of its system-average expense; system-average figures are of little aid in determining reasonableness of rates on particular traffic; not approved.—Rubber from Borger, Tex., to Memphis, Tenn., 316 I.C.C. 46 (48).

Ordinarily comparison of system-average expense per vehicle-mile with revenue per vehicle-mile produced by a particular rate is of little value in determining whether or not the rate is compensatory, particularly where relatively short hauls are involved. While respondent's operations are substantially different from those of carriers contributing operating data on which protestant's cost study was based, it submitted no evidence of its costs on considered traffic, and its rate and earnings comparisons are not persuasive that proposed rates would be compensatory; not approved. —Titanium Dioxide from Chicago, Ill., to Kalamazoo, Mich., 316 I.C.C. 150 (152-4).

While a comparison of system average expense per vehicle-mile with revenue per vehicle-mile is of little value in determining rate compensativeness as it falsely assumes all expenses are caused by miles operated, where such expense is well in excess of minimum revenues under the proposed rates, considerable doubt is cast on their compensativeness. Proposed rates represent a substantial reduction, but respondent presented no cost evidence, and in view of protestants' unrebutted showing of its operating results the rates are not shown to be compensatory; not approved. —Chemicals between Cedartown, Ga., and Points in N.J., 316 I.C.C. 249 (250-1).

Rates must return something above out-of-pocket costs to be approved, even where they are proposed to meet competition; comparison of yield per vehicle-mile under proposed rate with respondent's system-average expenses has little value to show whether the rate is compensatory, as it falsely assumes all expenses are caused by miles operates; not approved.—Canned Goods from San Francisco to Pocatello, Idaho, 316 I.C.C. 296 (298).

Respondent's cost figures in support of initial common-carrier rates were not computed on an acceptable cost formula, and it submitted no underlying data; although costs submitted by protestants are averages for numerous carriers operating in the territory and as such may not precisely reflect respondent's actual costs on considered traffic, they constitute the best evidence bearing on issue of compensativeness and thus are entitled to consideration; such evidence indicates that in most instances out-of-pocket costs would exceed minimum revenues from proposed rates; not approved.—Paper Articles between Ohio & Ill., Ind., N.J., N.Y., Ohio, Pa., 316 I.C.C. 390 (391-2).

While average costs of motor carriers in central region are not the best evidence of compensatory nature of particular movements, they are entitled to weight in absence of more specific evidence; costs submitted indicate probability that some of proposed rates are noncompensatorym Moreover, respondent has not shown what would be saved in loading costs by spotting trailers at shipper's dock for pickup after shipper loading, and added cost for driver and tractor between leaving the dock and returning to pick up the loaded trailer is not accounted for.—Dairy and Food Products between Chicago and Ohio & Mich., 316 I.C.C. 373 (376).

Protestants' unrebutted cost evidence, based on data in public statement No. 1-61 of commission's cost finding section, increased to reflect 1961 cost level, and on short highway mileage increased 6 percent for circuity, shows that out-of-pocket expenses exceed proposed rates by amounts ranging from 10.9 to 23.3 cents; not approved.—Paper and Paper Articles from Ohio to Chicago, Ill., 316 I.C.C. 570 (572).

Although protestant's cost data, developed by use of public statement No. 7-58 of commission's cost finding section, do not represent actual costs of particular movements, they are the best cost data available of record, and respondent made no attempt to rebut them; they are therefore entitled to weight as a fair approximation of cost of performing considered service; such data indicate that proposed initial rates would not cover out-of-pocket costs; not approved.—Freight, All Kinds, between Arden, N.C., and N.C. Points, 316 I.C.C. 676 (678).

Comparison of system-average expense per vehicle-mile with revenue produced by a particular rate is of little value in determining compensativeness, as it falsely assumes that all expenses are caused by miles operated; none of recognized exceptions to that rule are shown to be applicable. Proposed rates are not shown to be compensatory; not approved.—Phosphoric Acid and Fertilizer So-

lution—Utah and Idaho, 316 I.C.C. 683 (686).

Respondent submitted no cost data, and though protestants' cost data are based on regional averages and do not represent actual costs of particular movements, they represent the best data available of record and are unrebutted by respondent; they are therefore entitled to weight as a fair approximation of costs of performing considered service and are more convincing on issue of compensativeness than respondent's evidence that other carriers maintain rates lower than or same as the proposed rates. Protestants' evidence indicates that proposed rates are not compensatory; not approved.—Dairy Products from Ill., Minn., and Wis. to Fla., 316 I.C.C. 693 (695).

While costs submitted by protestant association are average costs for carriers operating in territories involved and do not represent actual costs of particular movements, they represent the best cost data of record and are entitled to weight as a fair approximation of cost of performing involved transportation service. Intervening shipper's showing that, on same formula, other rates of association carriers would not yield out-of-pocket costs does not discredit protestant's showing; those rates are not in issue, and it may be that costs of performing services covered thereby are lower than regional average costs used. Respondent presented no cost evidence, and protestant's study indicates that with one exception proposed rates are below out-of-pocket costs; not approved.—Sodium Silicate from N.J. & Pa. to Ill., Mich., Mo. & Ohio, 316 I.C.C. 699 (703-4).

Where actual distance over route used by carrier in performing considered service is not known, distance to be used in determining compensativeness of rates is estimated short highway distance increased 6 percent for circuity. Based on such distance, truck-mile earnings under proposed rate would be less than one respondent's system average expense, and although higher than second respondent's system average expense for one quarter-year, such a brief period, plus fact that the other specialized-carrier respondent shows a much higher system average expense, casts doubt on reliability of second respondent's figures; not approved.—Iron & Steel from or to Pennsylvania Points and Ind., 316 I.C.C. 705 (707-8).

Protestant's cost data indicate that respondent's average expense per vehicle-mile exceeds corresponding revenue from proposed reduced rate; moreover, based on respondent's reported system average cost per mile, and fact that three vehicles would have to be used to handle a minimum shipment of 80,000 pounds, cost of providing service would be $23.57 more than minimum revenue under proposed rate; not approved.—Iron and Steel Articles from St. Louis to Kansas City, 318 I.C.C. 45 (47, 48).

Respondent's cost data are substantially understated when no consideration is given to empty mileage or return loading nor allowance made for respondent's salary as a proprietary carrier. Protestants developed out-of-pocket costs which exceed proposed rates, and while territorial costs of general commodity carriers used do not necessarily reflect respondent's precise cost as a specialized hauler, they are the best evidence available to protestants, and in absence of effective rebuttal by respondent may not be ignored. Consideration of all the cost evidence is convincing that proposed rates are not compensatory; not approved.—Bananas, Mobile & New Orleans to Idaho, Mont., Oreg., 318 I.C.C. 140 (144).

Respondent has not met its minimum burden of showing compensativeness of proposed reduced t.l. rates on ingots and reduced charge of $10 per stop for partial loading or unloading; its cost data concern only sums paid for vehicles leased from owner-operators and do not include such overhead items as insurance; operating expenses for considered traffic are not shown to be comparable with respondent's average cost, nor were costs submitted for traffic moved in company-owned trucks, and no evidence was submitted in support of proposed stopoff charge; not approved.—Various Commodities between Chicago and Ind., Mich., Ohio, 318 I.C.C. 27 (28, 29).

Protestants' evidence indicates that proposed initial l.t.l. commodity rates on cider or vinegar would be noncompensatory; while regional average costs shown do not necessarily reflect precise costs of involved transpor-

tation, such costs cannot be ignored when they are the best evidence available to protestants on the issue of compensativeness, and no attempt is made by proponent to rebut such data; not approved.—Id., p. 30.

Proponent's cost study is defective in omitting certain expenses shown in its annual report and ignoring joint nature of round-trip costs; protestants' study based on Highway Form B formula accepted in numerous proceedings is more representative than study based on operating statistics for 77 general commodity carriers, being based solely on proponent's expenses and properly including all related expenses; eliminating stop-time cost, since proposed rate provides for shipper loading and unloading, such costs would still exceed proposed rate by substantial margin; not approved.—Lumber from Denver, Colo., to Kansas City, Mo., 318 I.C.C. 214 (215-16).

System average costs used by protestants are not necessarily actual costs which respondent would incur, but they represent a closer approximation of actual results than those presented by respondent, which were based on one-way movement and failed to include such items as terminal and traffic expenses as well as empty mileage; failure to compute costs for round-trip movement is the major deficiency; proposed rates not approved.—Paper and Related Art., Ga., N.C. & S.C. to Pa. & W. Va., 318 I.C.C. 440 (444).

Volume 10—p. 8218; Volume 11—p. 9558; Volume 12—p. 10461; Volume 13—p. 11112; Volume 14—p. 11634; Volume 15—p. 12244; Volume 16—p. 12908; Volume 17—p. 13615; Volume 18—p. 14624; Volume 19—p. 15896.

5. Duplicating or conflicting rates.—[Vols. 10-13, 19].—Respondent's rates in its individual tariffs that are lower than corresponding rates which it maintains in conference tariffs violate Rule 4(h) of Tariff Circular MF-3, which prohibits publication of class or commodity rates that duplicate or conflict with rates published in the same or any other tariff over the same route.—Basis for Rates to and from Unnamed Points in Tariffs, 316 I.C.C. 84 (86).

6. Territory, routes, points, "between", direction of movement.—[Vols. 11-16, 18, 19).—There was a rational basis for the commission's conclusion that proposed initial rates on crude rubber, filed by complainant in connection with its application under §7(c) of Transportation Act of 1958 for "grandfather" rights to transport that commodity, were unlawful because they would apply for transportation beyond scope of the carrier's existing authority and that potentially available to it under that statute; sustained.—Midwest Emery Freight System, Inc. v. United States, 202 F. Supp. 229 (232, 235)*.

A tariff establishes rates for transportation of goods which are embraced within the carrier's operating authority; tariff not based on authority is a nullity. Plaintiff must concede that it has no authority to transport firebrick and ferro alloys, and the commission construes the tariff in issue as including rates for those commodities; this the commission was privileged to do. Rejection of the tariff by the commission, sustained.—W. J. Dillner Transfer Co. v. United States, 214 F. Supp. 941 (945).

Order of the commission requiring plaintiff to cancel proposed rates on single unit mobile homes, on the grounds that its operating rights did not authorize transportation of such mobile homes, was clearly erroneous. Plaintiff holds authority to transport "prefabricated buildings, complete, knocked down,or in sections" and also authority to transport "buildings, complete, knocked down, or in sections"; neither of those certificates is restricted against transportation of trailers or mobile homes; thus, the commission's conclusion that a commodity so described could be transported only in sections (two or more units) is not tenable. The order under review is set aside, leaving to the commission any further action it may deem appropriate.—Pre-Fab Transit Co. v. United States, 262 F. Supp. 1009 (1010, 1014-5, 1016)*.

The commission's failure to reject a tariff listing rates for unauthorized commodities operates neither to convey new authority nor to condone the unlawful conduct.—J. B. Acton, Inc.—Investigation and Revocation of Cert., 89 M.C.C. 59 (64)*.

Rates not within scope of a carrier's operating authority are manifestly unlawful; respondent's applications for temporary authority to transport considered commodities from origin named having been denied for want of prosecution, proposed initial rates from that point are not supported by a grant of authority; cancellation required.—Bananas and Fresh Produce, Forest Park, Ga., to Ill., Ind., & Mo., 315 I.C.C. 1 (2).

Since respondent's commodity authority did not embrace authority to transport certain commodity, proposed rates thereon are ordered canceled.—Asphalt Cutback, Louisville, Ky., to Indiana & Ohio, 315 I.C.C. 439 (440); Road Paving Materials between Points in New England, 319 I.C.C. 95 (97-8).

The filing of tariffs publishing rates for service which cannot be provided by the carriers parties thereto is unlawful. Proposed rates on radio and television sets, deicing preparations, drugs or medicines, and other articles found not to be embraced in respondents authority for "such merchandise as is dealt in by wholesale and retail grocery and food business houses," ordered canceled.—Various Commodities, Illinois to Denver, 322 I.C.C. 554 (555).

Grouping, see §216(b), n. 250.

10. Plain and definite statement required.—[Vols. 10-19].—Minimum charges proposed in connection with l.t.l. rates on multiple shipments of clothing, to apply only when a stated aggregate volume is received from one shipper at one place and time, do not include a prepay requirement; such requirement is necessary because application of the minimum charges is dependent on volume and other incidents of tender by shipper; otherwise charges on like shipments could vary from day to day, depending on other shipments available from same consignor, and

consignee could not ascertain what the transportation charge on a given shipment would be; thus, in absence of the prepay requirement, proposed charges are not sufficiently clear and explicit.—Clothing, in Multiple Shipments, from Nanticoke, Pa., 315 I.C.C. 181 (183).

Rules providing reduced minimum charges per shipment when five or more shipments are picked up at one time in one calendar day are ambiguous and could result in controversy between carrier and shipper; use of phrase "on one calendar day" in addition to "at one time" adds nothing and should be eliminated: also, it should be made clear that all the pick-ups must consist of minimum-charge shipments. In addition, without requirements that such minimum charges be prepaid, and that billing for each shipment make reference to the other shipments, consignee of a collect shipment would have no means of checking accuracy of the charges. Approval of considered rules contemplates that they be revised accordingly.—Reduced Minimum Charges—West Roxbury to Mid. Atl. Ter., 315 I.C.C. 675 (678-9).

Rule in tariffs of defendant household-goods carriers, defining a divided shipment as one received at more than one place of pickup at origin or delivered to more than one place of delivery at destination, or both, is contradictory, where made subject thereto, of rule providing that property of two or more families or establishments will not be accepted as a single shipment; those rules should be made more definite by stating specifically that property of more than one family or establishment will be accepted as a single or divided shipment when requirements of that rule are otherwise met.—John F. Ivory Storage Co., Inc. v. Atlas Van Lines, Inc., 316 I.C.C. 224 (226)*.

Note to rules governing application of transportation charges to combined weight of divided shipments, which provides that carrier will separately weigh and issue a bill of lading on each shipment, even though shipments are consolidated and billed under provisions of such rule, requires clarification; if such rules mean what they imply, actual consolidation should be effected under a definite minimum weight for the entire consignment, and entire shipment should move under one bill of lading.—Id., p. 226.

Other divided-shipment rules which do not specifically define a point of origin or destination place no limits on such points with definiteness required by the commission's tariff circulars, and thus are uncertain in their application, especially in connection with defendants' pickup and delivery rules, several of which provide for different charges. Assailed rules ordered canceled to the extent they are found unlawful because vague, indefinite, or ambiguous.—Id., p. 226.

Proposed rules authorizing multiple pick-ups and deliveries or stoppage in transit are ambiguous in violation of §217(a) and Rule 4 of Tariff Circular MF-3 in that they can be interpreted as allowing only 3 pickups and 3 deliveries, or as many as 3 pickups at each point stopped for partial loading and 3 deliveries at each point stopped for unloading; also, the rules are in conflict when they provide a $5 charge for each pickup or delivery after the first, and a $10 charge for each stop exclusive of final destination, but make no clear distinction between pickup-and-delivery and loading-and-unloading services, which appear to involve similar operations and responsibilities on part of the carrier.—Split Pickup, Split Delivery, Stopping—Canned Goods, 316 I.C.C. 202 (203).

In addition, restriction of stopoff to complete loading to points through which the highway mileage from origin to destination is no more than 15 percent greater than over the shortest route over which carrier normally conducts business between such origin and destination is indefinite and uncertain, because shipper could not be expected to know the shortest highway route over which the carrier "normally conducts business." Proposed rules found unlawful and ordered canceled.—Id., p. 204.

Use of generic descriptions in National Motor Freight Classification to describe additional articles proposed to be included in grocery list in respondent's tariff violates rule 4(e) and (f) of Tariff Circular MF-3, which requires that commodity descriptions be specific whenever possible; and to avoid conflicts between specific descriptions and a broader description would include same articles, the

broader description should be followed by "Not more specifically described in the tariff." All articles respondent is authorized to transport could be named without resorting to generic description "groceries"; additional specific descriptions are necessary to provide rates for articles covered by proposed description "groceries, not otherwose indicated herein."—Bakery Goods, Food-stuffs & Groceries from N.J. & N.Y., 316 I.C.C. 639 (642-3).

Although suspended schedule names rates on bananas in cents per box, minimum 675 boxes, it does not define "box," and since a box is an indefinite unit, rates applicable per box without definition would violate rule 4 of tariff circular MF-No. 3.—Bananas, Mobile & New Orleans to Idaho, Mont., Oreg., 318 I.C.C. 140 (142).

Proposed tariff rule providing that line-haul rates would include loading and unloading services by not more than two men would permit the use of two men at any time although it would not require their use; thus, the rule is objectionable in that it is uncertain, indefinite, and ambiguous, in violation of rule 11 of commission's Tariff Circular MF-No. 3.—Helper Service in Middle Atlantic Territory, 318 I.C.C. 810 (813-14).

Although proposed plan V TOFC rates published in respondent motor carrier's tariff offer joint motor-rail motor service from and to named origin and destination points and points grouped therewith, essentially they provide for a rail line-haul between the named points, with the motor carrier performing the service to and from the railroad's ramps. Since those schedules do not provide a clear demarcation between the terminal areas of the named points and points beyond, and thus do not show whether the motor carrier would perform any line-haul service under the proposed rates, they lack definiteness and certainty as to their lawful application and are therefore unlawful.—Rubber Articles, Philadelphia to Ill., Ky., Mich., & Mo., 319 I.C.C. 632 (635, 638).

Defendant's rule providing that unless otherwise specified its rates include loading and unloading when the service can be performed by not more than two men is ambiguous, in violation of rule 11(a) of Tariff Circular MF No. 3, in failing to specify how many men will be furnished to load or unload, particularly when more than one vehicle is required to move a shipment, or who shall decide when the shipment "can" be loaded or unloaded by not more than two men. Rule proposed as alternative, providing for loading and unloading services of two men per vehicle, regardless of whether the service could be performed by one man, is likewise ambiguous in that it does not prohibit defendant from furnishing additional men at its convenience. Assailed rule ordered canceled, and defendant admonished promptly to establish an appropriate rule in compliance with rule 11(a).—Middle Atlantic Conference v. Transport Corp., 321 I.C.C. 308 (311-2).

Addition to tariff descriptions "Equipment, NOS," "Materials, NOS," and "Supplies, NOS" of reference mark leading to explanation "used or useful in the preparation, packaging, and sale of prepared food products, dairy products and byproducts" renders the three separate descriptions sufficiently specific to satisfy requirements of rule 4(f) of Tariff Circular MF No. 3. But mere addition of the symbol "NOS" to description "Canned Foods" does not alter conclusion that such description is too general; and publication of commodity description "Packing House Products" without reference to a tariff or item containing a complete list of such products is a violation of tariff circular rule 4(e) and therefore of §217(a) and (d).—Middlewest Motor Freight Bureau v. Beaver Transport, 325 I.C.C. 175 (177-8).

Though at time of hearing commodity descriptions "Chemicals" and "Machinery" were not accompanied by a list of the specific commodities embraced, defendant has since supplanted the "Chemicals" heading by two separate items, one, "Chemicals" followed by a list of specifically embraced commodities, and the other "Chemicals, NOS" (meaning not otherwise specified), both of which are subject to a tariff reference explained as "used or useful in the preparation, packaging, and sale of prepared food products, dairy products or byproducts"; and the "Machinery" description has been replaced by two items, "Machinery or machines, or parts named," followed by a specific list of ma-

chines, and "Machinery, NOS," subject to a tariff reference like that for chemicals. These current descriptions are sufficiently specific to satisfy the tariff circular rules.—Id., p. 178.

11. Notice chargeable to shipper.—[Vol. 16].—Complainant-consignee failed to show that defendant had engaged in an unreasonable practice in violation of §216(b) by failing to apprise shipper of availability of lower released-value rates on considered l.t.l. shipments of specified commodities; the alternative released-rate provision was clearly and fairly published in the pertinent tariff and shipper was put on notice, thereby, of availability of an alternative rate basis. Provisions in a carrier's tariff on file with the commission have the force and effect of statute, and carrier and shipper alike are charged with knowledge thereof and are bound thereby; carrier's obligation of public notice is fulfilled by the publication of rates, rules, and regulations in its tariff in clear, unambiguous language. Thus, complainant, as bearer of the charges, and shipper are chargeable with knowledge of availability of the lower released-value rates; complaint dismissed.—Winthrop Laboratories Div., Sterling Drug v. Dorn's, 325 I.C.C. 654 (655-7).

15. Posting required.—[Vol. 10, 15].—Defendant's institution of the practice of granting free intrastate transportation of cash letters for certain Wisconsin banks in connection with their interstate shipments thereof constitutes a change in value of the interstate service for which a charge is made, in violation of §217(c).—Armored Carrier Corp. v. B.D.C. Corp., 92 M.C.C. 665 (668).

16. Filing of tariffs.—[Vol. 16].—Although plaintiff bus company's tariffs were filed with the commission and, in absence of objection or investigation, had become effective, the tacit acceptance thereof by the commission does not foreclose the United States Court of Claims from looking into reasonableness of those tariffs as a factor in computation of transportation taxes.—Whitehouse Sightseeing Corp. v. United States, 300 F. 2d 449 (451).

Respondent's contention that its authority for "such merchandise as is dealt in by wholesale and retail grocery and food business houses" entitles it to transport any commodity whatever, provided the shipper or consignee in the slightest degree buys or sells food or groceries, was rejected by the commission and the court in a prior proceeding (see 163 F. Supp. 118). In view of its participation in that proceeding, it is at least questionable practice for respondent to again take the same position through medium of a tariff publication, without informing the commission at the time of filing as to the issue involved. A more orderly procedure would be to request an interpretation of its operating authority if it had a bona fide doubt as to its limitations.—Various Commodities, Illinois to Denver, 322 I.C.C. 554 (558).

17. Rejection of schedules.—[Vols. 14, 16-18].—The commission having found on examining plaintiff's certificate that it had no authority to transport firebrick and ferro alloys, it has authority under the statute to reject plaintiff's tariff naming rates on those commodities, although filed in proper form, because it was not in consonance with the statute and the commission's regulations thereunder. The court agrees with the commission that the tariff is an attempt to secure authority to haul those commodities; what the commission denied cannot be secured by rearranging language in the hope that in one way or another the previously denied authority will be approved.—W. J. Dillner Transfer Co. v. United States, 214 F. Supp. 941 (945, 946).

Since a tariff must be founded upon a valid certificate of authority to carry the commodities described therein, the commission could properly reject plaintiff's tariff without a hearing. The commission is an administrative body but exercises quasi-judicial duties; it exercises judgment and discretion; it may act of its own motion in certain instances and it may be petitioned to act by those having rights under the statute. The commission and the court (in 193 F. Supp. 823) previously held that plaintiff's certificate did not embrace the commodities in issue; due process of law does not require an administrative body any more than a court to retry issues which have been once decided. To compel the commission to retain files on every tariff and call a hearing thereon irrespective of whether it is based on a certificate would simply be senseless and bog it down in useless time-consuming ef-

fort.—Id., pp. 945-6.

Rejection, suspension, or condemnation of rates is appropriate where such rates apply to transportation beyond the publishing carrier's authority. In case of Railway Exp. Agency or any other express carrier this means that publication of rates applicable to delayed service which does not conform to the criteria of bona fide express service set forth in 63 MCC 573 would not be lawful; economies to be gained from such a delayed transportation service are available only to ordinary freight carriers.—Freight, All Kinds, L.C.L. Container Charges.—U.S.A., 323 I.C.C. 468 (481)*.

While proposed rule providing for time payment of charges for transportation of household goods through a prearranged loan to shipper by a financial institution may properly be published in carriers' tariffs, following rule determining amount of promissory note to be executed by shipper, reflecting the balance owing on the transportation charges plus a charge for credit, and providing a table of monthly payments, deals with matters beyond the commission's jurisdiction and is not properly published in a common carrier tariff, since the charges for credit recompense the financial institution for services rendered by it, not a service of the carrier. Such a proposal would normally be rejected upon submission for filing, but, since the second rule is so closely linked with the first (a proper subject for the commission's consideration), the schedules were accepted for filing. Order requiring cancellation of the second rule and of all references to it in the first will be deemed to have same effect as initial rejection of the improper filing.—Time Payment Plan for Transporting Household Goods, 323 I.C.C. 677 (679-80).

20. Joint rates.—[Vols. 12, 14, 17, 19].—By participating in a joint rate with a United States carrier a foreign operator subjects itself to the commission's jurisdiction and thus, to extent of the joint rate, becomes subject to terms of Interstate Commerce Act. And if the foreign operator fails or refuses to abide by provisions of the published tariff in which it is participating, it has committed a clear violation of the act.—Fess Transport, 91 M.C.C. 924 (927)*.

Although proposed plan V TOFC rates published in respondent motor carrier's tariff offer joint motor-rail motor service, with the motor carrier performing the service to and from the railroad's ramps, and they apply from or to numerous points grouped with the rail points named, there is no showing whether any such points are beyond the respective terminal areas within contemplation of §202(c)(2), and thus no proof that the motor respondent would perform any line-haul service. Therefore, under principle of 46 MCC 623 that motor carriers are not proper parties to joint rates when their service is performed within terminal areas, the proposed rates are not shown to be lawful and are ordered canceled.—Rubber Articles, Philadelphia to Ill., Ky., Mich., & Mo., 319 I.C.C. 632 (635-6, 638).

35. Distance provisions.—[Vols. 10-12].—Although investigation of iron-and-steel scales published by eastern motor carriers has been discontinued, one of the primary causes of its institution was carriers' alleged manipulation of distances to cut rates charged; respondents are therefore reminded that, in determining rates from mileage scales, tariffs publishing distance rates should clearly and definitely show application of the rates and publish distances between all points between which such rates apply, in accordance with rule 12 of Tariff Circular MF-3.—Iron and Steel Articles—Eastern Common Carriers, 314 I.C.C. 755 (758)*.

Proposed mileage rates, as published to utilize household-goods carriers' mileage guide, do not violate requirements of Rules 4(a) and 12(a) of tariff circular MF-No. 3 that all rates be plainly stated and that mileage rates clearly and definitely show the application thereof. The tariff circular authorizes the publication of distance commodity rates subject to a mileage guide for determination of mileages and, while protestant cites varying mileages to a point depending on method in which mileage guide is used, any deficiencies in respondent's publication are in the mileage guide rather than in method of publication. Further, respondent's traffic moves to large distribution points and not to all points, and the rates are published for mileage brackets rather than specific mileages.—Dog or Cat Food from

Boston to Middle Atlantic Points, 318 I.C.C. 59 (63).

Although six defendants have violated §217 by concurring in joint distance commodity rates published in tariff of a seventh, without participating in a distance guide as required by rule 12(c)(4) of Tariff Circular MF No. 3, they should be permitted to participate in the indicated mileage guide within the time specified in the order.—Middlewest Motor Freight Bureau v. Beaver Transport, 325 I.C.C. 175 (176, 177, 181).

36. Truckloads; equipment; weight.—[Vols. 10, 12, 19].—See Alcoholic Liquors, Detroit, Mich., to Long Island City, §202(b), n. 6.

37. Allowance to shippers.—[Vols. 10, 12].—Though carriers are not barred from publishing rates for less than a complete service, methods employed in providing the service must be lawful. Proposed terminal-to-terminal service in carrier-owned trailers is less than a complete service, since under proposed flat charge per trailer owners of the property transported would render a loading and unloading service for which they are entitled to publication of a just and reasonable allowance.—Automobile Parts and Other Articles, Central Territory, 316 I.C.C. 143 (144-5).

39. Transit.—[Vols. 12, 13, 15, 18].—Stopoff rules, mixed shipments of interstate and intrastate commerce, see Central States Motor Freight Bureau case, §216(b), n. 425.

40. Containers; returned containers.—[Vols. 16, 18].—While pallet-exchange agreement between named shipper and certain motor common carriers is not unlawful, exchange of pallets in manner therein described, in transportation of freight, is unlawful unless covered by appropriate tariff provisions. As, under the circumstances described, title to the pallets passes with each exchange, carrier would always be using its own pallets, and the transportation provided therewith is subject to tariff requirements of §217(a). Pallet exchange provisions similar to those quoted from tariff of one carrier would be appropriate and lawful, provided exchange thereunder is accomplished without discrimination and charges collected are reasonable for the entire service. But no mention should be made of exchange of pallets at carrier's sole option or convenience, since such a provision would violate the commission's tariff circular in that extent of the service would thereby become indefinite and uncertain.—Legality of Pallet Exchange Agreement—Kraft, 322 I.C.C. 439 (441-2, 444-5).

41. Intermediate or nearest point rule.—[Vol. 19].—Although 300 ICC 135 found that irregular-route carriers may not publish intermediate rules, 314 ICC 477 found that unnamed- or nearest-point rules were necessary to permit such carriers to establish rates for sporadic and infrequent movements; rule proposed by respondent, an irregular-route carrier, for intermediate application of class rates requires a more-distant point and is in fact an intermediate rule; cancellation required, without prejudice to establishment of a rule in conformity with views expressed in latter case cited.—Intermediate Point Rule between Points in Ill., Ind., & Mich., 315 I.C.C. 31.

For reasons stated in 314 ICC 477, respondent's unnamed-point rules, which provide for rates to or from points within a 25-mile radius of points named in the tariff, are unreasonable to extent they provide for a radius exceeding 15 miles from the named points. Also, as approved in that case, shortest highway distances rather than air-line distances should be used in determining mileage limits.—Basis for Rates to and from Unnamed Points in Tariffs, 316 I.C.C. 84 (85-6); in absence of a more specific method of naming the center of named points, as a basis for determining distances, the post office of same name as the named point, or in absence thereof of the business district, may be used where it is necessary to provide rates from or to small towns and open areas.—Id., p. 86.

Unnamed- or nearest-point rules should not be used by irregular-route carriers as a substitute for publication of specific point-to-point rates; specific rates should be published from or to major points in the area in which the rates are intended to apply, such points to include as a minimum all carriers' authorized points listed in tariff publishing agents' mileage guides.—Id., p. 86; and to ensure that unnamed- or nearest-point rules conform with the views expressed and are restricted to the

limited purpose intended, they may be published only in tariffs naming the rates in connection with which they are to apply, and only with special permission to depart from Rule 4(a) of Tariff Circular MF-3.—Id., p. 86.

Intermediate-point rule maintained by respondent is not authorized by Tariff Circular MF-3 and should be canceled; respondent may provide in lieu thereof an unnamed-point rule for determining rates over irregular routes as authorized in 314 ICC 477; establishment of a specific rate between particular points would not be inconsistent with such a rule.—Iron or Steel Articles from Portage, Ind., to Chicago, 316 I.C.C. 255 (257-8).

Since authority granted respondent to continue formerly exempt transportation is over irregular routes, in publishing rates therefor it may not maintain intermediate-point rules. See 314 ICC 477.—Bananas, Mobile & New Orleans to Idaho, Mont., Oreg., 318 I.C.C. 140 (141).

66. Special services.—[Vols. 10, 11, 14, 17].—Defendants' furnishing of helper service for loading and unloading of t.l. shipments moving between points in middle Atlantic territory and described Pittsburgh-Wheeling area, without tariff authority or charge, found unlawful in violation of §217. Reasonable rule and flat charge to be published for such service, prescribed.—Middle Atlantic Conference v. A.A.A. Trucking Corp., 321 I.C.C. 406*.

Although applicant's unloading of shipments of construction materials from rail cars, furnishing of special pallets, and storage of shipments prior to delivery, without compensation in addition to the line-haul charge, are not unlawful provided those services are extended without discrimination and the transportation charges are reasonable for the entire service performed, §217 requires that common carriers publish not only their rates and charges, but also any service extended in connection with the underlying transportation service. While applicant's failure to do so does not appear to be an intentional disregard of the obligations of a regulated carrier, it is admonished immediately to bring its tariffs into compliance with §217 and the commission's pertinent tariff circular rules.—Paul Marckesano & Sons Co., Inc., Extension, 86 M.C.C. 727 (731-2).

Applicant should give special consideration to its practice of providing storage without extra charge; while it is not unusual for carriers to provide storage when preliminary to delivery and incidental to the transportation service, storage for longer periods should be provided only at fully compensatory charges which are published in carrier's tariffs.—Id., p. 732.

72. Icing; refrigeration.—[Vol. 13].—Since respondent would perform refrigeration and protective services in transporting bananas, it must make tariff provision therefor in accordance with tariff circular MF-No. 3.—Bananas, Mobilé & New Orleans to Idaho, Mont., Oreg., 318 I.C.C. 140 (141).

Regulations of the Commission

27 FR 5142, June 1, 1962, Part 187: Freight Rate Tariffs, Schedules, and Classifications, §187.90 Suspension supplements, revised, effective on date of order.

29 FR 5006, April 10, 1964, Part 187: Freight Rate Tariffs, Schedules, and Classifications, §187.90 Suspension supplements, paragraph (f) revised, effective on date of order.

29 FR 15292, Nov. 14, 1964, Part 187: Freight Tariffs, Schedules and Classifications, §187.201 Released rates on household goods, amended to read as set forth, effective Feb. 1, 1965.

30 FR 8335, June 30, 1965, Part 187: Tariffs of motor common carriers; emergency transportation of property, Special Permission No. M-60160, §187.100 revised, effective July 1, 1965.

30 FR 13576, Oct. 26, 1965, Part 187: Freight Rate Tariffs, Schedules, and Classifications, §187.5, Form and Content of Schedules, effective Dec. 28, 1965.

31 FR 8919, June 28, 1966, Part 187: Freight Rate Tariffs, Schedules, and Classifications, §187.201 Released rates on household goods, amended to read as set forth; and released rates order nos. MC-2-B, MC-309, MC-330, MC-362, and MC-429, rescinded; effective on date of order.

31 FR 10469, Aug. 4, 1966, Part 187: Freight Rate Tariffs, Schedules, and Classification, §187.201 Released rates on household goods, paragraph (a) (31 FR 8919), amended as set forth, effective Sep. 30, 1966.

31 FR 12719, Sept. 29, 1966, Part 187: Freight Rate Tariffs, Schedules, and Classifications, §187.90 Supension supplements, paragraphs (a) thru (f) revised, effective on date of order.

NOTE: For recodification, see 49 CFR, Editorial Note, 32 FR 5606, April 5, 1967.

32 FR 8893, June 22, 1967, Part 287 [formerly Part 187]: Freight Rate Tariffs, Schedules, and Classifications, §287.100 Motor common carriers of property; establishment of rates, etc., covering emergency movements of property, revised, effective on date of order.

NOTE: For Republication and Redesignations of Regulations, see 32 FR 20003, Dec. 20, 1967.

32 FR 20654, Dec. 21, 1967, Part 1306 [former Part 286, formerly Part 186]: Passenger and Express Tariffs and Schedules of Motor Carriers, §1306.50 Released rates; express service, paragraphs (a) and (c) amended, effective on date of order.

Section 217. (b) [§*317(b) U.S.C.*] Deviation from rates and regulations enumerated in tariff forbidden; undue preferences.—[Unchanged. See vol. 10, p. 8224, vol. 11, p. 9561.]

Notes of Decisions

Volume 10—p. 8224; Volume 11—p. 9561; Volume 12—p. 10464; Volume 13—p. 1113; Volume 14—p. 11636; Volume 15—p. 12245; Volume 16—p. 12909; Volume 17—p. 13616; Volume 18—p. 14626; Volume 19—p. 15901.

5. Effect of tariff in force.—[Vols. 16-18].—The court is bound to apply a tariff as it is published; it is to be treated as though it were a statute binding both carrier and shipper to the rates, charges, rules, and regulations published therein; and no concessions contrary thereto may be made. No oral contracts or agreements may supersede or vary the tariff, and deviation from lawful rates and charges published therein is not permitted.—Miller v. Ideal Cement Co., 214 F. Supp. 717 (720).

When motor carrier's tariff named specific commodity rates, minimum 20,000 pounds, on steel wire from origin to destinations of defendant's shipments of wire, the lower court erred in holding that a lower 30,000-pound rate published therein from that origin to a more distant destination applied on the shipments (each of more than 30,000 pounds) under intermediate-points rule in the tariff. The intermediate rule is unambiguous, and can be applied only in absence of a specific commodity rate between given origin and destination points; and the tariff clearly contemplates application of the 20,000-pound rates to all shipments in excess of that minimum. Thus, no construction of the tariff was necessary, and it was error to apply the intermediate-points rule thereto. Furthermore, since reasonableness of a published motor carrier rate may not be in issue in a suit by or against a shipper, there was no authority to look beyond the tariff to determine whether plaintiff's charges were or were not reasonable.—Steffke Freight Co. v. Northwestern Steel and Wire Co., 329 F. 2d 308 (309-10).

A tariff may not be interpreted so as to extend its application beyond the statutory power of the governmental authority. Thus, since the States have exclusive jurisdiction over motor carriage in intrastate commerce, filing with the commission of a tariff containing a stopoff rule would not make those provisions applicable on intrastate shipments, even when commingled on one bill of lading with interstate shipments tendered at same time by same shipper as part of a single volume; nor may rates restricted to intrastate commerce be used for application on interstate shipments.—Central States Motor Freight Bureau, Inc., Petition, 319 I.C.C. 745 (749, 751)*.

Principles Governing Tariff Interpretation

10. In general.—[Vols. 13, 15-19].—Part I, §6(7), n. 10.—The court has primary jurisdiction to construe carrier's tariff when the question is "solely of law" but, on the other hand, primary jurisdiction lies in the commission where issue of tariff construction involves factors "the adequate appreciation of which" presupposes an "acquaintance with many intricate facts of transportation." Since language of tariff item in issue is ambiguous, and the litigants both urge readings as though a comma were inserted but disagree on where it should be placed, the court is without guidance in deciding between the alternative read-

ings without disclosure of factors underlying the tariff; record is not clear that factors underlying difference in rates charged and those claimed applicable were brought to lower court's attention. With exposition of the possible factors, the court will be in a position to say whether they involve specialized knowledge which only the commission possesses; judgment vacated and case remanded for further proceedings not inconsistent with the court's opinion.—Montgomery Ward & Co. v. Roy Stone Transfer Corp., 329 F. 2d 172 (174)*.

Were the problem of whether released-value classification ratings or exceptions ratings applied on considered shipments before the court as a strict matter of tariff construction by way of contract analysis, it would have to be referred to the commission for primary-jurisdiction determination of the transportation policies inescapably mixed up in the operative effect of classifications, exceptions, released and unreleased shipments, unless it could be decided by the court on principle that tariff ambiguities must be resolved in shipper's favor. However, there is still some room for court construction of tariffs without referral to the commission, and referral is unnecessary where the commission has already construed tariffs resembling the particular one at issue and has clarified underlying factors. If the policy reflected by the commission decisions is reasonably sound, then uniformity of application so essential in a regulated transportation industry makes it important that courts give it their imprimatur.—Strickland Transp. Co. v. United States, 334 F. 2d 172 (176-7, 178).

While tariffs must be applied as published, regardless of intention of the parties and irrespective of equities existing between carriers and shippers, since inadvertent omission of note in question did not ipso facto change the meaning of household goods tariff but, at most, created an ambiguity or uncertainty, traditional rules of construction of written documents are controlling in arriving at proper application of the tariffs; thus, intention of the framers and other considerations become relevant.—National Van Lines, Inc. v. United States, 355 F. 2d 326 (331-2)*.

A tariff should be interpreted to avoid unjust, absurd, or improbable results; if it is subject to different constructions, an interpretation which is reasonable and consistent with purposes of the tariff should be preferred to one which is impractical or which leads to absurd consequences. Also, a tariff should receive a construction which produces charges that are legal, in preference to one which produces illegal rates.—Id., pp. 332-3.

Furthermore, in accordance with the rule that in interpreting contracts the courts will give weight to what the parties themselves have done pursuant to their agreements, the practical application of tariffs by interested persons should be considered in determining the meaning of a tariff. Construction of household goods tariff in issue (which is found to be ambiguous) urged by carriers who allegedly collected overcharges in excess of the tariff rates presents a reasonable alternative to the commission's interpretation, accords with intention of the drafters, and would avoid possible violations of law; such a construction is to be preferred.—Id., pp. 332-3.

Since an article must be classified under a general description if it does not fall within a specific one and, admittedly, general classification descriptions apply to plaintiff's steel switch boxes, assailed higher rates were properly charged unless the shipments can be brought within specific description in item applicable to "14 gauge steel or thicker" switch boxes. Under Manufacturers Standard Gauge, the standard exclusively used and accepted in steel industries, plaintiff's .0710-inches thick steel is considered 14 gauge; and, while U.S. Standard Gauge (Revised) referred to in classification rule describes 14-gauge steel as of nominal thickness of .0749 inches, record does not support conclusion that "nominal thickness" must inflexibly mean "minimum thickness"; nominal thickness, being a measure of approximate thickness, should be interpreted to include generally accepted range of 14 gauge steel, which indisputably includes that used by plaintiff. The commission's finding that plaintiff's steel is not 14 gauge within the more specific description is not supported in the record; remanded for rehearing.—Roach Appleton Mfg. Co. v. United States, 265 F.

Supp. 568 (570, 574-6, 577)*.

The interpretation of a freight tariff presents ordinarily a question of law which does not differ in character from that presented when the construction of any other document is in dispute.—Strickland Transp. Co. v. Ling-Temco-Vought, Inc., 223 F. Supp. 253 (255-6).

The minimum weight is an integral part of the rate; though the record fails to show weight of any of considered shipments, no exception was taken to joint board's statement that shipments appear to have been under 2,000 pounds; therefore, in considering whether existence of volume commodity rates to involved destination precluded application of claimed l.t.l. rate under intermediate rule, shipments are assumed to have each weighed less than 2,000 pounds.—Bemis Bro. Bag Co. v. Felten Truck Line, Inc., 316 I.C.C. 417 (419, 420).

12. Ambiguities construed against maker.—[Vols. 15-18].—Where there is an ambiguity in the tariff and it is not made clear under which rating the article shipped comes, the ambiguity must be resolved in favor of the shipper and the lower rate awarded to him.—Strickland Transp. Co. v. United States, 334 F. 2d 172 (176).

Although any doubt about the meaning of tariffs is generally resolved against the carriers, as a corollary to the rule that written instruments will be construed strictly against their drafters, such rule should not be followed when it is outweighed by other equally settled and applicable rules of construction. Strict construction of tariffs against carriers who drafted them is not justified when such construction ignores a permissible, reasonable one which conforms to intent of the framers, avoids possible violations of law, and accords with the practical application of the tariff given by shippers and carriers alike.—National Van Lines, Inc. v. United States, 355 F. 2d 326 (333)*.

It is a general principle of tariff construction that any ambiguities in a tariff or classification are to be construed in favor of the shipper and against the carrier. That principle is applicable, though not conclusive in instant circumstances, since definition of "14 gauge" as used in classification description of switch boxes, "14 gauge steel or thicker," has been put into dispute, and since members of the steel industry consider steel having the thickness of that used by plaintiff to be 14 gauge.—Roach Appleton Mfg. Co. v. United States, 265 F. Supp. 568 (574)*.

15. Construction not to be strained or unnatural.—[Vols. 15, 16, 18].—In interpreting a tariff, terms used must be taken in sense in which they are generally understood and accepted commercially, and viewed in context of particular transportation operations. Dictionary definitions are not necessarily controlling, and neither carriers nor shippers can be permitted to urge a strained or unnatural construction.—Pickup and Loading Service—West Tennessee Motor Exp., 322 I.C.C. 162 (165).

16. Entire tariff to be considered.—[Vols. 10, 12, 14-16, 19].—All pertinent parts and provisions of a tariff must be considered together and given their reasonable effect; supplements are additions to or alterations of the tariff as originally published, are ingrafted upon it, and are to be read as a part of it. Thus, item in basic tariff providing for addition to the mileage or distance rates therein of a 10-cent per-mile charge for operation in mountain territory must be read with, and applies to, item in supplement to the tariff publishing applicable distance rates on defendant's shipments which moved over mountain-territory routes.—Miller v. Ideal Cement Co., 214 F. Supp. 717 (719-20).

17. Classification and exceptions.—[Vols. 10-19].—Commission decisions that an exceptions rating on articles shipped without release of value supersedes only unreleased classification ratings on same articles are based on sound reasoning that (1) by excluding ratings for released shipments from operation of the exceptions rating carrier declares that only unreleased shipments may move thereunder, (2) this necessarily supersedes that part of the classification calling for unreleased shipment, and (3) the exception, having no purpose to permit released shipments, could not reasonably be intended to supersede the released classification ratings, so that shipper may have benefit of the lower rate by making a released shipment. In holding that released-value ratings in national

motor classification applied on Government shipments of aircraft engines rather than higher exceptions ratings on engines shipped at full, unreleased value, and that the Government on post-audit properly deducted resulting overcharges, the trial court correctly applied that construction.—Strickland Transp. Co. v. United States, 334 F. 2d 172 (178-9).

25. Reasonable doubts resolved in favor of shipper.—[Vols. 10, 12, 15-19] Part I, §6(7), n. 13.—Doubts as to meaning of an ambiguous tariff provision must be resolved in favor of shipper. Viewed in light of considered shipper's facilities and loading problems, "directly accessible" and "immediately adjacent" to the truck, in rule governing placing of freight for free carrier loading, are susceptible of different meanings. Under a reasonable and practicable construction, those phrases do not require spotting of freight at tailgate of vehicle, but embrace shipments placed on shipper's dock; and, since the traffic involved is of some value and is subject to pilferage and to damage by rain, the general practice of placing shipments on the plant shipping room is reasonable. For years it has been carriers' practice, without charge and without objection, to pick up freight from the shipping room, from docks located as close as practicable to the loading dock, and from points close to door of shipper's warehouse; those locations are "directly accessible" and "immediately adjacent" within meaning of the tariff; but shipments placed in finished storage room located some distance from the loading dock are subject to the tariff loading charge.—Pickup and Loading Service—West Tennessee Motor Exp., 322 I.C.C. 162 (165-6).

Observance of Published Tariffs

30. Rates applicable to articles as commercially described.—[Vols. 12, 14-18].—The commission has frequently found that the description of a commodity for sales purposes fixes its identity for transportation purposes. [Citing 262 ICC 410.] Where an article is expressly designed for a single purpose, such as the aluminum aircraft skins shipped, a tariff description of that article couched in terms of such single purpose or use is an apt and appropriate description of the article itself. Classification ratings on aircraft skins, rather than those on aluminum blanks, stampings, or unfinished shapes, found proper for application on considered shipments.—Strickland Transp. Co. v. Ling-Temco-Vought, Inc., 223 F. Supp. 253 (254, 256).

Tariff terms must be taken in the sense in which they are generally understood and accepted commercially. While an automobile drive shaft has sometimes been referred to as including universal joints (which are not permanently attached to it), the automotive industry generally regards drive shafts and universal joints as separate and distinct articles, and complainant admits that what it refers to as a drive shaft is in reality a combination of articles. Since universal joints are separately described, classified, advertised, and sold, complainant's drive shaft assembly is part of the driving gear apparatus, and ratings on driving gear parts applied on considered shipments.—Ford Motor Co. v. Adley Exp. Co., 322 I.C.C. 156 (160).

33. Commodity description; analogous articles.—[Vols. 13, 14, 16-19].—Part I, §6(7), n. 49.—A proper test of applicability of a rate is whether the article may be reasonably identified by the tariff description. Hinge assemblies for automobile hoods, while more than a simple hinge, are sold as a hinge, are so identified in automobile parts catalog, and were so described on bills of lading; while hinges shipped were for use as automobile parts, that type hinge is also used for other purposes; is therefore embraced in both descriptions "Automobile Parts" and "Hardware, Hinges, or Butts." Specific description "Hinges" found applicable.—Petition of Rock Island M.T. Co. for Declaratory Order, 315 I.C.C. 482 (483-4).

Since the nature and character of article shipped, at time tendered, determines its status for rate purposes, complainant had burden to show kind of fresh meat shipped and whether carcass or part carcass within meaning of these terms as used in commodity tariff description governing rate sought. Neither that tariff nor defendants' testimony defines those terms as used therein, and complainant failed to establish that the meat shipped was within the claimed description;

rates charged are thus not shown to have been inapplicable.—Agar Packing & Provision Corp. v. Blue Arrow Transport, 316 I.C.C. 411 (413-4).

But when tariff naming rates to another destination defined carcass or part carcass meats as hung meats or whole, half, and/or quarter carcasses, and meat shipped was not suspended in trailer and did not consist of large pieces, rate applicable for purpose of applying mixing rules was that named on meats other than in carcasses or part carcasses.—Id., p. 415.

Tariff naming distance rate per animal on racehorses provided that lead ponies transported in same vehicle with livestock other than ordinary would be charged for at half the rate on the latter. Since complainant's testimony that a pony and 3 colts in same shipment with 5 racehorses complied with the tariff definition of "lead ponies" is not challenged or refuted, charging of the same rate on those animals as on the racehorses resulted in overcharges.—Newell v. Lux Art Vans Service, Inc., 318 I.C.C. 492 (495-6).

Ratings on driving gear parts applied on past shipments of automobile drive shafts with universal joints attached to the welded yoke at one end and to the slip yoke at the other, both before and after establishment of amended description "axel shafts or drive shafts" subject to lower t.l. and l.t.l. ratings. When latter item was amended the classification board was not informed that it contemplated drive shafts with universal joints and a slip yoke attached, and complainant admits that the completed assembly shipped is a combination of articles.—Ford Motor Co. v. Adley's exp. Co., 322 I.C.C. 156 (158, 159); although complainant contends that, since the drive shaft will not function without the universal joints, it is illogical to conclude that a classification item would be published having no application to preponderance of its shipments, it is not established that the automotive industry as a whole ships completed drive shaft assemblies to the same extent as complainant. Item currently applicable rates drive shafts with universal joints higher than those without, and the industry generally regards them as distinct articles. Since the present ratings are the same as those formerly applied, no unlawfulness is shown.—Id., pp. 159-60.

34. Use to which article is put.—[Vols. 13-19].—Part I, §6(7), n. 51.—While the commission has held that it is not permissible to make different ratings on an article based wholly on different uses to which it may be put, and also that the use to which an article is put is not determinative of the applicable rate thereon, it is equally well settled that the use may be considered in determining the nature of the commodity. [Citing 196 ICC 459.] The nature and character of a shipment when tendered for transportation determines its status for rate purposes and, necessarily, the predominant use or value is the use or value which determine the character of the shipment.—Strickland Transp. Co. v. Ling-Temco-Vought, Inc., 223 F. Supp. 253 (256).

Fact that an article has limited utility is important in determining its nature from a transportation standpoint.—Petition of Rock Island M.T. Co. for Declaratory Order, 315 I.C.C. 482 (483).

35. Whether specific designation supersedes general description.—[Vols. 14, 16, 17].—Part I, §6(7), n. 46.—Where two possible ratings are suggested to be applied on a commodity, the more specific, i.e., the one which more precisely describes and better fits the shipment in question, is the controlling rating. Proper ratings on aluminum commodity shipped is that provided in the classification on "Aircraft or Parts Named: Aircraft skins (outer covering), metal, in boxes or crates: In flat shapes" because it more precisely describes and better fits the shipments than does the rating on "Aluminum: Blanks, stampings, or unfinished shapes, NOI."—Strickland Transp. Co. v. Ling-Temco-Vought, Inc., 223 F. Supp. 253 (254-5, 256); and tariff item which specifically mentions hinges is a more specific description of automobile-hood hinges shipped than general description of iron or steel automobile parts in another item.—Petition of Rock Island M.T. Co. for Declaratory Order, 315 I.C.C. 482 (484).

A specific description in a classification takes precedence over a broad generic description provided that the commodity is actually embraced within the terms of the more specific item.—Ford Motor Co. v. Adley Exp. Co., 322 I.C.C. 156 (159).

See also Roach Appleton Mfg. Co. v. United States, n. 10, above.

40 Departure from tariff rates unlawful.—[Vols. 10-12, 14, 15, 18, 19].—Part I, §6(7), n. 215.—Since route over which defendant's shipments moved was in mountain territory, and the applicable rate was designated a distance commodity rate, item in the tariff providing for addition to mileage or distance rates therein of a 10-cent per-mile charge for operation in mountain territory must apply to the rate item and must be respected; carrier is bound to collect the additional 10 cents, regardless of any negotiations, misunderstandings, misrepresentations, or misquotations by or between the carrier and shipper or their agents. Responsibility for and amount of the charge are fixed by the tariff, not by the parties nor the court; and the statute prohibits carrier from deviating from the published tariff rate.—Miller v. Ideal Cement Co., 214F. Supp. 717 (720-1).

The law peremptorily fixes as charges to be exacted for the carriage of freight those specified in the applicable tariff, no more and no less. Thus, no receiver of freight may free goods of the carrier's lien unless he discharges not what may appear to be, or be asserted to be, but what actually is the amount due thereon, which amount such receiver and the carrier are conclusively presumed to know. When charges on considered shipments of aluminum aircraft skins are calculated under applicable classification item and ratings provided therein, there is a freight charge deficit for which defendant is legally liable to plaintiff; plaintiff is entitled to judgment in amount of that deficit with interest.—Strickland Transp. Co. v. Ling-Temco-Vought, Inc., 223 F. Supp. 253 (255, 256).

The statute imposes on a carrier an absolute duty to collect charges in accordance with published tariffs; and an inadvertent mistake provides no excuse for deviation from such tariffs. However, latter rule is held to be inapplicable in situation where inadvertent omission of note at the end of Sec. III of considered tariff publishing increased rates on household goods for distances up to 500 miles within, from, and to a described eastern territory (which note in former tariff referred to Sec. II therein for rates to be applied for distances of over 500 miles) did not ipso facto change the meaning of the tariff but, at most, created an ambiguity or uncertainty; under such circumstances, traditional rules of construction of written instruments are controlling in determining proper application of the tariff. Thus, intention of the tariff framers and other considerations become relevant.—National Van Lines, Inc. v. United States, 355 F. 2d 326(331-2)*.

The commission, in deciding that a literal interpretation of the new tariff resulted in only one possible construction, and that charges collected during period when the note was inadvertently omitted from Sec. III thereof were in excess of published rates and were not made in conformity with proper tariff interpretation, erroneously interpreted the tariff in question. While any ambiguity in tariffs is generally resolved against the carriers, a strict construction of tariffs against carriers is not justified when such construction ignores a permissible, reasonable one which conforms to intent of the framers, accords with the practical application given the tariff by shippers and carriers, and which would avoid possible violations of law. The district court erred in upholding the commission's decision; reversed.—Id., pp. 328-31, 333.

Though the commission has no authority under Part II to award reparation, a carrier subject to the act is not at liberty to charge or receive greater or less compensation than that specified in its tariffs, unless authorized to do so by competent authority; where rates charged are found inapplicable, it at once becomes the duty of the carrier to refund any overcharges and of the shipper to pay any undercharges, without an order or other action by the commission, and without resort to a court; and §222 provides penalties for failure to observe the provisions of filed tariffs.—Koss v. A. A. Lexington Moving & Storage Co., 315 I.C.C. 355 (355-6).

Just prior to date of considered shipment of household goods, defendant had canceled its participation in tariff shown on bill of lading as authority for rate charged, but participated at time of movement in tariff naming a lower rate for distance between points involved; defendant offered no explanation or authority for departure from latter rate, which is found

applicable.—Id., pp. 357, 358.

Since shipments transported terminal-to-terminal by respondent motor carrier for respondent forwarder constitute "truckload lots" within meaning of the second proviso of §409(a) and are transported for a distance exceeding 450 miles, the motor carrier's charging and the forwarder's paying of contract rates lower than the motor carrier's applicable tariff rates violates §§217(b) and 409(a).—Milne Truck Line, Inc.,—Investigation—Tariff Rates, 325 I.C.C. 128 (135).

See also Campbell "66" Express, Inc. v. United States, Gov't. traffic §66, n. 1.

48. Strict compliance with tariff rules.—[Vols. 10, 11, 14-18].—Rates for exclusive use of a vehicle apply only when provisions of governing tariff rule are complied with. However, tariff rule expressly providing language to be endorsed on bill of lading, in requesting exclusive use of carrier's vehicle, was not intended to exclude all other language adequate to make the same request; it was not intended that form rather than substance would govern. Defendant's certificate on bill of lading that exclusive vehicle service was furnished, which reasonably apprises carrier that shipper is requesting exclusive use of its vehicle, is sufficient compliance with tariff requirement for making exclusive-use rates applicable.—Campbell "66" Express, Inc., v. United States, 302 F. 2d 270 (272).

Charges for extra labor in loading shipment of household goods were inapplicable when applicable rate included loading except under circumstances specified in tariff; driver and his helper could have performed all the loading, facilities for loading are not shown to have been inadequate, and mere fact that loading may be more difficult at one place than another does not warrant extra labor charges; if more than two men are required to load shipment within a desired time, for no reason for which extra charges are specifically authorized in the tariff, cost of the labor is borne by carrier.—Koss v. A. A. Lexington Moving & Storage Co., 315 I.C.C. 355 (357, 358).

Household-goods carrier's practice of applying its published divided-shipment rule only upon request of a shipper is unlawful, since tariffs have the force of law and must be uniformly applied.—John F. Ivory Storage Co., Inc. v. Atlas Van Lines, Inc., 316 I.C.C. 224 (226)*.

Where commodity tariff contains no specific mixing provision for mixed truckloads of meats and other packing house products, specific mixing rule in ratings section of classification governs rather than general mixing rule in exceptions tariff, which is an exception to the general rule in the classification. That special rule, which is itself an exception to the general mixing rule, provides that articles specified thereby (including those involved) shall be charged their respective volume rates, without restriction as to whether they are class or commodity rates, subject to a minimum charge at the volume rate on fresh meat, NOI, for 21,000 pounds. Considered shipment was overcharged to extent that charges assessed exceeded those computed on such minimum basis.—Agar Packing & Provision Corp. v. Blue Arrow Transport, 316 I.C.C. 411 (412, 415-6).

When tariff naming rates per mile per animal on racehorses and lead ponies provided that distances used would be those published in Household Goods Carriers mileage guide, which named a distance of 1,421 miles between origin and destination of considered shipment, computation of charges for a greater distance on a speedometer-mile basis resulted in overcharges.—Newell v. Lux Art Vans Service, Inc., 318 I.C.C. 492 (495).

50. Concessions and rebates.—[Vols. 10, 14, 15].—While proposed rule for settlement of household goods claims, under which carrier, moving goods of shipper's employees at released rates, undertakes to arrange for repair of damaged articles or make settlement with shipper for those lost or damaged beyond repair, subject to reimbursement by shipper for any amount in excess of carrier's liability, may have theoretical possibilities of rebating in authorizing carrier to assume an obligation beyond its bill-of-lading liability, or of discrimination between shippers in that it depends on extension of credit to employers, no real danger of such unlawfulness is apparent. Rule approved, without prejudice to a different conclusion if warranted by results in actual practice.—Claim Settlement on Household Goods—U.S.A., 318 I.C.C. 359 (362).

Defendant's practice of granting free intrastate transportation of cash letters for certain Wisconsin banks coincidental with interstate transportation thereof at published rates violates the rebating provisions of §217(b). Cease-and-desist order entered.—Armored Carrier Corp. v. B.D.C. Corp., 92 M.C.C. 665 (667).

80. Intermediate provisions.—[Vols. 12, 13, 16-19].—Part I §6(7), n. 109 et seq.—Intermediate-points rule in plaintiff's tariff is unambiguous; it can be applied only in absence of specific commodity rates named in that tariff between given origin and destination points. Thus, when tariff named specific commodity rates, minimum 20,000 pounds, on wire from origin to destinations of defendant's shipments (each of which weighed more than 30,000 pounds), and clearly contemplated application of those rates to all shipments in excess of that minimum, lower court erred in applying the intermediate rule; thus, trial court's conclusion that lower 30,000-pound rate published in the tariff from considered origin to a more distant destination applied on the shipments under the intermediate rule was erroneous.—Steffke Freight Co. v. Northwestern Steel and Wire Co., 329 F. 2d 308 (309).

When open-routed tariffs contain an intermediate rule, any of participating carriers' authorized routes may be used to determine the applicable rate, provided they are not unduly circuitous or unnatural. Whether a claimed route is unduly circuitous or unnatural depends on the facts of each case; and while absence of traffic movement over a claimed route is a fact to be considered, it is not conclusive.—Bemis Bro. Bag Co. v. Felten Truck Line, Inc., 316 I.C.C. 417 (419).

Although claimed route from Kansas City to Wichita through Salina, Abilene, and Junction City is 35 percent circuitous and defendants have moved no traffic thereover, it involves no backhaul or unusual operating conditions and is thus not illogical or unnatural. Unrestricted commodity l.t.l. rate to Wichita therefore applied on considered shipments of less than 2,000 pounds to Salina, Abilene, and Junction City under intermediate rule; such application was not barred by existence of volume commodity rates on minima of 20,000 pounds or more to Salina, as the commodity rate referred to in the rule is necessarily one which could apply to the shipments concerned.—Id., pp. 419-20.

Intermediate rule in a tariff establishes the commodity rate published from a named point from an unnamed intermediate point just as positively and legally as if it was specifically named therefrom.—Iron or Steel Articles from Portage, Ind., to Chicago, 316 I.C.C. 255 (256).

175. Undercharges.—[Vols. 13, 14, 17].—Carrier's failure to make additional 10-cent per-mile charge on considered shipments, in accordance with tariff publishing such charge for operation in mountain territory, in connection with distance or mileage rates, resulted in undercharges. Since, admittedly, distance commodity rate was applicable and entire route of movement was in mountain territory, plaintiff was bound to charge and defendant is obligated to pay not only the mileage rate but also the additional 10-cent charge; plaintiff is entitled to recover undercharge for each trip, plus interest at 6 percent from respective dates on which the undercharges arose.—Miller v. Ideal Cement Co., 214 F. Supp. 717 (721).

See also Louisiana & A. Ry. Co. v. Export Drum Co., §8, n. 194.

222. Carrier's duty to collect tariff charges.—[Vols. 14-17].—Plaintiff motor carrier has not only the right but the duty to collect proper charges for transportation services performed. While consignee, who assumed responsibility for payment of charges in issue, is entitled to recover for damage to its goods due to carrier's negligence or misconduct, existence of such damage claim, even though valid, is no defense to plaintiff's claim for transportation charges.—Akers Motor Lines, Inc. v. Lady Cornell Comb Co., 203 F. Supp. 156 (157).

See also Miller v. Ideal Cement Co., n. 40, above.

238. Tariff minimum weights.—[Vols. 17, 18].—See Steffke Freight Co. v. Northwestern Steel and Wire Co., n. 5, above.

Section 217. (c), (d). [*§317(c), (d) U.S.C.*].—[Unchanged. See vol. 10, p. 8227-8.]

Notes of Decisions

§217(d): Volume 10-p. 8228; Volume 11—p. 9562; Volume 12—p. 10466; Volume 15—p. 12248; Volume 16—p. 12913.

§217 (d). 10. Engaging in transportation without filing tariffs.—[Vols. 10-12, 15, 16].—Since it appears that at time considered shipment of racehorses moved over their lines defendants had no rate in effect thereon either jointly or individually, they are admonished that motor common carriers performing transportation without having rates therefor lawfully on file, in violation of §217(d), are amenable to criminal or civil proceedings under §222.—Newel v. Lux Art Vans Service, Inc., 318 I.C.C. 492 (494).

Section 218. [*§318(a) U.S.C.*] **Schedules of contract carriers by motor vehicle—(a) Establishment, filing, and publication of schedules and rules affecting rates; notice of and hearing on proposed changes; undue preferences.** [Unchanged. See vol. 18, p. 14631.]

Notes of Decisions

Volume 10—p. 8230; Volume 11—p. 9564; Volume 12—p. 10466; Volume 13—p. 11115; Volume 14—p. 11639; Volume 15—p. 12248; Volume 16—p. 12914; Volume 17—p. 13621; Volume 18—p. 14633; Volume 19—p. 15904.

2. Construction and interpretation.—[Vols. 17, 18].—Purpose of the statute regulating contract carriers is to prevent destructive competition between contract and common carriers and among the contract carriers themselves; it is not designed to prevent discrimination among shippers, as it is in the case of common carriers. Originally, only minimum rates filed by contract carriers were subject to regulation but, under 1957 amendment to the act, contract carriers are required to file their actual charges as well as minimum rates; as a result thereof, common carriers are given a right of knowledge and surveillance of actual competition from contract carriers. Policies underlying regulation of common and contract carriers are not exactly the same, and that fact must be considered in relation to the basis for recovery of undercharges; however, that policy difference does not justify disregard of the general policy, which pervades regulation of contract as well as common carriers, that the rate filed must be observed. Lower court's holding that contract carrier's collection of alleged undercharges would be contrary to the statute reversed, and case remanded.—Bowser and Campbell v. Knox Glass, Inc., 390 F. 2d 193 (195-7)*.

While application for authority to transport brick (except fire brick) does not contain request for authority to transport sample brick panels to suppliers for matching in color and quality, supporting shippers occasionally require such service and applicant proposes to render it free of charge. Provision of free transportation in that manner, however, would be unlawful under the clear requirement of §218(a) that every contract carrier establish and observe reasonable minimum rates and charges for any service rendered or to be rendered.—James, 96 M.C.C. 272 (273, 275).

25. Schedules; publication; content.—[Vols. 11, 12, 15-19].—Plaintiff contract carrier, in

suit to recover alleged undercharges, was responsible for preparing and filing a correct schedule of charges in accordance with its contract with defendant shipper; and difference in policies underlying regulation of contract and common carriers does not justify disregarding the general policy, which pervades regulation of both, that a rate filed must be observed. Schedule filed by plaintiff was admittedly incomplete because of omission of a stoppage in transit rule, and both shipper and carrier agree that it did not reflect the contract between them; however, the rate filed is a matter of public record of which shipper must take notice at his peril and, as has been held in cases involving common carriers, hardship on shipper resulting from its reliance on the contract is inadequate to alter policy underlying the integrity of plaintiff's filed schedule of charges. The courts cannot in effect validate illegal rates long after the event, especially when carrier's competitors relied on the published charges in the interim. Lower court's decision reversed and case remanded for further proceedings.—Bowser and Campbell v. Knox Glass, Inc., 390 F. 2d 193 (194, 196-7)*.

A carrier may not publish rates on a commodity which it has no authority to transport. Although commodities in issue are chemicals, and respondent may transport them under its authority for "chemicals," proposed rate thereon is unlawful when the commodities are described in its schedules in such a manner as to mislead shipping public as to the extent of its authority. If respondent desires to list supporting shipper's products separately in its chemical list, it should describe them in appropriate terms.—Plastics, Sirup & Washing Compounds, Del. to N.Y. & N.J., 315 I.C.C. 351 (353).

Where mileage blocks in respondent's tariff scales on cement refer to airline rather than highway miles, applicable mileage cannot be determined with any degree of accuracy. Highway distances for rate-making purposes can be affected by many factors, including weight limitations on bridges and highways, overhead clearances, and topography; further, respondent must cross Ohio River to reach considered destinations and the crossings are seldom, if ever, on a direct airline route. Such method of computing distances for determining applicable rates violates §187.5(t) of commission's tariff circular MF No. 4 and §218(a) of the act.—Cement from Kosmosdale, Ky., to Ill., Ind., and Ohio, 318 I.C.C. 497 (498-9).

40. Departure from schedule rates unlawful.—[Vols. 13-15, 16, 17].—Since the statute requires a contract carrier to file with the commission a schedule of its actual charges as well as its minimum rates, and prohibits it from charging or demanding a transportation charge different from that specified in its schedule, plaintiff contract carrier must charge shipper in accordance with its filed schedule of charges. Difference in policies underlying the regulation of contract and common carriers does not justify disregard for the general policy that the rate filed must be observed, a policy which pervades regulation of both forms of carriage and which is enforced by permitting recovery of any undercharges in order to preserve the integrity of published rates. Though the schedule filed was admittedly incomplete because of omission of stoppage-in-transit rule, and plaintiff and defendant shipper agree that it did not reflect the contract between them, rate so filed is a matter of public record of which shipper must take notice at its peril.—Bowser and Campbell v. Knox Glass, Inc., 390 F. 2d 193 (194-6)*.

Accordingly, as has been held in common carrier rate cases, hardship on shipper resulting from its reliance on the contract is inadequate to alter the policy underlying the integrity of plaintiff's filed schedule of charges. Such instances of hardship may not be permitted to destroy the more far-reaching need to maintain respect for lawfully established rates which other shippers and common and contract carriers alike must be able to rely on as realistic facts. The courts cannot in effect validate illegal rates long after the event, especially when in the interim plaintiff's competitors have relied on the published charges. Lower court's judgment, denying plaintiff recovery of alleged undercharges based on its published schedule, reversed; case remanded for further proceedings consistent with the court's opinion.—Id., pp. 196-7.

Regulations of the Commission

30 FR 8335, June 30, 1965, Part 187: Schedules of motor contract carriers; emergency transportation of property, Special Permission No. M-60161, §187.101 revised, effective July 1, 1965.

31 FR 8919, June 28, 1966, Part 187: Freight Rate Tariffs, Schedules, and Classifications, §187.201 Released rates on household goods, amended to read as set forth; and released rates orders nos. MC-2-B, MC-309, MC-330, MC 362, and MC-429, rescinded; effective on date of order.

31 FR 10469, Aug. 4, 1966, Part 187: Freight Rate Tariffs, Schedules, and Classifications §187.201 Released rates on household goods, paragraph (a) (31 FR 8919) amended as set forth, effective Sep. 30, 1966.

31 FR 12719, Sept. 29, 1966, Part 187: Freight Rate Tariffs, Schedules, and Classifications, 187.90 Suspension supplements, paragraphs (a) thru (f) revised, effective on date of order.

NOTE: For recodification, see 49 CFR, Editorial Note, 32 FR 5606, April 5, 1967.

32 FR 8894, June 22, 1967, Part 287 [formerly Part 187]: Freight Rate Tariffs, Schedules, and Classifications, §287.101 Motor contract carriers of property; establishment of actual or minimum rates, etc., covering emergency movements of property, revised, effective on date of order.

Section 218. (b) [§*318(b) U.S.C.*] Complaints and investigations; hearings and orders of commission. [Unchanged. See vol. 11, p. 9565.]

Amendments, see footnotes, pp. 9565-9566.

Historical Note

The commission recommends, in view of the prohibitions in 18 USC §1001, that §218(b) be amended so as to eliminate the mandatory oath provision therein, and that such requirement be made discretionary with the commission.—Annual Report, 1964, p. 72.

Notes of Decisions

Volume 10—p. 8233; Volume 11—p. 9566; Volume 12—p. 10468; Volume 13—p. 11116; Volume 15—p. 12249; Volume 16—p. 12915; Volume 17—p. 13623; Volume 18—p. 14635; Volume 19—p. 15904.

25. What considered in determining reasonableness.—[Vols 10, 13, 15-19].—Respondent's distance scales based on airline mileages on portland cement, minimum 90 barrels, and masonry cement, minimum 122 barrels, or equivalent combinations, from Kosmosdale, Ky., to points in Illinois, Indiana, and Ohio are not compensatory for distances over 100 miles. Revenue on a minimum shipment of portland cement to a point 100 miles from origin, including empty return movement, equals respondent's system average cost, and though heavier loading may increase earnings, compensativeness of rates must be judged by the tariff minima; moreover, computation of charges on airline mileages results in substantial understatements. Other evidence indicates that profit shown by respondent is due to its short-haul traffic which is mostly intrastate. As publication of scales for highway movement on airline mileages also violates §218(a), rates under investigation are ordered canceled.—Cement from Kosmosdale, Ky., to Ill., Ind., and Ohio, 318 I.C.C. 497. (500).

30. Minimum rates and charges.—[Vols. 10-13, 15-19].—Proposed initial rates on salt and products, in bulk and packages, ranging from 54 to 67 cents, minimum 42,000 pounds, from Saltair, Utah, to points in Colorado, Nebraska, and Wyoming are not shown to be unlawful; respondent's cost study of a representative movement, though defective in certain respects, indicates that the truck-mile revenue from the 54-cent rate would cover the total cost of moving the traffic.—Salt from Saltair, Utah, to Colorado, Nebraska & Wyoming, 316 I.C.C. 213 (215, 216).

Section 218. (c) [§*318(c) U.S.C.*] New or reduced charges; hearings and orders of commission; suspension.[Unchanged. See vol. 11, p. 9568.]

Amendments, see footnotes, vol. 10, p. 8236, vol. 11, pp. 9568-9569.

Notes of Decisions

Volume 11—p. 9569; Volume 12—p. 10471; Volume 13—p. 11116; Volume 15—p. 12249; Volume 16—p. 12917; Volume 17—p. 13624; Volume 18—p. 14638; Volume 19—p. 15905.

5. Burden of proof.—[Vols. 12, 13, 16-19].—Contract carriers have no statutory burden under §218 to prove lawfulness of increased rates.—Cement from Hudson, N.Y., to New England and Pa., 319 I.C.C. 235 (238).

6. Initial rates.—[Vols. 18, 19].—Proposed initial distance and point-to-point rates are not shown to be compensatory; protestant's cost data based on public statement No. 4-58 of commission's cost-finding section are more accurate than general averages, without underlying data, supplied by respondent, and show out-of-pocket costs exceeding proposed distance rates by 4 to 33 cents; and respondent's showing of out-of-pocket costs in another proceeding exceeds truck-mile earnings from any of proposed rates. Proposed point-to-point rates are lower than corresponding rates of rail and motor common carriers and are not necessary to meet competition of carrier named; proposed rates would constitute a destructive competitive practice; not approved.—Steel and Metals from or to Points in Conn. and Pa., 315 I.C.C. 308 (309-10).

Proposed rates being initial rates, respondent does not have the burden of proof. As respondent is a small carrier and specializes in handling of two particular groups of commodities, costs indicated by protestant's cost study based on expenses of nine general-commodity common carriers are not necessarily representative of respondent's expenses; protestant's study is unacceptable as indicating costs on considered traffic; proposed rates not shown to be unlawful.—Salt from Saltair, Utah, to Colorado, Nebraska & Wyoming, 316 I.C.C. 213 (214, 216).

Burden of showing unlawfulness of initial rates rests with protestants. Initial rates 350 to 550 cents per net ton on salt, in bulk and in bags, minimum 40,000 pounds, from Omaha to 70 points in Iowa and 6 in Nebraska, and 225 to 900 cents on soybean meal, in bulk and in sacks, from Des Moines, Fort Dodge, and Sioux City, Iowa, to 34 points in Nebraska, though in general considerably lower than corresponding rail rates, are not shown to be unlawful. Cost data submitted by protestants reflect average costs of midwestern contract carriers, not actual costs of respondent's movements; truck-mile earnings fall short of such average truck-mile expense only when computed on round-trip distances with 100-percent empty return, but there is no basis for such assumption when the rates on salt apply in one direction and those on soybean meal in opposite direction. Approved.—Soybean Meal & Salt, Iowa, Nebr., & S. Dak., 318 I.C.C. 94.

Since respondent presently maintains only point-to-point rates on iron and steel articles over irregular routes in considered territory, proposed minimum mileage rates, applicable only in absence of specific point-to-point rates, are initial rates. Proposed scale on 33,000-pound minimum, ranging from 43.5 cents for 141 to 160 miles to 80.5 cents for 476 to 500 miles, patterned after rates maintained by competing iron and steel haulers, is not shown to be unreasonable or otherwise unlawful.—Iron or Steel Articles between Mass. & Middle Atl. States, 322 I.C.C. 133 (134-5, 137)*.

Respondent has satisfied the first test of compensativeness of the proposed rates for service provided with owner-operators when revenues received from actual shipments averaging slightly over 36,000 pounds exceeded corresponding expenses by about 20 percent, and obviously would still exceed respondent's total expenses if computed on the lower minimum proposed. And though existence of representative owner-operator costs is uncertain, since the commission cannot require such

operators to keep uniform accounts, and such costs are but rough approximations, respondent satifies the second test set out in 318 ICC 567 when it has shown that it is able to acquire and retain the services of owner-operators at the agreed division of revenue.—Id., pp. 136-7.

10. Evidence.—[Vols. 11, 12, 15-19].—Proposed rule designating charges and regulations for transportation of pallets or skids used in connection with shipment of corrugated containers is not justified by mere statement that movement under the rule would be so infinitesimal as to have no serious effect on protestant's rates and could result in loss of business to no other carrier. Respondent presented no evidence of distances, earnings, probable expenses, or traffic volume, and did not show rates to be applied on the traffic; it is not clear whether outbound movement of pallets or skids must be related to the inbound movement, nor is there any evidence that proposed movement is within scope of respondent's operating authority; not approved. —Pallets, Points in Ill., Ind., Ky., Mich., and Ohio, 315 I.C.C. 26 (27).

As respondent's cement operations from Lehigh Valley had existed less than a year at time of hearing, in lieu of a cost study it compared them with its affiliate's movements from Hudson Valley area to same destinations, which comparison indicates that costs from both areas are about the same. However, as the affiliate referred to its 1960 annual report in preparing its 5-week study for that year that report may be used to test respondent's rate scale and costs. Restated costs show that respondent's increased rates on cement in bags from Northampton and Nazareth, Pa., to Connecticut and Middle Atlantic States cover total costs by a slight margin, and that its lowest rates on bulk cement also approximate such costs for distances up to about 125 miles. As that distance generally exceeds the average cement haul in that territory, respondent's rates 31 to 355 cents per barrel as a whole cover its full costs and are compensatory. Cement from Hudson, N.Y., to New England and Pa., 319 I.C.C. 235 (244); and comparison with those rates warrants finding that increased cement rates 34 to 204 cents of another contract carrier from Glens Falls, N.Y., to New England and Pennsylvania are likewise compensatory.—Id., p. 249.

Section 219. [§*319 U.S.C.*] Application of section 20 (11) and (12) of this title to common carriers by motor vehicle.—[Unchanged. See vol. 11, p. 9570, vol. 12, p. 10472,]

Amendments, see footnotes, vol. 11, p. 9570.

Notes of Decisions

Volume 10—p. 8237; Volume 11—p. 9570; Volume 13—p. 11117; Volume 14—p. 11640; Volume 15—p. 12250; Volume 16—p. 12917; Volume 17—p. 13624; Volume 18—p. 14640; Volume 19—p. 15907.

15. Bill of lading act; bills, nature and function.—[Vols. 10, 14, 16-19].—Part I, §20(11), notes.—Issuance of one bill of lading covering both interstate and intrastate traffic cannot broaden the commission's jurisdiction: the bill of lading is a receipt for the merchandise and a contract to transport and deliver it; in case of an interstate shipment the contract between shipper and carrier is made up of the bill of lading and the tariffs and other rules and regulations governing interstate commerce, which are to be read into, and become a part of, any contract of shipment authorized by and within scope of the Interstate Commerce Act; but to extent that the bill of lading is a contract for carriage of intrastate commerce it is governed by the laws of the particular State having jurisdiction, and a volume of mixed intrastate and interstate commerce tendered to a motor carrier on one bill of lading does not become wholly interstate in character merely because the intrastate portion is

unloaded under a stop-in-transit rule; the State has exclusive jurisdiction over such intrastate transportation.—Central States Motor Freight Bureau, Inc., Petition, 319 I.C.C. 745 (749, 751)*.

Bills of lading are important instrumentalities of interstate commerce, and freight bills should be similarly regarded; supplying and preparation of such documents are an essential part of the transportation contract, and provision and preparation thereof by shipper constitute the giving of value to the carrier for which shipper may be recompensed either by appropriate reduction in rates, i.e., by provision of a lesser service at a lower charge, or, as proposed, by granting of a just and reasonable allowance. That the initial carrier is responsible for issuing shipping documents does not render the proposal unlawful, since carrier would still bear the ultimate responsibility for so doing.—Combined Bill of Lading-Freight Bill Allowance, 323 I.C.C. 168 (171).

That proposal for provision and preparation by shipper of a 9-part set of documents including a short form bill of lading, a delivery receipt, a consignee memorandum, an original freight bill, and a shipping order increases the minimum number of documents required by the commission's regulations and classification rule 10 does not change their character or significance: they remain instrumentalities of commerce. The obvious advantages accruing to both carriers and shippers from the proposal must be recognized, and, though it may create some problems not presently foreseeable, such possibility does not warrant its condemnation, especially as no problems are shown to have resulted from similar provisions already in effect in middle Atlantic territory.—Id., pp. 169, 171, 173.

See also Thomas Electronics, Inc. v. H. W. Taynton Co., n. 33, below; North American Van Lines, Inc. v. Heller, n. 115, below; and Silver Line, Inc., Investigation and Revocation, case, §204(c), n. 251.

30. Limitation of liability.—[Vols. 10, 11, 13, 14, 16-18].—Inasmuch as §20(11), which specifically applies to motor common carriers, prevents a carrier from limiting its liability except by maintaining rates dependent upon value declared by shipper in writing or agreed on in writing as the released value, paragraph 5 on the back of motor Bill of Lading (which states that carrier excludes liability for goods of extraordinary value) is merely an attempt to limit liability of the carrier in a manner that is prohibited by statute. Thus, unless the carrier either rejects the shipment or completely complies with the statutory requirements, it remains fully liable for the goods carried, regardless of their value.—Thomas Electronics, Inc. v. H. W. Taynton Co., 277 F. Supp. 639 (642-3).

In action for loss of or damage to motor carrier shipment of household goods, resulting from carrier's vehicle catching fire while enroute, carrier was liable for full amount of declared valuation of the entire shipment as shown in the bill of lading. Although the bill of lading contained a formula for determining amount of carrier's liability as to each article in the shipment which limited maximum liability on each article to a proportion of declared value of entire shipment, recovery as to each article whose actual damage was less than the formula maximum liability should not be limited to the actual damage. Shipper declared the value of entire shipment to be $20,000, total value of the articles therein exceeded that amount, all the articles were either destroyed or damaged by the fire, and total amount of damage to all articles exceeded the declared value of the shipment.—Zimmerman v. Allied Van Lines, Inc., 317 F. 2d 72 (73-5).

32. Released rates and ratings, generally.—[Vols. 14, 16-19].—Part I, §20(11), n. 67.Although §20(11), made applicable to motor carriers by §219, provides that carriers shall be liable for full actual loss or damage to property delivered to them, it also provides for limitation of that liability, subject to the commission's authorization, by agreement on a "released" value declared by shipper, to which his recovery for loss or damage is limited. Released-value rates are therefore lower than unreleased rates, and shipper becomes in effect a co-insurer of the shipment.—Strickland Transp. Co. v. United States, 334 F. 2d 172 (175).

In decisions holding that from a transportation standpoint released and unreleased ratings on the same commodity should be considered separate and distinct items, and that

an exceptions rating on shipments made without declaration of released value supersedes only the unreleased classification ratings on the commodity, the commission's action reflects two things, each resting on its administrative judgment in development of a sound transportation policy: first, that a specific commodity shipped with a released valuation is for transportation purposes distinctly different from the same commodity shipped without limitation on value; and second, flowing directly therefrom, that to supersede all classification ratings on the commodity the language of the exception must clearly indicate that it is intended to supersede both the released and the unreleased items. In holding that exceptions ratings on aircraft engines shipped at full, unreleased value did not supersede lower released-value ratings in national motor classification, and that latter provided the applicable charges on considered Government shipments, the trial court applied the correct construction to the tariffs.—Id., pp. 178-9.

Purpose of requirement of the national classification that shipper seeking benefit of released rates shall specify the agreed or declared value of the property on the bill of lading is to inform carrier that the shipment is moving at a lowered valuation; this is important from an operational standpoint and reasonable from standpoint of claims handling. While the Government made no such express declaration respecting considered shipments, there was substantial if not literal compliance with that requirement, since the standard uniform Government bill of lading declares the universal purpose to get the most transportation at the cheapest rate; in absence of affirmative declaration to the contrary, the Government intends thereby to ship at the lowest possible rate, and if that can be accomplished only by a limitation of value, it is the purpose of the Government to declare that released value.—Id., p. 179.

In shipper's action to recover claimed fair market value of household goods destroyed by fire while in transit in motor carrier's van, wherein carrier asserted shipper was limited to recovery of "released value of the property" in accordance with bill of lading and order for services signed by shipper, questions of (1) whether carrier failed to post its tariff for public inspection as required by statute, and (2) whether shipper had not been informed that he could have his goods transported at a higher valuation for an increase in cost, were jury questions.—Chandler v. Aero Mayflower Transit Co., 374 F. 2d 129 (134).

While carrier's statutory liability for loss and damage to property delivered to it may be limited by an agreement upon "released value" of a shipment, such limitation of liability can be effected only in compliance with a commission order authorizing special rates upon shipper's written declaration of value or a released value in writing. There being no challenge to authorization of released rates in issue, the question presented is whether "released value" on plaintiff's shipment was "agreed upon in writing" by shipper as those words are used in the statute. Congress no doubt intended that shipper should agree in the same sense that one agrees or assents to enter into a contractual obligation; thus assent is effective only if given after a fair opportunity to choose between higher or lower liability by paying a correspondingly greater or lesser charge. Contract law should be applied in deciding whether shipper is precluded from attacking validity of agreements shown by bill of lading and order for services signed by him; and questions of fact should be presented to the jury. Remanded to district court for new trial.—Id., pp. 134-7.

Before released rates may be approved, applicants for such relief must show that susceptibility of the traffic to loss or damage is comparatively high, that the wide range in value of the commodity makes amount of any claim difficult to estimate, and that adequate insurance covering is difficult to obtain or unreasonably high in cost. Applicants proposing general rules limiting liability of all class-rate traffic (except ordinary livestock and articles already subject to released rates) to amounts not exceeding maxima specified therein have not sustained that burden either as to the affected traffic as a whole or, individually or by representative evidence, as to any particular commodity or group of commodities to which the rules would apply. Proposed rules are not shown to be just and reasonable and would add considerably to shipper costs,

cause much confusion in compliance, and disrupt established business practices throughout the country; application denied.—Released Rate Rules—National M. Freight Classification, 316 I.C.C. 499 (510, 512-4)*.

The use of released-value rates permits the shipper to have his choice of two rates, the regular rate, holding the carrier to its stated liability in accordance with the terms and conditions of the bill of lading or the lower released value rate with its corresponding reduction of carrier liability; the bills of lading contain a printed notation in accordance with tariff provisions permitting the shipper to specify the declared value of its shipments as condition precedent to the use of the lower released rates; the shipper is charged with such knowledge by virtue of the tariff publication, and carrier's obligation of public notice is fulfilled by publication of such tariff.—Winthrop Laboratories, Div., Sterling Drug v. Dorn's, 325 I.C.C. 654 (656-7).

Liability of Carriers

33. Liability, generally.—[Vols. 17-19].—In its counterclaim for damages to shipment of frozen meat allegedly resulting from carrier's negligence in failing to provide adequate refrigeration, which was asserted in carrier's action to collect freight charges, consignor failed to prove that cause of rejection of the shipment was not present when the frozen meat was delivered to carrier in sealed cartons. Shipper did not meet its burden of proving that the goods were delivered to carrier in good condition; judgment against carrier on the counterclaim reversed.—Harris Truck Lines, Inc. v. Cherry Meat Packers, Inc., 313 F. 2d 864 (866-7). [Not arising hereunder.]

To establish carrier's liability for loss or damage to goods being transported, it is necessary only for claimant to show the carrier's receipt of the shipment in apparent good order and delivery or release thereof by carrier in damaged condition. This being shown, the prima facie case is established; burden is then on carrier to prove that shipment was not received in good order, that it was delivered by it in good condition, or that the damage was caused by an act of God, the public enemy, inherent nature of the goods, or fault of shipper, and that it was free from negligence.—L. E. Whitlock Truck Service, Inc. v. Regal Drilling Co., 333 F. 2d 488 (491).

Motor carrier was liable for damages to oil well drilling contractor's drilling rig which resulted from carrier's trucks accidentally overturning while moving the derrick (by the "two-truck" method) without disassembling it. Carrier specialized in and was experienced in hauling of oil well equipment; it is undisputed that, in transporting the equipment by "two-truck" method, likelihood of an accident is greater than it would have been had the rig been disassembled and transported in two trucks; and lower court found that, since shipper did not direct the "two-truck" movement as carrier alleged, the accident did not result from hazards created by shipper. And record adequately supports award of special damages, including shipper's loss of income from drilling operations as result of damage to the rig. Carrier knew the importance to shipper of delivery of its only rig on time; thus it knew the circumstances on which the special damages are based.—Id., pp. 491-2.

In carrier's suit to recover freight charges, which the United States defended by asserting setoff and counterclaim for damages to the camera shipped which exceeded plaintiff's charges, decision of the Supreme Court, 377 U.S. 134, that once the shipper establishes a prima facie case, the burden of proof shifts to carrier to show both its freedom from negligence and that the loss was due to one of the excepted causes relieving it from liability, is controlling. Thus, shipper having proved a prima facie case, and the carrier having shown that the damage was the result of shipper's defective packaging, the burden is not then on shipper to prove that, notwithstanding defective packaging, the damage was due to carrier's negligence in handling the shipment.—Super Service Motor Freight Co. v. United States, 350 F. 2d 541 (542-3).

A carrier is liable to lawful holder of the bill of lading for loss or damage to goods shipped occurring while shipment is in transit; and once shipper makes out a prima facie case by establishing delivery to the carrier in good condition and arrival at destination in damaged condition, the burden of disproving negligence is upon carrier. Evidence of record

establishes that plaintiff delivered large manufacturing machine to defendant motor carrier in good condition, that it was damaged while in transit, and that defendant failed to carry its burden of proving freedom from negligence.—Continental Can Co. v. Eazor Exp., Inc., 354 F. 2d 222 (223).

In action to recover damages for destruction by fire of household goods while being transported in interstate carrier's truck, local van and storage company held itself out as an interstate carrier in accepting the interstate shipment and issuing its bill of lading therefor (although it had no tariffs on file with the commission) when it did not disclose its agency relationship with defendant interstate carrier. From moment the cartons were loaded onto company's van they were in interstate commerce; and, while the bill of lading limited liability to 30 cents a pound, a carrier which holds itself out as an interstate carrier without having filed tariffs with the commission may not claim benefit of any contractual provisions limiting its liability to an agreed value.—Hamilton v. Dean Van Lines, Inc., 228 F. Supp. 671 (672-3).

Receiving carrier, having agreed to pick up the goods, open the cartons, repack, weigh, and value each item, cannot now claim that value thereof was not established at time of delivery to it; where defendants' wrongful conduct causes loss of the nature involved, they cannot be heard to complain that the damages were not precisely measured. Furthermore, that the storage company, acting as undisclosed agent of interstate carrier, contracted to obtain insurance in sum of $10,000 on the household goods is shown by credible testimony of two witnesses and by questionable conduct of both defendants in attempting to substitute the carrier's bill of lading (with a $1,000 limit of liability) after the goods were destroyed. Both defendants exercised bad faith throughout the entire transaction, and cannot therefore limit their liability to amount contained in carrier's tariff; any such agreement which limits a carrier's liability must be "fair, open, just and reasonable." [Citing 226 US 491.] Verdict for plaintiff against both defendants.—Id., p. 673.

Interstate common carrier has the burden of full liability for damages to goods received by it unless it shows full compliance with statutory requirements for limiting its liability; and §20(11), made specifically applicable to motor carriers, prevents a carrier from limiting its liability except by maintaining rates dependent on value declared by shipper in writing or agreed on in writing as the released value; thus, paragraph 5 on the back of motor Bill of Lading, which states that carrier excludes liability for goods of extraordinary value, is merely an attempt to limit liability in a manner that is prohibited by statute. Therefore, unless the carrier either rejects the shipment or completely complies with the statutory requirements, it remains fully liable for the goods carried, regardless of their value. And, since shipper has no legal duty to state value of its goods on a bill of lading, its failure to do so will not destroy the protection afforded it by §20(11).—Thomas Electronics, Inc. v. H. W. Taynton Co., 277 F. Supp. 639 (642).

In action to recover for damage to shipment of glass cathode ray tubes, plaintiff shipper established a prima facie case by showing delivery of shipment to defendant carrier in good condition, arrival in damaged condition, and the amount of the damage. Accordingly, since carrier failed to show its full compliance with requirements of the statute for limiting its liability; and did not show either that plaintiff was negligent, that it was free from negligence, or that the damage was due to one of the recognized excepted causes relieving it from liability, plaintiff is entitled to judgment in its favor in the amount of the damages shown.—Id., pp. 641-3.

See also Riss & Co. v. U.S., §20(11), n. 30; and Lux Art Van Service, Inc. v. Pollard, 28 USC §1331, n. 4.

34. Initial carrier.—[Vols. 18, 19].—Part I, §20(11), n. 31.—A warehouseman in the conventional sense does not become an initial carrier vis-a-vis the line-haul carrier he engages when he receives an order to ship goods previously delivered to him and formally undertakes a transportation duty that he cannot lawfully perform himself and must wholly delegate to an authorized carrier.—Flanzbaum v. M & M Transp. Co., 203 F. Supp. 365 (370*.

See also Riss & Co. v. U.S., §20(11), n. 31.

36. Delivering carrier.—See Riss & Co. v.

U.S., §20(11), n. 33.

115. Actions to enforce liability.—[Vols. 14-19].—Part I, §20(11), n. 115.—In action to recover charges for transporting Army officer's house trailer which moved under Government bill of lading, but which carrier could not deliver because of its total loss during transit due to an accident, plaintiff's contention that total measure of its liability is governed by §20(11), notwithstanding provisions of any bill of lading, contract, rule, or tariff, cannot be accepted. Common carrier's liability for value of cargo lost prior to delivery is distinct from shipper's liability for freight charges, latter being controlled by the contractual provisions set forth in the bill of lading. While the parties can, if they desire, provide in their bill of lading contract that full charges will be due despite loss of cargo in transit, standard-form Government bill of lading used in instant case expressly conditions payment of transportation charges on the consignee's receipt of shipment and signing of the Certificate of Delivery on the face of the bill. Summary judgment for defendant.—National Trailer Convoy, Inc. v. United States, 345 F. 2d 573 (574-5, 576).

In shipper's action against motor carrier for damage to large bottle manufacturing machine that fell, while in transit, from carrier's truck as it was ascending a steep hill, evidence supported finding that carrier did not prove its freedom from negligence and that indeed, the accident occurred either because the truck was traveling at an excessive speed after making a sharp turn simultaneously with starting up the hill, or because chain carrier used to secure the machine was defective, or because of a combination of the two. And, in the light of vouchers, ledgers, independent testimony, and the unusual character of the machine and extensive work necessary to repair the damage, amount of the award for damages was not unreasonable.—Continental Can Co. v. Eazor Exp., Inc., 354 F. 2d 222 (223-4).

Appellant motor carrier which had packed and shipped household goods at direction of appellee's wife and which, when informed that appellee (and not his wife) was owner of the goods, allowed shipment to continue moving to billed destination and held it in storage there, was guilty of conversion which gave rise to appellee's right to collect value of the goods at that time. Also, since carrier received notice of appellee's adverse claim after the interstate movement commenced and elected to ignore that claim, it did so at its own peril and is not entitled to storage charges. Presumption that person presenting property for transportation is "rightfully in possession" thereof and is authorized to contract for the transportation does not arise because carrier had knowledge of facts which, if pursued, would have led to actual knowledge that its customer had no authority to order the goods removed in the first instance. Trial court's judgment in favor of appellee, affirmed, as modified.—North American Van Lines, Inc. v. Heller, 371 F. 2d 629 (632-4)*.

Shipper is entitled to recover for any damage to its goods due to carrier's negligence or misconduct, either in an independent action or by way of counterclaim in carrier's action to recover freight charges, but existence of such damage claim, even though valid, is no defense to carrier's claim for transportation charges.—Akers Motor Lines, Inc. v. Lady Cornell Comb Co., 203 F. Supp. 156 (157).

Shipper's suit to recover for loss and damage to interstate shipments of machinery tendered to defendant carrier in good condition, moved under uniform bill of lading, and delivered in damaged condition, is governed by federal law; although, after inspection, carrier specifically authorized and directed plaintiff ro repair the machinery and bill defendant for its expenses, that agreement to provide compensation for damaged goods was routine, and is so closely connected to the bill-of-lading agreement as to constitute at most a clarification or modification thereof. In any event, plaintiff's damage claim can be predicated not on the agreement to repair but on the original damage; and the court, having jurisdiction over the main claim, has jurisdiction over any related claim. Therefore, plaintiff's motion to remand the case to the State court where it was initiated is denied.—Sylgab Steel & Wire Corp. v. Strickland Transp. Co., 270 F. Supp. 264 (266, 270-1).

Regulations of the Commission

29 FR 6324, May 14, 1964, Part 176: Transportation of Household Goods in Interstate or Foreign Commerce, §§176.3(c), 176.7 and 176.8, amended, §§176.9 and 176.10, revised, and §176.14 Claims for loss or damage, added, effective July 10, 1964.

29 FR 7390, June 6, 1964, Part 176: Transportation of Household Goods in Interstate or Foreign Commerce, §176.1 Definitions, revised, effective July 20, 1964.

29 FR 8481, July 7, 1964, Part 176: Transportation of Household Goods in Interstate or Foreign Commerce, effective date of order (29 FR 6324) postponed to Nov. 10, 1964.

29 FR 9711, July 18, 1964, Part 176: Transportation of Household Goods in Interstate or Foreign Commerce§176.1 Definitions, effective date of order (29 FR 7390) postponed from July 20, 1964 to Oct. 1, 1964.

29 FR 9835, July 22, 1964, Part 176: Transportation of Household Goods in Interstate or Foreign Commerce, corrections of order (29 FR 6324) in §176.8(c) and §176.12(a) and (b).

29 FR 11921, Aug. 20, 1964, Part 187: Freight Rate Tariffs, Schedules, and Classifications, §187.201 Released rates on household goods, corrected to reflect provisions of Released Rates Order No. MC-2-B.

29 FR 14173, Oct. 15, 1964, Part 176: Transportation of Household Goods in Interstate or Foreign Commerce, effective date of order of May 6, 1964 (29 FR 7390) further postponed to Nov. 30, 1964.

29 FR 15289, Nov. 14, 1964, Part 176: Transportation of Household Goods in Interstate or Foreign Commerce, §§ 176.3(c), 176.7, 176.8, 176.10, and 176.12 amended, and §176.14 Claims for loss or damage, added, effective Feb. 1, 1965.

29 FR 16125, Dec. 3, 1964, Part 176: Transportation of Household Goods in Interstate or Foreign Commerce, effective date of order of May 6, 1964 (29 FR 7390) postponed to Dec. 30, 1964.

29 FR 19107, Dec. 30, 1964, Part 176: Transportation of Household Goods in Interstate or Foreign Commerce, effective date of order of May 6, 1964 (29 FR 7390) further postponed to Feb. 1, 1965.

30 FR 3597, Mar. 18, 1965, Part 176: Effective date of order of May 6, 1964 (29 FR 7390) postponed to April 2, 1965.

30 FR 6117, Apr. 30, 1965, Part 176: Effective date of order of May 6, 1964 (29 FR 7390) postponed until further order, effective on date of order.

30 FR 16203, Dec. 29, 1965, Part 176: Transportation of Household Goods in Interstate or Foreign Commerce, effective date of regulations prescribed by order of May 6, 1965 (29 FR 7390) having been indefinitely postponed, currently effective regulations are published.

31 FR 8915, June 28, 1966, Part 176: Transportation of Household Goods in Interstate or Foreign Commerce, §176.1 Definitions, revised, effective August 1, 1966.

31 FR 8916, June 28, 1966, Part 176: Transportation of Household Goods in Interstate or Foreign Commerce, §§176.3(c), 176.7, 176.8 revised; §176.9 (b) and (c) revoked and §176.9 (d) renumbered as paragraph (b); §176.10 (a) and (c) revised, §176.10(d) is renumbered as §176.10(f) and new rules numbered §176.10(d), (e), and (g) are added; §176.12 is amended, and a new rule numbered §176.14 is added, effective Sept. 30, 1966, and will apply only on household goods removed from shipper's premises on and after effective date.

31 FR 10193, July 28, 1966, Part 176: Transportation of Household Goods in Interstate or Foreign Commerce, effective date of regulations prescribed by order of June 7, 1966 (31 FR 8916) postponed effective date to Jan. 1, 1967.

31 FR 13446, Oct. 18, 1966, Part 7: List of Forms, Part II, I C Act, Form BOC 101, prescribed as required by §176.10(e), §7.101 BOC 101, Form BOC 101 to report to the Commission all instances in which actual charges exceed written estimates by 10 percent or more, pursuant to §176.10(e), effective Jan. 1, 1967.

31 FR 14879, Nov. 24, 1966, Part 176: Transportation of Household Goods in Interstate or Foreign Commerce, §176.10(f), amended, Estimates of Charges, Reweighting, effective on date of order.

Section 220. [*§320(a) U.S.C.*] Accounts, records and reports.—(a) Reports to commission; copies of contracts; publication of information.—[Unchanged. See vol. 11, p. 9571, vol. 15, p. 12250.]

Amendments, see footnotes, vol. 11, p. 9571, vol. 15, p. 12250; historical notes, vol. 12, p. 10330, vol. 13, p. 11032, vol. 14, p. 11543; vol. 19, p. 15909.

Historical Notes

The Commission recommends that §§220 and 412 be amended to permit the Commission or its duly authorized agents to inspect the books, records, and other documents kept or maintained by agricultural cooperatives and shipper associations.—Annual Report, 1962, p. 201, renewed, Annual Report, 1963, p. 19; Annual Report, 1964, p. 76.

It is recommended that §220(f) be amended so as to prohibit the introduction in evidence in any damage suit of a report submitted to the Commission by its accident investigators, expert opinion testimony by such investigators in damage suits, and to restrict factual testimony by such investigators to cases where factual evidence is not reasonably available from other sources.—Annual Report, 1963, p. 15, Annual Report, 1964, p. 71-2.

Notes of Decisions

Vol. 12—p. 10472; Vol. 14—p. 11641; Vol. 15—p. 12251; Vol. 16—p. 12919; Vol. 17—p. 13626; Vol. 18—p. 14644.

5. In general.—[Vols. 12, 14-18].—The commission has power under §§204(a)(7) and 220(a) to require passenger carriers to report interference with complaince with regulations prohibiting race segregation.—Discrimination—Interstate M. Carriers of passengers, 86 M.C.C. 743 (752)*.

See also Exley Express, Inc. v. United States, §209(a)(1), n. 24.

While there is no statutory support for withholding carriers' individual commodity statistics reports from public inspection, since such reports fall within purview of the public records requirements of §§16(13), 204(d), and 316(d), exercise of the commission's responsibility thereunder must be reconciled with the various provisions of the act prohibiting unauthorized disclosure of shipper information to competitors, particularly §15(11), 222(e), and 317(f). Removal of all commodity statistics reports of individual carriers from public inspection is not a satisfactory solution to the disclosure problem, for even if there were some legal basis for such a complete withdrawal, it would be a retrogressive step, removing a valuable source of freight traffic information for use of carriers and the public. Also, the salutary effect on the reporting carriers of having their reports made available to the public would be lost.—Commodity Statistics Reporting—Extent and Disclosure, 323 I.C.C. 131 (134-5)*.

Additionally, there is no justification for withholding motor carriers' individual statistical reports while similar reports of other modes are made available to the public. Motor carriers with limited operations, serving limited territories, are not required to report commodity statistics unless they have attained class I status, and even class I carriers engaged predominantly in certain specialized services or in transporting certain specific commodities are relieved by regulation from freight commodity statistics reporting. Moreover, the same argument advanced to support exempting small motor carriers may apply also to some class I railroads whose operations are more limited in scope than those of many large motor carriers. In absence of any evidence substantiating a need to differentiate between modes in resolving the disclosure issue, and in interest of fair and impartial regulation as required by the national transportation policy, the issue should not be resolved on a mode basis.—Id., p. 135.

Criteria for implementing an effective solution of the problem include the reporting of meaningful and useful commodity statistics for commission, carrier, and public use, likelihood of inadvertent disclosure, and minimizing of the cost and paperwork burden on carriers and commission alike. The solution most likely to meet those criteria is to allow, in addition to the regular reporting, the separate reporting of commodity classes involving less than three shippers in a supplemental report which will be withheld from public inspection, whereas the carrier's regular commodity statistics report, which may exclude the less-than-three-shippers categories, will be made available to the public. Data from the two report forms may be combined by the commission for published statistics purposes, but access to supplemental reports will be made subject to commission approval. As carrier will be given option of obtaining shipper permission to include less-than-three-shippers' shipments in his regular report form, such reporting requirements should not prove unduly burdensome.—Id., pp. 136, 137.

Since it is clear that commodity statistics reports of individual motor carriers are "reports" as used in §204(d) and therefore, under terms thereof, should be available for public inspection, the provision of 49 CFR §206.7 that "the individual reports filed pursuant to this part will not be open to public inspection" is deleted. Plan outlined will avoid the apparent conflict between §§204(d) and 222(e); however, should there be some question as to the propriety of the data shown on either the regular or the supplemental report form, the commission may require justification from the reporting carrier, and certification of the three-shippers count will be required to assure accurate and proper reporting.—Id., p. 138.

10. Accident register.—Although accident register required to be kept by all for-hire or private carriers operating in interstate commerce is not required to be filed with commission, it is a "report" required by the commission and must be made available for inspec-

tion by it. However, §220(f) provides ample protection against such registers being subject to subpena or used in civil suits arising out of motor carrier accidents.—Qualifications of Employees and Safety of Operation, 91 M.C.C. 141 (147-8)*.

Regulations of the Commission

27 FR 12754, Dec. 27, 1962, Part 205: §205.3a, Class I Motor Carriers of Passengers required to file Annual Report Form D, amended.

28 FR 453, Jan. 17, 1963, Part 205: Reports of Motor Carriers, §205.1 Annual reports of Class I carriers of property, Annual Report Form A (Property), prescribed, effective on date of order.

28 FR 551, Jan. 22, 1963, Part 205: Reports of Motor Carriers, §205.1a, Annual reports of Class II carriers of property, Annual Report Form B (Property), prescribed, effective on date of order.

28 FR 10711, Oct. 4, 1963, Part 206: Freight Commodity Statistics, §206.1 Freight commodity statistics, amended, and §206.8 Standard commodity code, deleted, as to traffic for year beginning Jan. 1, 1964.

28 FR 13747, Dec. 17, 1963, Part 205: Reports of Motor Carriers, amended by adding thereto §205.14 Piggyback traffic statistics—motor. Effective with reports for first quarter of 1964.

29 FR 2559, Feb. 19, 1964, Part 205: Reports of Motor Carriers, §205.4 Annual reports of carriers of passengers other than Class I carriers, Annual Report Form E (passenger) prescribed for use commencing with year ended Dec. 31, 1963.

29 FR 2947, Mar. 4, 1964, Part 205: Reports of Motor Carriers, §205.3 Annual Reports of Class III carriers of property, Annual Report Form C (property), prescribed.

29 FR 12077, Aug. 25, 1964, Part 206: Freight Commodity Statistics, §206.7 Public disclosure—motor carrier reports, amended to read as set forth, effective on date of order.

30 FR 485, Jan. 14, 1965, Part 206: Freight Commodity Statistics, §206.7 modified and amended, effective on date of order.

31 FR 3077, Feb. 24, 1966, Part 205: §205.3a, class I Motor Carriers of Passengers required to file Annual Report Form D, revised to read as set forth, commencing with year ended Dec. 31, 1965.

31 FR 3497, March 8, 1966, Part 205: Reports of Motor Carriers, §205.1 Annual reports of Class I carriers of property, Annual Report, form A (Property), prescribed for use, commencing with reports for the year ended Dec. 31, 1965.

31 FR 4348, Mar. 12, 1966, Part 205: Reports of Motor Carriers, §205.3 Annual reports of class III carriers of property, revised Annual Report Form C (Property), prescribed for use commencing with year ended Dec. 31, 1965.

31 FR 4349, Mar. 12, 1966, Part 205: Reports of Motor Carriers, §205.4 Annual reports of carriers of passengers other than Class I carriers, revised Annual Report Form E (Passenger), prescribed for use commencing with year ended Dec. 31, 1965.

31 FR 9741, July 19, 1966, Part 205: Reports of Motor Carriers, §205.5 Class I Motor Carriers, added, effective on date of order.

NOTE: For Republication and Redesignations of Regulations, see 32 FR 20003, Dec. 20, 1967.

33 FR 538, Jan. 16, 1968, Part 1249 [former Part 305 formerly Part 205]: Reports of Motor Carriers; §1249.2 Annual reports of class II carriers of property, §1249.4 Annual reports of class III carriers of property, and §1249.14 Quarterly reports of class II carriers of property amended, effective Jan. 1, 1968.

33 FR 748, Jan. 20, 1968, Part 1249: Reports of Motor Carriers; §1249.11 Quarterly reports of passenger revenues, expenses, and statistics, §1249.12 Quarterly reports of property revenues, expenses, and statistics, §1249.14 Quarterly reports of Class II carriers of property, effective Dec. 31, 1967.

Section 220. (b) [*§320(b) U.S.C.*] Period covered by report; time of filing; oath.—[Unchanged. See vol. 11, p. 9572.]

Historical Note

The commission recommends, in view of the prohibitions in 18 USC §1001, that §220(b) be amended so as to eliminate the mandatory oath provision therein, and that such requirement be made discretionary with the commission.—Annual Report, 1964, p. 72.

Section 220. (c) [*§320(c) U.S.C.*] Depreciation charges.—[Unchanged. See vol. 11, p. 9572.]

Amendment, see footnote, p. 9572.

Notes of Decisions

Volume 15—p. 12251; Volume 19—p. 15910.

Section 220. (d) [§320(d) U.S.C.] Accounts, records, etc., form; period of preservation; access to by commission or agents.—[Unchanged. See vol. 11, p. 9573, vol. 15, p. 12251.]

Amendments, see footnotes, vol. 11, p. 9573, vol. 15, p. 12251.

Notes of Decisions

Volume 11—p. 9574; Volume 13—p. 11118; Volume 17—p. 13627; Volume 19—p. 15911.

1. Constitutionality.—[Vols. 11, 19].—Records which Congress requires a federally regulated business corporation to keep, and to make available for official inspection in order to provide for effective administration and enforcement, assume the characteristic of quasi-public documents; disclosure of such records may be compelled without violating the Fourth Amendment. Federally regulated motor carriers are subject to the highest degree of accountability to the public, the public being represented by the commission; that accountability naturally allows a motor carrier less protection and privacy than the ordinary citizen enjoys in his private business.—Cooper's Exp., Inc. v. I.C.C., 330 F. 2d 338 (340-1).

30. Accounts, records, etc., inspection; access to.—[Vol. 19].—The statute grants the commission broad power of inspection commensurate with its broad power of regulation of interstate motor carriers; it could not properly perform its duties if the regulated carrier had the right to say just how far examination of carrier records by commission representatives could go. However, the commission itself is limited by the standard of reasonableness; the inspection must be related to the commission's function as regulator of the carrier.—Cooper's Exp., Inc. v. I.C.C., 330 F. 2d 338 (341).

Records demanded of appellant carrier by representatives of the commission were those the commission was authorized to require motor carriers to keep and preserve, regulations requiring keeping thereof were published in the Code of Federal Regulations, and it is not contended that any other matter was requested. Under the circumstances, the commission's proper and reasonable demand to inspect carrier's premises and equipment and to examine and copy those records and documents should not have been refused. Preliminary injunction ordering carrier to submit its records and documents for inspection and copying, and to submit its lands, buildings, and equipment for examination, was properly granted.—Id., pp. 340, 341.

See also Financial Statements Released by Carriers, §20(3), n. 16, 31; §220(a), n. 10.

Uniform Accounting Regulations

50. Investment accounts.—[Vol. 13].—Funds provided through charges to depreciation may properly be used to retire equipment obligations.—Johnson Freight Lines Co., Inc. —Merger, 87 M.C.C. 747 (750, note)*; but use of such funds to repay, in part, a loan to be made for acquisition of intangible property to which a substantial sum has been allocated, and by which those funds would be so depleted as to be insufficient for the purpose for which they should properly be used, should not be approved.—Oregon-Nevada-California Fast Freight—Purchase—Coast-Lee, 90 M.C.C. 5 (9)*.

Proposed merger is a pooling of equity interests of stockholders within §182.01-20 of Uniform System of Accounts, in that all of equity interests in liquidating carrier will continue as such in survivor, and stockholders of neither will obtain 90 percent or more of the voting interest in the combined enterprise; therefore, liquidating carrier's tangible property may not properly be recorded at appraised value, and the appraised value may not be allowed in computing assets properly capitalizable.—Johnson Freight Lines Co., Inc.—Merger, 87 M.C.C. 747 (749)*.

In accounting for liquidation of a predecessor company, the tangible property acquired

was required to be recorded at net book values instead of at appraised values, because at time of consummation of that transaction the accounting regulations did not permit such a writeup; and though subsequent order permitted recording of appraised values on books of the acquiring company in such transactions, no evidence has now been submitted which might warrant an adjustment of depreciation accruals on that property (so as to increase equity of survivor's stockholders and decrease overcapitalization resulting from proposed merger) because of erroneous estimates of service life of such property, as permitted by the accounting rules under some circumstances.—Id., p. 749.

Amended §181.02-20 of Uniform System of Accounts permits writeup of tangible property acquired in a §5 transaction from book value to appraised value, provided appraisals are by independent, qualified appraisers, using proper standards upon adequate evidence, and value entered in survivor's books does not exceed consideration to be paid for such tangibles; but where price for all stock of acquired carrier is a single sum, the tangible properties may not be written up by appraisals to a point where acquired carrier's net worth exceeds the purchase price. A liquidating carrier's net worth as of assumed merger date was $2,066,175, at proposed price of $2,400,000 for its stock the maximum increase for appraisals would be $333,825; however, appraisals indicating a larger value for tangible properties acquired will be given consideration in passing on merger terms.—Continental Tenn. Lines, Inc.—Control—Tennessee Coach, 87 M.C.C. 775 (781).

Though shortened tax-depreciation guideline lives authorized by Internal Revenue Service will result in much larger tax-depreciation deductions in early years of service lives of facilities than book depreciation computed under commission accounting rules, neither that nor investment tax credit permitted by Revenue Act of 1962 warrants changes in present accounting rules or the commission's statement of policy dated February 9, 1959, that actual Federal income taxes payable for each year, based on effective tax regulations for the year, shall be recorded in the tax accounts of carriers' books of account and in financial statements. But present requirement for disclosure in carriers' annual reports of tax reductions for accelerated depreciation will be extended to apply to those attributable to tax-depreciation guideline lives, as well as investment tax credit.—Accounting for Federal Income Taxes, 318 I.C.C. 803 (805, 807-8).

Regulations of the Commission

28 FR 1960, Feb. 28, 1963: Retention periods, records, motor carriers other than class I, 49 CFR 203.1, 203.4; brokers, 49 CFR 203.100; class I motor carriers, 49 CFR 203.307.

29 FR 3088, Mar. 5, 1964: Same retention periods references.

30 FR 3163, Mar. 6, 1965: Same retention periods references, except that Class II motor carriers of property comply with 49 CFR 203.301-203.307.

Regulations of the Commission

29 FR 15867, Nov. 26, 1964, Part 182: Uniform System of Accounts for Class I Common and Contract Motor Carriers of Property, miscellaneous amendments, effective Jan. 1, 1965.

29 FR 16087, Dec. 2, 1964, Part O: The Commission, §0.5 Credentials required by special agents, accountants, and examiners, paragraphs (c), (d), (e), (f), and (g) amended, effective on date of order.

29 FR 19107, Dec. 30, 1964, Part O: Order of Nov. 24, 1964 (29 FR 16087) corrected to substitute "accountants" for "accounts" wherever latter appears therein.

29 FR 19104, Dec. 30, 1964, Parts 182 and 184: Part 182 Uniform System of Accounts for Class I and Class II Common and Contract Motor Carriers of Property, title amended to read as set forth and §§182.8900 - 182.9005, inclusive, added. Part 184 Chart of Accounts for Class II Motor Carriers of Property, cancelled in entirety. Both effective Jan. 1, 1965.

30 FR 5420, Apr. 16, 1965, Part 182: Uniform System of Accounts for Class I and Class II Common and Contract Motor Carriers of Property, regulations in revised and consolidated form (Issue of 1965) republished.

30 FR 11103, Aug. 27, 1965, Part 182: Uniform System of Accounts for Class I and Class II Common and Contract Motor Carriers of Property, miscellaneous amendments for correction of regulations published at 30FR 5420.

31 FR 11181, Aug. 24, 1966, Part 203: Destruction of Records of Motor Carriers and Brokers, §§203.1, 203.8, and 203.20 revised, new §203.10 added, and §203.21 amended, effective sixty (60) days after publication in the Federal Register.

32 FR 3664, Mar. 2, 1967: Retention periods, records, Class I and II motor carriers, 49 CFR 203.8; Class III motor carriers, 49 CFR 203.20; Brokers, 49 CFR 203.20.

30 FR 14984, Dec. 3, 1965, Part 203: Destruction of Records of Motor Carriers and Brokers, §§203.1 through 203.30, regulations revised, effective on date of publication in Federal Register.

31 FR 4067, Mar. 8, 1966: Retention periods, records, class I and II motor Carriers, 49 CFR 203.8; Class iII motor carriers, 49 CFR 203.20; Brokers, 49 CFR 203.20.

31 FR 4302, Mar. 11, 1966, Part 203: Destruction of Records of Motor Carriers and Brokers, §203.8 prescribed periods of retention, inadvertent error in order published at 30 FR 14984 corrected by changing retention period for item 40(a) from 2 to 3 years.

Notes of Decisions

Volume 10—p. 8243; Volume 11—p. 9577; Volume 12—p. 10474; Volume 17—p. 13629; Volume 18—p. 14648; Volume 19—p. 15914.

2. Construction and interpretation.—The elements of "knowingly" and "willfully" as used in §222(a) do not connote conduct done with evil purpose or criminal intent; they connote conduct which is conscious and intentional, deliberate, and voluntary.—United States v. Wormsbacher, 240 F. Supp. 716 (719-20).

10. Violation, indictable Federal offense.—[Vol. 19].—Defendant, though ostensibly an employment service furnishing drivers to shippers, is shown beyond reasonable doubt to have conducted a for-hire operation as a common carrier of motor vehicles in interstate commerce without a certificate from the commission, in violation of §206(a)(1). That such unlawful operations were knowing and willful is proven by testimony and exhibits demonstrating that defendant, through its officers and employees, consciously, deliberately, intentionally, and voluntarily violated the provisions of Part II; it is knowledge of the facts, as opposed to knowledge of the law, that is essential. Defendant found guilty on all counts as charged.—United States v. Aides, Inc., 211 F. Supp. 122 (124, 125).

See also Atwood's Transport Lines case, §208(c), n. 15.

15. Violation of Act, orders or regulations.—Meaning and effect of the phrase "knowingly and willfully" depends on context in which it is used, and in context of §222(a) it must be taken to create a malum prohibitum offense, not one connoting existence of any evil motive or specific criminal intent. It is equally well settled that, while willfulness is a question of fact, direct proof thereof is not essential: it may be inferred from acts, conduct, and circumstances, or a combination thereof. Motor carrier operations must be conducted in good faith, without a shadow of subterfuge or attempted evasion of the letter or obligation of the law. A carrier or shipper is presumed to have a practical knowledge of the law commensurate with his duties, and if the wrong is malum prohibitum it should be known by him, for it is his duty ot know what the law prohibits; other-

wise no criminal statue of nature of §222(a) could be enforced.—United States v. Lowther Trucking Co., 229 F. Supp. 812 (816-7).

Defendant, which lacked authority to transport dehydrated alfalfa meal, violated the act and the commission's leasing regulations when it backhauled that commodity under purported trip-leases of vehicles with drivers to a shipper association. Considering all facts and circumstances, including defendant's 30 years' experience as an authorized carrier; its realization of the nonexempt nature of the commodity by virtue of its possession of the commission's Administrative Ruling No. 107; its awareness that §207.6(a) of the commission's leasing regulations prohibited its leasing of vehicles with drivers to private carriers or shippers; the obviously illegal and spurious nature of the leasing agreements; and its failure to take any steps to determine legality of the arrangements involved, the conclusion is inescapable that the violations found were committed knowingly and willfully. Defendant found guilty as charged.—Id. pp. 814-5, 817.

Arrangement whereby defendant shipper leased vehicles from owner thereof for movement of its shipments fails to meet the tests of private carriage prescribed in 368 US 370, when in actual practice lessor, not shipper, assumed most of the burdens of the transportation business so far as the movements described in the information are concerned; such arrangement therefore constituted a for-hire transportation business by motor vehicle in interstate commerce without appropriate authority from the commission. As there was no substantial change in that arrangement after the commission had advised shipper's president that its position with regard thereto should be given serious consideration to make sure it was consistent with the applicable statutes, the Government has proved beyond a reasonable doubt that shipper-lessee knowingly and willfully aided and abetted defendant lessor in such unauthorized for-hire transportation; defendant shipper found guilty as charged.—United States v. Wormsbacher, 240 F. Supp. 716 (719, 720).

Defendant who transports chickens from its hatchery to both intrastate and interstate destinations is required by law to abide by the commission's regulations pertaining to hours of service of drivers at all times, in order that the safety of operation of its trucks be protected during particular hours or days when drivers thereof, in course of their duties as employees of the hatchery, perform particular acts which affect safety of operation of such trucks. While none of considered drivers went out of the State without having eight or more hours of off-duty time before reporting for work, and those who remained on duty for more than 70 hours in a period of 8 consecutive days drove the trucks only a fraction of their on-duty time, such operation substantially affected motor vehicle safety within commission regulations prohibiting drivers to remain on duty more than 70 hours in any 8 consecutive days.—United States v. Dixie Grain Co., 246 F. Supp. 705 (709, 710-11).

The question to be decided is not whether a substantial part of an employee's duties affects the safety of operation but, rather, whether any of his duties have a substantial effect on motor vehicle safety. Accordingly, on the record as stipulated, duties of each of defendant's employees named in the information substantially affected motor vehicle safety and defendant permitted or required each of them, respectively, to operate motor vehicles in interstate commerce while remaining on duty more than 70 hours in a period of 8 consecutive days in violation of the commission's regulations governing hours of service of drivers. Evidence does not support defendant's contention that it did not willfully and knowingly violate those regulations; nor do charges in four counts amount to double jeopardy when, though two counts concern driving of each of two employees, they pertain to different 8-day periods for each of the drivers; fine imposed.—Id., pp 711-12.

In prosecution charging corporation with engaging in for-hire interstate motor transportation without having obtained operating authority (to which it pleaded guilty) defendant shipper was properly charged with knowingly and willfully aiding and abetting carrier in committing the offense; shipper's motion to dismiss charges against it on ground that, though it knowingly participated in transportation conducted in violation of §203(c), being a member of the protected class for whose

benefit the law was passed, it cannot be charged as an aider or abettor, is denied. A person not within class described in a penal statute may nevertheless be charged provided (1) he was present actually or constructively and aided or abetted another in commission of the crime; (2) or, being absent, he counseled or caused that person to commit the crime; (3) or aided him after he commited the offense. If the crime is a misdemeanor the aider or abettor in any one of those three cases may be a principal and should be charged as such; crime in question being a misdemeanor, defendant is properly charged as a principal with the offense of aiding and abetting in commission of the crime named in the statute. —United States v. J & J Truck Leasing, Inc., 258 F. Supp. 105 (107, 109-10).

In prosecution for knowingly and willfully engaging in the business of a for-hire motor carrier in insterstate commerce without appropriate authority, defendant (owner of a truck-tractor which he leased to shipper under a 1-year written lease providing for rental on basis of 30 cents per mile) could not be considered a "common carrier" within statute proscribing interstate common carrier operation without a certificate where, pursuant to the lease, owner relinquished direction and control of the vehicle to shipper-lessee. Although owner maintained his capital investment in the vehicle, bore the risk of its premature depreciation, and bore risks of increased costs of fuel, repairs and maintenance, and of the vehicle's nonuse, it was operated by employee of, and under control and direction of,the lessee-shipper. Record is not conclusive that defendant-owner, not shipper-lessee, assumed most of the burdens of the transportation business so far as movements described in the information are concerned; judgment of acquittal granted.—United States v. Sternweis, 278 F. Supp. 82 (83-5).

Engaging in the transportation of property in interstate commerce without having obtained a certificate as required by §206(a) is criminal conduct if knowingly and willfully committed. Evidence of record sustains district court's conclusion that appellant knowingly and willfully violated §206(a); judgment of conviction, and order denying a new trial, affirmed.—United States v. Rudolph, 361 F. 2d 832.

Defendant's conviction, in prosecution for knowingly and willfully engaging in contract-carrier operations without a permit in violation of §209(a) and §222(a), is reversed when the trial judge's charge to the jury failed to present a correct view of all the issues (explicated at length in 368 US 370) to be properly considered. Instructions to the jury concerned issues of whether defendant leased motor vehicles to a shipper (for use by shipper to distribute its products) and itself employed drivers of those vehicles, but failed to submit the question of whether defendant-lessor or shipper-lessee bore all or substantially all of the characteristic burdens related to the transportation venture. Several factors, in addition to degree of shipper's control of the transportation, the jury instructions included all relevant factors explained in the cited case, it might have concluded that shipper had not shifted the characteristic transportation burdens to defendant and the latter was not providing contract-carrier services within the meaning of the act.—United States v. Casale Car Leasing, Inc., 385 F. 2d 707 (710-12).

Defendant was entitled, at the very least, to the safeguards spelled out in 368 US 370—a civil case—And certainly not less, since the government chose (perhaps unwisely) to institute the criminal prosecution. Also, in choosing to invoke the awesome power of the criminal law, the government cannot deprive a defendant of the benefit of an accurate statement of the law merely because such statement would make the jury's task less convenient or manageable.—Id., 712.

In prosecution of private motor carrier for allegedly "knowingly and willfully" failing to require its drivers to keep and submit drivers' logs in violation of §222(a), the Government is not required to prove actual criminal intent or deliberate refusal to comply with applicable regulations. Since the offense is a misdemanor and malum prohibitum, proof of specific criminal intent is not required. Uncontroverted evidence shows that defendant's officers knew the logging regulations; and fact that

those officers continued to employ drivers who failed to keep logs, knowing that to do so violated the regulations, supports an inference that defendant's conduct was willful as well. Trial court's judgment of conviction, affirmed.—United States v. John Hendricks, Inc., 388 F. 2d 677 (679).

60. Parties.—See United States v. Essenfeld, §222(c), n. 15.

Section 222. (b) [*§322(b) U.S.C.*] **Jurisdiction of district courts to restrain violations and enforce orders.**—(1) If any motor carrier or broker operates in violation of any provision of this part (except as to the reasonableness of rates, fares, or charges and the discriminatory character thereof, or any lawful rule, regulation, requirement, or order promulgated by the Commission, or of any term or condition of any certificate or permit, the Commission or its duly authorized agent may apply for the enforcement thereof to the district court of the United States for any district where such motor carrier or broker operates. In any proceeding instituted under the provisions of this subsection, any person, or persons, acting in concert or participating with such carrier or broker in the Commission of such violation may, without regard to his or their residence, be included, in addition to the motor carrier or broker, as a party, or parties to the proceeding. The court shall have jurisdiction to enforce obedience to any such provision of this part, or of such rule, regulation, requirement, order, term, or condition by a writ of injunction or by other process, mandatory or otherwise, restraining such carrier or broker, his or its officers, agents, employees, and representatives, and such other person, or persons, acting in concert or participating with such carrier or broker, from further violation of such provision of this part, or of such rule, regulation, requirement, order, term, or condition and enjoining upon it or them obedience thereto. Process in such proceedings may be served upon such motor carrier, or broker, or upon such person, or persons, acting in concert or participating therewith in the commission of such violation, without regard to the territorial limits of the district or of the State in which the proceeding is instituted.

(2) If any person operates in clear and patent violation of any provisions of section 203(c), 206, 209, or 211 of this part, or any rule, regulation, requirement, or order thereunder, any person injured thereby may apply to the district court of the United States for any district where such person so violating operates, for the enforcement of such section, or of such rule, regulation, requirement, or order. The court shall have jurisdiction to enforce obedience thereto by a writ of injunction or by other process, mandatory or otherwise, restraining such person, his or its officers, agents, employees, and representatives from further violation of such section or of such rule, regulation, requirement, or order; and enjoining upon it or them obedience thereto. A copy of any application for relief filed pursuant to this paragraph

shall be served upon the Commission and a certificate of such service shall appear in such application. The Commission may appear as of right in any such action. The party who or which prevails in any such action may, in the discretion of the court, recover reasonable attorney's fees to be fixed by the court, in addition to any costs allowable under the Federal Rules of Civil Procedure, and the plaintiff instituting such action shall be required to give security, in such sum as the court deems proper, to protect the interests of the party or parties against whom any temporary restraining order, temporary injunctive, or other process is issued should it later be proven unwarranted by the facts and circumstances.

(3) In any action brought under paragraph (2) of this subsection, the Commission may notify the district court of the United States in which such action is pending that it intends to consider the matter in a proceeding before the Commission. Upon the filing of such a notice the court shall stay further action pending disposition of the proceeding before the Commission. (Aug. 9, 1935, c. 498, §1, 49 Stat. 564; Sept. 6, 1965, Pub. L. 89-170, §4, 79 Stat. 648.)

The commission renews its recommendation that §222(b) be amended to enable the commission in enforcement proceedings to obtain service of process upon motor carriers and to permit the joining of any other necessary party without regard to where the carrier of other party may be served.—Annual Report, 1962, pp. 205-6; renewed, Annual Report, 1963, p. 20; Annual Report, 1964, p. 74-5.

Notes of Decisions

Volume 10—p. 8244; Volume 11—p. 9577; Volume 12—p. 10475; Volume 13—p. 11119; Volume 14—p. 11643; Volume 15—p. 12254; Volume 16—p. 12921; Volume 17—p. 13629; Volume 18—p. 14648; Volume 19—p. 15915.

1. Constitutionality.—On appeal from district court's injunctive order, in action by the commission to perpetually enjoin defendants from engaging in for-hire interstate transportation business by motor vehicle without appropriate authority, cases cited and relied on by defendants do not sustain their contention that §222(b), in permitting the commission or its agents to institute judicial proceedings to enforce the act, violates the constitutional grant of executive power to the President and his agents. The powers of law enforcement are not wholly assigned to the executive department; the function of initiating a judicial proceeding for enforcement of a legislative enactment is not the exercise of a prerogative exclusively reserved to the President, as it is not an action not subject to judicial check; and enforcement of any resulting judgment remains with the judicial or executive departments.—I.C.C. v. Chatsworth Cooperative Marketing Ass'n. 347 F. 2d 821 (822)*.

Moreover, it is recognized (295 US 602) that administrative bodies, such as the commission, created by Congress to carry into effect legislative policies in the statute, act in part quasi-legislatively and in part quasi-judicially; to extent such commission exercises any executive function, as distinguished from executive power in the constitutional sense, it does so in discharge of its quasi-legislative or quasi-judicial powers, or as an agency of the legislative or judicial departments of the government; and the authority of Congress, in creating such agencies, to require them to act independently of executive control cannot well be doubted. Judgment and order of lower court affirmed.—Id., p. 822-3.

2. Construction and interpretation.—[Vol. 19].—The statute being a highly remedial one, it should be liberally interpreted to effect its evident purpose.—I.C.C. v. Dudgeon, 213 F. Supp. 710 (714); I.C.C. v. Interstate Auto Shippers, Inc., 214 F. Supp. 473 (476).

See also Burlington Truck Lines v. U.S., §212 (a), n. 10; McFaddin Express, Inc. v. Adley Corporation, 363 F. 2d 546, 28 USC §1331, n. 4; United States v. City of Jackson, Miss., n. 25, below.

10. Indictment and information in general.—[Vols. 10-16].—It was not necessary that information charging motor carrier with several violations of §206(a) negative exception therein which permits uncertificated operations while carrier litigates asserted "grandfather" rights before the commission. While in a proper case the pendency of such an administrative proceeding is a defense, it is not necessary to anticipate that defense in the formal charge of operating without certificated authority—United States v. W. J. Dillner Transfer Co., 315 F. 2d 107 (109).

11. Interstate operation without certificate or permit.—[Vols. 10-19].—Defendant nonstock corporation whose sole activity is and has been the transportation of property by motor vehicle for compensation, and which performs the major portion of its service for canneries, meat packinghouses, produce dealers, and other persons not engaged in farming operations, is not a cooperative association within exemption of §203(b5) but a for-hire common carrier as defined in §203(a)(14), and its transportation of other than exempt commodities is in violation of §206(a) and is subject to be enjoined by the court when there is not in force with respect to it or any of its officers, directors, or members a certificate, permit, or any other form of authority issued by the commission. Injunction granted against the corporation, but no order restraining individual defendants is considered necessary at this time.—I.C.C. v. Nelson Cooperative Marketing Assn., 209 F. Supp. 697 (699, 700, 701).

Defendants holding no authority from the commission have offered and delivered transportation services at a fixed rate of compensation and throughout their operation have retained the identifying characteristics of a for-hire motor carrier; they have in fact conducted an interstate motor-carrier operation subject to Part II, shallowly cloaked with a subterfuge arrangement purporting to represent private carriage, in violation of §§206(a), 209(a), and 222(b), and unless enjoined and restrained are likely to continue to engage in such practices; injunction granted.—I.C.C. v. Arpel, Inc., 211 F. Supp. 370 (373, 374).

In his business of driveaway transportation of automobiles for individual owners, defendant utilizes (1) a contract with the owner, (2) a driver's application form, and (3) a lease agreement with the driver; however such documents, apparently designed to avoid regulation of the transportation, are of no legal effect where terms thereof are contrary to the facts. The lease agreement, wherein defendant "leases" owner's car to the driver for duration of the trip, is not a bona fide lease; it is a mere subterfuge under which he attempts to screen his unlawful carrier operations.—I.C.C. v. Dudgeon, 213 F. Supp. 710 (712-4).

Moreover, there is privity of contract between owner of each automobile and defendant, although it is made to appear that owner contracts with the driver; owner accepts defendant's terms and conditions, turns the car over to him, and pays his quoted charge; charges for the service are related to distance traveled, thus defendant's claim that rate charged is for screening a driver is discredited. Defendant, who holds no interstate certificate, assumes the right, power and duty to perform service within scope of his holding out, in violation of §206(a); injunction entered.—Id., pp. 714-5; in substantially identical case, preliminary injunction granted against corporate and individual defendants.—I.C.C. v. Interstate Auto Shippers, Inc., 214 F. Supp. 473 (476-7).

In holding out to the public an automobile driveaway service for individual owners, for compensation within meaning of Part II, and in furnishing substantially all the facilities for, and performing substantially all the functions of, such transportation, without having first obtained a certificate from the commission, defendant is unlawfully engaging in transportation as a common carrier in violation of §206(a). As defendant, if not restrained, intends to and will continue to provide such

service in the manner described, without authority from the commission, permanent injunction is issued.—I.C.C. v. Teeter, 228 F. Supp. 479 (481-2).

Although individual's purported lease of his tractors to a meat company for transportation of its products in its trailers provides for lessee's exclusive direction and control of operation of the vehicles, in actual operations he exercises very substantial control over both trucks and drivers and also assumes a substantial and significant share of the burdens of the transportation business. Record as a whole clearly shows that the operations involved are in substance actually those of defendant lessor, within meaning of 368 US 370, and that he occupies the position of a contract carrier in interstate commerce, providing defendant lessee as shipper with a complete transportation service without authority from the commission, in violation of §§206(a) and 209(a). Permanent injunction issued.—I.C.C. v. Moore, 236 F. Supp. 168 (170-2, 173).

Since record clearly shows that defendant cooperative is not a bona fide agricultural cooperative association as defined in the Agricultural Marketing Act, rather that it exists in name only and is a fictitious sham, for-hire transportation performed by it does not fall within partial exemption of §203(b5); and, since the fresh meat transported is not within agricultural commodity exemption of §203(b6), performance of such transportation without appropriate authority violates §§203(c), 206(a), and 209(a). Injunction issued against the cooperative, its two individual and one corporate organizers, and defendant slaughtering plant which (although not eligible for membership) participates in the cooperative and uses the transportation.—I.C.C. v. Iowa Cooperative Assn., 236 F. Supp. 873 (876-9).

Since the Motor Carrier Act is comprehensive enough to bring within its purview all those who, in substance, engage in a business of interstate transportation on public highways for hire and, being remedial in nature, should be liberally construed to effect its evident purpose, defendant nonprofit shippers association cannot claim exemption from economic regulation under any part of the statute by virtue of the exemption provided in §402(c)(1). Legislative history of enactment of Part IV of the Act clearly points out the distinction between freight forwarders and nonprofit associations of shippers, such as defendant. Congress did not intend to exclude shipping associations who assume responsibility for through movement of goods from application of Part II of the Act; a forwarder who is excluded does not engage in motor transportation.—I.C.C. v. International Shippers Ass'n of New Jersey, Inc., 249 F. Supp. 66 (70)*.

Therefore, defendant association which used no certificated carrier, but operated motor vehicles leased for the trip, in transporting goods of its shipper members and was reimbursed by the members for its services, was not within the §402(c) exemption. Neither the association nor its director had obtained appropriate operating authority; both were aware of requirements of the pertinent statutes and operated in violation thereof. Defendants association, its director, and one shipper member enjoined from violating §§203(c), 206, and 209; complaint dismissed as to shipper member that had withdrawn from the association and taken steps to handle its traffic properly.—Id., pp. 68-70.

Since the record is clear that defendant cooperative is not a bona fide agricultural cooperative association as defined in the Agricultural Marketing Act, the for-hire transportation performed by it does not fall within partial exemption of §203(b5); and, since its transportation of processed materials and regulated commodities constitutes common carrier operations within §203(a)(14), performance of such transportation service without appropriate authority violates §203(c) and §206(a). As it appears likely that defendants will continue such practices unless restrained, the cooperative, its two individual organizers, and all persons acting in concert or participation with them, are permanently enjoined and restrained from engaging in for-hire motor common carrier operations unless and until appropriate authority therefor is obtained.—I.C.C. v. All American Association, 281 F. Supp. 18 (22-3).

Defendant, claiming to be an employment agency in bringing together owners of automobiles who want them driven from one place

to another and persons who want to drive them in order to get a cheap trip, was in fact operating as a for-hire common carrier of private automobiles without a certificate, in violation of §§203(c) and 206(a)(1). Nothing in its business advertisements disclose the features now stressed as showing it was a mere intermediary between owner and driver; also it set all terms of the owner-driver relationship; owner and driver did not make their own arrangements as is normally done by an employer and employee. Defendant is not obliged to conduct its business in such a fashion that it must obtain a certificate; however, looking through form to substance, the commission rationally could (and its decisions show that it would) conclude that defendant was operating unlawfully as a common carrier. Lower court's dismissal of the commission's suit for injunction, reversed.—I.C.C. v. AAA Con Drivers Exchange, Inc., 340 F. 2d 820 (821-2, 825-6)*.

Since agricultural cooperative's transportation of non-farm commodities (on return trips after delivering member products to market) is found to be within the "cooperative association" exemption of §203(b5), such transportation was not in violation of the act. Congress intended to exempt from economic regulation by the commission cooperative associations which comply with the Agricultural Marketing Act; and such a cooperative does not lose its status by engaging in activity other than its primary statutory activity, so long as the other activity is incidental to, and necessary to effective performance of, the primary one. The Agricultural Marketing Act was not drawn with the regulation of transportation in mind, and its terms cannot be given one meaning for that purpose and another for the Act's primary purpose of encouraging agricultural cooperatives. Decision of lower court granting injunction reversed.—Northwest Agricultural Coop. Ass'n v. I.C.C., 350 F. 2d 252 (254-5, 257)*.

See also United States v. Casale Car Leasing, Inc., and United States v. Sternweis, §222(a), n. 15.

14. Operation beyond scope of authority granted.—[Vols. 15-19].—In prosecution of carrier charged with operating beyond territorial limits of its certificate, it is no defense that the carrier believes it can show "grandfather" rights broader than its certificate when it has neither sought nor obtained from the commission a broadening of its authority on basis of the alleged "grandfather" rights. Congress provided in §206(a) the narrow permission to continue uncertificated operations while "grandfather" claims were pending before the commission; otherwise, a court must accept carrier's certificate as the source and definition of its authority.—United States v. W. J. Dillner Transfer Co., 315 F. 2d 107 (109. 110).

Motor carrier's certificate authorizing transportation between points in New Jersey and Ohio did not authorize it to carry commodities from two Pennsylvania points to Ohio points, on theory that the two origins are within commercial zones of two New Jersey cities and hence covered by authority to serve those cities. Certificates which grant authority limited to a described territory do not authorize service to any point outside that territory, even though point in question may be within commercial zone of a municipality within the described territory. Operations in issue were not within authority in certificate relied on; conviction affirmed.—Id., p. 109.

In the commission's action seeking to enjoin carrier from transporting fork-lift trucks in interstate commerce, defendant's authority to transport "machinery" and "heavy machinery" (originally issued to its predecessor in 1939) is found to include fork-lift trucks when record in predecessor's application proceeding clearly shows that fork-lifts, and other such vehicles designed for use in warehouses or storage yards, were considered as "machinery" or "heavy machinery" when the certificate was originally issued. While, in the years since then, fork-lift trucks have become more numerous and more widely used, that fact should not deprive defendant of benefit of the uses permitted under the original certificate; to hold otherwise, on instant record, would deprive defendant of a constitutional right guaranteed by the due process clause. Furthermore, though the commission currently distinguishes between fork-lifts and "machinery" or "heavy machinery," that policy was first stated about 16 years after considered certificate was issued.

Complaint dismissed.—I.C.C. v. Mitchell Bros. Truck Lines, 250 F. Supp. 636 (637-9).

25. Injunction.—[Vols. 10-12, 15-19].—In denying the commission's request for preliminary injunction to restrain defendant-appellee from performing cross-haul operations in its radial territory, the district court neither filed findings of fact nor mentioned the crucial findings in its opinion, as required by Federal Rules of Civil Procedure; correctness of its assertion that under the facts and circumstances the commission was not entitled to the order sought depends on findings of fact without which it cannot intelligently be approved or disapproved. Defendant was apprised on two occasions, one 12 years ago, that operations involved were unlawful, and its persistence therein was a conscious rejection of the commission's contentions by one long familiar with requirements for proper conduct of interstate transportation. Judgment of the lower court vacated and case remanded for findings of fact and conclusions of law, with direction to issue a temporary restraining order.—I.C.C. v. Cardinale Trucking Corp., 308 F. 2d 435 (436, 437-8).

Interstate Commerce Act, as amended by the Elkins Act, has behind it the full force of the Commerce Clause giving the statute the broadest possible sweep of Congressional power. The United States has standing, with and without statutory authorization, to bring action against city, city officials, and interstate carriers seeking injunctive relief against racial segregation in passenger terminals in the city. Considering provisions of §§16(12) and 222(b), the Elkins Act, and 28 USC §2322, there is no question as to the Government's and the commission's standing to sue defendant carriers and, by implication, those statutes provide a basis for instant action against noncarrier defendants.—United States v. City of Jackson, Miss., 318 F. 2d 1 (8-10)*.

Statutory power to enforce substantive provisions of the law must carry with it the power to make such enforcement effective; in instant case, enforcement can be made effective only if relief is granted against noncarrier defendants who are causing the carriers to violate the statutes; and, there need be no community of interest between carriers and non-carriers sought to be enjoined. District court's failure to issue injunction against carriers and noncarriers constituted an abuse of judicial discretion; reversed and remanded with instructions that injunction sought be issued.—Id., pp. 10, 17.

Acts of defendant who possessed no interstate motor carrier authority, in providing driveaway service in interstate transportation of automobiles for individual owners, constitute violations of §206(a), and as such, are subject to be enjoined by the court under express provisions of §222(b). Defendant and all parties acting under his direction, or in concert with him, are permanently enjoined from providing such service, directly or indirectly, until appropriate authority therefor is obtained.—I.C.C. v. Dudgeon, 213 F. Supp. 710 (715); in substantially identical case, preliminary injunction granted against corporate and individual defendants.—I.C.C. v. Interstate Auto Shippers, Inc., 214 F. Supp. 473 (477).

Transportation operations conducted under purported vehicle-leasing arrangement are in substance those of defendant lessor who as a contract carrier provides defendant lessee as shipper with a complete transportation service without authority from the commission, in violation of §§206(a) and 209(a), and defendant shipper-lessee has actively aided and abetted defendant lessor in performance of such operations, thus subjecting both to enjoiner under §222(b) and §2 of the Elkins Act. As it appears that both defendants will continue to engage or participate in such unlawful activities unless restrained, both, together with their agents, employees, etc., are permanently enjoined from performing or hiring such transportation unless and until appropriate authority is obtained.—I.C.C. v. Moore, 236 F. Supp. 168 (172, 173).

See also Auto Drive-Away Company of Hialeah, Inc. case, n. 30, below.

27. Violation of orders, regulations, generally.—[Vols. 13, 15, 16, 18, 19].—The Attorney General has standing to bring suits to enjoin enforcement of State passenger segregation statutes, to restrain and remove unconstitutional interference with and burden upon interstate commerce; insofar as the actions involve violations of part II and the commission's regulations thereunder, the commission may itself, or by its designated agent, main-

tain such actions under provisions of §222(b).—United States v. Lassiter, 203 F. Supp. 20 (24).

In action against motor carrier for violation of the commission's safety regulations, proof that vehicle involved is one "used," in ordinary meaning of that word, in transportation of property in interstate commerce is all that is required to bring it within the commission's jurisdiction and to subject its operator to those regulations. When inspection disclosed that braking systems of defendant carrier's tractor-trailer combination were defective and both units were placed out of service, it was immaterial whether freight being transported was moving in interstate or intrastate commerce. Upon instructions from another employee of carrier and prior to any attempt to correct indicated defects, driver of the vehicle drove it back to carrier's terminal for repairs and then completed his trip. Fines imposed on carrier and the two employees involved.—United States v. Pioneer Motor Service, Inc., 204 F. Supp. 611 (612, 613).

30. Evidence.—[Vols. 11-14, 17-19].—At the jury trial, carrier admitted carrying commodities from two Pennsylvania points to Ohio points, although certificate relied on was limited to operations from New Jersey to Ohio points; it also knew that its certificate as interpreted by the commission did not give implied sanction to operations from those nearby Pennsylvania points. The jury was justified in concluding that carrier's conduct was a deliberate refusal to respect the plain limitations of certificate under which it was operating.—United States v. W. J. Dillner Transfer Co., 315 F. 2d 107 (109-10).

Evidence in suit filed by the commission to enjoin corporation, and two officers thereof, from continuing their unlawful interstate automobile driveaway operation without proper authorization, consisting of commission investigator's affidavit and accompanying exhibits, party admissions on file, and other materials, was sufficient to support lower court's summary judgment in favor of the commission. Defendants do not dispute sufficiency of the evidence to prove that their operation requires authority from the commission; and their attack on admissibility of most of the materials on which the lower court based its judgment, made for the first time on appeal therefrom, comes too late.—Auto Drive-Away Company of Hialeah, Inc. v. I.C.C., 360 F. 2d 446 (447-48).

Affidavit submitted in support of the commission's motion for summary judgment is subject to a timely motion to strike, if it does not comply with the Federal Rules of Civil Procedure; but in absence of such motion, formal defects in the affidavit ordinarily are waived. Also, defendants' objection to admission of contents of petitions they filed with the commission, as well as those filed with the court in support of motion for a stay of the court proceedings pending the commission's decision, cannot be justified by any rule of evidence; lower court properly considered those admissions in making its findings. Whether or not the stay granted for appeal from the summary judgment should remain in effect until the commission rules on appellants' pending application for appropriate authority is left to the district court's discretion; judgment affirmed.—Id., pp. 448-9.

Section 222. (c) [*§322(c) U.S.C.*] **Participation in unjust discrimination; evasion of regulations; penalty.**—[Unchanged. See vol. 10, p. 8247, vol. 18, p. 14651.]

Notes of Decisions

Volume 10—p. 8247; Volume 11—p. 9581; Volume 13—p. 11121; Volume 14—p. 11644; Volume 15—p. 12256; Volume 17—p. 13631; Volume 19—p. 15919.

5. Defeating or evading regulation.—[Vols. 15, 19].—Motor carrier, convicted on information charging that it and another carrier had entered into an arrangement whereby the

other purported to carry, but defendant actually carried and was paid for carrying freight in an area in which only the other carrier had operating authority, was properly penalized under portion of §222(c) which penalizes all violations in connection with which defendant has been guilty of fraud. Though the information did not refer to the substantive regulation violated, it did refer in parentheses to §222(c), a penalty section; and, viewing the three portions of §222(c) as a whole, it is not unreasonable to penalize the making of false or fictitious documents in connection with a violation as an aggravation of the violation itself. Defendant's argument that §222(c) is inapplicable and that it should have been penalized under §222(a), which prescribes the general penalty for a willful violation for which no penalty is otherwise provided, does not overcome the countervailing arguments.—Calore Exp. Co. v. United States, 351 F. 2d 596 (597-8).

It may be that an information alleging violation of §223 could support a criminal prosecution if it further charged that the carrier's extension of credit was designed to accomplish discrimination among shippers (noting that "liability" as used in §223 obviously refers only to civil liability); however, no discrimination is alleged in information charging defendant carrier with having failed to collect freight charges within seven days after delivery of the freight, in violation of §223 and the commission's regulations. Moreover, fact that carrier billed shippers in due time tends to negate any inference of discrimination. Therefore, as mere failure to receive payment from shipper within seven days after delivery of freight does not expose the carrier to criminal liability, defendant's motion to dismiss the information is well taken; granted.—United States v. General Expressways, Inc., 270 F. Supp. 115 (117).

To constitute a violation of §222(c) by a shipper who knowingly patronizes an uncertificated carrier, he must either (a) receive some character of rebate or concession, or (b) be guilty of some fraudulent conduct in an attempt to evade the regulations. Read together with §203(c), which condemns only the conduct of a carrier, as they must be as part of the same chapter of the act, those sections indicate congressional intent only to condemn the act of a shipper where elements of §222(c) are present. In absence of either rebate or fraud on part of defendant shipper, it may not be charged, under 18 USC §2, as an aider or abbettor of carrier who plead guilty to operating without authority. Had Congress intended to punish the shipper for participation in same conduct as the carrier, it seems that §203(c) would have so provided. This does not mean that a shipper may not conspire with carrier to violate §203(c), or may not be guilty as an aider or abbettor; but only that knowing shipment of goods, and payment of proper tariff charges, does not make the shipper an aider or abbettor.—United States v. Williamson, 235 F. Supp. 836 (837-9).

15. Concessions and rebates.—[Vols. 10, 11, 13, 14, 17].—Defendant's contention that §222(c) displaced provisions of the Elkins Act relating to rebates, concessions, and discriminations, is not supported by facts appearing in the information charging it with receiving rebates from railroad for cartage of shipments from Jersey City, N.J., to railroad's station in New York City, a service which it did not perform. The Elkins Act was adopted as a supplement to Part I of the act, which regulates interstate carriage by rail or jointly by rail and motor; however, §202(c) expressly makes provisions of the Motor Carrier Act, including §222, inapplicable to transportation by motor vehicle for a railroad subject to Part I. Accordingly, §222(c) does not apply to defendant's transportation of considered rail shipments; and, since defendant transported the shipments in behalf of railroad that is subject to the Elkins Act, defendant is subject to proscriptions and penalties provided by that statute. Motion to dismiss is denied.—United States v. Pep Trucking Co., 261 F. Supp. 480 (483-4).

Individual defendant's motion to dismiss, as to him, each count of information alleging that he and motor carrier corporation unlawfully gave a rebate by charging less than published rates and extended credit for more than 7 days after delivery of freight, because it is not alleged that he is, nor is he, a "common carrier by motor vehicle," denied. It is doubtful whether defendant's status must be alleged in any asserted violation of §222(c);

however, the Government's bill of particulars states that he is alleged to have acted as an officer of the corporation. In any event, each count of the information cites the general "aiding and abetting" provision, which is sufficient to notify defendant of grounds of his culpability. Moreover, 6 of the counts allege violation of §222(a) which refers to any "person" and §203(a)(1) defines that term as including "any individual"; therefore, those counts clearly state sufficient facts to constitute an offense against the United States.—United States v. Essenfeld, 267 F. Supp. 637 (638).

Fact that protestant carrier has contracted with a shipper to operate one of latter's cement storage and distribution plants on a cost-plus basis, and maintains certain supervisory employees who work at that and other plants, whose salaries are not billed to shipper but carried as part of carrier's general overhead, is not shown to constitute a concession to the shipper in violation of §222(c); nor is proceeding on extension application of another carrier the proper forum for final determination of that issue.—Bonded Freightways, Inc., Extension, 92 M.C.C. 68 (70-1).

Although defendant's granting of free intrastate transportation of cash letters for certain Wisconsin banks in connection with their interstate shipments for which a charge is made, while withholding such free service from other interstate shippers, violates provisions of §222(c), complainant may not in a complaint proceeding invoke the penalties provided therein.—Armored Carrier Corp. v. B.D.C. Corp., 92 M.C.C. 665 (668).

Section 222. (d), (e) [*§322(d), (e) U.S.C.*]—[Unchanged. See vol. 11, p. 9582; vol. 10, p. 8248.]

Notes of Decisions

§222(e): Volume 10—p. 8248; Volume 17—p. 13632.

§222(e). 3. Disclosure of information without shipper's consent.—[Vol. 17].—Since commodity statistics reports of individual carriers do not show names of shippers or their number, or origins and destinations of shipments, for harmful disclosure to result other information concerning carrier operations and carrier-shipper relations must be known or gathered and used together with the commodity traffic data from the individual report form. Nevertheless, so long as possibility for harmful disclosure exists, such possibilities must be recognized and measures taken to prevent unnecessary disclosure of shipper affairs to competitors, as intended by Congress. The fact that the disclosure provisions of §§15(11), 222(e), and 317(f) apply to carriers and their employees and agents, rather than to the commission or its staff, does not relieve the commission of its responsibility to carry out the intent of Congress to protect shippers from harmful disclosure. The commission must therefore retain administrative discretion to withhold commodity statistics reports from public inspection upon determination that harmful disclosure exists.—Commodity Statistics Reporting—Extend and Disclosure, 323 I.C.C. 131 (135-6)*.

Since such reports fall within purview of the public records requirements of §§16(13), 204(d), and 316(d), the commission's responsibility thereunder must be reconciled with the various statutory provisions prohibiting unauthorized disclosure of shipper information to competitors. The most effective solution is to allow, in addition to the regular reporting, separate reporting of commodity classes involving less than three shippers in a supplemental report which will be withheld from public inspection; but the individual carrier's regular commodity statistics report, which may exclude the less-than-three-shippers categories, will be made available to the public; this plan will avoid the apparent conflict between §§204(d) and 222(e). Therefore,

the provision of 49 CFR §206.7 that "the individual reports filed pursuant to this part will not be open to public inspection" is deleted. —Id., pp. 134, 137, 138.

Section 222. (f), (g), [*§322(f), (g), U.S.C.*] —[Unchanged. See vol. 10, p. 8249, vol. 11, p. 9583; vol. 15, p. 12256.]

Notes of Decisions

§222(g): Volume 16—p. 12924; Volume 18—p. 14651.

§222(g). 25. Falsification of reports, records, drivers' logs.—[Vols. 16, 18].—It is settled beyond a doubt that a corporation may be held criminally liable; that knowledge of employees and agents may be attributed to the corporation; and that their acts may amount to willfulness on part of the corporation. Evidence of filing of false logs by appellant's drivers, consisting of comparison thereof with Colorado port of entry receipts, was properly admitted; although records compared covered trips to Colorado only, such evidence was relevant and material to charges against appellant for falsifications in connection with trips to Colorado, and went to question of willfulness; it also served to negate evidentiary defense that the violations charged resulted from mere negligent or accidental failure to require proper logs, which would not amount to a crime under the regulation cited. Evidence adduced was sufficient to support a finding by the jury of knowing and willful violations by appellant of the commission's regulations pertaining to drivers' logs.—Steere Tank Lines, Inc. v. United States, 330 F. 2d 719 (721-722).

While the statute involved is of the malum prohibitum class, proof of both knowledge and willfulness is required. After properly charging the jury as to the meaning of "knowingly" and "willfully," and stating that it was unnecessary to show an evil or criminal intent, the lower court went into the subject of a corporation acting through agents and employees, and how knowledge was attributed to the corporation, including that gained in course of their work by subordinate employees such as truck drivers. While the charge as given was technically a correct statement of law, it nevertheless may have engendered confusion, ambiguity, and overemphasis, in light of evidence that each of the truck drivers concerned acted for his own benefit; such charge was therefore erroneous because of failure to go further and charge that knowledge sufficient to serve as basis for a finding of a knowing and willful violation would depend on knowledge by agents and employees of the corporation other than the drivers doing the falsifying.—Id., p. 723.

However, an appellate court must determine what the error meant to the jury in relation to all else that happened: an error which does not affect the substantial rights of a party shall be disregarded. Record as a whole shows that the manager of the terminal out of which the violations occurred was appellant's agent and knew of the violations; that, while the drivers falsified the records to make extra money, shortage of sufficient equipment and drivers for the rush of business created a situation inviting falsification, and the "word" to at least one driver was that his job depended on falsifying his log; and that appellant had been repeatedly warned of falsified logs, and had records in its possession, though in separate offices, which would easily have disclosed the falsifications. Thus it affirmatively appears that the error in the charge had only slight, if any, effect on the jury and was harmless. Judgment of the lower court affirmed and rehearing denied.—Id., p. 724.

See also United States v. Handfinger, §204(a)(1), n. 1.

Section 222. (h) [§*322(h) U.S.C.*]—Civil action for fines; amount; service of process; payment of costs and expenses.—[Unchanged, except that by the act of Sept. 6, 1965, Pub. L. 89-170, §3, 79 Stat. 649, the words "shall forfeit to the United States the sum of $100 for each such offense, and, in case of a continuing violation, not to exceed $50 for each additional day during which such failure or refusal shall continue" were stricken from the first sentence and, in lieu thereof, the language set forth below was inserted. See vol. 15, p. 12256.]

* * * or who shall fail or refuse to comply with the provisions of section 203(c) or section 206(a)(1) or section 209(a)(1) shall forfeit to the United States not to exceed $500 for each such offense, and, in case of a continuing violation not to exceed $250 for each additional day during which such failure or refusal shall continue.

Historical Note

The commission recommends that §222(h) be amended so as to (1) extend civil forfeiture provisions therein to unlawful operations and safety violations by motor carriers, (2) permit the commission to institute forfeiture actions directly in the courts, and (3) increase substantially amount of the forfeitures prescribed.—Annual Report, 1962, pp. 206-7; renewed, Annual Report, 1963, p. 20; Annual Report, 1964, p. 75-6.

Regulations of the Commission

32 FR 10794, July 22, 1967, Part 107a: Administrative Collection of Enforcement Claims, new Part 107a, adopting regulations published in 4 CFR Parts 101 through 105, added, effective Aug. 1, 1967.

Section 223 [§*323 U.S.C.*] Collection of rates and charges; extension of credit; liability of agent of beneficial owner.—[Unchanged. See Vol. 10, p. 8250.]

Notes of Decisions

Volume 10—p. 8251; Volume 11—p. 9584; Volume 12—p. 10476; Volume 14—p. 11645; Volume 15—p. 12257; Volume 16—p. 12924; Volume 17—p. 13632.

1. Construction and interpretation.—[Vols. 10, 17].—There can be no doubt that the purpose of the credit provisions in the statute is to prevent discrimination in credit treatment accorded shippers by motor carriers. Thus, in light of the specific statute punishing those carriers who have knowingly engaged in discrimination, purpose of the statute relating to extension of credit to shippers can be effectuated by a prosecution, under §222(c), for knowing discrimination.—United States v. General Expressways, Inc., 270 F. Supp. 115 (117).

See (also) Akers Motor Lines, Inc. v. Lady Cornell Comb Co., §217(b), n. 222.

2. Unfair practice; discrimination effected by extension of credit.—[Vols. 10, 11].—While an information based on a violation of §223 might support a criminal prosecution under §222(c) if it further charged that the extension of credit was intended to accomplish discrimination among shippers, no discrimination is alleged in eight-count information charging motor carrier with having failed to collect freight charges within seven days after delivery of the freight, in violation of the statute and the commission's credit regulations. Indeed, uncontroverted fact that defendant billed the shippers in due time tends to negate any inference of discrimination. The mere failure to receive payment from a shipper within seven days after delivery of freight does not expose the carrier to criminal liability (noting that "liability" as used in §223 ob-

viously refers only to civil liability). Therefore, defendant's motion to dismiss the information, being well taken, is granted.—United States v. General Expressways, Inc., 270 F. Supp. 115 (116-7).

As to alleged violation regarding extension of credit to shippers, record is clear that the commission's regulations have not been observed by respondent carrier; carrier concedes it extended credit beyond period allowed by the regulations. Although that entire area is being reassessed in Ex Parte No. 73 and Ex Parte No. MC-1, past and continuing violations of the regulations cannot be condoned; cease and desist order entered.—Silver Line, Inc., Investigation and Revocation, 96 M.C.C. 173 (174, 176, 177).

5. Practices, in general.—[Vols. 11, 12].—Under proposed rule for time payment of charges for transportation of household goods, shipper applies for credit before movement and carrier transmits the application to a financial institution which agrees to purchase shipper's note upon presentation by carrier, without recourse to carrier; before delivery shipper makes a downpayment of at least 10 percent of the total charges and executes a promissory note to carrier for the balance, and carrier submits the note to the financial institution, which then pays the full amount of the remaining transportation charges. The commission's credit regulations provide that a carrier may, upon taking precautions deemed sufficient, extend credit for 7 days from date of delivery or presentation of the bill, and proposed rule establishes a procedure whereby carrier assures itself of payment of its charges within the period permitted; it extends no further credit, the continuing credit relation being between shipper and the financial institution. Proposed rule thus conforms to the statute and the credit regulations; approved.—Time Payment Plan for Transporting Household Goods, 323 I.C.C. 677 (678-9).

However, proposed rule for determining amount of shipper's note and the required monthly payments deals with matters beyond the commission's jurisdiction. The note reflects the balance owing on the transportation charges, plus cost of the credit, which is given by the financial institution that passes on acceptability of the note and agrees beforehand to purchase it without recourse to the carrier. The additional charges for credit recompense the financial institution for a service rendered by it, not a service of the carrier; they are not charges contemplated by §217, do not refer to a service within scope of the act, and are not in fact charges of a carrier subject to the act. Cancellation required.—Id., pp. 679-80.

Regulations of the Commission

31 FR 6964, May 12, 1966, Part 188: Extension of Credit to Shippers, §188.1 Carrier may extend credit to shippers, revised as set forth, effective July 21, 1966.

31 FR 10076, July 26, 1966, Part 188: Extension of Credit to Shippers, effective date (31 FR 6964) modified to August 29, 1966.

NOTE: For recodification, see 49 CFR, Editorial Note, 32 FR 5606, April 5, 1967.

32 FR 12402, Aug. 25, 1967, Part 288 [formerly Part 188]: Extension of Credit to Shippers, §288.3 Period of credit following delivery of freight, revised, effective Sept. 25, 1967.

Section 224. [§*324 U.S.C.*] Identification plates for interstate motor carriers.—[Unchanged. See vol. 10, p. 8253.]

Amendments, see footnotes, vol. 10, p. 8253; historical notes, vol. 10, p. 8253, vol. 11, p. 9584, vol. 12, p. 10477, vol. 13, p. 11122, vol. 14, p. 11645.

Notes of Decisions

Volume 16—p. 12925.

Section 225. [§*324a U.S.C.*] Allowances to shippers for transportation services.—[Unchanged. See vol. 11, p. 9585.]

Amendments, see footnotes, vol. 11, p. 9585.

Notes of Decisions

Volume 15—p. 12257; Volume 16—p. 12925; Volume 17—p. 13633; Volume 18—p. 14652; Volume 19—p. 15920.

20. Instrumentality or service furnished by shipper.—Proposal that, for an appropriate allowance, shippers may provide a 9-part set of documents including a short form bill of lading, a delivery receipt, a consignee memorandum, an original freight bill, and a shipping order, on shipments moving between trunkline territory and central, northwestern, southwestern, or w.t.l. territory, pertains to matters for which an allowance may properly be paid, since bills of lading and freight bills are instrumentalities of commerce and their supply and preparation are an essential part of the transportation contract. Shipper's performance of those functions constitutes the giving of value to the carrier for which shipper may be recompensed, and fact that it is initial carrier's responsibility to issue shipping documents does not render the proposal unlawful, since it is in recognition of that duty that allowance is to be paid.—Combined Bill of Lading-Freight Bill Allowance, 323 I.C.C. 168 (171).

Proposed allowance, which is open to all shippers on an equal basis, does not constitute a discriminatory rebate, and the record does not establish that it is unnecessary or will create complications on joint-line traffic or difficulty in reconciliation with present systems designed for data-processing machinery. That some shippers now prepare their own bills of lading should not preclude publication of proposed allowance, nor should it be condemned because shippers will themselves realize some benefits from it. Many obvious advantages will accrue to carriers under the proposal, and the commission would be remiss in its duty if it failed to recognize that fact; conversely, possibility that the proposal may create some problems not presently foreseeable does not warrant its condemnation. Proposed allowance is therefore lawful.—Id., p. 173.

25. Compensation contemplated.—[Vols. 16, 18, 19].—Schedules naming proposed plan V TOFC rates provide that shipper and consignee may elect to pick up and deliver a shipment, in lieu of the motor respondent, and receive an allowance of 7 cents per 100 pounds for each service. Under §225 a shipper allowance must be no more than is just and reasonable, and the criterion is the reasonable cost to the shipper; as there is no evidence on that issue, the proposed allowances are not shown to be just and reasonable. Proposed rates disapproved on other grounds.—Rubber Articles, Philadelphia to Ill., Ky., Mich., & Mo., 319 I.C.C. 632 (634).

In considering the reasonableness of proposed allowances, the commission has adhered to the principle that the amount paid (1) should be no more than is just and reasonable for the service or instrumentality furnished, and (2) should not exceed the reasonable cost to the owner of the goods of performing the service or furnishing the instrumentality used; whichever of these sums is the lower marks the maximum the carrier may pay.—Combined Bill of Lading-Freight Bill Allowance, 323 I.C.C. 168 (172).

In determining reasonableness of proposed allowance of 4 cents a set for a 9-part combined bill of lading-freight bill to be supplied and prepared by consignor, the standard to be considered is the cost of a 9-part bill, i.e., the service or instrumentality furnished, not the price of the 2-part bill required by the commission's regulations and classification rule 10; and fact that shipper would retain two parts of the document does not preclude it from receiving an allowance for supplying those parts, since carrier is required to issue the bill of lading and freight bill to the shipper. Level of proposed allowance does not exceed maximum reasonableness, considered in relation to carrier's costs in issuing the documents; irrespective of actual price paid for the set, which depends on the number purchased, carrier's costs, including preparation of the documents, exceed the allowance proposed.—Id., p. 172.

Proposed allowance is also reasonable from standpoint of shippers' costs in purchasing the documents. Since the minimum price of

0.9 cents for a 9-part bill is based on purchase of 4.5 million bills, use of that figure would understate costs to intervener tendering some 250,000 motor carrier shipments a year, and would ignore the obvious fact that, since respondents hold out to serve all shippers, many would doubtless purchase the documents in lots of 5,000 to 100,000, for which the average cost is 7 cents a set, compared with an average cost of 3 cents a set for like quantities of the 2-part bill. Reasonableness of proposed allowance is supported by intervener's evidence, which appears reasonably representative of shipper costs. Approved.—Id., pp. 169, 172.

49. Privately-owned (shipper-lessor) trucks.—[Vols. 15, 18].—That proportional all-commodity rates for movement of shippers' trailers to and from rail terminals, in conjunction with rail plan III TOFC service, produce charges differentially lower than those for similar shipments in normal joint-line motor service does not constitute an allowance for services and facilities furnished by shipper, which violates §225 because not specifically published as such; as the property transported under those rates is the trailer itself, loaded or empty, the trailer is not an instrumentality which carrier is obligated to furnish and for which an allowance must be published.—Proportional Rates between Harrisbury & Points in Pa., 315 I.C.C. 499 (502); Freight, All Kinds, between Harrisburg and Pa. Points, 316 I.C.C. 41 (44).

65. Publication of allowances required.—Vol. 16].—Under proposed per-trailer charges for terminal-to-terminal service, on shipments in carrier-owned trailers, owners of the property would render a loading and unloading service for which they are entitled to publication of a reasonable allowance under §225; such an allowance in excess of shipper's cost would be unjust and unreasonable. —Automobile Parts and Other Articles, Central Territory, 316 I.C.C. 143 (145).

Section 226. [§*325 U.S.C.*] **Investigation of motor vehicle sizes and weights and qualifications and hours of service of employees.**—[Unchanged. See vol. 11, p. 9585.]

Amendment, see footnote, p. 9585; historical notes, p. 9586, vol. 12, p. 10477.

PART III

INTERSTATE COMMERCE ACT; WATER CARRIERS

Chapter 12, Title 49, U.S. Code

Section 301. [§*901 U.S.C.*] **Short title.**—[Unchanged. See vol. 11, p. 9587.]

Section 302. (a), (b), (c), (d) [§*902 U.S.C.*] **Definitions; "water carrier," "common carrier by water."**—[Unchanged. See vol. 11, p. 9588.]

Notes of Decisions

§302(c): Volume 12—p. 10478; Volume 14—p. 11646; Volume 15—p. 12259; Volume 16—p. 12926; Volume 18—p. 14654.

§302(d): Volume 11—p. 9588; Volume 12—p. 10479; Volume 13—p. 11123; Volume 14—p. 11646; Volume 15—p. 12259; Volume 16—p. 12926; Volume 17—p. 13633; Volume 18—p. 14654.

§302(d). 1. Common carrier defined.—[Vols. 11, 15, 16, 18].—Contractual arrangements: [Vols. 12-14, 18].—Transferee authorized to operate as a carrier only by towing vessels in performance of general towage is the towing carrier when the towing is performed by others under contractual arrangements. The contract for towage of shippers' barges is evidenced by transferee's bill of lading, and the towage performed by others under contract with it is incidental to such transportation for the shipper, within exemption of §303(f)(2). And in absence of any pertinent regulations of the commission, transferee may lawfully hire towage under any contractual arrangements not in conflict with other maritime law, regulations, or custom.—Pittsburgh Towing Co.—Certificate Transfer—Zubik, 317 I.C.C. 661 (668, 670)*.

Ownership of vessel or facilities:—[Vol. 12].—Though transferee of authority for towage operations owns no towboats, and towage of shippers' barges is either performed by it with chartered towing vessels or by others under contract with it, there is no requirement in Part III that a water carrier must own or actually operate vessels; the statutory requirement is use of the vessel irrespective of ownership.—Pittsburgh Towing Co.—Certificate Transfer—Zubik. 317 I.C.C. 661 (668)*.

Towage: [Vols. 12, 13].—As a person engaged solely in towage, transferee is a "carrier" for regulatory purposes under Part III; but to fulfill its obligations to its shippers does not require the degree of control over the towing vessel that would be required of a freighting carrier over a cargo-carrying vessel.—Pittsburgh Towing Co.—Certificate Transfer—Zubik, 317 I.C.C. 661 (669)*.

Section 302. (e) [*§902(e) U.S.C.*] "Contract carrier by water."—[Unchanged. See vol. 11, p. 9589.]

Notes of Decisions

Volume 11—p. 9590; Volume 12—p. 10482; Volume 13—p. 11124; Volume 14—p. 11647; Volume 15—p. 12259; Volume 16—p. 12926; Volume 17—p. 13634; Volume 19—p. 15921.

1. Constitutionality.—Provisions of §302(e) which embrace the kind of vessel-furnishing business operated by appellant within statutory term "contract carrier by water," and consequently require one engaged in such business to obtain a permit authorizing such operations, do not offend the Due Process Clause of the Fifth Amendment. Due process requirements are satisfied if the law passed under authority of the Commerce Clause has a reasonable relation to a legitimate legislative purpose and is not arbitrary, capricious, or discriminatory.—Boylan v. United States, 310 F. 2d 493 (496, 498).

Due process does not require Congress to surrender foresight based on its judgment as to reasonable possibilities, or demand that the legislative hand be stayed until an anticipated evil has become a reality or demonstrably inevitable. It is a proper legislative purpose to deal with conditions inimicable to the public interest which, in the judgment of Congress, "might well" come about unless something is done about it. Thus, control of competitive pressure exerted by vessel-furnishers upon regulated water carriers was a proper legislative purpose and the statutory means of doing so—requiring permit authority—has a reason-

able relation to that purpose.—Id., p. 499.

While a long line of cases have held that a lessor of transportation equipment is not a "carrier," persons who furnish vessels to shippers are carriers by statutory definition. It is not significant that Congress chose to so categorize lessors of vessels; it could have termed them "vessel furnishers" and subjected them to the same regulation as contract carriers by water. Where legislative judgment as to reasonableness is questioned, judicial inquiry is restricted to issue whether any state of facts, known or reasonably assumable, affords support therefor; the statute must be deemed to have a reasonable basis in fact unless the contrary is apparent from its face or from facts which may be judicially noted.—Id., p. 500.

Although private lessors of vessels are subject to economic regulation, whereas private lessors of rail and motor transportation equipment are not, and interstate water carriers are in active competition with interstate rail and motor carriers, the Fifth Amendment contains no equal protection clause. At best, appellant calls attention to a lack of uniformity in the way Congress has exercised its power under the Commerce Clause; he has failed to show that lack of uniformity in existing laws is inappropriate to any proper legislative purpose. A legislative body may hit at an abuse which it has found, even though it has failed to strike at another; due process is not violated by §302(e), as applied under facts of record.—Id., pp. 500-1.

5. Contract carrier defined.—[Vols. 11-17, 19].—When appellant, under individual contracts or agreements, furnished his tug for compensation to a construction firm so latter could transport its own property (construction equipment loaded on its barge) in interstate commerce, he was engaging in the business of a "contract carrier by water," as defined in §302(e); such operations are subject to the permit requirements of the act. While it has been held, in a long line of cases, that a lessor of transportation equipment is not a "carrier," a lessor of vessels is a carrier by statutory definition.—Boylan v. United States, 310 F. 2d 493 (495-6, 500).

10. Exemption orders.—Application for order exempting proposed operation as furnisher of vessels to persons engaged in marine construction for use in transporting their own property, denied when service applicant would provide would be substantially competitive with service of existing authorized carriers who offer to transport contractors' equipment and supplies. Moreover, even if the situation were otherwise it is doubtful whether exemption should be granted in view of applicant's apparent lack of concern for the matter of regulation, as evidenced by its past arrangement of unauthorized transportation subject to the act.—Jack Neilson, Inc., Exemption, 321 I.C.C. 664 (677).

Respondent Atlas, holding exemption order as furnisher of a special barge to noncarriers for transportation of their own contractors' machinery and equipment on Mississippi River and tributaries between Vicksburg, Miss., and New Orleans, exceeded scope of that exemption when it leased its barge to respondent Neilson, which contracted with one shipper for movement of latter's property from Gale, Ill., on the upper Mississippi, to Fort Gaines, Ga., on the Chattahoochie, then with another shipper for movement from Coffeeville, Ala., to Port Lavaca, Tex. As a vessel furnisher, Atlas had obligation to ensure that its vessel was used in compliance with terms of its exemption, and its reliance on Neilson's status as an unregulated carrier of exempt commodities did not relieve it of that obligation. By leasing its barge without restriction on its use Atlas engaged in the business of a contract carrier without a permit, in violation of §309(f); cease-and-desist order entered.—Id., pp. 668, 676, 678.

Section 302. (f), (g), (h) [*§902 (f), (g), (h) U.S.E.*]—[Unchanged. See vol. 11, p. 9592.]

Notes of Decisions

§302(g): Volume 13—p. 11125; §302(h): Volume 11—p. 9592; Volume 12—p. 10483; Volume 15—p. 12261; Volume 18—p. 14655.

Section 302. (i) [§*902(i) U.S.C.*]—"Interstate or foreign transportation"—[Unchanged. See vol. 11, p. 9592.]

Historical notes, see vol. 14, p. 11649.

Notes of Decisions

Volume 11—p. 9593; Volume 12—p. 10484; Volume 13—p. 11126; Volume 14—p. 11649; Volume 15—p. 12261; Volume 16—p. 12927; Volume 17—p. 13635; Volume 18—p. 14655; Volume 19—p. 15922.

10. Transportation to or from a foreign country.—[Vols. 12, 14, 15, 17-19].—Canadian water carrier's transportation of passengers and property from Canadian Pacific ports to ports in Alaska is clearly not within meaning of "interstate or foreign commerce" as defined in §302(i)(1); and transportation of passengers and their property who will stay with the ship from the Canadian port of embarkation until its return thereto, with "shore-leave" stops at Alaska ports for sightseeing and other pleasure purposes, is not within definition of that term in §302(i)(3B), since, when passengers are given "shore leave" at one Alaskan place and thence transported to another and again given "shore leave," there is no element of transshipment. "Grandfather" application dismissed.—Canadian Natl. Steamship, 322 I.C.C. 436 (438).

Section 302 (j)—(m) [§*902 U.S.C.*] Definitions.—[Unchanged. See vol. 11, p. 9593, 9594.]

Section 303. (a) [§*903(a) U.S.C.*] Application of provisions; exemptions.—[Unchanged. See vol. 11, p. 9594.]

Section 303. (b) [§*903(b) U.S.C.*] Bulk cargo carriers; commodities.—[Unchanged. See vol. 11, p. 9594.]

Historical note, vol. 14, p. 11649; vol. 19, p. 15923.

Historical Note

The commission renews its recommendation that §303(b) relating to the water carrier bulk commodity exemption be repealed, but with provisions preserving rights of those carriers presently engaged in such operations under the exemption.—Annual Report, 1962, p. 208; Annual Report, 1963, p. 21.

Notes of Decisions

Volume 11—p. 9594; Volume 12—p. 10486; Volume 13—p. 11127; Volume 14—p. 11650; Volume 15—p. 12262; Volume 16—p. 12928; Volume 17—p. 13635; Volume 18—p. 14656; Volume 19—p. 15923.

1. In general.—[Vols. 11-19].—Where carrier A enters into affreightment contract with bulk shipper for through shipment of bulk grain to be transported as a §303(b) exempt tow and tows the barge to an intermediate point where it engages carrier B—authorized

to provide towage—to tow it to destination, and carrier B moves the barge in a mixed tow intermingled with barges of non-bulk commodities, inclusion of non-bulk during any portion of the through trip destroys the §303(b) exemption otherwise applicable to carrier A and subjects its affreightment contract to regulation for the entire trip. Bulk-cargo exemption applies only if bulk and non-bulk commodities are not moved in same tow at any time during entire trip for which exemption is claimed; the price for bulk exemption is no mixing. As carrier A is responsible for entire through trip under its affreightment contract, it cannot claim benefits of the exemption unless conditions of §303(b) are strictly observed throughout the trip; if it engages other carriers for towage, it must see to it that tower complies with those conditions. The commission's ruling, that carrier A is not exempt, sustained.—Gulf Canal Lines, Inc. v. United States, 258 F. Supp. 864 (866-8, 872-3)*.

Discrimination against exempt bargelines in ex-barge rates of rail carriers, see American Barge Line Co. case, §3(4), n. 43.

10. Service incidental to transportation by other carriers.—[Vols. 11-14, 17, 18].—In transferee's arrangements with towing contractors, it is immaterial that it is authorized to operate as a carrier only by towing vessels in performance of general towage. As the contract for towage of shipper's barges is evidenced by its bill of lading, transferee as the bill-of-lading carrier is the towing carrier, and actual performance by others under contractual arrangements with it is "incidental" to its transportation for the shipper, within exemption of §303(f)(2).—Pittsburgh Towing Co.—Certificate Transfer—Zubik, 317 I.C.C. 661 (668)*.

Where one water carrier is employed by

another to tow vessels between specified ports, such incidental towage is transportation by the latter under 303(f)(2).—Hambrick v. American Commercial Barge Line Co., 318 I.C.C. 527 (548).

Section 303. (g) [§*903(g) U.S.C.*] Intraharbor, contiguous harbors; small craft.—[Unchanged. See vol. 11, p. 9600.]

Historical Note

The commission recommends, in view of prohibitions in 18 USC §1001, that the IC Act and various related acts be amended to eliminate the mandatory requirement that certain reports, applications, and complaints be filed with the commission under oath, and that such oath provisions be made discretionary with the commission.—Annual Report, 1962, p. 209; renewed, Annual Report, 1963, p. 21.

Notes of Decisions

§304(c): Volume 11—p. 9604; Volume 12—p. 10493; Volume 13—p. 11130, Volume 14—p. 11652; Volume 15—p. 12264; Volume 16—p. 12928.

§304(c). 5. Classification of groups of carriers.—[Vols. 12-16].—Though transferee of general-towage authority owns no towboats, and towage of shippers' barges is either performed by it with chartered towing vesels or by others under contractual arrangements, Part III does not require a water carrier to own or actually operate vessels; the statutory requirement is use of the vessel. Since transferee's contract to tow a shipper's barge is evidenced by its bill of lading, it is the towing carrier, and towage performed for it by others under contract is incidental to its transportation for the shipper, within exemption of §303(f)(2). Its obligations to its shippers as a tower do not require the degree of control over the towing vessel that would be required of a freighting carrier over a cargo vessel, and its method of operation exclusively or largely with outside towage is not shown to violate any provision of Part III or regulations thereunder.—Pittsburgh Towing Co.—Certificate Transfer—Zubik, 317 I.C.C. 661 (668, 669, 670)*.

Regulations of the Commission

29 FR 4914, April 8, 1964, Part 500: New Subchapter E—Intermodal Transportation, Part 500 Practices of For-Hire Carriers of Property Participating in Trailer-on-Flatcar Service, §§500.1 - 500.8, added, effective July 6, 1964.

29 FR 8421, July 3, 1964, Part 500: Practices of For-Hire Carriers Participating in Trailer-on-Flatcar Service, effective date of order (29 FR 4914) postponed pending further order.

29 FR 11126, July 31, 1964, Part 51: New Part 51—General Requirements, added under the heading Parts 51-59, Consolidation, Finance, and Reorganization, effective Oct. 1, 1964.

29 FR 11273, Aug. 5, 1964, Part 500: Practices of For-Hire Carriers Participating in Trailer-on-Flatcar Service, effective date of order (29 FR 4914) fixed as Sept. 11, 1964.

29 FR 12508, Sept. 2, 1964, Part 500: Effective date of order (29 FR 4914) as amended (29 FR 11273) postponed until further order.

31 FR 8573, June 21, 1966, Part 6, Fees for Service Performed in Connection with Licensing and Related Activities, amended, effective July 22, 1966.

NOTE: For recodification, see 49 CFR, Editorial Note, 32 FR 5606, April 5, 1967.

32 FR 12689, Sept. 1, 1967, Part 600 [formerly Part 500]: Practices of For-Hire Carriers of Property Participating in Trailer-on-Flatcar Service, effective date, except as to §§600.7 and 600.8, is Aug. 18, 1967; §600.7 shall become effective Nov. 16, 1967, and §600.8 shall become effective Feb. 18, 1968.

32 FR 13414, Sept. 23, 1967, Part 106 [formerly Part 6]: Fees, §106.2 Filing fees, amended, effective Oct. 20, 1967.

Section 304. (e)[*§904(e) U.S.C.*] Investigation of complaints; orders.—[Unchanged. See vol. 11, p. 9605.]

Notes of Decisions

Volume 16—p. 12929; Volume 17—p. 13638.

25. Transportation without requisite authority.—Although respondent Neilson contends that it acted as a broker in arranging for transportation of contractors' equipment for two shippers, Part III contains no provisions relating to functions or regulation of brokers of water transportation. Under tests of use of transportation facilities discussed in 250 ICC 639, it appears that Neilson was merely a broker or agent as to that part of the transportation performed for one shipper from Gale, Ill., to New Orleans, since towers who performed the service retained control and use of their towing vessels and the barge obtained by Neilson for shipper's use; but as to remainder of that movement, from New Orleans to Fort Gaines, Ga., and as to the subsequent transportation for the other shipper from Coffeeville, Ala., to Port Lavaca, Tex., Neilson had the right to exclusive use and control of the towing vessel and the barge and was responsible as a carrier within meaning of Part III for the operations conducted thereby.—Jack Neilson, Inc., Exemption, 321 I.C.C. 664 (675, 676).

Regardless of whether Neilson functioned as a carrier or as a broker with respect to all or part of the considered transportation, it acted unlawfully in either capacity, since the transportation was not exempt, and, in engaging unauthorized carriers to perform services which could not lawfully be performed without authority, Neilson, which has no authority, was responsible as an accessory to the unlawful operations. Neilson apparently gave no thought to the matter of authority and made no inquiry in that respect of the towers it engaged. Considering the warning previously given it by a commission representative concerning its unlawful operations, and its more recent use of vessels of others to perform an unauthorized operation itself as a carrier, and in arranging for unlawful operations by the other carrier respondents, Neilson is chargeable with deliberate disregard for the provisions of the act. Cease-and-desist order entered.—Id., pp. 676-7.

None of respondent towing companies—the one engaged by Nielson to tow the barge from Gale to New Orleans, the one which under contract with that carrier towed it from Gale to Vicksburg where it was turned over to the other, and the one engaged to perform the remainder of the towage movements

considered—held any authority to perform the service involved, but either relied on Neilson for the requisite authority or were simply unconcerned with whether authority was required. However, only the first two retained control of their vessels and crews during the portion of the trip performed by each and were responsible as principals for the unauthorized transportation; cease-and-desist order entered against those two.—Id., pp. 670, 676, 678; and as there is no evidence that either shipper knowingly or willfully violated the law, investigation is discontinued as to them, but both are admonished to exercise care in future to employ only carriers holding appropriate authority from the commission.—Id., p. 677.

Modified Procedure

215. In general.—[Vol. 16].—Respondent's motion to strike references in protestants' exceptions to comparison of the parties' rates on ground that it was not permitted to testify concerning rate comparisons at oral hearing, overruled. Comparison of the rates was introduced by protestants in their statement of facts and argument, and respondent did not request cross-examination on the matter; respondent was afforded ample opportunity to present evidence thereon in its statements under modified procedure.—Towing Rates, Pittsburgh Towing Co., 321 I.C.C. 366 (367).

Section 305. (a) [*§905(a) U.S.C.*] Reasonable rates, fares, charges; classifications, regulations, practices.—[Unchanged. See vol. 11, p. 9605.]

Notes of Decisions

Volume 11—p. 9606; Volume 12—p. 10494; Volume 13—p. 11131; Volume 14—p. 11653; Volume 15—p. 12264; Volume 16—p. 12929; Volume 17—p. 13639; Volume 18—p. 14658; Volume 19—p. 15926.

25. Competition considered.—[Vols. 14-19].—Disabilities of Seatrain's rail-water-rail service are not shown to require rates differentially under respondent Sea-Land's in order to share in considered rubber traffic; each service has its own disabilities, which to considerable extent offset each other; moreover, interested shippers testified that Sea-Land's service offers no particular advantage and would not be used at rates higher than Seatrain's. Thus no justification appears for interfering with Sea-Land's effort to meet existing competition; its proposal is to meet, not to go below, Seatrain's rate level; both carriers participated in the traffic at equal rates in the past, and there is no reason to assume they would do otherwise under rate equality proposed; Sea-Land's proposed single-factor rate is shown to be compensatory; approved.—Synthetic Rubber, Baytown and Houston, Tex., to Conn;, 315 I.C.C. 649 (653, 654).

Under former parity of rates on drugs and related articles, both Sea-Land and Seatrain were able to compete effectively for the traffic, but Sea-Land's competitive position was impaired after Seatrain established incentive rates for its rail-water-rail service. As that and Sea-Land's motor-water-motor service appear to be of equal value to volume shippers, who testified that they would not use Sea-Land's service at rates higher than Seatrain's, Sea-land's reduced incentive rates, the same as Seatrain's, on weight of shipments in excess of 40,000 pounds, are competitively necessary and, being fully compensatory, are approved.—Drugs and Related Articles from N.J. and N.Y. to Tex., 318 I.C.C. 67 (76, 77).

28. Reasonableness, relatively.—[Vol. 18].—Although Seatrain seeks a favorable rate differential under Sea-Land's rate on carbon blacks because it is the low-cost carrier, that factor is not controlling when Sea-Land's rate generally meets or exceeds its fully distributed costs and, as it is the same as Seatrain's between points where there is an appreciable movement of that traffic, it does

not appear that Seatrain cannot compete effectively for the traffic. There is little difference in the two services: Seatrain's main operational disadvantage stems from its use of boxcars compared with Sea-Land's use of truck-body containers, and does not justify prescription of a rate differential. Sea-Land's rate found lawful.—Carbon Black from Tex. and La. to N.J. and Pa., 318 I.C.C. 339 (344).

Relative advantages and disadvantages of Seatrain Lines' rail-and-water (boxcar) and Sea-Land Service's motor-and-water (container) services are not such as to warrant differentials in rates on same traffic between same points.—Plastics, Texas to New Jersey, New York, & Pennsylvania, 321 I.C.C. 115 (117).

Evidence; Presumptions; Admissions as to Reasonableness

70. Comparisons of rates, generally.—[Vols. 11, 12, 14, 15, 18].—Comparisons of assailed rates from Pittsburgh district to Tennessee River ports with rates on similar traffic to points on Ohio and lower Mississippi Rivers have little value; size of locks on the Tennessee as compared with the Ohio, also differences in volume and balance of traffic on the three rivers, are operational factors which cannot be ignored; moreover, whereas the Tennessee is a slack-water river, barge tows can be moved down the lower Mississippi with the current and without delay due to locks, at less cost per mile to the carrier than on the other two waterways. Thus, in absence of cost data, rates to the compared Ohio and lower Mississippi points do not represent the maximum level of reasonableness to the Tennessee River ports, and in light of such differences in operating conditions the rate advantage of the lower Mississippi River ports cannot be found undue or unreasonable.—Hambrick v. American Commercial Barge Line Co., 318 I.C.C. 527 (538).

Cost of Service

101. Terminal services.—[Vol. 15].—Charge for local cartage is a direct expense incurred by respondent, not related to through motor-water rate, and therefore not a division of revenues.—Razors and Related Articles, Boston, Mass., to Houston, 318 I.C.C. 97 (99); but instead of using average interline expense for all trailers interchanged at New York, the portion of interline expense which is variable with time the equipment is in possession of connecting carriers should have been developed to reflect any differences in that time attributable to different destinations or lengths of haul.—Id., p. 100.

102. Operating costs.—[Vols. 14-17, 19].—Reduced motor-water-motor rates on weight of shipments of drugs and related articles in excess of 40,000 pounds, from Jersey City-Newark and New York City areas to Texas, are compensatory when to Houston they approximate 152 and 150 percent, and to Dallas 106 and 108 pereent, of fully distributed costs. While such costs were developed on basis of an entire excess weight shipment, such relation of rate to cost was based only on the incentive rate, and a true measure of compensativeness—comparison of costs with weighted average rate for the shipment—would afford even stronger support for compensativeness of considered rates.—Drugs and Related Articles from N.J. and N.Y. to Tex., 318 I.C.C. 67 (76).

Sea-Land's use of territorial average costs of connecting motor-carriers in its cost data appears appropriate because of the number of origins involved and the number of different motor carriers participating in considered joint rate.—Carbon Black from Tex. and La. to N.J. and Pa., 318 I.C.C. 339 (343).

Although respondent's initial intercoastal operations were necessarily of a break-bulk, stopgap nature pending completion of its trailership facilities, its cost study reflecting those operations has material bearing to show compensativeness of considered intercoastal any-quantity class and commodity rates under present more economical trailership operation. Coupled with fact that most of the rates under investigation, particularly on shipments of 2,500 pounds and over, represent increases over prior rates, that study indicates that the considered rates are even more remunerative for trailership service and are reasonably compensatory.—Intercoastal Any-Quantity Class and Commodity Rates, 319 I.C.C. 357 (360, 361).

Seatrain's reduced rates on plastics from Texas to New York and New Jersey points substantially exceed fully distributed costs computed on joint costs of the rail and water carriers; as a majority of the rates are covered by agreements between the parties, that method of costing fully supports finding that those rates are compensatory; and as Seatrain is shown to have a very substantial cushion of profit, and its port-to-port rate is not shown to exceed its costs, both the nonconcurring (combination) rates and the port-to-port rate are also compensatory. Sea-Land's motor-water-motor rates in same amounts as the Seatrain rates are likewise compensatory when they exceed its out-of-pocket costs. Both sets of rates approved.—Plastics, Texas to New Jersey, New York, & Pennsylvania, 321 I.C.C. 115 (118).

Although protestant criticizes Sea-Land's failure to recognize a directional empty movement in its operations, since number of loaded trailers moving northbound from Jacksonville to the port of Newark is greater than the southbound loaded movement, Sea-Land's equal apportionment to its loaded movement of cost of moving empty trailers satisfies the cost principle that vessel costs at sea are by nature joint for the round trip.—Frozen Juice and Fruit from Florida to the North, 319 I.C.C. 577 (589); and though protestant contends that the higher-than-average ownership cost of refrigerated trailers used for considered citrus traffic should, for the southbound movement, be a charge against the northbound traffic, such higher ownership and depreciation costs are joint to all traffic handled in the containers, regardless of direction, and there is no cost-of-service basis for distributing that cost other than equally over the total loaded movements in both directions.—Id., p. 590.

Although no underlying data were presented to show accuracy of amount of $19,286 which protestants claim should be included in respondent's costs of operation with "outside" towage by independent contractors, and their unsupported statement that charges for such towage were currently depressed owing to temporary oversupply of towing service is entitled to little weight, even including that amount and an allowance for profit based on an operating ratio of 95 percent respondent's increased rates for towage of shippers' barges would still generally exceed its costs in connection with outside towage. On that basis, ton-mile expense including allowance for empty return would be 3.142 mills per ton-mile, and the rates for representative movements would exceed fully distributed costs in all but one instance by 2 to 51 cents. Thus the proposed rates are generally compensatory for application exclusively in connection with outside towage.—Towing Rates, Pittsburgh Towing Co., 321 I.C.C. 366 (370).

111. Wages; prices; taxes.—[Vols. 14, 16, 18].—By act of June 28, 1962, §5, provisions of statute imposing 10-percent tax on amounts paid for transportation of persons, 26 USC §4261, were amended so as to apply to such transportation beginning before Nov. 16, 1962. Public Law 87-508, 87th Congress, H. R. 11879.

Rates, by Commodities

125. Commodities; characteristics; rates prescribed or approved.—[Vols. 11-19].—Part I, §1(5), n. 350; Part II, §216(b), n. 125. ***Carbon black:*** Sea-Land's rate, $1.56, minimum 65,000 pounds, by motor-water-motor, on carbon black, in packages or bags, from points in Louisiana and Texas to New Jersey and Pennsylvania points, from Sherlington, La., to the same destinations, and from 4 other Louisiana points to Trenton, N.J., found lawful.—Carbon Black from Tex. and La. to N.J. and Pa., 318 I.C.C. 339.

Coal: [Vols. 11, 17, 18].—Initial joint rail-water rates on coal from Illinois-Indiana mine groups to upper lake ports for transshipment beyond the docks by rail, barge, or truck, ranging from $2.67 to $3.17 per net ton, found not shown to be unjust, unreasonable, or otherwise unlawful.—Chicago, B. & Q. R. Co. v. Chicago & E.I. R. Co., 322 I.C.C. 138*.

Drugs, medicines, toilet preparations: Reduced single-factor motor-water-motor commodity rates on certain acids, chemicals, drugs, medicines, and toilet preparations, 118 cents from Jersey City and Port Newark, N.J., terminals and 138 cents from New York

City and New Brunswick and Wharton, N.J., rate groups to Dallas and Fort Worth, Tex., and 136 and 156 cents, respectively, to Houston, Tex., to apply on weight of shipments in excess of 40,000 pounds, approved as compensatory and no lower than necessary to meet rail-water-rail competition.—Drugs and Related Articles from N.J. and N.Y. to Tex., 318 I.C.C. 67.

Fruits: [Vol. 11].—Increased Sea-Land rate 140.5 cents, minimum 70,000 pounds, on citrus fruits and frozen juices and concentrates from Florida to New York City and points grouped therewith, and $1.40 rate, minimum 31,000 pounds, from Jacksonville, approved as just and reasonable.—Frozen Juice and Fruit from Florida to the North, 319 I.C.C. 577.

Grain, grain products: [Vol. 19].—Joint rail-water rates 28 to 36 cents per 100 pounds on corn and wheat in bulk, based on a fixed quantity booked in advance for water movement, from St. Louis and Illinois and Indiana points on Chicago & E.I.R. to Buffalo, approved as just, reasonable, and otherwise lawful.—Rail-Water, Grain in Bulk, from Mo., Ill., & Ind. to Buffalo, 319 I.C.C. 123*.

Lumber: [Vol. 11].—Common and contract carrier rates on surfaced lumber from certain Oregon and Washington ports, $12 per 1,000 board feet to Los Angeles and $12.50 to San Diego, and $12, $13.25, and $13.75 from Seattle to San Francisco, Monterey, and San Diego, respectively, with rates $2 higher on rough lumber, appear compensatory and otherwise lawful if made subject to agreed conditions fixing a minimum tender of 500,000 board feet, providing for loading charges when vessel is shifted to a second dock at shipper's request to complete loading, and requiring delivery to vessel in sufficient volume for expeditious loading.—Rough and Surfaced Lumber from Oregon to California, 318 I.C.C. 363.

Plastics, products: Reduced water, rail-water, rail-water-rail, motor-water, and motor-water-motor rates on synthetic plastics from Texas origins to New York City rate group, 106 and 101 cents, respectively, on minima 70,000 and 80,000 pounds from Houston and Texas City, and 116 and 111 cents from Freeport, North Seadrift, and Orange, approved as reasonable and not shown to be unlawful.—Plastics, Texas to New Jersey, New York, and Pennsylvania, 321 I.C.C. 115.

Miscellaneous: [Vol. 11].—Truck-water-truck rates of $1.53, minimum 50,000 pounds, and $1.03 on excess in single shipment using not more than 2 vehicles, on various articles, including electric wire and cable, New York City and New Brunswick, N.J. to Houston, Tex., found just and reasonable; will not constitute a destructive competitive practice.—Electric Wire, Cable, from New Yqrk and New Brunswick, 316 I.C.C. 75 (79).

Motor-water incentive rate, 217 cents, on weight in excess of 40,000 pounds on razor blades and related articles from Boston, Mass., to Houston, Tex., approved as compensatory.—Razors and Related Articles, Boston, Mass., to Houston, 318 I.C.C. 97.

Sea-Land Service's local port-to-port and joint single-factor motor-water, water-motor, and motor-water-motor any-quantity class and commodity rates on general freight moving intercoastal between Pacific coast States and New England and middle Atlantic States, made in relation to rates of overland forwarders on same general pattern as rates for Sea-Land's Atlantic coastwise and gulf services, found reasonably compensatory and otherwise lawful; §4 relief granted for the joint commodity rates.—Intercoastal Any-Quantity Class and Commodity Rates, 319 I.C.C. 357.

Rubber: [Vol. 11].—Single-factor motor-water-motor rate 126 cents, minimum 108,000 pounds, on synthetic rubber from Baytown and Houston, Tex., to Bridgeport, East Norwalk, Fairfield, New Haven, Norwalk, Stratford, and West Haven, Conn., found just and reasonable.—Synthetic Rubber, Baytown and Houston, Tex., to Conn., 315 I.C.C. 649.

Sugar: [Vol. 18].—Reduced rates on sugar, minimum 600 tons, from gulf ports to Ohio River crossings, of which rate from New Orleans to Cincinnati, $5.70 per ton or 28.5 cents per 100 pounds, not including transfer from barges to rail cars or trucks, is representative, approved as fully compensatory and otherwise lawful.—Sugar, South to Indiana, Ohio River, Intermediate Points, 319 I.C.C. 782*.

Rates for Special Classes of Service; Practices

420. Towage.—Mileage rates proposed for towage of shippers' barges are not shown to be compensatory; protestants' cost data indicate that they would not meet costs of service, and cancellation of provision requiring shippers to insure cargo and barge could be expected to increase carrier's costs; evidence is inadequate for determining a proper relation between rates for affreightment and for towing services, or a minimum level of rates for respondent on Ohio River; not approved. —Towing Rates between Points on the Ohio River, 315 I.C.C. 583 (584, 586, 587).

Increased bargeload towing rates $1.05 to $2.95 per ton on all commodities, minimum 500 tons, in shipper-owned barges, between points on Ohio River and tributaries, ranging from 59 to 85 percent of protestants' towing rates, are noncompensatory for towage with chartered towboats when costs of chartering a towboat exceed such rates except for the two shortest hauls, but are generally compensatory and on high enough level to enable respondent to conduct a profitable operation when used exclusively in connection with outside towage (performed by others under contractual arrangements), since costs for such movements are in all instances below the proposed rates for representative movements; approved for application exclusively in connection with outside towage. However, as lawfulness of respondent's operating practices is under consideration in another proceeding, it is to be understood that an adverse finding therein would necessarily affect the instant findings.—Towing Rates, Pittsburgh Towing Co., 321 I.C.C. 366.

Rules, Regulations, Practices

460. Demurrage.—[Vols. 15, 18].—See Rail-Water, Grain in Bulk case, §15(7), n. 77a.

529. Tender; loading.— Conditions agreed on by respondents to govern application of rates on lumber and products from Oregon and Washington to California ports, (1) fixing a minimum tender of 500,000 board-feet, to be discharged at not more than two docks at one destination port; (2) providing a charge, when after loading of such minimum at one dock vessel is shifted to a second at same port at shipper's request for loading of a lesser amount, of 50 cents per 1,000 feet on portion so loaded, subject to a minimum charge of $125; and (3) requiring delivery to vessel in sufficient volume for loading at a rate of not less than 100,000 board-feet per hour per gear, constitute an informed judgment of what is operationally desirable and practical for handling the traffic, and would aid materially in developing the stable and economical service to which the public is entitled. Respondents will be expected to incorporate the text of those conditions in revised schedules. —Rough and Surfaced Lumber from Oregon to California, 318 I.C.C. 363 (367-8).

See also Rail-Water, Grain in Bulk case, §15(7), n. 77a.

Section 305. (b) [*§905(b) U.S.C.*] Duty to establish through routes, joint rates; divisions.—[Unchanged except that the new sentence, below, was inserted between the second and third sentences thereof by §2 of act of Aug. 24, 1962, Pub. Law 87-595, 76 Stat. 938. See vol. 11, p. 9612.]

Common carriers by water subject to this part may also establish reasonable through routes and joint rates, charges, and classifications with common carriers by water subject to the Shipping Act, 1916, as amended, or the Intercoastal Shipping Act, 1933, as amended (including persons who hold themselves out to transport goods but who do not own or operate vessels) engaged in the transportation of property in interstate or foreign commerce between Alaska or Hawaii on the one hand, and, on the other, the other

States of the Union, and such through routes and joint rates, and all classifications, regulations, and practices established in connection therewith shall be subject to the provisions of this part.

Notes of Decisions

Volume 11—p. 9612; Volume 12—p. 10495; Volume 13—p. 11131; Volume 15—p. 12267; Volume 16—p. 12931.

2. Construction and interpretation.—[Vols. 11, 12, 16].—Since defendant bargeline affords single-line service on considered traffic from Pittsburgh district to Tennessee River ports and no public need is indicated for through routes and joint rates with another bargeline beyond Paducah, there is no violation of §305(b) in failure to establish such rates.—Hambrick v. American Commercial Barge Line Co., 318 I.C.C. 527 (538-9).

Section 305. (c) [§*905(c) U.S.C.*] Undue preferences or prejudices prohibited.—[Unchanged. See vol. 11, p. 9612.]

Notes of Decisions

Volume 12—p. 10495; Volume 14—p. 11655; Volume 15—p. 12267; Volume 16—p. 12932; Volume 18—p. 14660; Volume 19—p. 15928.

20. Localities.—[Vol. 19].—Although lower Mississippi River ports are shown to be in an advantageous position ratewise, compared with Tennessee River ports, in barge movement of iron and steel articles from Pittsburgh district, complainant has not met its burden of showing such advantage to be undue or unreasonable in light of differences in operating conditions on those waterways, particularly heavier volume of traffic on the lower Mississippi and fact that barge traffic can move downstream with the current and without delay due to locks, at less cost per mile to the carrier than to the Tennessee River ports. Thus there is no sound basis for a preference and prejudice finding.—Hambrick v. American Commercial Barge Line Co., 318 I.C.C. 527 (538, 539).

25. Shippers.—[Vols. 15, 16, 18].—Although forwarders are not specifically included in §305(c), Congress clearly intended a forwarder to stand in a shipper relation to any underlying carrier subject to Part I, II, or III. Complainant forwarder's objection to examiner's ruling that he could not raise issue of undue preference or prejudice in assailed barge rates under that section, and that intervener's attempts to show violation thereof unduly extended issues in complaint proceeding, contrary to Rule 72 of Rules of Practice, sustained.—Hambrick v. American Commercial Barge Line Co., 318 I.C.C. 527 (529).

Section 305. (d) [§*905(d) U.S.C.*] Interchange of traffic.[Unchanged. See vol. 11, p. 9613.]

Notes of Decisions

Volume 13—p. 11132; Volume 14—p. 11656; Volume 15—p. 12268; Volume 17—p. 13640.

Section 306. (a) [§*906(a) U.S.C.*] Schedule of rates, fares, and charges; filing and posting; content.—[Unchanged. See vol. 11, p. 9613.]

Notes of Decisions

Volume 11—p. 9614; Volume 12—p. 10496; Volume 14—p. 11656; Volume 15—p. 12268; Volume 16—p. 12932; Volume 18—p. 14661; Volume 19—p. 15929.

136. Plain and definite statement required.—[Vols. 16, 19].—Part I, §6(1), n. 136; Part II, §217(a), n. 10.—Although freight bills covering two bargeload movements for one shipper were introduced to show that defendant bargeline's multiple bill-of-lading provisions permit individual shippers to perform forwarder services in violation of §411(b), those movements appear to have been multiple shipments by one consignor to more than one consignee, as contemplated by §402(c)(1). However, as defendant's tariff provisions concerning issuance and use of multiple bills of lading are not clear, it will be expected to revise them to prevent misinterpretation.—Hambrick v. American Commercial Barge Line Co., 318 I.C.C. 527 (537).

Section 306. (b) [§*906(b) U.S.C.*] Form and manner of publishing, filing, posting schedules; unlawful use.—[Unchanged. See vol. 11, p. 9614.]

Section 306. (c) [§*906(c) U.S.C.*] Deviation from tariff rates forbidden.—[Unchanged. See vol. 11, p. 9615.]

Notes of Decision

Volume 11—p. 9615; Volume 12—p. 10497; Volume 15—p. 12269; Volume 16—p. 12933; Volume 17—p. 13642; Volume 18—p. 14663; Volume 19—p. 15929.

Section 306. (d) [§*906(d) U.S.C.*] Transportation without published schedules forbidden; change in rates.—[Unchanged. See vol. 11, p. 9615.]

Notes of Decisions

Volume 12—p. 10498.

Section 306. (e) [§*906(e) U.S.C.*] Establishment, filing and publication of schedules and rules affecting rates; notice of changes; deviation from rates forbidden.—[Unchanged. See vol. 11, p. 9616.]

Notes of Decisions

Volume 16—p. 12934; Volume 17—p. 13641.

25. Schedules; publication; content.—[Vol. 16].—Although defendants have not been shown to be conducting motor pickup and delivery service beyond maximum permissible limits of their terminal areas, their tariffs as filed do not adequately describe operations

offered or scope of their terminal areas; present tariffs ordered canceled without prejudice to filing of new tariffs in line with the findings.—Sause Bros. Ocean Towing Co. v. W.R. Chamberlin & Co., 91 M.C.C. 199 (204).

Section 307. (a)-(c) [§*907 U.S.C.*]—[Unchanged. See vol. 11, pp. 9617-8.]

Historical Note

The commission recommends, in view of the prohibitions in 18 USC §1001, that §307(a) be amended so as to eliminate the mandatory oath provision therein, and that such requirement be made discretionary with the commission.—Annual Report, 1964, p. 72.

§307(b). 5. Parties.—Bargeline which did not participate in assailed rates but was employed by another to tow vessels between specified ports was properly dismissed as defendant; such incidental towage is transportation by the employing carrier under §303(f)(2).—Hambrick v. American Commercial Barge Line Co., 318 I.C.C. 527 (528).

Section 307. (d) [§*907(d) U.S.C.*] Establishment of through routes, joint classification, joint rates, fares, etc; differentials.—[Unchanged. See vol. 11, p. 9618.]

Notes of Decisions

Volume 12—p. 10498; Volume 14—p. 11657; Volume 15—p. 12269; Volume 16—p. 12934; Volume 17—p. 13642; Volume 19—p. 15930.

Historical Note

The commission recommends the parts I, II, and III be amended to authorize the commission, after investigation and hearing, when necessary and desirable in the public interest, to require establishment of through routes and joint rates between motor common carriers of property and between those carriers and carriers by rail, express, and water.—Annual Report, 1962, p. 201; renewed, Annual Report, 1963, p. 19, Annual Report, 1964, p. 69.

100. Joint rates, fares, and charges.—[Vols. 15-17, 19].—See Candy and Confectionery from N.J., N.Y., & Pa. to Tex., §15a(3), n. 2; and Rail-Water, Grain in Bulk case, §15a(3), n. 2; §307(g), n. 10.

150. Differentials.—[Vols. 15-17, 19].—Seatrains' contention that it must have differentially lower rates than Sea-Land to offset various disabilities claimed to make rail-water-rail service less attractive than motor-water-motor is not substantiated; interested shippers testified that they consider those services similar, and that Sea-Land could not share in the traffic involved except on rate parity with Seatrain. Determination of the low-cost carrier is not important in passing on reasonableness of Sea-Land's reduced incentive rates on drugs and related articles when they exceed its fully distributed costs and do not go below level of Seatrain's incentive rates or fully distributed costs; in those circumstances, requirement of a differential is not warranted.—Drugs and Related Articles from N.J. and N.Y. to Tex., 318 I.C.C. 67 (76-7).

Section 307. (e) [§*907(e) U.S.C.*] Commission to establish just divisions of joint rates, fares, or charges; adjustments.—[Unchanged. See vol. 11, p. 9619.]

Notes of Decisions

Volume 12—p. 10499.

Section 307. (f) [§*907(f) U.S.C.*] Transportation needs and fair return considered in determining rates, etc.—[Unchanged. See vol. 11, p. 9620.]

Historical notes, see vol. 11, p. 9620, vol. 12, p. 10499.

Notes of Decisions

Section 307. (g) [§*907(g) U.S.C.*] New rates; determination of lawfulness by commission.—[Unchanged. See vol. 11, p. 9621.]

Notes of Decisions

Volume 11—p. 9622; Volume 12—p. 10499; Volume 16—p. 12937; Volume 19—p. 15932.

10. Burden of proof.—[Vols. 11, 17, 19].—Part I, §15(7), n. 35; Part II, §216(g), n. 5—Investigation having been instituted before effective date of proposed rates, burden is on proponent to show that they are just and reasonable, notwithstanding discontinuance of suspension. That burden is not met when the only evidence bearing on their compensativeness indicates that they would not meet operating costs of the service. Respondent's request for further hearing to submit additional evidence is denied when petition fails to establish that such evidence would reveal any material change in or addition to facts already of record.—Towing Rates between Points on the Ohio River, 315 I.C.C. 583 (584, 586, 587).

To come under the protection of the act against unfair or destructive competition, a motor carrier or forwarder protesting proposed water-carrier rates must first establish that it possesses a cost advantage, or must bear the consequences of its failure to do so.—Intercoastal Any-Quantity Class and Commodity Rates, 319 I.C.C. 357 (361).

Joint rates published by water carrier for rail-water movement of bulk grain are initial rates as to which protestants have the burden of proof. There have been no through combination rates subject to the act on considered movements, since water respondent's port-to-port rates applicable on packaged grain require issuance of a separate bill of lading, and its past transportation of bulk grain has been under §303 exemption. Rail respondent's concurrence in its tariff did not bring the joint rates within purview of §15(7) so as to impose a burden of proof on the water carrier, since exemption initially lost thereby renders the publication "initial," though water carrier's status is "changed," now being subject to regulation. Otherwise, a new or exempt water carrier could never file in the first instance joint rates with rail connections without subjecting itself to limitations not of its own making, but imposed on it solely because of the form of publication and fact that the railroad is already subject to rate regulation; this would be a subversion of substance to form of publication.—Rail-Water, Grain in Bulk, Mo., Ill., and Ind. to Buffalo, 321 I.C.C. 564 (565-6)*.

It is significant that, while both §15(7) and §307(g) provide expressly for suspension and/or investigation of "a new rate," which encompasses both changed and initial, each places the burden of proof on the proponent

only of a "changed" rate. Distinction between meaning of the two terms is readily apparent from the exception from provisions of §307(g) of any "initial" schedule filed before a specified date, and further support for this distinction is found in similar provisions of §§216(g), 218(c), 307(i), and 406(e). Thus, within the entire statutory framework there is consistently recognized an express difference between an "initial" and a "changed" rate, and express identification of the parties on whom the burden of proof falls. This view is consistent also with provisions of §7(c) of Administrative Procedure Act, whereby the proponents of an order, such as protestants of an "initial" rate proposal, have the burden of proof.—Id., pp. 566-7. [But see dissent.]

See also Terminal Charge on Order Bills of Lading Shipments, §216(g), n. 5.

15. Orders as to suspended rates.—[Vol. 19].—Since §307(g) authorizes the commission to investigate new rates or regulations, with or without suspension, it has no burden under §7(c) of Administrative Procedure Act to show lawfulness of order discontinuing suspension and continuing investigation of proposed rates.—Towing Rates between Points on the Ohio River, 315 I.C.C. 583 (586).

27. Particular issues; reasonableness.—[Vol. 16].—Proposed rates in connection with truck-water-truck services provide for utilization of two containers per shipment; however, rates subject to a minimum weight in excess of the physical or legal carrying capacity of the motor vehicles are not unlawful per se, and are not contrary to law merely because they are on the same basis as rail incentive rates.—Electric Wire, Cable, from New York and New Brunswick, 316 I.C.C. 75 (77).

In determining compensativeness of proposed incentive rate on weight of shipments in excess of 40,000 pounds, protestant's comparison of respondent's costs for average excess weight of 15,000 pounds with rate applicable to that excess lacks probative value because (1) the incentive rate is inoperative until the 40,000-pound minimum has been exceeded and thus cannot stand alone, and (2) assuming 55,000 pounds to move without additional loading of the containers with other freight, costs should be computed on equal division of weight between the two containers, on which basis protestant's cost estimate is well below the normal rate and the incentive rate. Proper comparison is between aggregate revenue from a shipment with aggregate cost of that shipment; on that basis revenue from a 55,000-pound shipment would exceed fully distributed cost by almost 50 percent; approved.—Razors and Related Articles, Boston, Mass., to Houston, 318 I.C.C. 97 (100-1).

Sea-Land's proposed rates on citrus fruits and juices from Florida to New York metropolitan group are just and reasonable when they are fully compensatory and protesting motor carriers have not shown that they have an inherent cost advantage in competing with Sea-Land.—Frozen Juice and fruit from Florida to the North, 319 I.C.C. 577 (597).

See also Rough and Surfaced Lumber case, §307(h), n. 25.

Section 307. (h), (i) [*§907 (h), (i) U.S.C.*] —[Unchanged. See vol. 11, pp. 9622, 9623.]

Historical Note

The commission recommends, in view of the prohibitions in 28 USC §1001, that §307(h) be amended so as to eliminate the mandatory oath provision therein, and that such requirement be made discretionary with the commission.—Annual Report, 1964, p. 72.

Notes of Decisions

§307(h): Volume 16—p. 12938; §307(i): Volume 11—p. 9624.

§307(h). 25. [Vol. 16].—What considered in determining reasonableness.—[Vol. 16].—Since in the water carrier lumber trade on Pacific coast there are none of the traditional distinctions between contract and common carriers, rules and regulations gov-

erning the service should apply equally to all. Conditions agreed on by respondents to govern application of rates on lumber and products from Oregon and Washington to California ports, (1) fixing a minimum tender of 500,000 board-feet, to be discharged at not more than two docks at one destination port; (2) providing a charge, when after loading of such minimum at one dock vessel is shifted to a second at same port at shipper's request for loading of a lesser amount, of 50 cents per 1,000 feet on portion so loaded, subject to a minimum charge of $125; and (3) requiring delivery to vessel in sufficient volume for loading at a rate of not less than 1,000 board-feet per hour per gear, constitute an informed judgment of what is operationally desirable and practical for handling such traffic.—Rough and Surfaced Lumber from Oregon to California, 318 I.C.C. 363 (365, 367-8).

However, since one respondent is the only carrier serving certain small Oregon ports, and, though a minimum exceeding 150,000 board-feet would work hardship to small mills shipping through those ports, it would be uneconomical to enter them for less than 500,000 board-feet, the minimum tender rule in that carrier's schedule should be modified by a pooling or consolidation rule which would permit two or more shippers at those ports to combine in offering the requisite minimum quantity at one time and place. Subject to publication in revised schedules of the agreed conditions as thus modified, respondent's rates of $12 per 1,000 board-feet to Los Angeles and $12.50 to San Diego appear compensatory and otherwise lawful.—Id., p. 368.

§307(i) 7. Reduced rates; charges.—Proposed reduced rates on lumber from Washington and Oregon points, $12 per 1,000 board feet to Los Angeles and $12.50 tq San Diego, appear compensatory and otherwise lawful if made subject to agreed conditions fixing a minimum tender of 500,000 board-feet, providing for loading charges when vessel is shifted to a second dock at shipper's request to complete loading, and requiring delivery to vessel in sufficient volume for expeditious loading.—Rough and Surfaced Lumber from Oregon to California, 318 I.C.C. 363 (367-8).

Section 308. (a) [§*908(a) U.S.C.*] Reparation awards; limitation of actions; "carrier".—[Unchanged. See vol. 15, p. 12272.]

Amendment, see footnote, vol. 15, p. 12272; historical notes, see vol. 14, p. 11568.

Notes of Decisions

Section 308. (f) [§*908(f) U.S.C.*] Limitation of actions.—[Unchanged. See vol. 18, p. 14664.]

Notes of Decisions

Volume 17—p. 13644.

Section 308. (g) [§*908(g) U.S.C.*] Joinder of parties; process; judgment.—[Unchanged. See vol. 11, p. 9626.]

Section 309. (a) [§*909(a) U.S.C.*] Certificates of public convenience and necessity; water carriers in bona fide operation on January 1, 1940.—[Unchanged. See vol. 11, p. 9627, vol. 19, p. 15933.]

Notes of Decisions

Volume 11—p. 9628; Volume 12—p. 10500; Volume 13—p. 11134; Volume 14—p. 11659; Volume 15—p. 12274.

1. Construction and interpretation.—[Vols. 11-14].—Section 27(b) of Alaska Statehood Act specifically provides that nothing therein or in any other act shall be construed as depriving Federal Maritime Commission of its preexisting exclusive jurisdiction over common carriage by water between Alaska and other U.S. ports, or as conferring such jurisdiction on Interstate Commerce Commission, and the subsequent amendments of §309 conferred "grandfather" rights on water common or contract carriers engaged on the critical date in interstate or foreign commerce between points in Alaska "over any inland waterway, other than the high seas." As all applicant's operations between Washington and Alaska ports are performed with ocean-going vessels which because of their draft cannot directly tie up or anchor in many of the Alaska ports served, necessitating transfer of cargo to and from shallower draft vessels at a convenient and safe anchorage, and in other instances its vessels proceed directly to the dock or anchorage at a river port without stopping at other points on the river, its operations are conducted on the high seas, with traversal of navigable inland waterways only as an incident thereto.—Alaska Steamship Co., 325 I.C.C. 196 (198-9).

And lighterage operations of applicant's Lomen Division are performed, not between points on inland waterways, but between shipside and shore installations. Its barge operations between Alaska points are also performed by use of the high seas, and no service is shown to be provided in transportation of shipments from and to points wholly on any inland waterway without traversing in part the high seas. Therefore, neither applicant's common carrier operations nor the common and contract carrier operations of its Lomen Division are shown to have been conducted between Alaska points over inland waterways within meaning of the amendments to §309. Applications dismissed.—Id., p. 199.

Under §309(a) and (f), as amended by Pub. Law 86-615, July 12, 1960, the commission's jurisdiction over water carrier "grandfather" operations between points in Alaska attaches only if they are conducted over inland waterways, rather than the high seas. Thus, issue presented in Alaska "grandfather" application proceeding is the effect on the jurisdictional question of the order of Jan. 19, 1952 (33 CFR 82.275), issued by the Commandant of the Coast Guard, of which official notice is taken, wherein he designated as "inland" all the waters plied by applicant. The Act of Feb. 19, 1895 provided for special rules for navigating certain United States harbors, rivers, and inland waters; inland navigation rules and

pilot rules apply in accordance with lines dividing the high seas from inland waters which are established by the Commandant of the Coast Guard; and 33 CFR 82.2 provides a general rule for distinguishing inland waters from the high seas for the purposes of applying inland or international rules of navigation.—Erickson and Wolf Alaska "Grandfather" Application, 325 I.C.C. 276 (277).

Moreover, the court said in 173 Fed. 426, in commenting on the line prescribed pursuant to the 1895 statute, that purpose of the legislation was for delimiting United States inland waters in order to inform navigators where inland navigation rules, as distinguished from the international rules, become applicable; and that it did not purport to change boundaries of a particular federal district, nor enlarge the jurisdiction of any particular federal court. Accordingly, it is clear that the navigational boundary line established by the Commandant of the Coast Guard with respect to the waters involved in applicant's "grandfather" proceeding would not fix, change, or limit statutory jurisdiction of Federal regulatory agencies. And there is no doubt that, in the Alaska Statehood Act, Congress intended to withhold from the commission jurisdiction over transportation by water which had previously been conferred on the Federal Maritime Board (now the Federal Maritime Commission).—Id., p. 278.

Therefore, since the examiner properly weighed the criteria which should determine regulatory jurisdiction over considered transportation, his conclusions that waters plied by applicants in conducting their operations are "inland waterways, other than the high seas," within meaning of the Alaska "grandfather" amendments to §309(a) and §309(f), and that the service involved is not subject to the certificate or permit requirements of part III of the act, are affirmed. As the commission is without jurisdiction over water carrier operations involved, the application is dismissed.—Id., pp. 278, 280-3.

50. Bona fide operation.—[Vols. 11-15].—Since operation by corporate applicant's predecessor-in-interest as a water common carrier of property between ports of call in southeastern Alaska, as described in the application, was not conducted over "any inland waterway, other than the high seas," within the meaning of the so-called Alaska "grandfather" amendment to §309(a), the service involved is not subject to certificate requirements of the statute. Although the Commandant of the Coast Guard has classified as "inland" the waters plied by applicant, all waters involved are tidal waters and a substantial portion are classed as coastal waters by the U.S. Customs Service. While applicant's operations are wholly between coastal ports in Alaska, it was recognized in 173 Fed. 426 that, notwithstanding fact that a port may be within territorial waters of a State, it may still be on the high seas. The commission is without jurisdiction over the operations involved; application dismissed.—Erickson and Wolf Alaska "Grandfather" Application, 325 I.C.C. 276 (278, 280-3).

Section 309. (b) [*§909(b) U.S.C.*] Application for certificate; form and contents.—[Unchanged. See vol. 11, p. 9631.]

Historical Note

The commission recommends, in view of the prohibition in 28 USC §1001, that §309(b) be amended so as to eliminate the mandatory oath provision therein, and that such requirement be made discretionary with the commission.—Annual Report, 1964, p. 72.

Notes of Decisions

Volume 11—p. 9631; Volume 12—p. 10505; Volume 13—p. 11137; Volume 14—p. 11660; Volume 15—p. 12274; Volume 16—p. 12938; Volume 17—p. 13645; Volume 18—p. 14666; Volume 19—p. 15934.

15. Filing application; scope of issues; parties.—[Vols. 11-13, 16-19].—Inasmuch as portions of Arkansas and Verdigris Rivers over which applicant proposes to conduct barge operations are not now navigable and will not be so until completion of approved waterway projects in 1970 at the earliest, application is dismissed as premature, without prejudice to filing of another application at a more appropriate time. As in other consolidated applications, voluntary withdrawal was sought without success, and issues at hearing were necessarily limited to fitness and ability of each applicant to conduct operations in the reasonably foreseeable future. Handling of those matters has consumed time, effort, and expense that should have been directed to more useful purposes; applicants are therefore admonished to withhold filing of applications in future until it can be established with certainty that the operations can be commenced within a reasonable period, otherwise summary dismissal of such applications will be considered.—A & O Barge Line, Inc., 321 I.C.C. 343 (345).

Section 309. (c) [*§909(c) U.S.C.*] Issuance of certificate to qualified applicants.—[Unchanged. See vol. 11, p. 9632.]

Historical Note

The commission recommends that part III of the act be amended so as to provide for revocation of water carrier certificates or permits for nonuse.—Annual Report, 1964, p. 62.

Notes of Decisions

Volume 11—p. 9632; Volume 12—p. 10506; Volume 13—p. 11137; Volume 14—p. 11661; Volume 15—p. 12275; Volume 16—p. 12939; Volume 17—p. 13645; Volume 18—p. 14666; Volume 19—p. 15934.

5. Competition.—[Vols. 12-19].—Carriers already in the field are entitled to transport all the traffic they can handle adequately, efficiently, and economically, without competition of a new service; applicant has failed to establish by convincing evidence that existing water carriers cannot or will not meet supporting shippers' reasonable transportation needs between points involved; extension authority denied.—Moran Towing & Transp. Co., Inc., Extension, 315 I.C.C. 591 (596)*.

25. Necessity, demand for service, in general.—[Vols. 11-19].—Decision in the Schaeffer case, 355 US 83, did not make consideration of comparative rates mandatory in application proceedings. While the Supreme Court noted therein that lower rates may be a factor for consideration as an inherent advantage, it also indicated that, where such advantages exist, the commission must consider whether on the balance public interest would be better served by additional competitive service. Evidence of shippers and other water carriers supported the commission's conclusion that present or future public convenience and necessity would be served by grant of certificate permitting extension of applicant's water-carrier service from Atlantic ports to Tampa, Fla., thereby improving service to shippers whose commodities are inherently suited for barge movement; sustained.—Atlantic Coast Line R. Co. v. United States, 202 F. Supp. 456 (459-61)*.

While it might be arguable that the type of single-line through service plaintiff seeks to provide would be an improved and better service, for which there is present or future need, the commission's conclusion that evidence failed to establish need for proposed operations is also clearly rational. Much of the evidence pertained to conjectural future use of such service, if offered, and there is in fact no showing that present interline service is inadequate; sustained.—A.L. Mechling Barge Lines, Inc. v. United States, 218 F. Supp. 837 (839)*.

Need for applicant's proposed freighting service from New York and New England

ports to ports on Great Lakes is not established when opposing water carriers have shown that they can provide transportation without transfer of lading, and none of supporting shippers has investigated or used the freighting service of such carriers. One shipper's support apparently arises from satisfactory nature of applicant's towing service, rather than any need for additional freighting service; other shippers' evidence is vague and there is no certainty they would use the service if authorized; denied.—Moran Towing & Transp. Co., Inc., Extension—Great Lakes, 315 I.C.C. 591 (595)*.

26. Fitness; financial ability.—[Vols. 11-19].—Applicant has not shown that it can and will conduct proposed operations along Arkansas and Verdigris Rivers prior to completion of waterway project approved by Congress. Its proposal to operate shallow-draft towboats and barges on now open portions of Arkansas River and to portage towboats and cargoes around damsites under construction by piggyback truck service is indefinite and hazy; it is not shown to have now available any vessels of type to be used, or to have tested feasibility of transporting commercial cargoes on present waters of Arkansas River; nor has it presented any details of its plan for portaging around construction sites or shown feasibility of such combined operations. Application dismissed as premature.—A & O Barge Line, Inc., 321 I.C.C. 343 (344-5).

Section 309. (d) [§*909 (d) U.S.C.*] Specifications of routes, ports; extension of routes; restriction on additions to equipment.—[Unchanged. See vol. 11, p. 9633.]

Notes of Decisions

Volume 12—p. 10510; Volume 13—p. 11139; Volume 14—p. 11663; Volume 15—p. 12276; Volume 16—p. 12942; Volume 17—p. 13650; Volume 18—p. 14670; Volume 19—p. 15937.

20. Extension over unfinished portions of waterways.—[Vols. 12-19].— Although Congress never authorized any specific project to extend navigation on Licking River, maintenance of the navigable portions thereof was specifically authorized, and construction of Markland locks and dam on Ohio River resulted in the Markland Pool, of which the Licking forms a part above the dam, water levels of the Locking being controlled by level of that pool; as a direct result, the normal pool level of the Licking was increased and the limit of practicable navigation on that river extended from 3 to 18.3 miles. As applicants' operation son the Licking were connected with their operations on the Ohio, and service on the navigable portion of the Licking is a normal extension of their past service along that river, they are entitled to operate over the new segment under the proviso of §309(d).—Ohio River Co. Extension, 322 I.C.C. 731 (732-3).

Section 309. (e) [§*909(e) U.S.C.*] Certificate not to confer proprietary or exclusive rights in waterways.—[Unchanged. See vol. 11, p. 9634.]

Section 309. (f) [§*909(f) U.S.C.*] Permit essential to operation; carriers in bona fide operation on January 1, 1940.—[Unchanged. See vol. 19, p. 15938.]

Notes of Decision

Volume 11—p. 9635; Volume 12—p. 10511; Volume 13—p. 11140; Volume 14—p. 11664; Volume 15—p. 12277.

2. Construction and interpretation.—[Vols. 12-15].—Insofar as immediate effect of requirement that persons who furnish vessels to a shipper for compensation, for shipper's use in transporting its own property in interstate commerce to obtain a permit may be advantageous to established common and contract water carriers, and the same is warranted as a means of attaining objective of the national transportation policy.—Boylan v. United States, 310 F. 2d 493 (499).

See also Erickson and Wolf Alaska "Grandfather" Application, §309(a), n. 1.

Section 309. (g) [§*909(g) U.S.C.*] Application for permit; form and contents; issuance of permit; terms and conditions.—[Unchanged. See vol. 11, p. 9636.]

Notes of Decisions

Volume 11—p. 9636; Volume 12—p. 10512; Volume 13—p. 11141; Volume 14—p. 11666; Volume 15—p. 12278; Volume 16—p. 12942; Volume 17—p. 13651; Volume 18—p. 14670.; Volume 19—p. 15939.

Historical Note

The commission recommends, in view of the prohibitions in 28 USC §1001, that §309(g) be amended so as to eliminate the mandatory oath provision therein, and that such requirement be made discretionary with the commission.—Annual Report, 1964, p. 72.

18. Conditions imposed; scope stated in permit.—[Vol. 16].—Though defendants' authority for freighting service, in which carrier furnishes both cargo space and motive power, does not authorize towage operations, in which carrier provides only the motive power, its publication of allowances for use of shippers' barges does not alone constitute prima facie evidence of an offering to engage in unauthorized towage operations, and evidence does not establish that it performed an unauthorized towage service when, before publication of the allowances, it leased contracting shipper's barge on occasions when it had no suitable equipment of its own. Moreover, defendant's allowances are fixed amounts unrelated to size of shipment and do not appear designed to meet level of competitive towage rates. No violation of its permit or of §309(f) is shown; 278 ICC 417 and 285 ICC 75, distinguished.—Coyle Lines, Inc. v. Warrior & Gulf Nav. Co., 318 I.C.C. 583 (586-7).

25. Necessity, demand for service, in general.—[vols. 11-19].—Under the contract-carrier provisions of Part III, applications have generally been denied upon showing that existing carriers could provide the type of service required by shipper; however, extension authority has been granted shipper-owned carriers which gear their services to their parent companies in interest of efficiency and economy, and authority has also been granted where it has been shown that applicant would provide low-cost transportation, that its equipment is especially adapted to shipper's needs, and that protestants have not furnished reasonably adequate service.—Warrior & Gulf Nav. Co. Extension, 322 I.C.C. 261 (264-5).

34. Extension of operations.—[Vols. 14-17].—Extension authority granted applicant for points along Atlantic coast between Fort Pierce and Cape Kennedy, Fla., to permit extension of an efficient and economical service geared to needs of its parent shipper for transportation of iron and steel articles from Port Birmingham, Ala., and Orange, Tex., to additional consuming points. It is advantageous to shipper to deal with applicant as its alter ego rather than with two or more carriers for movement of its products from the mills to consuming points, and though protestants can provide a joint-line service in some respects similar to that of applicant, they have not shown that it would be as economical or so

geared to shipper's production schedules as fully to meet its overall needs. As protestants are now shown to have handled any of traffic involved, grant will not materially affect them.—Warrior & Gulf Nav. Co. Extension, 322 I.C.C. 261 (265).

Section 310. [§*910 U.S.C.*] **Dual operations under certificates and permits.**—[Unchanged. See vol. 11, p. 9638.]

Amendment, see footnote, vol. 11, p. 9638.

Notes of Decisions

Volume 11—p. 9638; Volume 12—p. 10512; Volume 13—p. 11142; Volume 14—p. 11666; Volume 18—p. 14671.

1. In general.—[vols. 11-14, 18].—Contract carriage by applicant of iron and steel articles for its parent shipper from Port Birmingham, Ala., and Orange, Tex., to points along Atlantic coast between Fort Pierce, Fla., and Cape Kennedy will not be competitive with its certificated operations. However, though resulting dual operations are approved, right is expressly reserved to reconsider that issue at any future date should the situation change so as to bring about an improper competitive situation, discrimination, or preference.—Warrior & Gulf Nav. Co. Extension, 322 I.C.C. 261 (265-6).

Section 311. (a), (b) [§*911 U.S.C.*] **Temporary operations.**—[Unchanged. See vol. 11, p. 9638, vol. 15, p. 12279, vol. 16, pp. 12943—4.]

Notes of Decisions

Volume 12—p. 10513; Volume 13—p. 11142; Volume 14—p. 11667; Volume 15—p. 12280; Volume 16—p. 12944; Volume 18—p. 14671.

Section 312. [§*912 U.S.C.*] **Transfer of certificates and permits.**[Unchanged. See vol. 11, p. 9639.]

Historical Notes, see vol. 15, p. 12280, vol. 16, p. 12945, vol. 17, p. 13652, vol. 19, p. 15940.

Notes of Decisions

Volume 13—p. 11143; Volume 14—p. 11667; Volume 16—p. 12945; Volume 17—p. 13632; Volume 18—p. 14671; Volume 19—p. 15940.

5. Transfers, in general.—[Vols. 14, 16-18].—In action to set aside and annul the commission's approval of application for transfer of considered water carrier certificate, the court cannot accept the commission's refusal to heed its own regulations governing transfer of such certificates and the clear evidence before it of applicants' attempt to deceive the commission for purpose of changing the ownership, not just the form of ownership, of the certificate and effectively circumventing the commission's transfer rules. Legislative regulations, created by a Federal agency pursuant to congressional authority, have the force of law, and the agency promulgating a rule is as bound by its terms as is the general public; therefore, the commission itself being bound by its rules and regulations, any action taken by it is invalid unless the rules pertaining to the action are followed.—Mississippi Valley

Barge Line Co. v. United States, 252 F. Supp. 162 (165-6)*.

The transfer regulations require that copy of all contracts or other written documents pertaining to proposed transfer be filed with the application; that, if operations are not being conducted at the time, it must be shown that suspension of operations was due to circumstances over which holder of the authority had no control, and that operations under certificate sought to be transferred would be consistent with public interest; and that applicant submit information to show that proposed transferee is fit, willing, and able properly to perform the services authorized. However, option agreements entered into by transferor and corporate transferee's sole stockholder, which show that actual purpose of the transfer was to change ownership of the certificate (not merely to change the form of ownership), were not filed with the application; there was no showing that transferor's suspension of operations was caused by circumstances beyond his control; and there was no information in the application showing that transferee was in any way financially fit to carry on operations authorized by the certificate.—Id., pp. 165, 166.

In addition, transferor's statement in his notice to competitors, that he was owner of transferee corporation, is completely refuted by the record. The commission allowed a concealment and violation of its rules in the transfer application and, after subsequent hearings resulted in an examiner's recommendation that the transfer be denied, it refused to accept the examiner's findings. The commission cannot ignore its own rules under the facts before it; therefore, in view of the regulations and the record, the commission's orders approving transfer of the certificate are set aside and annulled.—Id., pp. 164, 165.

10. Transactions under §5.—[Vols. 13, 14, 19].—Since approval under §5(2) for merger of a regulated water carrier into parent lumber company would encompass transfer of former's certificate, that part of application seeking authority under 312 is dismissed.—Weyerhaeuser Co. Merger, 312 I.C.C. 778 (781)*.

Regulations of the Commission

28 FR 12336, Nov. 22, 1963, Part 306: Transfers of Certificates and Permits, 306.4 Required exhibits, amended by deleting therefrom paragraph (f); and §306.6 Procedure, paragraphs (b) and (c) amended to read as set forth, effective Jan. 1, 1964.

Section 312a. [*§912a U.S.C.*] **Revocation of certificates and permits.**—(1) Certificates and permits shall be effective from the date specified therein, and shall remain in effect until suspended or revoked as provided in this section.

(2) Any certificate or permit issued under this part may, upon application of the holder thereof, in the discretion of the Commission, be amended or revoked, in whole or in part, or may, upon complaint, or on the Commission's own initiative, after reasonable notice and opportunity for hearing, be suspended, changed, or revoked, in whole or in part, for willful failure to comply with the provisions of section 305(a) with respect to performing, providing, and furnishing transportation upon reasonable request therefor: *Provided, however,* That no such certificate or permit shall be suspended, changed, or revoked under this paragraph (except upon application of the holder) unless the holder thereof, fails to comply, within a reasonable time, not less than thirty days, to be fixed by the Commission, with a lawful order of the Commission, made as provided in section 304(e) of this title, commanding obedience to the provisions of section 305(a) with respect to per-

forming, providing, and furnishing transportation upon reasonable request therefor. (Sept. 6, 1965, Pub. L. 89-170, §8(a), 79 Stat. 652.)

Section 13. (a) [§*913(a) U.S.C.*] Accounts, records and reports.— [Unchanged. See vol. 11, p. 9639, vol. 15, p. 12280.]

Amendments, see footnotes, vol. 15, p. 12281; historical notes, see vol. 12, p. 10330, vol. 13, p. 11032, vol. 14, note to § 20(1), p. 11543; vol. 19, p. 15940.

Historical Note

The commission recommends, in view of the prohibitions in 18 USC §1001, that §313(a) be amended so as to eliminate the mandatory oath provision therein, and that such requirement be made discretionary with the commission.—Annual Report, 1964, p. 72.

Regulations of the Commission

28 FR 695, Jan. 26, 1963, Part 301: Reports, §301.20, Annual Report Form M prescribed for use by maritime carriers beginning with year ended Dec. 31, 1962.

30 FR 997, Jan. 30, 1965, Part 301: Reports, §301.10 Annual reports for Class A and Class B water carriers on inland and coastal waterways, Inland and Coastal Waterways Annual Report Form K-A (Class A and Class B water Carriers) prescribed for use commencing with year ended Dec. 31, 1964.

Section 313. (b) [§*913(b) U.S.C.*] Copies of contracts, agreements, to be filed.—[Unchanged. See vol. 11, p. 9640.]

Notes of Decisions

Volume 16—p. 12945.

Section 313. (c) [§*913(c) U.S.C.*] Uniform system of accounts.— [Unchanged. See vol. 11, p. 9640.]

5. In general.—Though shortened tax-depreciation lives authorized by Internal Revenue Service will result in much larger tax-depreciation deductions in early years of service lives of facilities than book depreciation computed under commission accounting rules, neither that nor investment tax credit permitted by Revenue Act of 1962 warrants changes in present accounting rules or the commission's statement of policy dated February 9, 1959, that actual Federal income taxes payable for each year, based on effective tax regulations for the year, shall be recorded in the tax accounts of carriers' books of account and in financial statements. But present requirement for disclosure in carriers' annual

reports of tax reductions for accelerated depreciation will be extended to apply to those attributable to tax-depreciation guideline lives, as well as investment tax credit.—Accounting for Federal Income Taxes, 318 I.C.C. 803 (805, 807-8).

29 FR 19107, Dec. 30, 1964, Part O: Order of Nov. 24, 1964 (29 FR 16087) corrected to substitute "accountants" for "accounts" wherever latter appears therein.

Section 313. (h) [§*913(h) U.S.C.*] Definitions.—[Unchanged. See vol. 15, p. 12282.]

Amendments, see footnotes, vol. 15, p. 12282.

Section 314. [§*914 U.S.C.*] Allowances to shippers for transportation services.—[Unchanged. See vol. 11, p. 9643.]

Notes of Decisions

Volume 12—p. 10517; Volume 15—p. 12282; Volume 16—p. 12946; Volume 18—p. 14673.

15. Carrier's right and duty to furnish instrumentality and service.—[Vols. 15, 18].—A carrier authorized to engage in freighting service (which does not include towage operations) is not prohibited from using shippers' barges as part of its equipment, provided arrangements for such use are reasonable and otherwise lawful. The test is whether shippers' barges would be used as part of defendant's equipment or received as part of con-

signment to be towed. Defendant's publication and maintenance of allowances for use of shippers' barges does not alone constitute an offering to engage in unauthorized towage operations, and evidence does not establish that it has in fact done so in leasing shipper's barge when it had no suitable equipment of its own.—Coyle Lines, Inc., v. Warrior & Gulf Nav. Co., 318 I.C.C. 583 (585, 587).

50. Publication of allowances required.—[Vols. 12, 15, 16, 18].—Where contract carrier leases shipper's barge for performance of authorized freighting service, existence of an executed charter party would not relieve it from requirement of §314 to publish its allowances as a part of its schedule.—Coyle Lines, Inc., v. Warrior & Gulf Nav. Co., 318 I.C.C. 583 (588).

Section 315. (a), (b) *[§915 (a), (b) U.S.C.2*—[Unchanged. See vol. 11, pp. 9643, 9644.]

Section 315. (c) [*§915(c) U.S.C.]* **Suspension and modification of orders.**—[Unchanged. See vol. 11, p. 9644.]

Historical note, vol. 14, p. 11668.

Notes of Decisions

Volume 13—p. 11144; Volume 14—p. 11668; Volume 16—p. 12946; Volume 17—p. 13653; Volume 19—p. 15941.

20. Certificates; permits.—[Vols. 13, 14, 16, 17, 19].—The commission's power under §315(c) to suspend, modify, or set aside its orders under Part III is circumscribed by prevailing standards of fair procedure. Where an unopposed application for transfer of a water-carrier certificate has been granted and the transaction consummated, clear and convincing evidence that approval was induced by willfully misleading evidence in regard to some vital matter is required before the order may be set aside. Moreover, if the order approving the transfer was properly entered and the conditions for issuance of the certificate in transferee's name fully complied with, the certificate became vested in transferee, and the commission has no power to revoke any water carrier certificate. Even if transferee's subsequent operations were found in an appropriate proceeding to be unlawful, only an order to compel compliance would be issued.—Pittsburgh Towing Co.—Certificate Transfer—Zubik, 317 I.C.C. 661 (666, 668)*.

Section 315. (d) [*§915(d) U.S.C.*] **Time when orders take effect; continuance in effect.** [Unchanged. See vol. 11, p. 9644.]

Notes of Decisions

Volume 13—p. 11145; Volume 16—p. 12946.

Section 315. (e) [*§915(e) U.S.C.*] **Compliance with orders.**—[Unchanged. See vol. 11, p. 9644.]

Section 316. (a)-(d). [*§916(a)-(d) U.S.C.*]—[Unchanged. See vol. 11, pp. 9645, 9646.]

Notes of Decisions

§316(c) Volume 16—p. 12947.

Section 317. (a)-(f) *[§917(a)-(f) U.S.C.]* **Unlawful acts and penalties; Rebates, concessions; false billing; false reports; disclosure of information.**—[Unchanged. See vol. 11, pp. 9647—9649.]

Historical note, see vol. 12, p. 10474.

Notes of Decisions

§317(f): Volume 12—p. 10515.

§317(f). 5. Disclosure of information to shipper's competitor.—[Vol. 12].—See Commodity Statistics Reporting—Extent and Disclosure, §222(e), n. 3.

Sections 318, 319. *[§§918, 919 U.S.C.]*—[Unchanged. See vol. 11, pp. 9650, 9652.]

Section 320. *[§920 U.S.C.]* **Repeals.**—[Unchanged. See vol. 11, p. 9652.]

Notes of Decisions

Volume 12—p. 10516; Volume 14—p. 11669; Volume 19—p. 15942.

2. Construction and interpretation.—[Vols. 12, 14, 19].—The commission has not promulgated any rules or regulations applying to the hiring of towage by water carriers; therefore, under §320(d), a carrier holding towage authority may lawfully hire towage under any contractual arrangements not in conflict with other maritime law, regulations, or custom.—Pittsburgh Towing Co.—Certificate Transfer—Zubik, 317 I.C.C. 661 (670)*.

Sections 321, 322. *[§§921, 922 U.S.C.]*—[Unchanged. See vol. 11, pp. 9653, 9654.]

Section 323. *[§922a U.S.C.]* **Recording of evidences of equipment indebtedness.**—Any mortgage (except mortgages under the Ship Mortgage Act, 1920, as amended), lease, equipment trust agreement, conditional sale agreement, or other instrument evidencing the mortgage, lease, conditional sale, or bailment of one or more vessels, used or intended for use by a carrier subject to this part in interstate commerce or any assignment of rights or interest under any such instrument, or any supplement or amendment to any such instrument or assignment (including any release, discharge, or satisfaction thereof, in whole or in part), may be filed with the Commission, provided such instrument, assignment, supplement, or amendment is in writing, executed by the parties thereto, and acknowledged or verified in accordance with such requirements as the Commission shall prescribe; and any such instrument or other document, when so filed with the Commission, shall constitute notice

to and shall be valid and enforceable against all persons including, without limitation, any purchaser from, or mortgagee, creditor, receiver, or trustee in bankruptcy of, the mortgagor, buyer, lessee, or bailee of the vessel covered thereby, from and after the time such instrument or other document is so filed with the Commission; and such instrument or other document need not be otherwise filed, deposited, registered, or recorded under the provisions of any other law of the United States of America, or of any State (or political subdivision thereof), territory, district, or possession thereof, respecting the filing, deposit, registration, or recordation of such instruments or documents: *Provided, however,* That nothing contained in this section shall, in any way, be construed to alter or amend the Ship Mortgage Act, 1920, as amended. The Commission shall establish and maintain a system for the recordation of each such instrument or document, filed pursuant to the provisions of this section, and shall cause to be marked or stamped thereon, a consecutive number, as well as the date and hour or such recordation, and shall maintain, open to public inspection, an index of all such instruments or documents, including any assignment, amendment, release, discharge, or satisfaction thereof, and shall record in such index the names and addresses of the principal debtors, trustees, guarantors and other parties thereto, as well as such other facts as may be necessary to facilitate the determination of the rights of the parties to such transactions. (Oct. 17, 1968, Pub. L. 90-586, §1(2), 82 Stat. 1149.)

Section 324 [1] *[§923 U.S.C.]* **Separability of provisions.**—[Unchanged. See vol. 11, p. 9656.]

[1]Section 323 was renumbered section 324 by Pub. L. 90-586, §1(1), Oct. 17, 1968, 82 Stat. 1149.

Notes of Decisions

Volume 12—p. 10516; Vol. 13—p. 11147; Volume 14—p. 11670; Volume 15—p. 12285; Volume 16—p. 12947; Volume 17—p. 13654; Volume 18—p. 14674; Volume 19—p. 15943.

1. Freight forwarder defined.—[Vols. 12-19].—Freight forwarders and motor carriers are not the same: under definition of a forwarder in §402(a)(5) as a person which "otherwise than as a carrier" subject to Part II holds out to the public and utilizes services of carriers subject to Parts I, II, or III, a freight forwarder is one who hires independent common or contract carriers.—Shippers Cooperative, Inc. v. I.C.C., 308 F. 2d 888 (891)*.

While freight forwarders are authorized to, and ordinarily do, assemble, consolidate, break-bulk, and distribute the consignor's freight, challenged volume commodity rate tariff is not unlawful because under its terms forwarders need not actually perform all those functions; tariff contemplates certain variations from ordinary procedures, and offers shipper reduced charges contingent upon degree of variation. Forwarders proffer all the services they are authorized to perform but that is the extent of their obligation. If some consignors or consignees wish to have less than the proffered service, no statute and no public policy prevent such arrangements being authorized by the commission.—National Motor Freight Ass'n., Inc. v. United States, 205 F. Supp. 592 (595-7)*.

In enacting Part IV, Congress recognized that services of freight forwarders are definitely in public interest, and safeguarded their place in the overall scheme of regulated transportation insofar as lay within its power. Unlike Parts II and III, Part IV does not distinguish between common and contract carriers: all forwarders subjected to economic regulation are uniformly described as persons which hold out to the general public as common carriers to provide transportation of property for compensation, and legislative history of Part IV establishes that Congress did not intend to exclude from licensing provisions thereof those persons which, like motor contract carriers, restrict their for-hire services to a limited number of shippers.—Atlanta Shippers Assn., Inc.—Investigation, 316 I.C.C. 259 (273, 275)*.

A group or association of shippers may not lawfully handle nonmembers' shipments which have no connection with or fundamental relation to the business of its shipper-members; whenever the freight consolidating and distributing services performed by such a group or association on nonmembers' shipments are supplied with a purpose to profit from the effort itself, as distinguished from a purpose merely to obtain for its members the benefits of c.l., t.l., or other volume rates, the operation is in substance a common-carrier freight forwarding service for compensation.—Id., p. 278.

And if any person or persons other than the shipper-members of a group or association actually control, or even possess the right or privilege to control, the freight consolidation and distribution services, it is they and not the shippers who through the purported association perform such activities; the operation thus conducted in name of the shippers (or group or association) is in substance a common-carrier forwarding service for which authority is required. In such circumstances the controlling persons will be regarded as having assumed the necessary responsibility for the transportation from point of receipt to destination within meaning of the forwarder definition; and the same conclusion obtains where persons other than shipper-members of the association bear the essential risks and burdens of the consolidating and distributing operations.—Id., p. 279.

Whether particular activities constitute a for-hire freight forwarding service or are bona fide consolidating and distributing operations by a nonprofit group or association of shippers can be resolved only after consideration of all facts and circumstances in each case. Surface appearances and similarities are neither conclusive nor significant; all essential elements must be considered together in light of the broad remedial purposes of the statute

in relation to the governing criteria embraced in its multiple provisions.—Id., p. 283.

Facts and circumstances surrounding organization and continuing operation of respondent ASA as a purported shippers' association establish that it was designed to benefit respondent Kilgore and his family; Kilgore dominated its organization and at the outset caused it to adopt a corporate charter and bylaws which preclude its apparent shipper-members from exercising any control over its policies and functions, and he continues to control and manage its activities through a sympathetic board of governors appointed without approval of the "shipper-members"; he financed its operations initially, solicited traffic and members, created a rate structure which would aid in such solicitation, and established a pattern of operations which has never changed except on his "recommendation"; and the "shipper-members" assume none of the risks and burdens normally assumed by shippers acting together to obtain cheaper transportation. ASA's activities constitute in substance a for-hire forwarding operation subject to the act.—Id., pp. 281-2.

Respondents ASA, the two Kilgores, ABW (which they control), Paramount, and Consolidated—the last three of which perform the physical operations at Atlanta, New York-Philadelphia, and Chicago—by knowingly participating in the overall scheme revealed are jointly providing a complete freight-forwarding service for compensation. Although their activities are conducted under color of §402(c)(1), operations of bona fide shippers' associations, which by nature are initiated by the shippers themselves, require no such complicated schemes as are disclosed. Record establishes beyond dispute that respondents, acting in concert under a coordinated plan, the plain purpose of which is to evade requirements of the act, hold out to the general public a common-carrier forwarder service without authority from the commission, in violation of §410(a).—Id., pp. 267, 282, 283.

Respondents Paramount and Consolidated participated in the arrangements, not as agents for ASA's shipper-members, but as agents for Kilgore (who clearly acted as an independent entrepreneur), and thus undertook to perform services which he as their principal could not lawfully perform. Relations between the several respondents resulted in a kind of partnership or common interest in which each member is the agent of all, so that the act of one in furtherance of the common object is the act of all. Respondents thus constitute in effect a single person within meaning of Part IV, and all are as responsible for violating its provisions as if each had conducted the entire operation individually; cease-and-desist orders entered against all six respondents.—Id., pp. 282-3, 289.

Though it is argued that Kilgore at all times acted as employee of ASA under delegation of authority by its membership and board of governors, evidence is clear and convincing that he was an independent actor, having full control over the questioned operations and responsibility for providing the consolidation and distribution services received by shipper-members, and his financing of the original operations is plainly inconsistent with any employee or agent status. Subsequent organizational changes whereby Kilgore relinquished his various titles and installed his son as manager of ASA were mere changes in form which would not warrant a different conclusion, since members continue to look to him for continuing functioning of "their" association; and he has profited not only in salaries for himself and his immediate family, but also through his proprietary interest in ASA's distribution agent. Finding that operations performed in name of ASA are in substance an unauthorized freight-forwarder service, affirmed.—Id., 322 I.C.C. 273 (291-2)*.

Absence of a formal agency relation between respondents respectively performing consolidation and distribution service on pool-barge shipments does not require independent consideration of their operations; §402(a)(5) neither explicitly nor by implication requires existence of such a relation between participants in a through transportation service, but by defining a forwarder as one who holds out "to transport or provide transportation" recognizes that forwarders often accomplish their complete-service undertaking

by means of informal arrangements with other participants.—Southern Bonded Warehouse Co.—Investigation, 318 I.C.C. 345 (355).

Respondents have participated jointly in a common plan or enterprise to effect for-hire transportation, in which under doctrine of 245 US 229 each is the agent of all, thus constituting a single person within meaning of §402(a)(5). Nor are form and manner of issuing bills of lading or assessing terminal charges of controlling significance in determination of forwarder status; any other conclusion would be inconsistent with purposes of Congress in subjecting the forwarder industry to economic regulation.—Id., pp. 355, 356.

Applying criteria of a bona fide shippers' association announced in 316 ICC 259 to facts in instant investigation, the freight consolidating, shipping, and distributing operations performed in name of respondent FSA constitute in substance and reality a complete freight forwarder service provided jointly by the several respondents for compensation and without authority from the commission; evidence clearly shows that FSA's apparent shipper-members, in obtaining from respondents the same physical transportation service (albeit at lower cost) as they would receive from a regulated forwarder, do not control, direct, or dominate the activities in question or bear the essential risks and burdens of conducting such operations. Cease-and-desist order entered against all respondents, and companies named, which though not named as respondents are shown to have participated in conduct of the operations involved, are admonished to discontinue their participation.—Federal Shippers Assn., Inc.—Investigation, 316 I.C.C. 523 (526-7)*.

The essential functions of a freight forwarder are to assemble, consolidate, break bulk, and distribute the consignor's freight; in addition, it assumes responsibility for transportation of the property from point of origin to point of destination. It is not shown that operations of defendant holding out a consolidation service permitting use of plan III TOFC service include all the essential functions of a forwarder or that it assumes responsibility for the through transportation. It accepts only one loaded trailer at a time from a shipper, which it "mates" or "marries" with another shipper's trailer moving to same destination, and disclaims any responsibility for a shipment it is to "marry" until it executes a rail bill of lading for the TOFC movement; that disclaimer is affirmed by testimony of a motor carrier representative that such carrier assumes all responsibility for the inbound movement to the railroad ramp and is paid direct by shipper for such movement. Thus, it cannot be said that defendant's operations are not confined to the terminal area where the trailers are "mated."—Natl. Motor Freight Traffic Assn. v. Delaware Valley, 323 I.C.C. 560 (562, 571-2)*.

Concerning break-bulk and distribution, there is no showing that defendant's business and that of the distributor which delivers shipments to consignees are not wholly separate or that each of their services and responsibilities are not confined to their respective terminal areas; if anything, the facts tend to show that defendant has no connection with or control over the distributor. Further, the record is devoid of any evidence that shippers using defendant's service look to it for overall responsibility for their traffic; to the contrary, in case of damage claims by shippers, defendant merely furnishes them the original bill of lading, with instructions to resolve the matter with the carriers involved. Notwithstanding any implication in the factual situation that defendant is performing a forwarder service, complainants have not adduced sufficient evidence to permit an affirmative finding that defendant's business is that of a forwarder within §402(a)(5); and it follows that the railroad providing the TOFC service and its subsidiary which furnishes trailers to defendant cannot be found to be aiding or abetting it in any violation of Part IV.—Id., pp. 572-3.

Among the requisites of a freight forwarder as defined in §402(a)(5) are (1) that the forwarder service begin at point of receipt of shipment and continue to point of ultimate destination, and (2) that it receive compensation for the total service performed; and §413 provides that the forwarder shall be deemed both the receiving and delivering transportation company for purposes of §20(11). Receipt of shipments from, or delivery to, a connecting carrier under circumstances ap-

proximating or amounting to mere interchange between carriers is not the receiving or delivery of freight contemplated by those sections of the act.—Alaska Freight Lines, Inc., v. Puget Sound Tug & Barge, 94 M.C.C. 376 (379).

Though defendant water carrier consolidates shipments at its dockside terminal and issues through bills of lading between Seattle and interior Alaska points, shipments originating at or destined to points beyond Seattle or Seward are received from or delivered to land carriers at those ports; there is no privity of contract between defendant and the actual shipper or consignee whereby defendant assumes full responsibility for safe transportation of shipments from point of receipt from shipper to ultimate destination; and it does not receive as compensation the total charges for the through movement. Where several carriers thus participate in the transportation there is a joint undertaking; defendant's responsibility begins and ends at Seattle or Seward, and its participation is merely that of a connecting common carrier. And on shipments originating at Seattle and destined to Seward its service is only that of the actual transporting water carrier. Its services are therefore not those of a forwarder subject to Part IV.—Id., pp. 377-8, 379-80.

A shipper association that is not controlled by its members may fall within the definition of a freight forwarder even though the services rendered are performed exclusively for its members and do not profit the organization per se. Mere reimbursement for expenses of operation of such an association has been held to constitute "compensation" or "compensation" may involve profit, through various means, to nonshippers in control of an association. Likewise, the holding out of service to a limited number or class of shippers, as distinct from all of the general public, maybe a holding out within §402(a)(5) if the association is not otherwise bona fide.—Natl. Motor Frt. Traf. Assn., Inc., v. Internatl. Shippers, 94 M.C.C. 440 (444).

When members of a purported shipper association, while enjoying benefits of a complete transportation service at volume rates, do not control the association but instead allow a purported agent or employee to control it, they have invested the latter with the basic characteristics of an independent entrepreneur, and as such the operations of the purported agent or employee, if otherwise within the definition of a freight forwarder, are subject to the licensing requirements of Part IV.—Natl. Motor Frt. Traf. Assn., Inc. v. Mfrs. Shipping Assn., 322 I.C.C. 205 (215).

Lack of knowledge of important matters pertaining to organization and activities of defendant MSA on part of shipper representatives, officers, and board members supports the reasonable inference that the board is merely a rubber stamp for recommendations of defendant Tiefenthal, MSA's vice-president in charge of operations, and that he actually controls the organization. It is apparent that Tiefenthal is in reality an unauthorized forwarder acting in MSA's name; it is he who profits from the involved operations, not only from his "compensation," but also from rental of equipment to MSA by a corporation which he controls through stock ownership, and from fact that latter can "marry" its relatively insignificant amount of freight to that of MSA; and MSA's services are held out to the public by solicitations and through telephone-book listings. Cease-and-desist order entered.—Natl. Motor Frt. Traf. Assn., Inc. v. Mfrs. Shipping Assn., 322 I.C.C. 205 (216).

Defendant Lincoln not only manages defendants PBS and CSA, but shipper-members of both associations clearly have delegated or abandoned to him whatever power of control they ever had, and have invested him for all practical purposes with the characteristics of an independent entrepreneur, providing services physically identical to those of regulated forwarders. His compensation for conducting forwarding operations in their name includes not only his income from CSA and PBS, but, since success of their operations and those of another "nonprofit" corporation of which he is executive secretary depends materially on continued operation of each, also includes his income from latter corporation to a material degree. His unauthorized forwarder services are held out to members and prospective members whose traffic will benefit his operations, and mere fact that they are not held out to all of the general public does not preclude a

finding of a holding out within meaning of §402(a)(5). Cease-and-desist order entered.—Natl. Motor Frt. Traf. Assn., Inc. v. Piggy Back Shippers, 322 I.C.C. 190 (201, 202-3).

In enacting §402(c) as an exception to or clarification of §402(a)(5) and (7), Congress recognized that while most shippers may prefer to have their shipments consolidated, forwarded, and distributed by others on a for-hire basis, and to pay for such service by sharing with them the savings from volume shipment, others desire to participate in mutual nonprofit pool-car or pool-truck activities and secure for themselves the benefits of volume rates. Those statutory provisions constitute a functional delineation between transportation "services" intended to be regulated and "operations" not to be regulated, and in clear language forbid the purchase and sale of all unlicensed freight forwarding service regardless of methods or procedures employed. Determination of whether any particular transportation function is a forwarding service subject to the act entails careful and complete analysis of all facts and circumstances surrounding its performance, and compliance with the regulatory requirements cannot be evaded by subtle arrangements or shades of form if the substance and basic nature of the operation brings it within purview of the law.—Atlanta Shippers Assn., Inc.— Investigation, 322 I.C.C. 273 (277-8)*.

See also Dal-Worth Shippers Ass'n., Inc. case, §402(c), n. 15.

Air freight forwarders follow the general pattern set by surface forwarders subject to part IV in that they assemble shipments for expedited movement, consolidate them, perform distribution service, and assume responsibility for the transportation from point of receipt to point of delivery; the only difference is that the air forwarder uses a direct air carrier and the surface forwarder uses only surface forms of transportation.—Special Delivery, Inc., Extension, 88 M.C.C. 275 (277); Nickerson, 88 M.C.C. 186 (187); and such forwarders are defined and classified by Civil Aeronautics Board as indirect air carriers. [9 CAB 473; 14 CFR 296.2(a).]—Panther Cartage Co. Extension, 88 M.C.C. 37 (40).

Since the forwarder definition in §402(a)(5) includes one who utilizes for any part of the transportation the services of a carrier subject to Part II, it follows that air freight forwarders which use the services of a motor carrier for transportation requiring operating authority from the Commission are subject to provisions of Part IV.—Nickerson, 88 M.C.C. 186 (187); Special Delivery, Inc., Extension, 88 M.C.C. 275 (277).

Air forwarder service on traffic moving to and from points beyond the published terminal areas of air carriers, where shipper is normally charged the forwarder's rates between air terminals and the motor carrier's published charges to or from the air terminal city, is similar to that furnished by direct air carriers through connection with motor carriers; shipping documentation clearly apprises shipper that a connecting service is being performed and that the air forwarder has no carrier responsibility for the shipment while it is under the motor carrier's control. Such operations do not constitute surface freight forwarding under part IV of the act. Air freight forwarders' assumption of carrier responsibility for shipments the motor transportation of which does not fall within the §203(b7a) exemption, however, would result in institution of surface forwarding operations in violation of the licensing provisions of part IV.—Motor Transp. of Property Incidental to Air, 95 M.C.C. 71 (88-90)*.

Section 402. (a)(6)-(8) [*§ 1002(a) (1)-(8) U.S.C.*]—[Unchanged. See vol. 11, p. 9657.]

Notes of Decisions

Volume 12—p. 10517; Volume 13—p. 11148; Volume 14—p. 11671.

SERVICE

§402(a)(7). 1. Construction and interpretation.—Since §402(a)(7) excepts from service subject to Part IV only that part in which motor transportation within exemption of §203(b7a) is utilized, an air-freight forwarder utilizing motor carriers for service not within exemption, and which therefore requires authority from the commission, is itself subject to provisions of Part IV.—Panther Cartage Co. Extension, 88 M.C.C. 37 (40,42). Therefore air forwarders desiring to use motor carriers' service between airports and points beyond terminal areas of underlying air carriers (which is not within exemption of §203(b7a)) must obtain permits as surface forwarders from the commission.—Air Cargo Terminals, Inc., Extension, 88 M.C.C. 468 (470); Nickerson, 88 M.C.C. 186 (188).

See also Motor Transp. of Property Incidental to Air, §402(a)(5), n. 1.

A customs brokerage service is not related to, and therefore not a part of, that service which the act contemplates will be rendered by a freight forwarder.—Frank P. Dow Co., Inc., Extension, 322 I.C.C. 103 (115).

"Service subject to this part," as used in the permit requirement of §410(a), is defined in §402(a)(7) to cover everything the freight forwarder does, in connection with forwarding by surface facilities, in the course of his undertaking to the shipper whom he serves.—Atlanta Shippers Assn., Inc.—Investigation, 322 I.C.C. 273 (275)*.

Section 402. (b) [§ *1002(b) U.S.C.*] Exemptions.—[Unchanged. See vol. 11, p. 9658.]

30. Household goods.—[Vols. 12, 14, 18, 19].—See Routed Thru-Pac, Inc. v. United States, 28 USC §2325, n. 27.

Section 402. (c) [§ *1002(c) U.S.C.*] Exemptions.—[Unchanged. See vol. 11, p. 9658.]

Historical notes, vol. 16, p. 12948; vol. 17, p. 13655; vol. 18 p. 14676; vol. 19, p. 15945.

Historical Note

The commission recommends that §§203(b5) and 402(c) be amended to provide that agricultural cooperatives and shipper associations, respectively, shall be entitled to exempt status thereunder only upon application and proof of eligibility.—Annual report, 1962, p. 201; renewed, Annual Report, 1963, p. 19; Annual Report, 1964, p. 76.

The commission recommends that §402(c) be amended to require groups or associations of shippers to satisfy the commission that they are bona fide shipper associations before they begin opeations.—Annual Report, 1965, p. 77.

Notes of Decisions

Volume 12—p. 10518; Volume 13—p. 11148; Volume 14—p. 11672; Volume 15—p. 12286; Volume 17—p. 13655; Volume 18—p. 14676.

2. Construction and interpretation.—[Vol. 15].—Exemption of §402(c) is specifically restricted to associations of freight forwarders and does not extend to an association of carriers; and a freight forwarder is by definition one who hires independent carriers; thus, that

exemption does not apply to operations of a nonprofit corporation which performs an over-the-road transportation service for its members.—Shippers Cooperative, Inc. v. I.C.C., 308 F. 2d 888 (891)*.

Legislative history of the statute, as well as its language, clearly would justify the commission's treatment of §402(c) as a "clarifying provision" rather than as a true exemption from §402(a)(5).—National Motor Freight Traffic Ass'n v. United States, 242 F. Supp. 601 (605)*.

Though forwarders and shippers are to an extent engaged in similar activities, they are separated by sharply defined differences in operation, which Congress clearly recognized and provided for in the Freight Forwarders Act; §402(c) clearly evinces a strong Congressional policy that the regulation envisioned by the act not encroach on or restrict the right of shippers to join together to gain for themselves the savings of volume rates. However, shipper associations, unlike forwarders, do not hold out to the general public but perform services only for their dues-paying members, and do not assume common-carrier responsibility for the shipment from point of assembly to point of destination; and, since a true shipper association is a nonprofit cooperative association, the members bear the burdens as well as share the benefits of its operation, bearing expenses of the consolidation and distribution operation as well as sharing in any surplus monies that remain in the association's treasury at the end of the year.—Freight Consolidators Cooperative, Inc. v. United States, 230 F. Supp. 692 (696)*.

In view of the strictures imposed on freight forwarders as distinguished from shipper associations, it is perfectly clear that great competitive advantages would accrue to an organization if it could free itself of the burdens of compliance with the applicable regulations, by the self-styled title of shippers association or otherwise, for purpose of engaging in the business of freight forwarding. To tolerate such a situation would be repugnant to the Congressional intent and would create a fertile field for unscrupulous entrepreneurs. One who does all the things a forwarder does is subject to regulation, no matter what he may call himself; the Interstate Commerce Act, including the forwarder provisions, is remedial in nature, and exceptions to its regulatory plan are to be strictly construed; one claiming benefit of an exception to such a statute has the burden of proving that he comes within such exception.—Id., pp. 697, 698-9.

While §402(c) exempts nonprofit shippers' associations from economic regulation, it does not give such an association carte blanche authority to operate without the properly prescribed commission procedure. A nonprofit association of freight forwarders would be exempt, but an association of carriers would not; and a freight forwarder is defined as one who hires an independent carrier. Thus, the §402(c) exemption does not apply to defendant association which operated its own vehicles, leased for the trip, to transport its members' goods.—I.C.C. v. International Shippers Ass'n of New Jersey, Inc., 249 F. Supp. 66 (68, 69-70)*.

On further consideration, practice whereby traffic of respondent shippers' association is coloaded with that of another such bona fide association, for interstate TOFC movement, is found to be a lawful service within §402(c); however, it does not necessarily follow that all operations of such an association are exempt from regulation merely because a bona fide shippers' association is involved. Respondent occasionally coloads its interstate traffic with that of two other associations whose activities are not shown to be other than those of a bona fide shippers' association and, in view of Columbia Shippers decision, 105 MCC 846, record is persuasive that such banding together on a non-profit basis in order to secure benefits of rail volume rates is a permissible function consistent with objectives of the statute.—Piggy-Back Shippers Assn. of Florida—Investigation, 332 I.C.C. 349 (350-1)*.

Congress, recognizing that the freight forwarder definition in §402(a)(5) does not embrace the normal or usual activities of warehousemen and nonprofit shippers' associations, enacted §402(c), not as a true exemption, but as a clarifying provision to assure that §402(a)(5) would not be construed as applying to such persons. Net effect of those sections taken together is to denote the type of transportation agency to be regulated,

while cautioning the commission that certain activities of nonprofit associations or other shippers' agents, "as those persons normally operate," are not to be confused with or regarded as forwarder operations subject to Part IV, since such persons do not do all the things required by the definition of a forwarder.—Atlanta Shippers Assn., Inc.—Investigation, 316 I.C.C. 259 (273-4)*.

In effect, those sections preclude a shipper from purchasing a complete freight forwarding service from persons not licensed by the commission, while allowing him to combine his goods with those of other shippers on a nonprofit basis to obtain the savings resulting from their collective ability to utilize the c.l., t.l., or other volume rates of regulated rail, motor, or water carriers; such construction accords with the basic purposes of Congress in subjecting the forwarder industry to economic regulation.—Id., pp. 274-5.

The forwarder act safeguards the right of all shippers to combine their goods on a nonprofit basis to obtain volume transportation savings, whether the physical consolidation or distribution is performed by them, their group or association, or their terminal agent; however, the statute precludes a shipper from purchasing "for compensation" a complete transportation service in which details and responsibilities of freight assembly, etc., are assumed by unlicensed persons. Thus Part IV brings within its proscriptions all persons who in substance engage in providing and assuming full responsibility for through transportation of shipments of others on a for-hire basis, regardless of the form they adopt.—Southern Bonded Warehouse Co.—Investigation, 318 I.C.C. 345 (353).

Multiple shipments by one consignor to more than one consignee are within contemplation of §402(c)(1).—Hambrick v. American Commercial Barge Line Co., 318 I.C.C. 527 (537).

The mere fact of incorporation cannot significantly alter the regulatory status of otherwise lawful freight consolidating and distributing activities of a nonprofit group or association of shippers. By whatever name described, §402(c) evinces a strong congressional policy that regulation under Part IV not encroach on or restrict the right shippers always had to join together to gain for themselves the savings of volume rates. Congress' primary concern was with the method of operation adopted by shippers, not their form of organization; existence of both incorporated and unincorporated shipper associations prior to passage of the Forwarder Act, together with absence of any clear congressional expression on the subject, indicates that Congress, which was surely aware of State laws authorizing nonprofit corporations, considered the difference between the two forms insignificant. In absence of a clear mandate to the contrary, the phrase "group or association of shippers" in §402(c) must be given an uncomplicated nontechnical meaning which would not exclude corporations.—Atlanta Shippers Assn., Inc.—Investigation, 322 I.C.C. 273 (286-7)*.

Nor is there anything in the makeup or functioning of an incorporated shipper association that automatically brings its operations within licensing provisions of Part IV. The view that incorporation insulates shipper-members from burdens normally inherent in transportation activities and thus constitutes them "purchasers" of a complete forwarding service disregards the basic nature of relationship between the shippers and their group, which exists whether or not it is incorporated. Shipper-members are never fully divorced from their fundamental responsibilities as organizers and controllers of the association and as shippers of freight transported in its service. They are necessarily responsible as beneficial owners of the goods, and to that extent there can be no effective insulation between them and third persons. Consequently, when shippers acting together organize, operate, and control their own corporation to perform consolidation and distribution of their own freight, and bear the risks and burdens entailed, including risk of loss or of obtaining no savings, there is no holding out to the public to provide transportation for compensation within the forwarder definition.—Id., pp. 287-8. [But see dissent.]

While a contrary conclusion would avoid necessity of case-by-case determination of lawfulness of certain operations, it would be an impermissible incursion into the legislative field in light of history, purposes, and past

application of Part IV. However, this does not mean that circumstances surrounding an incorporation may not be weighed in ascertaining the basic nature and true status of purported shipper-association operations. The commission will go behind the corporate form to establish the essential facts, which must be weighed and considered with all others attendant to a given operation, to arrive at a correct assessment of the total situation. And where it appears that the corporate form has been purposely chosen as a subterfuge to escape regulation, appropriate weight will be given that fact in finding the operations in question to be such as require authority.—Id., pp. 288-9.

The statute does not require that members of a bona fide shippers association bear a joint and several liability. Congress apparently accorded no importance in the statutory scheme of regulation to presence or absence of such "partnership" liability. The major financial risk entailed in conduct of association operations, other than those readily insurable, is risk that savings resulting from the association's use of volume rates will be eaten up or more than offset by its operating expenses. So long as this essential transportation burden is in fact ultimately borne by the members, rather than by someone else who exercises effective surveillance over the physical consolidation and distribution operations, there is compliance with the statutory scheme.—Id., p. 285.

15. Associations of shippers.—[Vols. 12-15, 17].—Plaintiff nonprofit shippers' association does not hold itself out to the public as a common carrier for compensation, assumes no responsibility for through movement of freight, and differs from a freight forwarder as defined in §402(a)(5) in other respects; however, it does provide for assembling and consolidating of property, uses services of rail or motor carriers for transportation of consolidated shipments, and also, if a member desires, provides for distribution of shipments at destination. The profit motive is not a necessary element of engaging in for-hire transportation business within §4272 of the Internal Revenue Code; construction placed on various statutes regulating interstate commerce are not determinative of tax statutes involved. Since plaintiff furnishes substantially all the facilities and performs substantially all the functions of a freight forwarder, it is liable for payment of transportation excise taxes; action for refund of transportation taxes dismissed.—Dal-Worth Shippers Ass'n., Inc. v. United States, 211 F. Supp. 590 (593-4).

Though plaintiffs would have the court believe that they are a bona fide shippers association simply because they say they are, the record details their method of operations and amply supports the commission's finding that they are engaged in an unauthorized forwarder business. Their modus operandi starkly shows the total absence of good faith participation by members in the conduct and affairs of plaintiff FCC and leaves no doubt that the raison d'etre underlying their organization was to operate unlawfully as freight forwarders. Service received by individual shipper members was identical to that provided by a regulated forwarder; shipments moved on standard common-carrier bills of lading prepared and signed by one of FCC's principals, and it thus assumed responsibility for the through shipments in same manner as a regulated forwarder. The commission's cease-and-desist order sustained.—Freight Consolidators Cooperative, Inc. v. United States, 230 F. Supp. 692 (697)*.

The essential predicate of any bona fide shippers' association is that, at all times and with respect to each l.c.l. or l.t.l. shipment moving in its service, it must act as agent for its lawful shipper-members in reducing their transportation costs through savings effected in cooperation with other members who likewise employ it as transportation agent; the avowed purpose and practical result of its combining freight of its members must not be to obtain any benefit for the shipper other than the savings so achieved. Consequently, to avoid being characterized as a for-hire forwarder, a group or association of shippers may not lawfully handle nonmembers' shipments which have no connection with or fundamental relation to the business of its shipper-members.—Atlanta Shippers Assn., Inc.—Investigation, 316 I.C.C. 259 (277-8)*.

In addition, operations of a bona fide shippers' association must be conducted at all

times as agent for its shipper-members who as its principals possess the exclusive right and ability to control, direct, and dominate its operations; in such circumstances the association merely does for its members, as their agent, what they could legally do for themselves under §402(c).—Id., pp. 278-9. [But see dissent.]

General considerations must be given practical application; unregulated competition in any regulated industry must be confined within practicable limits determined by substance rather than any label; the definition of a shippers' association must be interpreted in a manner transcending the merely formal, and the economic reality behind the arrangements, not their form, is determinative. For example, the handling by an otherwise lawful association, as agent for its members, of shipments moving on a delivered-price basis to consignee-members merely results in reduction of the transportation costs ultimately paid by the members and is within protection of §402(c)(1). [338 US 689.]—Id., pp. 277, 279-80.

Facts and circumstances surrounding organization and continuing operation of respondent ASA are convincing that its apparent shipper-members neither control its activities nor assume risks and burdens of its operations, but are primarily interested in obtaining cheaper transportation for their goods, and to that end look solely to respondent Kilgore, who organized the "association," as the one primarily responsible. At the outset, Kilgore caused ASA to adopt a corporate charter and bylaws which effectually preclude the "shipper-members" from exercising any more control over or participation in its policies and functions than they could in dealing with a recognized for-hire forwarder; though they may use its services, none has ever had right or ability to direct manner in which it would operate or to require it to supply a different service better suited to his needs, and its physical operations have always been left to Kilgore's sole discretion. Thus, ASA's operations are not those of a bona fide group or association of shippers within exclusion of §402(c)(1).—Id., pp. 266, 280-1.

Freight consolidating and distributing activities of respondent FSA are not those of a bona fide group or association of shippers within meaning of §402(c)(1) when its apparent shipper-members are able to exercise no more control over such operations than over those of any regulated forwarder; there has never been a meeting of FSA's members, none of its financial dealings have been disclosed to them or to its board of directors, nor does it appear that members have ever had opportunity to vote on any matter. The shipper-members are primarily interested in obtaining cheaper transportation for their goods, and to that end vested complete control over and responsibility for the operations conducted in name of their "association" in respondent Silverman, who organized the corporation and as president has operated it as his own, soliciting traffic and members, formulating all corporate policies, and establishing a pattern of operations that he alone could alter. Such operations constitute in substance a for-hire forwarder service subject to Part IV.—Federal Shippers Assn., Inc.—Investigation, 316 I.C.C. 523 (527)*.

A shippers' association of type recognized by §402(c)(1) as beyond scope of regulatory provisions of Part IV must possess as an essential attribute the quality of subordination; in all its operations it must act solely at the request, under the direction, and for the account and benefit of its members; the members must always act as principal and the association as their agent. Conversely, where the members, though enjoying benefits of a complete transportation service at volume rates, have not retained effective control over movement of their freight but have delegated all responsibility therefor to a purported agent or employee, they have invested the latter with the basic characteristics of an independent entrepreneur, and as such the operations of the purported agent or employee, if otherwise within the definition of a freight forwarder, are subject to the licensing requirements of Part IV.—American Freight Forwarding Corp. v. Konlon and Walder, 318 I.C.C. 507 (518)*.

And that a shippers' association operates on a nonprofit basis and for benefit of members only has little or no significance when it is shown that in all its operations the association is not directed, dominated, and con-

trolled by its members, but on the contrary is a mere pawn manipulated at the will of persons other than bona fide shipper members and used by them solely to impart a semblance of lawfulness to services which in all material respects are those of a for-profit forwarder within meaning of §402(a)(5).—Id., p. 518.

The physical service rendered individual shipper members of respondent FCC, through activities of respondents purportedly acting as its agents for consolidation, forwarding, and distribution of their shipments, is identical to that ordinarily provided by a regulated forwarder. It is equally clear that the shipper members have never exercised any greater control or influence over FCC and the operations assertedly performed in its name than if they had employed a regulated common carrier, and that they regarded their membership in FCC, not in terms of responsibilities assumed, but rather as a mere formality which qualified them to receive the benefit, at an agreed rate, of a preexisting and self-operating transportation service.—Id., pp. 518-9.

History of considered operations discloses that from their inception they were completely dominated and controlled, without interference from shipper members, by nonshipper individuals primarily interested in profiting from transportation as such, who derived substantial profit either directly in form of salaries and expenses or indirectly through their proprietary interest in the consolidation and distribution agents selected by them. Since the service resulting from collective activities of the various individuals and companies named has been available to any interested shipper through expedient of an obligation-free "membership," their combined operations in concert with FCC constitute a single jointly-conducted common-carrier forwarder service, for the unauthorized performance of which each participant is individually responsible. Cease-and-desist order entered against participants named as respondents, and those not so named admonished to discontinue their participation.—Id., pp. 509-13, 519-20.

While record does not support detailed analysis of respondents' practices, it is apparent that corporate respondent, though it has a "membership" list of a limited number of shippers, is not a shippers' association within exemption of §402(c), but a business device whereby one of two individual respondents has performed operations which he could not lawfully perform in his own name; he and the other individual received profits from the operation in form of payments for procuring equipment leases required for shipments transported, which funds constitute the entire amount received by the corporation in excess of its operating expenses, and only their distribution to those two individuals clothes it in guise of a nonprofit organization.—Western Shippers Assn., Inc.—Investigation, 88 M.C.C. 575 (576, 577).

To qualify for the exclusion of §402(c), a group or association of shippers must limit its consolidating and distributing services to its members, those services must be for the purpose of reserving to the members the benefit of volume rates and must be performed on a nonprofit basis. Additionally, a bona fide shippers' association must be controlled by its members, otherwise it may be found to fall within the forwarder definition in §402(a)(5), since the provisions of §402(c) do not preclude the commission from determining what is an "association of shippers." There is no convincing evidence that defendant association does not meet these tests, and the mere fact of incorporation does not affect its status. However, the exclusion of §402(c) does not authorize it to perform any motor carriage subject to the act.—Natl. Motor Frt. Traf. Assn., Inc., v. Internatl. Shippers, 94 M.C.C. 440 (443-6, 447).

Most shippers' associations perform or arrange for performance of same services provided by freight forwarders as set forth in parts (A), (B), and (C) of the definition in §402(a)(5); the other essential parts of that definition, which primarily and usually distinguish freight forwarders from bona fide shippers' associations, are that the services so enumerated be held out to the general public and be performed for compensation. Neither defendant CSA nor defendant PBS, both organized as nonprofit corporations under California law, is a bona fide shippers' association, although neither is operated so as to

profit the association itself and neither holds out to or will serve all of the general public, service being provided to those whose traffic will "fit in with" or complement existing members' traffic because of its type, volume, and frequency of movement. Holding out of service to a limited number or class of shippers, as distinct from all of the general public, does not preclude a finding that there is a holding out within meaning of §402(a)(5), if the association is not otherwise bona fide.—Natl. Motor Frt. Traf. Assn., Inc. v. Piggy Back Shippers, 322 I.C.C. 190 (200-1).

Control by members of an association which would otherwise be within definition of a forwarder is essential for it to qualify as an association of type recognized by §402(c)(1) as beyond scope of the regulatory provisions of Part IV. In receiving the same physical services as those provided by regulated forwarders, shipper-members of CSA and PBS exercise no greater control over their respective associations, and have little more interest in or dominion over their operations, than any shipper in any for-hire service, namely, the service received and the rates paid; formalities such as payment of entrance fees and meetings merely lend a semblance of validity to the associations so that they can continue to render satisfactory service at lower rates. Principal function and seemingly greatest exercise of control or power of board members of both is to vote on admission of members, and even this becomes little more than a formality in face of screening of prospective members, and presentation of traffic information on which the boards are to vote, by defendant Lincoln, the manager of both.—Id., pp. 200, 201-2.

Examples cited of independent membership action do not overcome the overwhelming impression given by shipper testimony of lack of knowledge about the basic structure and operations of CSA and PBS. Those witnesses, including presidents of both, though officers and members of the boards of directors, do not know enough about their respective organizations to indicate that they do or could control them, and the general membership would certainly know even less. If shipper-members of either association ever controlled or had the right to control it, they clearly have delegated or abandoned that power to Lincoln, and have invested him for all practical purposes with the basic characteristics of an independent entrepreneur, whose operations are those of an unauthorized freight forwarder. Cease-and-desist order entered against all defendants still performing or participating in the involved operations.—Id., pp. 202, 203.

Whenever an apparent shipper's group or association ostensibly consolidates and distributes freight, lawfulness of its operations may be determined by either of the following standards: (1) whether the group or association itself is in substance engaged in the business of serving the public as a forwarder of property for compensation, and thus is a seller of forwarder service; or (2) whether the group or association (or its shipper-members through their organization) is purchasing for compensation a complete transportation service in which the essential risks and burdens of freight assembly, consolidation, forwarding, break-bulk, and distribution are assumed for it or its members by a person not licensed by the commission.—Atlanta Shippers Assn., Inc.—Investigation, 322 I.C.C. 273 (279)*.

An otherwise legitimate shippers' association may overstep the statutory limits by functioning unlawfully as a provider of forwarder service for profit, when its activities are not confined to the normal operations of a nonprofit association or group in consolidating or distributing freight for its members, but instead reflect all essential attributes of a forwarder service as defined in the act. Conversely, where its operations are those normal to a nonprofit shipper association and do not include all things required by the forwarder definition, they necessarily will not conform to the statutory definition of "service subject to this part" and plainly are not subject to the commission's jurisdiction. Since the shipper obtains from the nonprofit group or association the same physical service it would receive from any recognized forwarder, the functional distinction between regulated and nonregulated consolidating and distributing operations is that the regulated forwarder by statute holds itself out to the general public,

for compensation, to deliver safely at destination the shipments entrusted to its care.—Id., pp. 279-80.

A shippers' organization may not justify service to any nonmember simply on ground that the profits it thus receives ultimately or indirectly benefit its members by helping defray costs of handling their own shipments. Such a group must affirmatively stand aloof from the lure of a public calling, and may not lawfully handle shipments unconnected with and fundamentally unrelated to a non-transportation activity of a shipper member; when it handles shipments of that character for a nonmember the service is clearly supplied for the purpose of profiting from transportation as such, rather than to obtain for its members the savings of volume rates, and the operation is in substance a common-carrier forwarding service for compensation. To hold otherwise would allow shippers' groups or associations to engage indiscriminately and without limitation in the for-hire forwarding business and would be inconsistent with the clear legislative mandate outlawing the purchase and sale of unlicensed forwarding services generally.—Id., p. 282.

Nor may a shippers' organization operate as a device whereby unlicensed forwarders serve its shipper members in contravention of the act. The basic test is whether the consolidating and distributing operations are such that any person or persons other than the association (a) have any right or ability to control, direct, or dominate such operations, or (b) bear the essential risks and burdens, financial and otherwise, of conducting them. Both aspects of that question must be answered in the negative for the operations to be those of a bona fide group of shippers acting together on a nonprofit basis to achieve the permissible purposes specified in the act; an affirmative answer to either part compels conclusion that the purported members are in fact purchasing transportation from a person or persons engaged in unlawful forwarding service. Where the association members have not retained effective control over movement of their freight but have delegated all responsibility to a purported agent or employee, the latter acts as an independent entrepreneur which if otherwise within the forwarder definition is subject to the licensing requirements of Part IV.—Id., pp. 283-4.

Control of an association by its shipper members is essential for it to be considered an association of type recognized by §402(c)(1) as beyond scope of regulatory provisions of Part IV. Defendant MSA is not a bona fide shippers' association when evidence as a whole, particularly testimony of two representatives of shipper members, precludes finding that it is controlled by either its members or its board of directors. Though both those witnesses have served on the board and collectively have held offices of president, secretary, and treasurer, their testimony is replete with vagueness on vital matters concerning MSA's operations and internal structure, and it is a reasonable inference from such lack of knowledge on part of board members and others that, while control ostensibly lies in the board, it is but a rubber stamp for recommendations of defendant Tiefenthal, MSA's vice president in charge of operations, and that it is he who actually controls the organization and is in reality a forwarder acting in its name. Cease-and-desist order entered against MSA and three individual defendants who have actively participated in considered operations.—Natl. Motor Frt. Traf. Assn., Inc. v. Mfrs. Shipping Assn., 322 I.C.C. 205 (213, 215, 216).

Present operations of respondent association are those of a bona fide shipper association entitled to benefit of the exclusion provision of §402(c), when its board of directors has assumed strict control of its operations, no freight other than that of shipper members is handled, and no profit or compensation over and above the actual transportation and operating costs incurred is realized; shipper members thus bear the essential risks and burdens of conducting the considered operations.—Piggy-Back Shippers Assn. of Florida—Investigation, 323 I.C.C. 672 (675)*.

However, record discloses that respondent association occasionally coloads its interstate traffic with that of two other shippers' associations for plan III TOFC movement and, thereby, obtains the benefit of rail volume rates and charges. Accordingly, although apparently it has confined such activities to coloading its traffic only with that of other

bona fide shippers' associations, respondent is cautioned to conduct operations in strict conformance with guidelines of the Columbia Shippers case, 105 MCC 846. If respondent's traffic were to be combined with that of non-members, for-profit, shippers, it would not be within the §402(c) exemption since, under the cited decision, the freight forwarder type of activities of a shippers' association must be limited to those conducted solely for members of a bona fide shipper association or in conjunction with other such non-profit associations.—Id., 332 I.C.C. 349 (350-1)*.

While a single entity clearly cannot be both a forwarder subject to regulation and an exempt shipper association, the fact that their physical operations closely parallel each other, since they are predicated on the expedition and economy available through tendering of volume shipments to underlying carriers rather than numerous smaller ones, is not determinative of their true status, especially as the forwarder takes a portion of the savings realized as its profit, while the association does not. And since the act specifically recognizes shippers' right to join together to secure the benefit of volume rates, and it would ignore simple economic truths not to recognize that business cooperatives are generally motivated by members' desire to secure an economic advantage they could not obtain individually, motivating factors such as level of transportation charges which may cause a shipper to join or use services of an association have little significance in determining legality of the operation involved. Nor does an association's assumption of corporate status alter the regulatory status it may enjoy.—National Motor Freight v. New Hampshire Shippers Co-op., 323 I.C.C. 658 (664-5).

While the standard stated in 322 ICC 273, i.e., whether any person other than shipper members has any right or ability to control, direct, or dominate the operations, or bears the essential risks and burdens of conducting them, delineates the type of investigation to be pursued in determining status of a purported shipper association, it is basically an abstraction that can be applied only after all facts and circumstances pertinent to the operations under scrutiny are carefully and completely analyzed, both as individual elements and as components in the total functioning of the organization. For to place unwarranted reliance on a few actions or failures to act would tend to circumvent consideration of the totality of the operation and inevitably lead to a somewhat algebraic solution not in accord with the mandate of the act. All the evidence relating to the conduct of defendant's operations must therefore be weighed and balanced most delicately in relation to the applicable criteria to determine whether they are actually conducted in a bona fide manner.—Id., pp. 665-6.

Analysis of all the evidence is convincing that defendant is a bona fide shippers' association, entitled to continue its present operations without authority from the commission. All service rendered is limited to members, and even subsid¹aries of members must themselves be members before they may use it. A principal purpose of the association is to furnish members an integrated service without necessity of their making individual arrangements with carriers and other agents for handling of shipments at intermediate points and destination, thus members need have no more than general knowledge of manner in which their shipments are handled. Members bear a continuing relation to the association and assume responsibility for and control of it through election and participation of members on the board of directors, which meets regularly and frequently to consider not only general policies but also matters of more routine nature; and all commitments necessary to conduct of operations are made in the association's name and by its employees, the more important being made only after action by the board.—Id., pp. 666-7.

While the board has frequently obtained cogent facts from, and followed the advice of, the general manager whom it employed and entrusted with responsibility for day-to-day operations, this might be expected of any organization that hires a supervisor, and the board has not always accepted his recommendations, depending on members to furnish the pertinent facts. And though neither the board nor the members formulated specific charges for various classes of freight moving to diverse points, the general manager being instrumental in their initial determination, the board

has considered the level of charges on numerous occasions, particularly in relation to broader problems affecting the association's operations, such as rise in costs due to increases in rates of underlying carriers and necessity to pay legal costs arising from the instant proceeding.—Id., pp. 667-8.

Though the general manager's salary is based on a sliding scale related to gross freight billings, the amount of work involved is likewise determined and the resulting salary, which represents his entire remuneration, does not appear unreasonable. He has neither assumed responsibility for defendant's current deficit nor stands to gain if its revenues should exceed costs of operation, since any excess belongs to the association and its members, and in his relation to it he is clearly subject to the board. His authority to sign checks was specifically granted by the board when election of a nonresident treasurer made it necessary, and his authority to pledge the association's assets was intended to allow it to obtain operating funds from its creditor bank by using its bills of lading as collateral; moreover, the treasurer, a shipper-member, submits regular independent financial reports to the board. The members and their elected board alone ultimately assume the essential risks and burdens of the enterprise as well as control, direct, and dominate its operations, and it is therefore exempt from regulation by virtue of §402(c).—Id., pp. 667, 668.

See also I.C.C. v. International Shippers Ass'n of New Jersey, Inc., §222(b), n. 11.

16. Operations confined to terminal areas.—[Vols. 12-15, 18].—If business of respondents engaged in consolidating and distributing pool-barge shipments were wholly separable and services of each confined to its respective terminal area, they would not be subject to Part IV; however, although their operations are ostensibly those of shippers' agents or terminal operators, evidence is convincing that this is a mere device or subterfuge under which they jointly provide or hold out a complete freight forwarding service without appropriate authority. Cease-and-desist order entered.—Southern Bonded Warehouse Co.—Investigation, 318 I.C.C. 345 (354).

See also Natl. Motor Freight Traffic Assn. v. Delaware Valley, §402(a)(5), n. 1.

18. Operations as shipper's agent.—[Vols. 13, 15].—While a group or association of shippers can lawfully employ other persons to manage their daily shipping operations, such persons may not act independently or otherwise than as bona fide employees of the shipper-members; to sanction any delegation of power or authority to another person by a shipper, or group or association, the purpose of which is to have the purported agent assume all the shipper's or association's functions and risks in the operation concerned, would enable a shipper or association to confer upon another person a license to operate as a for-hire forwarder; such arrangements are merely a device to circumvent provisions of Part IV and will not be allowed.—Atlanta Shippers Assn., Inc.—Investigation, 316 I.C.C. 259 (280)*.

Although the usual function of a freight consolidator is to act as consignee's agent in collecting shipments from various shippers and in forwarding a single consolidated shipment to his principal, this is not his only proper and lawful function. Nothing in the act remotely implies that a freight consolidator may not act as agent of multiple consignors for purpose of obtaining for his principals the lower transportation charges which railroads, motor carriers, or forwarders may extend when a shipment is large enough to satisfy a stipulated minimum weight.—Aggregate Rates on Wearing Apparel—Ry. Exp. Agency, 318 I.C.C. 737 (740)*.

However, that does not necessarily apply where Railway Exp. Agency suggests in its advertising that shippers may obtain benefit of reduced charges under a consolidation rule by employing a freight consolidator which is its own wholly owned subsidiary; operations of REA and its subsidiary may not be treated as a single commercial enterprise unless the separate entities were devised to avoid some clear legislative purpose of the act. Since the record fails to show whether or to what extent REA's competitors are adversely affected by its use of the subsidiary as a consolidator or the extent, if any, to which economies claimed to result to it from aggregation of

shipments are nullified by costs of the subsidiary, judgment on the matter is reserved pending development of necessary facts in instant or some other proceeding.—Id., pp. 740-1.

Section 403. (a), (b) [§ *1003(a), (b) U.S.C.*]—[Unchanged. See vol. 11, pp. 9658, 9659.]

Historical Note

The commission recommends, in view of prohibitions in 18 USC §1001, that the IC Act and various related acts be amended to eliminate the mandatory requirement that certain reports, applications, and complaints be filed with the commission under oath, and that such oath provisions be made discretionary with the commission.—Annual Report, 1962, p. 209; renewed, Annual Report, 1963, p. 21.

Regulations of the Commission

29 FR 4914, April 8, 1964, Part 500: New Subchapter E—Intermodal Transportation, Part 500 Practices of For-Hire Carriers of Property Participating in Trailer-on-Flatcar Service, §§500.1 - 500.8, added, effective July 6, 1964.

29 FR 6283, May 13, 1964, Part 404: Exemptions, §404.1 Use by air freight forwarders of regulated motor common carrier service, added, effective June 24, 1964.

29 FR 8421, July 3, 1964, Part 500: Practices of For-Hire Carriers Participating in Trailer-on-Flatcar Service, effective date of order (29 FR 4914) postponed pending further order.

29 FR 11126, July 31, 1964, Part 51: New Part 51—General Requirements, added under the heading Parts 51-59, Consolidation, Finance, and Reorganization, effective Oct. 1, 1964.

29 FR 11273, Aug. 5, 1964, Part 500: Practices of For-Hire Carriers Participating in Trailer-on-Flatcar Service, effective date of order (29 FR 4914) fixed as Sept. 11, 1964.

29 FR 12508, Sept. 2, 1964, Part 500: Effective date of order (29 FR 4914) as amended (29 FR 11273) postponed until further order.

31 FR 8573, June 21 1966, Part 6. Fee for Service Performed in Connection with Licensing and Related Activities, amended, effective July 22, 1966.

27 FR 6674, July 13, 1962, Part 405: Surety Bonds and Policies of Insurance, §405.6 Insurance and surety companies—(a) State authority and designation of agent, revised, effective July 15, 1962.

Section 403. (e) [§ *1003(e) U.S.C.*] [Unchanged. See vol. 11, pp. 9659.]

Section 403. (f) [§ *1003(f) U.S.C.*] Investigation; hearing; enforcement.—[Unchanged. See vol. 11, pp 9660.]

5. Scope of issues.—Since the issue of whether an exempt shippers' association may engage in practice of "co-loading" its trailers with those of other shipper associations (in order to secure benefits of rail volume TOFC rates) was raised at start of the commission's

investigation proceedings, and the question certainly was important to plaintiffs (interveners therein) the commission was required to rule thereon; therefore, no justification therefor being shown, the commission's failure to rule on legality of respondent association's coloading practices was error. While plaintiffs ask the reviewing court to decide the coloading issue, questions of whether specific conduct is illegal and what remedy is appropriate are peculiarly suited for the commission's judgment; accordingly, question of legality of coloading by exempt shippers' associations is remanded to the commission for its initial determination. Affirmed in part.—Freight Forwarders Institute v. United States, 263 F. Supp. 460 (466-9)*.

Although issue of whether a corporation may qualify as a bona fide shippers' association under §402(c)(1) was decided in the negative in 316 ICC 259, that decision is now before the entire commission for reconsideration; therefore, since propriety of respondents' operations can readily be determined on another and more fundamental basis, judgment on the interpretation issue is reserved for the prior case, and for purpose of instant proceeding it is assumed that the corporate respondent's status does not automatically disqualify it as a shippers' association.—American Freight Forwarding Corp. v. Konlon and Walder, 318 I.C.C. 507 (517)*.

10. Parties and notice.—Rights of certain respondents to be represented by counsel and cross-examine witnesses throughout all stages of investigation proceeding were not prejudiced by their inclusion as parties after taking of over 900 pages of transcript. Administrative investigations into lawfulness of operations are necessarily somewhat exploratory in initial stages; the vital and material connection between those respondents and ones initially named was elicited from subpenaed witnesses during first 5 days of hearings, whereupon the additional respondents were promptly made parties and were afforded, but declined to exercise, opportunity to recall and cross-examine witnesses who had previously testified. Extent of their involvement in operations of initial respondents was a matter peculiarly within their knowledge from inception of the investigation, and if their failure promptly to disclose their true interest led them to do less in early stage of the proceeding than they might have done, the choice was theirs.—American Freight Forwarding Corp. v. Konlon and Walder, 318 I.C.C. 507 (514)*.

15. Hearing.—Granting of a continuance before an administrative agency rests in the examiner's sound discretion, and reviewing courts will not interfere with its exercise except on a clear showing of abuse. Hearing examiner did not abuse his discretion in failing to adjourn hearing indefinitely; on last days of hearings, after conclusion of testimony of interveners and the commission's Bureau, counsel for plaintiffs (respondents in investigation) orally requested adjournment so that they might prepare a rebuttal case, but failed to identify their alleged witnesses, or state when or where they would be available, or what relevant testimony they would give. There was no request for subpenas of those witnesses as authorized by Rule 56 of the commission's Rules of Practice, nor any showing that depositions of material witnesses could not be taken as authorized by Rule 57, and plaintiffs rejected examiner's offer to grant a short postponement, while failing to demonstrate good and sufficient cause for a longer postponement.—Freight Consolidators Cooperative, Inc. v. United States, 230 F. Supp. 692 (700)*.

Opportunity to be represented and to present and cross-examine witnesses is all that the law requires as the elements of a full hearing.—American Freight Forwarding Corp. v. Konlon and Walder, 318 I.C.C. 507 (514)*.

Full and careful consideration of record in investigation of operations of Carload Shippers Assn. compels conclusion that conduct of the hearing was not all that is required under the law; examiner's overly active participation in interrogation of witnesses has so beclouded the evidence that a finding of unlawfulness would be inappropriate. However, though investigation is discontinued, respondents are admonished to conduct their operations in accordance with the standards discussed.—Atlanta Shippers Assn., Inc.—Investigation, 322 I.C.C. 273 (289)*.

See also National Motor Freight Traffic Ass'n v. United States, APA, 5 USC, Burden of Proof.

20. Evidence.—Intervener's petition filed subsequent to oral argument, requesting that a document entitled "Code of Operations for Bona Fide Shippers' Association" be incorporated in the record, denied. While standards outlined therein represent petitioner's conception of organizational and operational requirements of the §402(c) exclusion, and the document is not objectionable as argument on the questions presented for determination in investigation,, reception of those contentions at such late date would in fairness require that the other parties of record be allowed additional time to file rebuttal statements, thereby further delaying an ultimate decision; the circumstances are thus within contemplation of Rule 1.86 of Rules of Practice.—Atlanta Shippers Assn., Inc.—Investigation, 316 I.C.C. 259 (272)*.

Intervening forwarders were properly allowed to participate in direct examination of witnesses called by Bureau of Inquiry and Compliance. Under Rule 74 of Rules of Practice interveners may examine witnesses immediately following their examination by parties in whose behalf intervention was made; to restrict such examination to cross-questioning on matters raised by the Bureau would not only place interveners in anomalous position of having to cross-examine witnesses presented by the party in whose behalf they intervened, but would also hamper just, speedy, and inexpensive determination of substantive issues involved in investigation. Interveners' direct examination of those witnesses is not claimed to have exceeded scope of the investigation or improperly broadened the issues, and respondents were not prejudiced thereby in any manner.—Federal Shippers Assn., Inc.—Investigation, 316 I.C.C. 523 (525)*.

Examiner properly refused to strike testimony of interveners' witnesses on ground that it constituted improper rebuttal evidence; though those witnesses plainly were presented to rebut individual respondent's statements concerning extent of solicitation performed by purported shippers' association, adequate groundwork for presentation of their testimony was laid during interveners' cross-examination of one of respondents' witnesses; respondents do not challenge materiality or veracity of such testimony and were not prejudiced by its admission.—Id., p. 526.

Transcript of record in 285 ICC 724, wherein certain respondents in instant investigation are shown to have participated in operations claimed to be those of a regulated forwarder, was properly admitted. Although weight of that evidence is attenuated by fact that only one bargeload was involved, it is relevant and material to a proper understanding of respondents' overall activities because of similarity of surrounding facts and circumstances to the operations under investigation.—Southern Bonded Warehouse Co.—Investigation, 318 I.C.C. 345 (351-2).

Admission in investigation proceeding of exhibit consisting of 988 pages of transcript in an earlier proceeding, wherein certain past activities of an individual respondent are described, did not deprive other respondents not parties to the earlier case of their right of cross-examination. That evidence relates only to that individual and not to any of the other respondents, except as they may be controlled by him; requirements of administrative due process are met when he, represented by his counsel, was present at the earlier proceeding and was afforded ample opportunity to participate therein. However, since matters contained in the exhibit are too inconclusive to show a past pattern of unauthorized operations by that respondent, objection is sustained and the exhibit stricken.—American Freight Forwarding Corp. v. Konlon and Walder, 318 I.C.C. 507 (515)*.

In concluding that that respondent, who controls a licensed forwarder respondent was the prime mover behind certain operations found to be unlawful, the commission takes official notice of decision in 285 ICC 276 (affirmed 125 F. Supp. 926, 348 US 967), wherein the forwarder, under his control, was found to have aided and abetted the creation and conduct of other unlawful forwarder operations.—Id., p. 520, Note 20.

Burden is on complainants to establish by competent evidence the material allegations of the complaint. Cases cited by complainants

in support of their argument that defendants have both the burden of adducing evidence and the burden of persuasion that alleged forwarder operations come within §402(c)(2) were not adversary in nature, in that the United States, an agency thereof, or a commonwealth was a party to the proceeding; complainants in an adversary complaint case do not wear the same shoes as would the commission in an administrative investigation proceeding brought on its own motion as a regulatory agency charged with the duty of requiring compliance with existing statutes. And to shift the burden of persuasion, rather than the mere burden of going forward with the evidence, to defendants in complaint proceedings such as the instant one is not warranted.—Natl. Motor Freight Traffic Assn. v. Delaware Valley, 323 I.C.C. 560 (570)*.

Break-bulk and distribution of traffic moving in plan III TOFC service are not shown to be services and responsibilities of defendant consolidator; there is no showing that latter's business and that of the distributor are not wholly separable or that each of their services and responsibilities are not confined to their respective terminal areas. Without testimony of a witness for a distributor of involved traffic, the record must speak for itself; complainant's mere inferences and assumptions that there is some agency relation or other arrangement between defendant and the distributors, without definite proof thereof, falls far short of affirmatively establishing that such agency or arrangement exists; if anything, the facts tend to refute such presumptions and dictate that defendant has no connection with or control over the distributor.—Id., p. 572.

30. Orders of Commission.—There is no merit to contention that scope of challenged cease-and-desist order is too broad, vague, and general. Order under attack provides fair notice of what it seeks to prohibit when read in conjunction with the opinion. The entire record, complaint, investigation, and opinion are to be considered as indices of what conduct is sought to be proscribed. The order sustained.—Freight Consolidators Cooperative Inc. v. United States, 230 F. Supp. 692 (700)*.

Respondent which loads pool barges at Monaca, Pa., and respondents which perform unloading and distribution of such shipments at Houston, Tex., have participated jointly in a common plan to provide for-hire transportation and under doctrine of 245 US 229 constitute a single person within meaning of §402(a)(5); thus, in conducting unauthorized forwarder operation, all are as responsible for violating the act as if each had conducted the entire operation separately and individually. Cease-and-desist order entered against all three respondents.—Southern Bonded Warehouse Co.—Investigation, 318 I.C.C. 345 (355-6).

Respondent Brown's disclaimer of any control over or influence on other respondents found to be conducting an unauthorized forwarder operation is belied by the facts of record. Brown controls ABC, a licensed forwarder which controls the company that acquired control of the distribution agents involved, and under Brown's orders two former employees of ABC assumed complete control of the involved operations and at all times considered themselves primarily responsible to him. These circumstances, together with ABC's past participation, under Brown's control, in similar unlawful forwarder operations, impel conclusion that Brown, a man of diverse transportation experience, not only held power to control but was the prime mover behind the operations concerned. Cease-and-desist order should therefore be directed against Brown and ABC as well as the other respondents.—American Freight Forwarding Corp. v. Konlon and Walder, 318 I.C.C. 507 (520)*.

Respondents in each of two investigation proceedings are aware of the part they play in the overall plan of operation found to be unlawful. By participating therein they are providing (selling) to shippers, jointly and in concert, a complete forwarder service for compensation without authority from the commission; each participant is therefore individually responsible for the unauthorized performance of such service, and plea of certain terminal-agent respondents that a cease-and-desist order be not directed against their activities in the overall scheme must be rejected. Those respondents acted in effect as agents of an unlicensed and hence illegal forwarder, and as

such undertook to perform services which their principals could not perform. Cease-and-desist order entered against all respondents in each proceeding.—Atlanta Shippers Assn., Inc.—Investigation, 322 I.C.C. 273 (293-4)*.

Although individual who initially organized and controlled respondent association for his own benefit has severed any connection with it and it now functions as a bona fide shipper association, entry of a cease-and-desist order against him is amply supported by the evidence.—Piggy-Back Shippers Assn. of Florida—Investigation, 323 I.C.C. 672 (674-5)*.

Section 404. (a) [§ *1004(a) U.S.C.*] Rates, charges, and practices. Duty to establish reasonable rates, etc.; service; classifications, regulations and practices.—[Unchanged. See vol. 11, p. 9660.]

Historical note, vol. 14, p. 11673.

Notes of Decisions

Vol. 12—p. 10519; Volume 13—p. 11151; Volume 15—p. 12288; Volume 16—p. 12949; Volume 17—p. 13656; Volume 18—p. 14676; Volume 19—p. 15945.

Tests of Reasonableness

23. In general.—[Vols. 18, 19].—Though forwarders generally have the same class-rate structure, no unreasonableness is shown in maintenance by three commonly controlled defendants of different rate levels, subject to different rules and practices, on same commodities between same points in various instances. Defendant publishing the lowest rates does so to meet unregulated competition, chiefly of pool-car shippers, or competition of motor carriers and other forwarders; such reductions were based on cost analyses and were subject to protest; moreover, that forwarder's recent operations have yielded a substantial profit.—Clipper Carloading Co., Inc., v. ABC Freight Forwarding, 318 I.C.C. 157 (161).

104. Ascertaining cost.—[Vol. 19].—Although recognized as carriers under the act, forwarders are required to use common carriers for their underlying transportation needs; therefore their costs are the transportation charges of the underlying mode plus their overhead expenses.—Intercoastal Any-Quantity Class and Commodity Rates, 319 I.C.C. 357 (360).

Classifications, Class Rates

130. Class rates, ratings, exceptions.—[Vols. 18, 19].—Respondent's proposed reduced l.c.l. and any-quantity class rates between 6 southern and 10 northern States, on same level as rates of competing motor carriers, are compensatory and no lower than necessary to enable respondent to compete effectively for the traffic; approved.—Forwarder L.C.L. Class Rates between South and Ill., Ind., 316 I.C.C. 651 (653-4).

Section 404. (b) [§ *1004(b) U.S.C.*] Undue preferences or prejudices prohibited.—[Unchanged. See vol. 11, p. 9660.]

Notes of Decisions

Volume 12—p. 10521; Volume 13—p. 11151; Volume 15—p. 12289; Volume 16—p. 12950; Volume 17—p. 13657; Volume 18—p. 14680; Volume 19—p. 15951.

50. Persons shipping, receiving freight.—[Vols. 12, 13, 15, 18, 19].—Rates or tariff rules which favor shippers who tender relatively large shipments in the aggregate and thus promote economical transportation are not inherently unduly prejudicial to small shippers.—Multiple Shipments, California to Oregon & Washington, 315 I.C.C. 247 (248).

Defendants, three commonly controlled forwarders, are not shown to be engaging in discriminatory tactics to detriment of the shipping public, merely because they maintain different rate levels in various instances for movement of same commodities between same points, in connection with different rules and practices; complainant forwarder failed to produce a single shipper in support of its allegation of unjust discrimination.—Clipper Carloading Co., Inc. v. ABC Freight Forwarding, 318 I.C.C. 157 (161-2).

Although proposed reduced rates on all commodities in straight or mixed shipments in "Speed Van Service," applicable only when shipper requests such service and speed van containers are available, are subject to a maximum weight per container, respondent would accept heavier shipments and charge its present l.c.l. rates on the excess weight; also, even if Speed Van Service were requested, the present higher rates would apply if speed van containers were not available. Since it is within respondent's control or discretion to make the containers available for their application, the proposed rates are unjustly discriminatory, permitting application of different charges on identical shipments, depending on manner in which respondent loaded the shipment, amount of any excess weight, and the commodity or commodities involved. Service provided under the proposed rates is admittedly similar to that under respondent's present rates; such difference in treatment cannot be justified by availability of the proposed rates to all shippers upon proper notice to respondent.—"Speed Van Service" between Md., N.J., N.Y., Pa. & Ill., 321 I.C.C. 452 (454-5, 456).

The proposed rates not only unjustly discriminate between different shippers, but same shipper could be subjected to different rates on like shipments, depending on availability of the necessary containers at time Speed Van Service was requested. Such discrimination is patent in, and encouraged by, the proposed schedules, and in such circumstances the commission need not abdicate its duty to protect the general public despite absence of shipper complaint. Examples of discrimination set forth in recommended report are more than potential; they are the inherent result of the schedules. Such unlawfulness cannot be removed by providing for alternation of the proposed with the present rates; a shipper requesting Speed Van Service on shipments exceeding the stated maximum weights would still be unable to determine the applicable rate until after respondent had loaded the shipment. Though respondent is willing to modify the tariff so as to accord shipper the benefit of the lower of the conflicting charges, it does not clearly or specifically show how or to what extent the unlawfulness would be removed. Not approved.—Id., pp. 456-7.

However, the proposed rates cannot be found unduly preferential or prejudicial when there is no indication how and to what extent specific shippers are injured, nor any basis for a presumption in that regard.—Id., p. 456.

100. Rates and charges.—[Vols. 13, 16-19].—That 6-percent increase proposed in transcontinental rates and charges excludes some areas and some traffic is not unduly discriminatory; lawfulness of particular rates is not in issue, and approval is restricted to lawfulness of the proposed increase as applied to the basic rates.—General Increases—Transcontinental, 319 I.C.C. 792 (804).

Section 404. (c) [*§ 1004(c) U.S.C.*] Preference or advantage by common carrier.—[Unchanged. See vol. 11, p. 9661.]

Notes of Decisions

Notes of Decisions

Volume 13—p. 11152; Volume 14—p. 11673.

Section 405. (a) [§ *1005(a) U.S.C.*] Tariffs of freight forwarders; filing, posting.—[Unchanged. See vol. 11, p. 9661.]

Notes of Decisions

Volume 13—p. 11153; Volume 14—p. 11673; Volume 15—p. 12289; Volume 16—p. 12951; Volume 18—p. 14681; Volume 19—p. 15952.

10. Duplicating or conflicting rates.—Although proposed reduced rates on all commodities in straight or mixed shipments in "Speed Van Service," applicable only when shipper requests such service and speed van containers are available, are subject to a maximum weight per container, respondent would accept heavier shipments and charge its present l.c.l. rates on the excess weight; also, even if Speed Van Service were requested, higher present rates would apply if speed van containers were not available. As proposed rates are published in a separate tariff and are not referred to in tariff containing the present rates, there is a hidden conflict between the various rates, in violation of the commission's tariff regulations. Such unlawfulness cannot be removed by providing for alternation of the proposed and present rates, since a shipper requesting Speed Van Service would not know the applicable rate until after respondent had loaded the shipment. Shipper is entitled to know with certainty what rates he must pay; proposed schedules ordered canceled.—"Speed Van Service" between Md., N.J., N.Y., Pa. & Ill., 321 I.C.C. 452 (454-5, 456).

Section 406. (e) [*§ 1006(e) U.S.C.*] **New rates; determination of fairness by commission; suspension.**—[Unchanged. See vol. 11, p. 9665.]

Notes of Decisions

Volume 12—p. 10522; Volume 16—p. 12953; Volume 17—p. 13659; Volume 18—p. 14684; Volume 19—p. 15954.

15. Order as to suspended rates.—[Vol. 19].—Although certain of proposed rates represent slight increases, they are integral parts of proposed adjustment resulting generally in

reductions and must be so viewed; as the reduced rates are not shown to be compensatory, all proposed rates are required to be canceled.—Forwarder Commodity Rates between N.J. and Midwest, 315 I.C.C. 554 (554, 556).

20. Evidence.—[Vol. 19].—Respondent's objection to statement of an employee of motor tariff bureau, who supervises publication or printing of tariffs, on ground that he is not shown to appear on behalf of carriers or shippers and has no interest in the proceeding, overruled; the bureau publishes tariffs on behalf of its members and has an interest in the proceeding, and qualifications of its employee to testify as to rate and tariff matters are not questioned.—Freight, All Kinds, Import—Pacific Coast to Chicago, 315 I.C.C. 491 (492).

25. Burden of prrof.—[Vols. 12, 16-19].—That proposed rate was not protested does not relieve respondent of the burden imposed on it by §406(e) to show that the proposed change is just and reasonable.—Various Commodities, New York to New Jersey & New York, 316 I.C.C. 135 (136).

While respondent is entitled to meet existing competition at just and reasonable rates, it has burden of showing that proposed rates are just and reasonable; mere reference to rail rates and alleged competition is insufficient to establish their lawfulness.—Forwarder Commodity Rates between N.J. and Midwest, 316 I.C.C. 554 (555).

Although respondents represent that since 1948 they have elected to forego authorized general increases on transcontinental traffic aggregating approximately 8 percent and are entitled now to add at least 6 percent of those unclaimed increases, their failure to apply previous increases does not relieve them of the statutory burden under §406(e) to justify the general 6-percent increase now proposed.—General Increases—Transcontinental, 319 I.C.C. 792 (800).

See also Terminal Charge on Order Bills of Lading Shipments, §216(g), n. 5.

26. Reasonableness of regulations and practices.—Proposed multiple-shipment rule, minimum 5,000 pounds, designed to induce shippers to consolidate for a single pickup relatively small shipments otherwise requiring more than one pickup, is objectionable in that it does not specifically require that the aggregated shipment be received from one shipper, and that it be prepaid; requirement that charges be prepaid is necessary because their application depends on volume and other incidents of tender by shipper; disapproved, without prejudice to establishment of a rule conforming to views expressed.—Multiple Shipments, California to Oregon & Washington, 315 I.C.C. 247 (248).

65. Reasonableness of proposed rates.—[Vols. 17-19].—Proposed charges for segregation for split delivery at Pacific coast destinations of components of single shipments of at least 20,000 pounds, $2 for shipments rated up to $10 and $4 for higher-rated shipments, in connection with rate reduction averaging 32 cents, appear adequate to cover cost of additional service performed and are just and reasonable as inducement to shippers to consolidate 20,000-pound lots. Proposed charges would not give respondent an unfair advantage over other forwarders or motor carriers when any disproportion compared with latter's split delivery charge of $16.39 is more than offset by greater differences between their volume and any-quantity or small-quantity transcontinental rates.—Split Delivery—East to Pac. Coast & Mountain States, 315 I.C.C. 253 (255).

Proposed reduced import commodity rates from Pacific coast ports to Chicago are not shown to be compensatory for contemplated use of rail plan IV TOFC service; while respondent states that import forwarder traffic loads heavier than domestic, there is no sure indication that a volume sufficient to load 60,000 pounds on two trailers on a flatcar would be available for movement with reasonable dispatch; and that the predominant westbound forwarder movement is about twice that eastbound is an important factor in considering whether respondent could reasonably be expected to obtain enough traffic to permit use of the plan IV rates.—Freight, All Kinds, Import—Pacific Coast to Chicago, 315 I.C.C. 491 (493).

Nor is it shown that the proposed rates would not constitute a destructive competitive practice; respondent now handles traffic under joint-loading contract with other for-

warders, who would reduce their rates to retain it; and evidence does not support respondent's claim that consolidators, rather than regulated carriers, are handling traffic it formerly enjoyed, or that volume diverted from consolidators could be expected to provide loads of at least 60,000 pounds, particularly if regulated carriers publish the same reduced rates and the forwarders continue joint loading—both reasonably to be anticipated. Not approved.—Id., p. 493-4.

That proposed reduced rates or charges are above or on same level as certain competitive rates does not of itself establish their reasonableness; and beyond unsupported statement that some of considered traffic has been diverted to a forwarder using a rail-water-rail route, respondent offered no evidence of existing competition; moreover, it has not met the minimum requirement of proving the proposed rates to be compensatory; not approved.—Boots or Shoes from Massachusetts to Texas, 315 I.C.C. 264 (265).

Proposed l.t.l. commodity rates are not shown to be just and reasonable when respondent submitted no evidence of earnings or cost data to show their compensativeness and there is nothing to indicate that compared rates cited are acceptable as a proper standard to gage reasonableness of the rates proposed. Moreover, l.t.l. commodity rates require special justification which is not presented. Not approved.—Various Commodities, New York to New Jersey & New York, 316 I.C.C. 135 (138).

Respondent's unsupported assertion that proposed volume rates on various commodities between certain New Jersey points and points in 7 midwestern States, generally lower than present rates of respondent and protestant motor carrier association, are as profitable, on a cost basis, as from or to any other New Jersey points where they now apply, does not meet the minimum requirement of proving that they are compensatory; not approved.—Forwarder Commodity Rates between N.J. and Midwest, 316 I.C.C. 554 (555-6).

Although respondent's cost data do not reflect its present expenses because of its limited experience with traffic concerned at time its costs were computed, rates of competing motor carriers on same level as respondent's proposed reduced l.c.l. and any-quantity class rates between 6 southern and 10 northern States are the best available evidence of reasonableness of the proposed rates and are convincing that they are compensatory. Proposed rates are no lower than necessary to permit respondent to compete effectively for the traffic; approved.—Forwarder L.C.L. Class Rates between South and Ill., Ind., 316 I.C.C. 651 (653-4).

Proposed 6-percent increase in rates and charges on all transcontinental traffic weighing less than 10,000 pounds and moving to and from Pacific coast, except between certain points and areas specified (which exceptions are necessitated by similar exceptions in like increases proposed by motor carriers which are respondents' principal competitors), approved as necessary to provide revenues needed to meet increased operating expenses. Evidence is convincing that the transcontinental rates as thus increased do not exceed reasonable Maxima.—General Increased—Transcontinental, 319 I.C.C. 792 (799-800, 803).

Proposed rates on all commodities in straight or mixed shipments in "Speed Van Service," subject to a maximum weight per container and applicable only when shipper requests such service and speed van containers are available, are admittedly below many of respondent's present c.l. or volume rates; contention that negligible damage claims justify such reductions is without substance, as the speed van containers are also used in connection with respondent's present rates, and a shipper using speed van service does not have exclusive use of the container; not approved.—"Speed Van Service" between Md., N.J., N.Y., Pa. & Ill., 321 I.C.C. 452 (457).

Proposed l.c.l. commodity rates on straight or mixed shipments of commodities rated class 110 or higher in uniform classification, in steel containers of not over 350 cubic feet capacity, furnished by shipper, gross minimum weight 3,000 pounds, $4.28 from Baltimore and $4.91 from New York to Atlanta, are reasonably compensatory and justified to facilitate handling of import traffic while reducing loss and damage claims to a minimum.

Though the proposed rates are the same as respondent's class 100 rates, the containers, which must be returned to shipper, weigh 1,420 pounds, resulting in the charge on the 1,580 pounds minimum weight of lading approximating the class 200 level; and while respondent will return the empty containers at the class 150 rates to the ports, it will augment that revenue by shipping northbound traffic in them. Approved.—Merchandise from Baltimore and New York to Atlanta, 322 I.C.C. 245 (246, 248)*.

66. Cost of service.—[Vol. 19].—Although respondent's study of cost of transporting containerized merchandise shipments omitted such items as general office and tarffic department salaries, operating rents, office supplies, maintenance, and payroll taxes, it is neither feasible nor necessary to require allocation of overhead costs to any single l.c.l. forwarder shipment. As a practical matter, nearly all forwarder costs are variable because based almost exclusively on purchased transportation. Respondent has shown its out-of-pocket costs for the 3,000-pound l.c.l. shipment, and any remaining unallocated costs are more than covered by the revenue in excess of those costs; moreover, additional revenue would be derived from other shipments consolidated with one subject to the proposed rates, thus the total revenue for a c.l. shipment would substantially exceed the total line-haul cost by rail. Considering the very substantial excess of the rate over the costs shown, proposed rates are compensatory.—Merchandise from Baltimore and New York to Atlanta, 322 I.C.C. 245 (247)*.

Protestants' contention that respondent's cost data are unrealistic because they do not include any overhead costs such as expenses for employees, operating rents, etc., and that addition of amount for such expenses, based on respondent's quarterly report, produces total costs higher in many instances than proposed rates, is not rebutted; proposed rates thus are not shown to be compensatory.—Boots or Shoes from Massachusetts to Texas, 315 I.C.C. 264 (266).

Section 406. (f) [§ *1006(f) U.S.C.*] Investigation involving State regulations; conference of State and interstate commissions; prescription of rates, regulations.—[Unchanged. See vol. 11, p. 9665.]

Section 406a. [§ *1006a U.S.C.*] Actions for recovery of charges; limitation of actions; definition; effective date.—[Unchanged, except that the act of Sept. 6, 1965, Pub. L. 89-170, §7, 79 Stat. 651, amended paragraph (2) to read as set forth below; also renumbered paragraphs (5), (6), and (7) as paragraphs (6), (7), and (8), respectively, and inserted new paragraph (5), below. See vol. 18, p. 14687.]

(2) For recovery of reparations, action at law shall be begun against freight forwarders subject to this part within two years from the time the cause of action accrues, and not after, and for recovery of overcharges, action at law shall be begun against freight forwarders subject to this part within three years from the time the cause of action accrues, and not after, subject to paragraph (3) of this section, except that if claim for the overcharge has been presented in writing to the freight forwarder within the three-year period of limitation said period shall be extended to include six months from the time notice in writing is given by the freight forwarder to the claimant of disallowance of the claim, or any part or parts thereof, specified in the notice.

The term "reparations" as used in this section means damages resulting from charges for transportation services to the extent that the Commission, upon complaint made as provided in section 406 of this part, finds them to have been unjust and unreasonable, or unjustly discriminatory or unduly preferential or unduly prejudicial.

Notes of Decisions

Volume 14—p. 11674; Volume 15—p. 12292; Volume 16—p. 12953; Volume 17—p. 13660; Volume 18—p. 14688

20. Complaints seeking reparation.—[Vols. 15-18].—In 1965 amendment to §406a, Congress did not in express terms provide more than a judicial avenue to reparations; therefore, the commission's decision to anticipate voluntary settlements before resort to the courts (by establishing informal procedure for settlement of uncontested reparations claims against forwarders), and to make a rate determination for the convenience and protection of the parties, was not a necessary consequence of the statutory change. Whether the commission should have so decided and, if so, what the precise form and scope of the procedure should be were questions suitable for exploration in formal rule-making. The commission having failed to comply with rule-making requirements of §4 of the APA, its action establishing considered procedure is invalid.—National Motor Freight Traffic Ass'n v. United States, 268 F. Supp. 90 (93, 95-7)*.

Regulations of the Commission

30 FR 16050, Dec. 23, 1965: In view of enactment of Public Law 89-170, Sept. 6, 1965, the Commission has approved a method by which freight forwarders may be authorized informally to pay reparations to shippers in uncontested cases where the carrier is agreeable to making adjustments.

Section 407. [*§1007 U.S.C.*] **Motor carrier rates applicable to small parcel forwarding.**—[Unchanged. See vol. 11, p. 9666.]

Section 408. [§1008 U.S.C.] Authority for assembling and distribution rates.—[Unchanged. See vol. 11, p. 9667.]

Notes of Decisions

Volume 12—p. 10523; Volume 13—p. 11155; Volume 14—p. 11675; Volume 15—p. 12293; Volume 17—p. 13660; Volume 18—p. 14688; Volume 19—p. 15958.

2. Construction and interpretation.—[Vols. 12-15].—Under the permissive provisions of §408, assembling or distribution rates lower than normal rates may not be established for exclusive benefit of forwarders, but must be made available to others using common carrier services under like conditions. [272 ICC 413.]—Assembling and Distribution Rates Between Points in N.Y., 316 I.C.C. 606 (607-8).

5. Assembling and distribution rates.—[Vols. 13-15, 17-19].—A motor common carrier may establish distribution rates different from its normal rates if such difference is justified by a difference in the respective services; proposed distribution rates for freight consolidators not approved where respondent failed to show any difference in the services or that the proposed rates would be compensatory.—Distribution Rates—Pitts-

burg to Ind., Ky., Mich., and Ohio, 316 I.C.C. 381 (382).

Although assembling and distribution rates less than 85 percent of corresponding class rates have not generally been approved, and proposed assembling rates on textiles from mills throughout the Carolinas to Charlotte and Greensboro, N.C., are less than 80 percent of l.t.l. class rates presently moving the traffic, they are shown to be no lower than necessary to prevent diversion to private carriage or other modes of transportation; and comparisons with other motor-carrier rates in that area, together with indicated savings in collecting charges and making deliveries, are convincing that the proposed rates, though possibly depressed, are compensatory; approved.—Assembling Rates at Charlotte and Greensboro, N.C., 318 I.C.C. 429 (431, 436-7, 439).

Proposed l.t.l. assembling and distribution commodity rates, restricted to forwarder traffic and lower than like rates maintained by same respondent without such restriction, may not be approved; moreover, proposed rates are not shown to be compensatory, as required under §216(g), or to be justified by difference in conditions under which the respective services are employed, as required under §408.—Assembling and Distribution Rates between Points in N.Y., 316 I.C.C. 606 (608).

Proposed l.t.l. assembling and distribution class rates between Springfield, Mass., and some 19 points in Connecticut and 61 in Massachusetts are not justified by general statements concerning attractiveness of the traffic and reference to competitive rates which apply only between Connecticut points; many of proposed rates are far below level 85 percent of normal class rates previously approved for rates under §408, and no cost data to show their compensativeness are presented. Not approved.—Assembling and Distribution Rates between New England Points, 318 I.C.C. 57 (58).

Assembly and distribution rates published for New York and Philadelphia areas in "A & D" tariffs apply to service beyond commercial zones for forwarders and consolidators, whose traffic is varied, frequently light and bulky, and entails more paperwork than assembly and distribution under "S" tariffs, generally within the commercial zone, of small shipments having a prior or subsequent line haul by the same carrier as part of a pool truckload, which usually consists of articles of the same class. Moreover, traffic moving beyond the commercial zones under "A & D" tariffs may not be handled by exempt carriers, whereas service performed within the zones by regulated carriers under the "S" tariffs is in direct competition with unregulated local cartage operators whose rates are not published or subject to any statutory criterion. These substantial differences in nature of the traffic and services involved justify maintenance of a higher level of rates in the "A & D" than in the "S" tariffs.—Distribution Rates in Eastern Central Terr. Cities, 319 I.C.C. 410 (413-4).

Section 409. [§1009 U.S.C.] Utilization by freight forwarders of services of common carriers by motor vehicle.—[Unchanged. See vol. 15, p. 12294.]

Amendments, see footnotes, vol. 13, p. 11158 (former §409); see also vol. 15, p. 12294, Historical note, vol. 17, p. 13661; vol. 18, p. 14689.

Notes of Decisions

Volume 12—p. 10524; Volume 13—p. 11158; Volume 14—p. 11676; Volume 15—p. 12295; Volume 17—p. 13661; Volume 18—p. 14689; Volume 19—p. 15959.

2. Construction and interpretation.—[Vols. 12-15, 17-19].—In holding in 272 ICC 413 that, since most forwarder traffic moving terminal-to-terminal by motor carriers moves in trucks sealed by the forwarders, all such traffic should be treated as "truckload" for purposes of §409(a), the commission clearly considered factors other than published rates in determining what constitutes a truckload; and, except for the 450-mile exemption, there is no indication that Congress, in the 1950 amendment which added the second proviso

of §409(a), adopted a different view. And though historically a t.l. shipment is one that substantially fills the vehicle's carrying capacity, "truckload" does not lend itself to an exact definition applicable in all instances; circumstances surrounding the movement must be considered, and that weight alone is not conclusive in defining a truckload was recognized in 321 ICC 732 and 323 ICC 543.—Milne Truck Line, Inc.—Investigation—Tariff Rates, 325 I.C.C. 128 (133).

That consideration of factors other than weight and published rates in determining what constitutes a truckload lot will render enforcement of §409(a) more difficult is not controlling. Volume and t.l. rates and minimum weights are published at various levels, and, while such factors in the tariff should be considered, to adopt a definition of "truckload lots" as a shipment of freight thus rated or ratable would ignore the fact that in many instances a shipment ratable at a particular volume or t.l. rate would not constitute a truckload; recognition of that fact is necessary to give practical effect to the provisions of §409(a).—Id., p. 134.

Forwarder respondent's contention that a fair method of defining a truckload lot is to relate it to the capacity of the vehicle used, measured by either maximum weight or volume, without reference to minima published in connection with t.l. or volume rates, is not supported by decisions cited, which show that the commission has never restricted its consideration solely to those matters, but has given primary consideration to the actual service to be rendered. Moreover, respondent's interpretation of "vehicle" to mean the tractor or unit of motive power pulling the load, rather than the trailer containing the freight, is erroneous in context of the matters at issue. "Vehicle" as used in that context clearly implies a single unit or trailer on or in which the freight is actually loaded; the tractor has no freight carrying capacity.—Id., pp. 134-5.

The best test for determining what constitutes a truckload lot within meaning of §409(a) is one which carefully weighs all pertinent factors, including the actual practice of the motor carrier who provides the forwarder with service. Evidence indicates that representative shipments handled by respondents moved on one bill of lading from one consignor at one origin to one consignee at one destination; each of such shipments, which averaged about 20,500 pounds, moved in one 24-foot trailer; and although additional freight could possibly have been loaded onto the trailer, normally the seals placed on the trailers in respondent forwarder's dock were not broken prior to delivery at destination terminal, thus indicating that the forwarder had exclusive use of the trailer. Weighing such factors in ligh of past precedents and dealing in totalities, conclusion is warranted that the involved shipments constitute truckload lots.—Id., p. 135.

5. Agreements.—[Vols. 15, 17-19].—Since shipments transported terminal-to-terminal by respondent motor carrier for respondent forwarder are found to be "truckload lots" within meaning of the second proviso of §409(a) and were and are transported for a distance exceeding 450 miles, the motor carrier's charging and the forwarder's paying of contract rates lower than the motor carrier's applicable tariff rates was and is in violation of §§217(b) and 409(a). Cease-and-desist order entered.—Milne Truck Line, Inc.—Investigation—Tariff Rates, 325 I.C.C. 128 (135).

Section 410. (a) [*§ 1010(a) U.S.C.*] Permit essential to operation; carriers in operation on effective date of section; service to, from, and within Alaska; Hawaii; "grandfather" provisions.—[Unchanged. See vol. 11, p. 9669; Vol. 19, p. 15959].

Historical notes, vol. 16. p. 12954, vol. 17, p. 13661, vol. 18, p. 14690.

2. Construction and interpretation.—Unauthorized for-hire forwarder operation by purported shipper association, see Atlanta Shippers Assn. case, §402(a)(5), n. 1.

See §402(a)(7), n. 1.

10. Cessation of unlawful operation.—Where individual shippers' commodities are loaded into pool barges by one respondent at Monaca, Pa., for movement by regulated water carriers to Houston, Tex., where break-bulk and distribution operations are performed by two others pursuant to a common plan or enterprise, respondents jointly and in concert are engaged in service as a for-hire freight forwarder in violation of §410(a); cease-and-desist order entered.—Southern Bonded Warehouse Co.—Investigation, 318 I.C.C. 345 (346, 355, 356).

Section 410. (b) [§ *1010(b) U.S.C.*] Application for permit; form and content.

[Unchanged. See vol. 11, p. 9669.]

Historical Note

The commission recommends that mandatory oath requirement be eliminated; that oath provision be made discretionary with the commission.—Annual Report, 1960, p. 191; Annual Report, 1961, p. 192; Annual Report, 1964, p. 72.

Notes of Decisions

Volume 12—p. 10525; Volume 13—p. 11158; Volume 14—p. 11676; Volume 15—p. 12296; Volume 16—p. 12954; Volume 17—p. 13661; Volume 18—p. 14690; Volume 19—p. 15961.

18. Burden of proof.—[Vols. 13, 15, 16, 18, 19].—In showing that proposed forwarder service will be consistent with public interest and the national transportation policy, applicants must establish that existing service is inadequate to meet the reasonable needs of the public, in same manner as those seeking certificated authority under Part II. This requirement was effectively imposed by the 1957 amendment of §410(d), and a finding of inadequacy in service of opposing forwarders is penultimate to a finding of need for a new similar service.—Norman G. Jensen, Inc., 318 I.C.C. 719 (724).

In the 1957 amendment of §410(d), Congress did not change a forwarder applicant's basic burden of establishing that its proposed operation will be consistent with public interest and the national transportation policy, but merely removed the bar, except in case of applicants controlled by or affiliated with a carrier subject to Part I, to the commission's denial of an application solely on ground of adequacy of existing forwarder service.—Frank P. Dow Co., Inc., Extension, 322 I.C.C. 102 (112-3).

22. Evidence.—[Vols. 14, 15, 17, 18, 19].—Since intervener's claim of right to serve Longview, Wash., under its authority to serve Portland, Oreg., has not been determined; its authority is limited to foreign freight; at time of hearing it had handled only two small shipments in its recently instituted service from Longview; and a number of protestants can provide the complete service for which authority is sought, its opposition to application need not be considered.—Norman G. Jensen, Inc., 318 I.C.C. 719 (721, 724).

Verified statements of 38 shippers in support of applicant's request for further hearing, which were appended to its exceptions, cannot properly be considered as evidence; motion to strike granted.—Frank P. Dow Co., Inc., Extension, 322 I.C.C. 103 (108).

Evidence relating to applicant's operations between 1916 and 1933 was properly excluded; regardless of their nature and extent, those operations are too remote in time to justify modification of authority granted applicant in 1948.—Id., p. 109.

25. Hearing, generally.—Applicant's request in its exceptions for further hearing, and supporting verified statements of 38 shippers, do not comply with rule 1.101(b) of Rules of Practice; no satisfactory reason is given why the evidence sought to be adduced at a further hearing was not presented at initial hearing, and matter contained in the appended shipper statements is convincing that such evidence would be merely cumulative of that already of record.—Frank P. Dow Co., Inc., Extension, 322 I.C.C. 103 (108).

Section 410. (c) [§ *1010(c) U.S.C.*] Issuance of permit; carriers excluded; applicant controlled by or with common carrier.—[Unchanged. See vol. 11, p. 9669.]

Notes of Decisions

Volume 12—p. 10525; Volume 13—p. 11159; Volume 14—p. 11677; Volume 15—p. 12296; Volume 16—p. 12954; Volume 17—p. 13662; Volume 18—p. 14691; Volume 19—p. 15962.

2. Construction and interpretation.—[Vols. 12-19].—The basic statutory standards to be applied in determining whether an application for forwarder permit should be granted or denied are contained in §410(c) and (d). Though §410(d) formerly prescribed a rule to be followed in all forwarder proceedings, which assured that permit would not be refused solely on ground of adequacy of existing forwarder service, amendment thereof in 1957 limited applicability of that rule to proceedings involving applicants controlled by or affiliated with a carrier subject to Part I, but did not change the §410(c) standard of consistency with public interest and the national transportation policy. Obviously, to grant forwarder authority in face of adequate existing service would frustrate Congress' intent in amending §410(d) so as to avoid wasteful duplication of existing facilities; however, though an application may now be denied solely because existing service is adequate, it need not be denied where there is proof of a public interest factor of equal or dominant importance. Nonetheless, adequacy of existing service is a vital factor and most frequently of controlling importance.—Frank P. Dow Co., Inc., Extension, 322 I.C.C. 103 (110, 111-3).

And because §§209(b) and 410(c) require application of the same statutory standard of consistency with public interest and the national policy in evaluating contract-carrier and freight-forwarder applications, it does not follow that forwarder applications should be considered in terms of criteria announced in the 1957 amendment of §209(b). That Congress considered the amendment of §§209(b) and 410(d) at the same time does not mean that it intended to include the §209(b) criteria in Part IV; had it so intended, it could have specifically referred to or incorporated those five criteria in Part IV, but it did not. On the contrary, the congressional committee reports state that the amendment of §410(d) would bring the requirements for obtaining forwarder authority more nearly in line with those for obtaining rights to engage in other types of common-carrier service; this hardly evinces intention to bring the requirements for forwarder authority in line with those for contract-carrier authority.—Id., pp. 113-4.

7. Competition.—[Vols. 13-19].—Mere availability of other types of common carriage should not bar institution of forwarder service of a character not presently offered.—Corpus Christi Distributing Service, Inc., Extension, 316 I.C.C. 542 (545).

Amendment of §410(d) in 1957 for specific purpose of eliminating needless and uneconomic duplication of existing forwarder services had effect of imposing requirement that an applicant seeking authority for a new similar service must prove inadequacy of service provided by opposing forwarders. Five forwarder protestants are authorized to serve Longview, Wash., all offer service from that port in connection with their nearby terminals at Portland, Oreg., and, since no inadequacy in their service is shown, they are entitled to continue their operations without any diversion by applicant. Denied.—Norman G. Jensen, Inc., 318 I.C.C. 719 (723, 724, 725).

It is manifest from the legislative committee reports that Congress intended by the 1957 amendment of §410(d) to remove the bar to the commission's giving full consideration and weight to existing forwarder service (except in case of applicants controlled by or affiliated with a carrier subject to Part I) in evaluating merits of applications seeking to establish a new competitive forwarder service; and the commission has since felt it incumbent to make subsidiary findings as to

whether existing service is adequate to meet the evident needs of the supporting shippers.—Frank P. Dow Co., Inc., Extension, 322 I.C.C. 103 (112, 113).

Protestants can provide more frequent service on import traffic from Longview, Wash., and Stockton and San Diego, Calif., to destinations east of Rocky Mountains than applicant whose authority is restricted to that traffic, because of their ability to combine such shipments in consolidated loads with their large volume of domestic traffic, and they have surplus equipment and capacity for forwarding eastbound traffic in TOFC service. Applicant's use of motor carrier service for line-haul movement of some traffic does not constitute a significant advantage because its use thereof is limited by terms of §409. While protestants' service is largely untried by supporting shippers, it appears adequate to handle all import traffic that might be tendered them at those three ports. Grant of authority sought would therefore be inimical to public interest and the national transportation policy, particularly the directive to foster sound economic conditions in transportation and among the several carriers.—Id., p. 116.

25. Necessity, demand for service.—[Vols. 12-19].—There is substantial public need for proposed forwarder service between points in 11 northern or central States and points in Louisiana and Texas, utilizing barge service between consolidation and distribution points, when numerous shippers desire to obtain the rate advantages of barge service and are not interested in expeditious movement, but do not ship individually in sufficient quantities to meet bargeload minima, and the only forwarders holding authority for part of the service proposed have not provided such service for some years; however, no support is shown for service at New York points except in extreme western portion of the State, and authority granted is limited accordingly.—Corpus Christi Distributing Service, Inc., Extension, 316 I.C.C. 542 (545).

Applicant has failed to meet its burden of showing inadequacy of existing forwarder services from Longview, Wash. Protestants authorized to serve Longview as well as Seattle and Portland, Oreg., are furnishing adequate service and can facilitate dispatch of all shipments by combining those from Longview with those from the other ports; nor is any need shown for establishment of terminal facilities at Longview in view of proximity of protestants' terminals at Portland. While overall traffic through the port of Longview has increased in recent years, no reasonable certainty of prospective need for proposed forwarder service is shown, and if volume of traffic warranted it in future at least one existing forwarder would consolidate and make shipments directly from there. Denied.—Norman G. Jensen, Inc., 318 I.C.C. 719 (724-5).

Though applicant, an import forwarder holding authority from the Treasury Department as a customs broker, contends that it can provide a complete service meeting a public need which protestants who lack that authority cannot supply, its service as a customs broker cannot be considered a part of the service it proposes to provide. Its customs brokerage service is performed under regulations of the Customs Bureau, and its duties and obligations as a customs broker in no way relate to the provision of or arranging for surface transportation subject to the commission's jurisdiction. In proceeding on application for extension authority from three additional Pacific coast ports, the commission's concern is with the forwarder service proposed, not with some extraneous service such as customs brokerage, which is not a part of forwarder service as defined in §402.—Frank P. Dow Co., Inc., Extension, 322 I.C.C. 103 (114-5).

Even though supporting shippers' traffic now moves to an undisclosed extent through the three ports sought instead of those which applicant is already authorized to serve, the commission has found that a carrier's mere desire to follow traffic it has previously handled is not enough alone to warrant grant of authority, and that it would be contrary to law and sound reasoning to authorize an applicant to follow certain traffic where adequate existing service is available at the relocated origin. Those principles are equally applicable to forwarders; in amending §410(d) Congress intended the commission to afford greater protection to existing forwarders which can adequately provide the service needed by

shippers, and to allow applicant to follow its shippers' traffic to the three ports involved, in face of adequacy of available service, would frustrate Congress' intent in amending §410(d).—Id., p. 117.

Despite applicant's contention that it would provide a specialized service, no essential difference is discernible in forwarding of domestic traffic and import traffic that has been cleared through customs. Protestants serving the involved ports handle import shipments in same manner as domestic and, because they forward both types together in consolidated loads, can offer more frequent service; supporting shippers who have used their service have found it satisfactory. As protestants' service thus appears adequate to handle all import traffic that may be tendered them at the three ports, grant of application would authorize an unneeded duplicative service, and it must be denied as contrary and inimical to the public interest and the national transportation policy.—Id., p. 116.

26. Fitness, generally.—[Vols. 12-19].—Since prohibition of §411(b) is designed to prevent abuses arising from shipper control of forwarders, an application falling within purview thereof must be subjected to searching scrutiny and denied unless circumstances render applicant's practice of such abuses unlikely. Proposed operation as a forwarder of new furniture would not be consistent with public interest when applicant would be subject to potential control by a furniture company which could exercise control over movement of traffic to its competitors. Denied.—Furniture Forwarders, Inc., 316 I.C.C. 615 (618, 619).

Although applicant has not provided any service under its existing permit for operation between 15 States and southern Texas for about 19 years, it believes that proposed operation between points in 11 States and points in Texas and Louisiana, utilizing barge service between consolidation and distribution points, would be more economically feasible, and is willing to surrender its existing rights; applicant has shown ability to obtain substantial financial backing and its president, who is president of two other forwarding companies, proposes to use latter's facilities and personnel to aid in rendition of the proposed service. In the circumstances, applicant may be found fit to perform the proposed service, but grant of authority sought is conditioned on its request in writing for concurrent cancellation of its outstanding permit.—Corpus Christi Distributing Service, Inc., Extension, 316 I.C.C. 542 (546).

Section 410. (d) [§ *1010(d) U.S.C.*] Competition.—[Unchanged. See vol. 18, p. 14693.]

Section 410 (e) [§ *1010(e) U.S.C.*] Terms and conditions; territories; restrictions.—[Unchanged. See vol. 11, p. 9670.]

Notes of Decisions

Volume 12—p. 10527; Volume 13—p. 11160; Volume 14—p. 11679; Volume 15—p. 12298; Volume 16—p. 12955; Volume 17—p. 13664; Volume 19—p. 15963.

25. Territory to be served.—[Vols. 12-15, 19].—Although territorial scope of applicant's original application for authority to render forwarder service from all Pacific coast ports was unopposed, authority was granted only from the ports of Vancouver, B.C., and Seattle, Portland, San Francisco, and Los Angeles, those being the only Pacific coast ports handling any significant volume of import traffic at that time. The commission could have granted authority as sought, but did not, and it is not suggested that its failure to authorize all Pacific coast ports resulted from clerical error or inadvertence; terms of applicant's existing permit conform precisely with findings on its original application, and its argument that it is already authorized to perform proposed service from the ports of

Longview, Wash., and Stockton and San Diego, Calif., is without merit.—Frank P. Dow Co., Inc., Extension, 322 I.C.C. 103 (109).

A forwarder is authorized to serve only those points specifically designated in its permit and points within commercial zones of the points so designated. There is therefore no merit to contention that applicant (which also operates as a customs broker at all ports it is authorized or seeks to serve) is entitled to serve all points in the U.S. Customs District for San Francisco, which includes Stockton, and all points in the Customs District for Oregon, which includes Portland and Longview.—Id., p. 110.

Section 410. (f) [§ *1010(f) U.S.C.*] Suspension, change, revocation, or permits.—[Unchanged. See vol. 11, p. 9670.]

Notes of Decisions

Volume 13—p. 11161; Volume 15—p. 12298; Volume 17—p. 13665; Volume 18—p. 14693.

10. Amendment of permit.—[Vol. 13].—To modify terms of an existing permit merely because territorial scope of original application was unopposed and a more extensive grant might have been made 15 years earlier would tend to cast doubt on all outstanding certificates, permits, and licenses.—Frank P. Dow Co., Inc., Extension, 322 I.C.C. 103 (109).

Section 410. (g) [§ *1010(g) U.S.C.*] Transfer of permit or operating rights; employees' interest protected.—[Unchanged. See vol. 11, p. 9671.]

Historical Note

The commission recommends that provisions of part IV relating to ownership, control, and operation of freight forwarders in common with carriers of other modes be revised and clarified, and, to this end, that future transactions involving such relationships be made subject to the provisions of §5.—Annual Report, 1962, p. 208; renewed, Annual Report, 1963, p. 21.

Notes of Decisions

Volume 12—p. 10528; Volume 13—p. 11161; Volume 14—p. 11680; Volume 15—p. 12299; Volume 16—p. 12956; Volume 17—p. 13666; Volume 18—p. 14694; Volume 19—p. 15965.

2. Construction and interpretation.—[Vols. 12-19].—Since purpose of the prohibition stated in §411(b) is to guard against abuses which may arise from shipper control of forwarders, an application falling within purview thereof must be denied unless attendant circumstances render applicant's practice of such abuses unlikely. Section 402(a)(8) provides that "control" includes actual as well as legal control and also power to exercise control; and since Congress in enacting Part IV used "Control" in same sense as in Part I, the commission is not limited to forwarder cases in resolving the question of control. See discussion of "control" in 38 MCC 95, and of effect of family relationship in 55 MCC 696 and 60 MCC 404.—Furniture Forwarders, Inc., 316 I.C.C. 615 (618).

Applicant's president and principal stockholder (the others being his wife and son) is employed, and will continue to be employed, as purchasing agent and supervisor of trucking operations for furniture company whose chairman of the board and president are his brother and nephew, respectively; thus, applicant's president is in a position to influence policies of the furniture company although he is not a director or officer thereof; conversely, the furniture company is in position to influence him and through him to control applicant's proposed operations as a forwarder of new furniture—a situation proscribed by §411(b); that the furniture company does not intend to use applicant's service does not negate its power to exercise control. Application denied.—Id., pp. 618-19.

Section 412. [§ *1012 U.S.C.*] Accounts, records and reports.—[Unchanged. See vol. 11, p. 9674, vol. 15, p. 12300.]

Amendments, see footnotes, vol. 15, p. 12300; historical notes, see vol. 12, p. 10330, vol. 13, p. 11032, vol. 14, 11543.

Historical Notes

The commission recommends that §412 be amended to permit the commission or its duly authorized agents to inspect the books, records, and other documents kept or maintained by agricultural cooperatives and shipper associations. —Annual Report, 1961, p. 184; renewed, Annual Report, 1962, p. 201; Annual Report, 1963, p. 19; Annual Report, 1964, p. 76.

The commission recommends, in view of the prohibitions in 28 USC §1001, that §412(b) be amended so as to eliminate the mandatory oath provision therein, and that such requirement be made discretionary with the commission.—Annual Report, 1960, p. 191; renewed, Annual Report, 1961, p. 192; Annual Report, 1964, p. 72.

Notes of Decisions

32 FR 16428, Nov. 30, 1967, Part 540 [formerly Part 440]: Uniform System of Accounts for Freight Forwarders, miscellaneous amendments pertaining to extraordinary and prior period items, effective Jan. 1, 1967.

33 FR 4067, March 1, 1968: Record Retention Guide, XXIV Interstate Commerce Commission [Revised] 1.11 Freight forwarders, 49 CFR Part 1228.

Section 413 [§ *1013 U.S.C.*]. Receipts or bills of lading; delivery; application of §20(11), (12).—[Unchanged. See vol. 11, p. 9676.]

Notes of Decisions

Volume 12—p. 10528; Volume 13—p. 11162; Volume 14—p. 11681; Volume 15—p. 12301; Vol. 16—p. 12957; Volume 18—p. 14694.

10. Issuance of bills of lading.—[Vols. 13, 14, 16, 18.]—Under through bills of lading issued by plaintiff forwarder to shippers of l.c.l. shipments lost in transit while on defendant's St. Louis freight platform awaiting plaintiff's loading instructions or availability of outbound car or truck, plaintiff was a common carrier; so far as the customer-shipper was concerned, interstate carriage was still in effect when the loss occurred and plaintiff was liable to its shippers therefor.—Republic Carloading & Distrib. Co. v. Missouri Pac. R. Co., 302 F. 2d 381 (385, 389)*.

But in movement of the consolidated carload or truckload to St. Louis under bill of lading issued by the line-haul rail or motor carrier, naming plaintiff as consignor-consignee, or in similar outbound movement under new bill of lading, plaintiff was a shipper-consignee in relation to the underlying carrier; latter's obligation ended with placement of the inbound car at the platform or the truck at the depot, and subsequent unloading by defendant was performed at plaintiff's request as consignee and was not part of the common carriage; thus, when the loss occurred the interstate movement had either ceased or had not yet begun, and defendant, which did not participate therein, was not liable to plaintiff for the loss.—Id., pp. 385-6, 389.

32. Released rates and ratings generally.—Section 20(11), which is made applicable to forwarders by §413, merely restates the common law rule that a common carrier is ordinarily an insurer against loss, damage, or injury to property committed to it for transportation; but though it also declares any limitation of liability to be null and void, it authorizes the commission to modify that general rule upon a proper showing of justification for relief therefrom. Since this discretionary power involves an exception to the general rule, it has been used sparingly, and an applicant for released-rates authority is required to show that (1) the wide range in value of the commodity makes it difficult to estimate amount of any claim that may arise, (2) susceptibility of the traffic to loss and damage is comparatively high, (3) there is a high ratio of claims to freight charges, and (4) claims for loss and damage are numerous and frequent.—Wearing Apparel, Accessories, Piece Goods—Shulman, Inc., 321 I.C.C. 1 (4-5).

Applicant, a forwarder of wearing apparel, accessories, and piece goods, has shown that

packages handled contain commodities with a range of values from $5 to $30,000; that, despite modern security precautions, theft and pilferage continue to be high and seemingly cannot be eliminated; and that frequency of claims causes it great difficulty in obtaining cargo insurance. Outstanding order granting it relief for released-value rates should not be rescinded merely because of its failure to adduce specific evidence concerning ratio of claims to freight charges, since it has introduced an added consideration: competitive necessity. Without released rates, applicant would be required to ascertain the actual value of each shipment, even though its competitors would not, and resultant slowing down of its operations would prevent continuance of its competitive overnight service; moreover, if shippers were required to declare actual value, its exposure to claims would be increased. The released rates order previously issued is thus shown to be lawful.—Id., pp. 5-6.

Although the outstanding order, after authorizing applicant to maintain released rates on "wearing apparel, accessories, and piece goods," also states that it does not authorize such rates "on any description of traffic * * * other than as herein specifically indicated," that negative statement is explanatory, not descriptive, and examiner's conclusion that dresses, shoes, fur coats, and costume jewelry are not "specifically indicated" and therefore excluded would virtually nullify the order. The ordinary rule in interpreting orders is that a presumption exists in favor of a meaningful interpretation; broad generic descriptions, such as "wearing apparel," have long been used in the trade and by the commission for convenience; obviously, that description is inclusive, not exclusive. Since wearing apparel was specifically indicated in the order, it follows that all commodities embraced within that generic description are also indicated as specifically as though expressly designated; hence, dresses, shoes, and fur coats are included in the description "wearing apparel."—Id., p. 3.

115. Actions to enforce liability; in general.—[Vols. 14, 15].— Suit to recover from underlying connecting carrier, see First Flight Co. case, §20(12), n. 1.

50. Pickup and delivery.—[Vols. 12, 14, 19].—Prohibition in §415 of payment by forwarders of allowances that are "more than just and reasonable" requires some indication that a proposed allowance does not exceed average shipper's cost of performing the service. Respondent's claim that its cost of performing pickup service at Baltimore ranges from 55 to 60 cents per 100 pounds is not supported by any cost data, and no evidence of costs of shippers or of cartage companies performing the service for them was presented. In absence of such a showing, proposed allowances in form of a general reduction of 35 cents in rates of one respondent, and of 20 and 30 cents in rates of another, on shipments de-

livered by shippers to their receiving stations may not be approved.—Freight Forwarder Allowances at Baltimore, Md., 315 I.C.C. 719 (721).

Section 416. (a)—(d) [*§ 1016(a)—(d) U.S.C.*]—[Unchanged. See vol. 11, pp. 9677, 9678.]

Section 417. (a) [*§ 1017 (a) U.S.C.*] **Enforcement and procedure. Sections 12 and 17 of Part I, Compulsory Testimony and Immunity of Witnesses Acts, applicable.**—[Unchanged. See vol. 11, p. 9679.]

Section 417. (b) [*§ 1017(b) U.S.C.*] **Proceedings to enforce orders.—**

By act of Sept. 6, 1965, Pub. L. 89-170, §5, 79 Stat. 650, paragraph (b) was amended by inserting "(1)" after "(b)" and by adding the following:

(2) If any person operates in clear and patent violation of section 410 of this part, or any rule, regulation, requirement, or order thereunder, any person injured thereby may apply to the district court of the United States for any district where such person so violating operates, for the enforcement of such section, or of such rule, regulation, requirement, or order. The court shall have jurisdiction to enforce obedience thereto by a writ of injunction or by other process, mandatory or otherwise, restraining such person, his or its officers, agents, employees, and representatives from further violation of such section or of such rule, regulation, requirement, or order; and enjoining upon it or them obedience thereto. A copy of any application for relief filed pursuant to this paragraph shall be served upon the Commission and a certificate of such service shall appear in such application. The Commission may appear as of right in any such action. The party who or which prevails in any such action may, in the discretion of the court, recover reasonable attorney's fees to be fixed by the court, in addition to any costs allowable under the Federal Rules of Civil Procedure, and the plaintiff instituting such action shall be required to give security, in such sum as the court deems proper, to protect the interests of the party or parties against whom any temporary restraining order, temporary injunctive or other process is issued should it later be proven unwarranted by the facts and circumstances.

(3) In any action brought under paragraph (2) of this subsection, the Commission may notify the district court of the United States in which such action is pending that it intends to consider the matter in a proceeding before the Commission. Upon the filing of such a notice the court shall stay further action pending disposition of the proceeding before the Commission.

2. Construction and interpretation.—[Vols. 13, 14, 18, 19].—There is no distinction in law between the well-known and recognized policy permitting ownership of transportation facilities such as various types of cars by shippers or other private owners for transportation in line haul by rail carriers, and TOFC plan IV under which forwarders supply the flatcar either by lease from private owners or from the carrier itself, if the rates and tariffs covering such service are properly published and available to all shippers. However, the language of §418 is far from plain when applied to such a situation, and the court may seek light from its legislative history; evidence in that respect clearly demonstrates the legislative intent to prevent use of contract carriers by forwarders, and not to prevent forwarders from using their own instrumentalities and containers. The commission in its expertise correctly held that plans III and IV, and the rates and charges thereunder, are not violative of §418 when used by freight forwarders.—Cooper-Jarrett, Inc. v. United States, 226 F. Supp. 318 (326-7)*.

§421(g): Volume 18—p. 14695.

PART V

INTERSTATE COMMERCE ACT; LOAN GUARANTIES

Chapter 19, Title 49, U.S. Code

Section 501. [§ *1231 U.S.C.*] **Purpose.**—[Unchanged. See vol. 18, p. 14696.]

Historical Note

Although the loan guaranty program terminated on June 30, 1963, the commission continued to discharge responsibilities in connection with applications pending on that date and guaranties made prior thereto. All applications pending at the termination of the program have been disposed of; and final disbursements have been made in all guaranteed loans.—Annual Report, 1965, pp. 51, 53.

Notes of decisions

Volume 19—p. 15968.

2. Construction and interpreration.—[Vol. 19].—Inasmuch as the specific definition of a common carrier by railroad in §1(3)(a) includes as a carrier a trustee of a railroad, application under Part V by trustees of railroad in reorganization under the Bankruptcy Act qualifies under the statute as an application designed to aid a common carrier by railroad.—New York, N.H.& H.R. Co. Trustees' Loan Guaranty, 312 I.C.C. 749 (754).

Since Part V is a remedial statute, a liberal construction thereof is required. Though the trustees constitute an entity separate and apart from the debtor, upon assuming office they succeeded to all its rights, properties, and assets under §77(c)(2) of the Bankruptcy Act, thus are substituted for debtor by operation of law; it would therefore be unreasonable so to construe Part V that they would be placed in a less advantageous position than debtor to obtain aid consistent with the general purposes and objectives of Part V and §77 of the Bankruptcy Act; considering also the continuity of interest between debtor and the trustees, Part V authorizes the guaranty of a loan to them for purpose of reimbursing the estate they administer for capital expenditures made by the debtor from its own funds prior to inception of the reorganization proceeding.—Id., p. 755.

Objection by a holder of debtor's bonds that the loan for which guaranty is sought would not be in best interest of bondholders is more properly for consideration by the court in the reorganization proceeding.—Id., p. 750, note.

Section 502. [§ *1232 U.S.C.*] **Definitions.**—[Unchanged. See vol. 18, p. 14696.]

Section 503. [§ *1233 U.S.C.*] **Loan guaranties.**—[Unchanged. See vol. 18, p. 14696.]

Section 504. [§ *1234 U.S.C.*] **Limitations.**—[Unchanged. See vol. 18, p. 14679.]

Notes of Decisions

Volume 18—p. 14698; Volume 19—p. 15970.

5. Findings required; carrier's need for guaranty.—[Vol. 19].—Copies of letters received from three prominent New York banking institutions evidence inability of debtor railroad's trustees to obtain proposed $7,500,000 loan without a guaranty under Part V. Under present circumstances, failure to afford the trustees the time they seek through the proposed loan for determining, through surveys and studies being conducted, whether debtor's operations can be restored to profitable basis will result not only in complete and almost immediate cessation of the railroad operations, but will nullify all action taken to date by the trustees; from standpoint of the overall public interest, including the national defense, such result would be catastrophic. Grant of the guaranty sought is therefore justified.—New York, N.H. & H. R. Co. Trustees' Loan Guaranty, 312 I.C.C. 749 (756, 758, 759).

However, the proposed loan will enable the trustees to operate the railroad only for a few more months, when an additional $7,500,000 will be needed. As a prerequisite to favorable consideration of any further requests under Part V, the trustees will be required to furnish concrete evidence of steps taken and proposed to eliminate the continuing substantial out-of-pocket losses, also specific and detailed information as to definite commitments by States and localities, employees and labor unions, and other affected parties, to assume their respective share of the burden of maintaining such of the railroad operations as are essential in the public interest.—Id., pp. 759-60.

6. Interest rates.—[Vol. 19].—Interest rate of 4-3/4 percent per annum on proposed loan was negotiated by debtor's trustees after prolonged and unsuccessful attempts to secure loans at the current prime rate of 4-1/2 percent; proposed rate is less than that involved in trustees' prior application; is not unreasonable.—New York, N.H. & H.R. Co. Trustees' Loan Guaranty, 312 I.C.C. 749 (756).

8. Carrier's ability to repay; earning power; collateral security.—[Vol. 19].—***Collateral security:*** Proposed loan of $7,500,000 to debtor railroad's trustees would be secured by trustees' certificates which would have first lien on all debtor's properties other than such right, title, and interest as the trustees have or may acquire in capital stock of the railroad's subsidiary bus company now held by the Secretary of the Treasury as part of collateral securing flood loans to the railroad. As debtor's total assets as of September 30, 1961, aggregated $431,077,981, it is reasonable to conclude that, should resort thereto be necessary, the liquidating value of the estate would more than adequately secure the proposed loan; affirmative finding under §504(a)(4) is therefore warranted.—New York, N.H. & H.R. Co. Trustees' Loan Guaranty, 312 I.C.C. 749 (757-8).

Earning power: Not even the most favorable analysis of the trustees' pro forma estimates of prospective earning power of debtor's estate could be considered encouraging; such estimates compel conclusion that to date the trustees have been unsuccessful in arresting debtor's out-of-pocket losses to any material degree, and that no such abatement is envisioned within the next year; thus the estate's prospective earning power does not of itself furnish assurance of the trustees' ability to repay the proposed loan within the time fixed, or afford reasonable protection to interests of the United States. Nevertheless, the requisite finding under §504(a)(4) may be made if the trustees' prospective earning power, together with the character and value of the security pledged for the proposed loan, meets the statutory requirements.—New York, N.H. & H.R. Co. Trustees' Loan Guaranty, 312 I.C.C. 749 (757).

SUPPLEMENTAL LEGISLATION

Chapter 2.—ELKINS ACT

Section 41.(1)-(3). Liability, offenses, penalties, jurisdiction; Acts of agents, departures from published rates; receiving rebates.—[Unchanged. See vol. 4, pp. 2748, 2788, 2791.]

Historical note, see vol. 4, p. 2749, vol. 18, p. 14699.

Notes of Decisions

Volume 4—pp. 2751-2788; Volume 7—p. 5891; Volume 10—p. 8257; Volume 11—p. 9686; Volume 12—p. 10530; Volume 13—p. 11164; Volume 14—p. 11683; Volume 15—p. 12303; Volume 16—p. 12958; Volume 17—p. 13668; Volume 18—p. 14699; Volume 19—p. 15977

Constitutionality and Interpretation

11. Construction of language employed.—[vols. 4, 7, 10, 19].—

By its terms, the Elkins Act (adopted as a supplement to the then existing Interstate Commerce Act which regulated only interstate carriage by rail or jointly by rail and motor) applied to acts done by any common carrier subject to that act and its amendments; and amendment thereof by the Hepburn Act did not effect a change in the language delineating its coverage. Thus, since the statute applies to the railroad named in information charging defendant motor carrier with receiving rebates from the railroad for cartage service which it did not perform, in violation of §41(1), defendant is subject to proscriptions and penalties provided by the Elkins Act upon which the counts of the information are properly based. Motion to dismiss, on grounds that defendant is not a person or corporation intended to be covered by prohibitions of the Elkins Act, denied.—

United States v. Pep Trucking Co., 261 F. Supp. 480 (482, 483-4).

While ownership or maintenance of tracks inside a plant by a carrier, for use or benefit of the industry, violates the Elkins Act, when such tracks are not in fact plant facilities, though used incidentally for temporary placement of industry cars to facilitate interchange of cars in line-haul service, no violation occurs.—A. O. Smith Corp. Terminal Allowance, 319 I.C.C. 99 (101)*.

12. Purpose.—[Vols. 4, 10, 11, 19].—Shipper-appellant's practice of shipping locally produced propane gas at published transit rate instead of applicable higher local rate, through device of claiming a transit privilege to which it was not entitled, comes well within intendment of the Elkins Act, which is to eliminate rebates, concessions or discriminations from interstate transportation and, thus, to place all shippers and localities on an equal basis. Considering appellant's unfair economic advantage from such practice, the evil of discrimination against local shippers is readily apparent; furthermore, stipulation that appellant charged its customer with the local freight rate, and would have lost money on the propane business had it not been for the profit it made on the freight rates, cannot be dismissed as insignificant. Trial court's judgment finding appellant guilty of violating the statute, and imposing a fine on each of 26 counts, affirmed.—Union Petroleum Corp. v. United States, 376 F. 2d 569 (571-3)*.

Failure to File or Publish Rates

30. Willful failure to file and publish rates a misdemeanor.—[vol. 4].—See Natl. Motor Freight Traffic Assn. v. Delaware Valley, §6(1), n. 55.

Rebates, Concessions, and Discriminations

42. Solicitation an offense.—[vol. 4].—The Elkins Act outlaws solicitations of rebates by any person whatever, no matter for whose benefit the rebate is sought. Sanctions of the act are not restricted to carriers or shippers; any person as used in §1 thereof means "any person." Congress wanted interstate carrier rates to be published and honored, it wanted rebates stopped, and it used fitting language to accomplish that end. An indictment under §1 of the Elkins Act states an offense when it charges that a person has solicitated a rebate from a common carrier respecting interstate transportation of a shipper's property, even though it is not alleged that the rebate was for the benefit of the shipper.—United States v. Braverman, 373 U.S. 405 (406-9).

Acts alleged to amount to illegal "solicitation" of extension of credit beyond the 120-hour period authorized in the commission's credit regulations, which occurred both before and after movement of shipments involved, must be compared with the railroad's normal policy toward, and usual treatment of, other shippers. While a request before shipment for more than 120 hours in which to pay for a given shipment would be a solicitation of a concession or discrimination with respect to that shipment, transactions pointed to as such a "solicitation" did not in fact request longer credit for shipments charged in the information. And, while evidence shows instances of discussion and efforts between the railroad and shippers' association (after shipment) aimed at resolving default and securing payment of delinquent bills, it is not shown that the railroad would not have done the same to settle like problems of other shippers in similar circumstances; charge of unlawful solicitation of concession or discrimination is not supported.—Continental Shippers' Ass'n. v. United States, 328 F. 2d 966 (969-71).

47. Rebates; defined.—[vols. 4, 10, 15, 17, 19].—If a carrier wishes to initiate a lesser service for a lower price, it may do so: nothing in TOFC plans III and IV even suggests any rebate, concession, or discrimination; the types of service offered are available to all who wish to use them, and the rates are published for the type selected by the shipper; rates and charges under those plans thus do not violate the Elkins Act or §§2, 3, or 6 of Interstate Commerce Act. Whether railroads have indulged in unlawful practices under those plans has no bearing on lawfulness of the plans themselves; however, practices which they are shown to be engaging in—leasing of trailers and flatcars—are not violative of those sections on their face, and since there is nothing to prove that these leasing arrangements were used unlawfully, the

commission's decision that they are not shown to be unlawful must be upheld.—Cooper-Jarrett, Inc. v. United States, 226 F. Supp. 318 (323, 324-5)*.

Railroad was forced to transport shipments in interstate commerce at a rate less than that named in its published and filed tariffs when defendant trucking company demanded and received from the railroad 10-1/4 cents per hundred pounds for cartage service it did not perform, thus limiting the railroad to receipt of only 24-1/4 cents of the filed rail tariff rate of 34-1/2 cents. This amounted to a proscribed rebate received by defendant from the railroad, and a violation of the Elkins Act.—United States v. Pep Trucking Co., 261 F. Supp. 480 (482-3).

Provision in tariff naming TOFC rates under which shippers move railroads' trailers to and from ramp sites, that, if prior arrangements are made with the carriers, shippers or their agents may transport the trailers to points beyond tariff terminal areas, is a possible source of illegal rebating under Elkins Act, since it holds out to provide something of value to shippers but neither the charge therefor nor its compensativeness is shown, and is also potentially discriminatory when granting of the privilege would be discretionary with the carriers; cancellation required.—Iron and Steel Articles between Atlanta and St. Louis, 318 I.C.C. 80 (83).

Assailed unit train rates on steam coal, based on annual volume minima, do not result in a rebate through provision of free transportation for quantities of coal exceeding that fuel's 1962 share of the destination market. Unit train tariff provides that freight charges will be assessed initially at the rate for the highest annual volume, to be later adjusted on an alternating rate basis if that volume is not met; and once the volume shipped exceeds each of the annual minima, the rate for all coal previously shipped drops to the figure for that minimum. This does not amount to a rebate, since any settling payments will be made to, not by, the carrier. Also, if the 10,000-ton minimum per shipment is not met, defendant's rate for conventional service, rather than the unit train rate, becomes applicable.—Natural Gas Pipeline Co. of America v. N.Y.C. R. Co., 323 I.C.C. 75 (84).

71. Discrimination; defined.—[vol. 4].—The prohibition of a "concession or discrimination" implies a comparison with, a measurement by, and a departure from, a determined standard; also a two party transaction must exist before the statute is violated. It is not enough that shipper know that he is in a different position than other shippers; the railroad must have put him in, or he must have asked that the railroad put him in, that position. The prohibited acts, concession or discrimination, require that a conceding or discriminating party exist; however, cooperation between shipper and carrier is not required before the statute can be violated.—Continental Shippers' Ass'n v. United States, 328 F. 2d 966 (968).

Departure from Schedules; Devices

89. As to the shipper.—[vols. 4, 7].—In placing a density classification on export cotton, which under governing marine tariff made lower of two rates applicable, shipper demanded a rebate on basis of a claim that it knew or should have known to be false; such action is similar in nature to "false billing" and "false classification" and, under well known principles of statutory interpretation, come within "any other unjust or unfair device or means." Moreover, shipper acquiesced in—if, indeed, it did not prompt—carrier's actions that the [Maritime] commission found to constitute false billing. Effect of entire transaction was that shipper obtained transportation by water at less than otherwise applicable rates in such a way that its competitors were unaware of what had transpired.—Hohenberg Bros. Co. v. Federal Maritime Commission, 316 F. 2d 381 (383, 385). [Not arising hereunder]

On appeal from trial court's judgment finding shipper guilty of knowingly soliciting and accepting concessions from railroads through device of claiming a transit privilege to which it was not entitled, in violation of §1 of the Elkins Act, appellant's claimed misinterpretation of the transit tariff is not a valid defense to prosecution; while the statute was amended to insert word "knowingly," this does not alter fundamental principle that mistaken understanding of the law does not constitute a

defense. Moreover, "knowingly" imports mere perception of facts necessary to bring a questioned activity within statutory prohibitions; it does not require that there be knowledge or awareness that the activity is in fact prohibited. Appellant had full knowledge of tariffs in issue as well as all facts that would make the transit privilege inapplicable and discriminatory, but it nevertheless operated upon supposition of its legal right to do so. As the Supreme Court stated in 209 US 56, this was all the knowledge or guilty intent required by the statute; affirmed.—Union Petroleum Corp. v. United States, 376 F. 2d 569 (570-1, 573)*.

100.—Extension of credit.—[vols. 4, 13].—In criminal prosecution for violation of the Elkins Act, allegedly committed when shippers' association failed to pay its freight charges within time allowed by the commission's credit regulations, mere fact that the association failed to pay its freight bills within time allowed (and thus took advantages which it knew other shippers did not receive) does not show acceptance or receipt of a concession or discrimination. The statute does not make the mere failure to pay bills in violation of the credit regulations a crime, without more; nor does it make criminal a dialogue between creditor and debtor aimed at resolving existing default and securing payment of delinquent bills, without more.—Continental Shippers' Ass'n v. United States, 328 F. 2d 966 (967, 969, 970).

The railroad was not acting discriminatorily, or giving a concession, when it allowed the association to ship freight and extended to it the allowable credit; it was only giving what lawfully could be and was given to any shipper. Any advantage the association gained was entirely by its own action in failing to pay its freight bills after the freight was received, not through a discrimination or concession either knowingly or innocently granted by the railroad, and thus such advantage did not violate the statute. Moreover, while a long-standing record of unobjected-to late payments might show a course of action amounting to giving and receiving discriminatory credit, the railroad continually objected to the late payments and even suspended association's credit privileges for a period. After reinstatement of its credit, there was no regular pattern of late payments by the association; thus there is no support for the theory that the railroad gave it a concession or discrimination.—Id., p. 969.

102.—Lease to shipper at inadequate rental.—[Vols. 4, 7, 10, 11, 13, 15, 16, 19].—Schedule of minimum sale price and minimum monthly rental of each building at railroad's food terminal which tenants or buyers must pay, and which the railroad must collect in compliance with the commission's order in 308 ICC 609, set forth. As to the two of those buildings considered separately, in view of circumstances surrounding the transition of going concern businesses of previous tenants, early completion costs and latent defect costs were necessarily includible in current tenant's rate base, even though it derived no direct benefit therefrom.—Birmingham Food Terminal, Inc. v. Southern Ry. Co., 205 F. Supp. 640 (644, 645-6)*.

Penalties and Prosecutions

112. Application of penalties and provisions; to both carrier and shipper.—[Vols. 4, 7, 10, 13, 16].—Although defendant's granting of free intrastate transportation of cash letters for certain Wisconsin banks in connection with their interstate shipments for which a charge is made, while withholding such free service from other interstate shippers, violates provisions of the Elkins Act, complainant may not in a complaint proceeding invoke the penalties provided therein.—Armored Carrier Corp. v. B.D.C. Corp., 92 M.C.C. 665 (668).

See also Meinerz Creamery Co. case, EA §42, n. 1.

140. Sufficiency of indictment.—[vols. 4, 7, 10].—Test of the sufficiency of an indictment is whether the accusation contains elements of the offense intended to be charged, and sufficiently apprises defendant of what he must be prepared to meet, and whether the record accurately shows to what extent defendant may plead former acquittal or conviction in future proceedings relating to the same alleged offense. Information charging defend-

ant with violations of §41(1) of the Elkins Act, in that it knowingly, by means of a device, accepted rebates from Pennsylvania R. Co., meets the test of sufficiency; motion to dismiss, on grounds of insufficiency of the information, denied.—United States v. Pep Trucking Co., 261 F. Supp. 480 (482, 484).

See also United States v. Braverman, n. 42, above.

147. Burden of proof.—[Vols. 4, 10].—In order for association's conviction of violation of the Elkins Act, allegedly committed when it failed to pay accumulated freight charges within railroad's credit period, to be upheld, the record must show that the association knowingly solicited, accepted, or received a rebate, concession, or discrimination whereby any advantage was given or discrimination was practiced. The evidence established only that, because of pressing financial problems, the association failed to pay its obligations; it informed the railroad of its problems and suggested steps to resolve the debt; the railroad, after consideration, disclosed steps which it intended to collect the debt. The record as a whole is convincing that the association did not solicit, accept, or receive a concession or discrimination; hence there was a failure of evidence to support the charge; reversed.—Continental Shippers' Ass'n v. United States, 328 F. 2d 966 (968, 971).

Regulations of the Commission

32 FR 10794, July 22, 1967, Part 107a: Administrative Collection of Enforcement Claims, new Part 107a, adopting regulations published in 4 CFR Parts 101 through 105, added, effective Aug. 1, 1967.

Section 42. [§42 *U.S.C.*] Parties included in proceedings to enforce law.—[Unchanged. See vol. 4, p. 2792.]

Historical note, see vol. 4, p. 2792.

Notes of Decisions

Volume 4—p. 2792; Volume 7—p. 5896; Volume 11—p. 9688; Volume 14—p. 11683. Volume 19—p. 15979.

Parties Included in Proceedings to Enforce Law.

1. Parties interested in the traffic.—[Vols. 4, 7, 11, 14, 19].—Defendant district attorneys and judges of Louisiana were properly joined as parties defendant in actions to enjoin enforcement of State segregation statutes on Federal constitutional grounds.—United States v. Lassiter, 203 F. Supp. 20 (24).

While neither the pertinent provisions of the Elkins Act, the Interstate Commerce Act, nor the commission's order in 308 ICC 609, would apply to tenants at railroad's food terminal who were not shippers or receivers of freight or interested in or affected by rates on shipments moving through that terminal, the court, declining to apply the doctrine of "de minimis," found that tenants and realty companies named, all of whom occupied premises at the terminal on effective date of the commission's order, were shippers or receivers of freight within those statutes.—Birmingham Food Terminal, Inc. v. Southern Ry. Co., 205 F. Supp. 640 (643-4, 645-6)*.

Individual defendant who under purported vehicle-leasing arrangement has in substance actually been performing a complete transportation service as a contract carrier for defendant lessee as shipper, without authority from the commission in violation of §206(a) and 209(a) of Interstate Commerce Act, and defendant shipper-lessee who has actively aided and abetted the performance of such unauthorized operations, are subject to enjoiner under §2 of the Elkins Act. As it appears that both defendants will continue to engage in such unlawful activities unless restrained, defendant lessor, his agents, employees, etc., are enjoined from performing

such transportation, and defendant shipper, its agents, employees, etc., are enjoined from employing such services, unless and until defendant lessor obtains appropriate authority from the commission.—I.C.C. v. Moore, 236 F. Supp. 168 (172, 173).

In action by the Government seeking injunctive relief against racial segregation in rail and bus terminals which resulted from maintenance, by the city and its officials, of signs on sidewalks adjacent to terminals used by interstate carriers designating terminal waiting rooms as "white" and "colored" respectively, defendant carriers are proper parties since, although not responsible for the signs, they use those terminal facilities. Also, defendants city and city officials are "interested" and "affected" parties within this section, and under §43 they are "parties interested in the traffic," who should be required to discontinue their practices leading to discrimination. Reversed and remanded with instructions that injunction sought against both carrier and noncarrier defendants be issued.—United States v. City of Jackson, Miss., 318 F. 2d 1 (9-10, 17)*.

Provisions of §2 of Elkins Act authorizing joinder as parties, in addition to the carrier, of all persons interested in or affected by the rate considered concern enforcement proceedings instituted by the commission or other proper authorities, not by private parties. That section does not authorize joinder as defendants in a complaint proceeding under §13 of Interstate Commerce Act of noncarrier shippers or consignees charged assailed rates; a §13 proceeding is not an enforcement proceeding, and no violation of Elkins Act was alleged against defendant carriers.—Empire Petroleum Co. v. Chicago, B. & Q. R. Co., 315 I.C.C. 291 (292, 293).

Respondent sugar refineries and brokers have participated in and "are interested in or affected by" respondent dairy company's unlawful for-hire backhauling of sugar, within §2 of the Elkins Act, because their dealings with it have contributed to the success of those operations, and they have benefited therefrom in that their transactions with the dairy company have resulted in furthering sales by the brokers on behalf of their principals, with brokerage fees going to the brokers; and it is unnecessary to find that they knew or should have known that the dairy company's activities were in violation of Interstate Commerce Act before they may be ordered to cease and desist from dealing with it, since their own dealings constitute participation in violation of the licensing requirements of that act, which may be enjoined under the Elkins Act.—Meinerz Creamery Co.—Investigation of Operations, 88 M.C.C. 77 (85-6).

Respondent brokerage company is interested in or affected by the principal respondents' unlawful interstate transportation of sugar, within meaning of §2 of Elkins Act, when it has had full knowledge of every significant phase of their operations, has profited in utilizing their services, receiving its commission from the refinery whether or not it assists them in reselling sugar, and knows that their sugar operations constitute for-hire transportation service.—Stewart—Investigation of Operations, 89 M.C.C. 281 (289).

In purported lease of equipment without drivers, in which vehicles involved were actually subject to use, often with drivers on shipper-lessee's payroll, for movements on behalf of other shippers, shipper-lessee benefited by its participation as shipper in lessor's operations and must fairly be found to be interested in or affected by the considered practices within §2 of Elkins Act.—G & W Transfer Co., Inc.—Investigation of Operations, 89 M.C.C. 251 (254)*.

Shipper benefited and is benefiting by its participation as such in unlawful for-hire transportation performed under purported truck-leasing arrangement, and thus can be said to be interested in the practices condemned, within meaning of §2 of Elkins Act.—Schultz Transit, Inc., Investigation of Operations, 89 M.C.C. 305 (310)*.

Respondent sugar refiners and their agent brokers are "interested in or affected by" principal respondent's unlawful transportation activities; their dealings with it have contributed to success of its buy-and-sell operations and they have benefited therefrom, the refiners in avoiding absorption of a part of freight cost for lawful for-hire carriage and in

reaching a market where they would otherwise be at a competitive disadvantage geographically, and the brokers in receiving commissions on sugar which otherwise might not be sold in their respective marketing areas.—Morgan Packing Co., Inc.—Investigation of Operations, 92 M.C.C. 48 (60. 61).

Respondent sugar refiners and their exclusive broker are interested in and affected by respondent dairy company's unlawful sugar-transporting activities within meaning of §2 of Elkins Act; their dealings with it have contributed to success of those operations and they themselves have benefited therefrom; and since those dealings constitute participation in a violation of the licensing provisions of the Interstate Commerce Act, which participation may be enjoined under the Elkins Act, it is unnecessary to find that they knew or should have known that the dairy company's sugar activities have been unlawful.—Clearfield Cheese Co., Inc.—Investigation, 92 M.C.C. 504 (509)*.

In investigation to determine whether freight forwarder holding C. A. B. authority and motor carrier respondent are jointly and severally engaged in interstate carriage of property beyond scope of motor carrier's certificates, record is convincing that air forwarder knew, or had reason to know from nature of the arrangements in which it participated, that activities of the motor carrier constituted a for-hire transportation service requiring interstate motor carrier authority. It is evident, also, that air forwarder respondent benefited by its participation to some extent, and that it is interested in or affected by the practices under investigation within meaning of the statute. Consequently, cease and desist order is entered against both the air forwarder and the motor carrier respondents.—Film Transit, Inc., and Air Dispatch, Inc.—Investigation, 98 M. C. C. 145 (152).

Section 43. [§*43 U.S.C.*] **Proceedings in equity to enforce tariffs, etc.; district attorneys; damages; witnesses; precedence.**—[Unchanged. See vol. 4, p. 2793.]

Historical note, see vol. 4, p. 2794.

Notes of Decisions

Volume 4—p. 2795; Volume 19—p. 15980.

1. Injunction against departure in rates or discrimination.—[Vols. 4, 19].—Under this statute, both the rail and bus aspects of actions to restrain enforcement of State statutes requiring separation of passengers according to race in terminals, on Federal constitutional grounds, may be maintained by the commission or the Attorney General.—United States v. Lassiter, 203 F. Supp. 20 (24).

The Attorney General has standing to bring suit in the name of the United States to restrain and remove an unconstitutional interference with, and burden upon, interstate commerce. And the statute authorizes a U.S. Attorney, whenever so directed by the Attorney General, to institute a proceeding for equitable relief against discriminations forbidden by statutes relating to interstate commerce.—United States v. City of Shreveport, La., 210 F. Supp. 708 (710).

See also United States v. City of Jackson, Miss., §42, n. 1.

EXPEDITING ACT

Section 44, 45.[Unchanged. See vol. 11, p. 9688, vol. 13, p. 11165; vol. 15, p. 12304.]

Notes of Decisions

§44: Volume 4—p. 2802; §45: Volume 4—p. 2804; §45: Volume 19—p. 15980.

§45: 1. Right of direct appeal to Supreme Court.—[Vols. 4,19].—See I.C.C. v. AAA Con Drivers Exchange, Inc., case, 28 U.S.C. §§1291, 1292, n. 1.

COMPULSORY TESTIMONY—IMMUNITY OF WITNESSES

Section 46-48. Self-criminating testimony; perjury; refusal to testify.—[Unchanged. See vol. 4, p. 2806.]

Historical note, see vol. 4, p. 2806.

Notes of Decisions

§46: Volume 4—p. 2807; Volume 10—p. 8263; Volume 12—p. 10531; Volume 14—p. 11684; Volume 15—p. 12305; Volume 18—p. 14700.

§47: Volume 4—p. 2816; Volume 12—p. 10532.

§48: Volume 4—p. 2820; Volume 13—p. 11166; Volume 14—11685.

§47: 3. Interpretation.—[Vols. 4, 12].—Appellee was not immune from indictment and prosecution for violation of the Sherman Act and the Conspiracy Act because of the fact that he had previously appeared and testified before a subcommittee of Congress concerning matters covered by the indictment. Immunity provision of the Act of Feb. 25, 1903, applies only to persons testifying in judicial proceedings, not to those testifying before Congressional committees, and the 1906 amendment thereof simply limited immunity to persons testifying under oath and in response to subpena; it is limited to judicial proceedings which are brought under specific acts, such as the Sherman Act or the Commerce Act. Congressional investigations, although they may relate to specific existing acts, are not generally so restricted in purpose and scope as to be spoken of as being brought "under" those acts. Lower court's dismissal of the indictment, on ground that appellee's testimony before the subcommittee had immunized him from indictment, reversed and case remanded.—United States v. Weldon, 377 U.S. 95 (96-8, 104-7)*.

MANN-ELKINS ACT

Section 50. Agent in Washington for service; service in default of designation.[Unchanged. See vol. 4, p. 2828.]

Historical note, see vol. 4, p. 2828.

Notes of Decisions

Volume 7—p. 5899; Volume 11—p. 9689; Volume 12—p. 10532; Volume 13—p. 11166; Volume 14—p. 11685; Volume 15—p. 12305; Volume 16—p. 12958; Volume 17—p. 13669; Volume 18—p. 14700.

1. In general.[Vols. 7, 11-18].—Although third-party plaintiff, a Tennessee corporation, is a wholly owned subsidiary of a wholly owned subsidiary of defendant, a Missouri corporation, in absence of a showing that the books and records of the parent and subsidiary corporations are mingled, and that the parent exercises such control over the subsidiary that the latter should be deemed the agent of the former, the mere relationship of parent and subsidiary does not warrant conclusion that the parent is doing business wherever the subsidiary is doing business.—First Flight Co. v. National Carloading Corp., 209 F. Supp. 730 (733, note 3).

Extent of personal jurisdiction of the federal courts and sufficiency of service of process under Rule 4(d)(3) of Federal Rules of Civil Procedure is a matter governed solely by federal rather than state law. Although third-party defendant neither owns nor operates any line in Tennessee and maintains in that State only a solicitation office staffed by a "District Agent" and a clerk, neither of whom has been designated an agent to receive process, such district agent would be regarded as a "managing or general agent" within meaning of Rule 4(d)(3) authorizing a wholly federal method of service; the court has personal jurisdiction over defendant under federal law, and service of third-party process upon the district agent was service upon an acknowledged agent of defendant within the territorial limits of the court's process; motion to quash overruled.—Id., pp. 733, 735-6, 740.

The district court has no jurisdiction to entertain a third-party complaint against a railroad which owns no track and performs no transportation service within the judicial district, but merely maintains an office for solicitation of business. Mere solicitation does not constitute "doing business": the criterion is whether the local solicitors have authority to bind the foreign corporation by which they are employed; none of defendant's employees in its Philadelphia office had such authority; motion to quash service of process, granted.—Vereen v. Chicago, N., St. P. & P. R. Co., 209 F. Supp. 919 (920-1); Greenwalt v. Reading Co., 209 F. Supp. 954 (955). [Not arising hereunder.]

In the matter of service of process, a district court must not be walled in by limitations of state law that are more restrictive than federal law. Where service of process is validly predicated under Rule 4(d)(3) of Federal Rules of Civil Procedure, it must not be defeated by showing that the alternative provisions of Rule 4(d)(7), allowing process to be served in accordance with state law, indicate defective service; where there is no need to use state law for service, it may not be used to test sufficiency of service. Since subsection (d)(3) permits service on an agent authorized by law to receive process, federal law is used to determine whether the agent served comes within meaning of the rule; and state law, not being invoked under subsection (d)(7), cannot define the agency question under subsection (d)(3). Except where, unless service is properly had under state procedure, no federal means of service is available, subsections (d)(3) and (7) stand on independent footing; once it is established that a defendant may be served, either is available to plaintiff as his direction for the service of process.—Hornstein v. Atchison, T. & S.F. Ry. Co., 229 F. Supp. 1009 (1012). [Not arising hereunder.]

Purpose of the summons is to give efficient notice, and service of process on an agent whose activities establish defendant's "presence" in the State cannot be deemed insufficient notice; as a matter of law, the highest ranking agent within the State who is the means whereby a foreign corporation is subject to process is a proper person under Rule 4(d)(3) to receive the summons on behalf of his principal. Service of process on agent in charge of defendant railroad's solicitation office in Wisconsin, maintenance of which

establishes its amenability to the district court's jurisdiction, provided adequate notice. It would be reasonable to expect that such an agent, especially one under direction of out-of-State superior officers, would turn over the process received by him to his superiors, as defendant's agent in fact did. Finding of "in personam" jurisdiction over defendant because it is doing business in the State and because service on its solicitation agent was proper is compatible with fair play and substantial justice.—Id., p. 1013.

PANAMA CANAL ACT

Section 51. Proceedings relating to rail and water routes; orders.—[Unchanged. See vol. 11, p. 9690.]

Amendments, see footnotes, vol. 11, p. 9690.

HOCH-SMITH RESOLUTION

Section 55. Policy in making rate adjustments; investigation of rates authorized.—[Unchanged. See vol. 4, p. 2833.]

Historical notes, see vol. 4, p. 2834, vol. 10, p. 8267.

Notes of Decisions

Volume 4—p. 2835; Volume 7—p. 5901; Volume 10—p. 8267; Volume 11—p. 9690; Volume 13—p. 11167; Volume 15—p. 12306; Volume 16—p. 12959; Volume 17—p. 13669; Volume 18—p. 14701; Volume 19—p. 15982.

Ratemaking Policy

20. Consideration of industrial conditions.—[Vols. 4, 7, 10].—Hoch-Smith Resolution, and analysis thereof in 281 US 658, give convincing proof that congressional policy requires just and reasonable classifications for all ratemaking purposes, not just class rates; and in commenting on requirement for consideration of (a) the general and comparative levels in market value "of the various classes and kinds of commodities" over a reasonable period of years, (b) natural and proper development of the country as a whole, and (c) maintenance of an adequate system of transportation, the Supreme Court emphasized that those matters were all regarded as factors to be considered under existing laws. The basic statutory standards of lawfulness are substantially the same today as when that resolution was enacted.—All Commodities, New England to Chicago and St. Louis, 315 I.C.C. 419 (424)*.

RATES ON GOVERNMENT TRAFFIC

GOVERNMENT TO PAY FULL RATES

Section 65. [§321 as enacted] Government traffic; rates,—[Unchanged. See vol. 13, p. 11167, vol. 11, par. (b), p. 9691.]

Amendments, see footnotes, vol. 13, p. 11168; historical notes, vol. 11, p. 9691, vol. 12, p. 10533.

Notes of Decisions

Volume 11—p. 9692; Volume 12—p. 10533; Volume 13—p. 11168; Volume 14—p. 11686; Volume 15—p. 12307; Volume 16—p. 12960; Volume 18—p. 14701; Volume 19—p. 15983.

10. Pleadings and procedure, generally.—[Vols. 13-15].—When they filed a stipulation of facts, affidavits supporting their contentions, and documents relating thereto, both parties intended the stipulation to mean that all possible evidence in carrier's suit to recover amount of claimed overpayment on government shipments had been put into the record, i.e., that neither party had any more evidence regarding the issues. In addition, by their cross motions for summary judgment, both parties admit that there was no question of fact remaining which necessitated further proceedings.—Garrett Freightlines, Inc. v. United States, 236 F. Supp. 594 (595).

In government's suit to recover from carrier alleged overpayments for transportation charges, judgment and order of Sept. 12, 1955, referring to the commission question of "what were the reasonable rates for shipments involved," and retaining jurisdiction pending that determination, was an adjudication of the whole case (including all possible theories of recovery) to which the United States took no exception. However, the commission did not rule on the matter because of lack of jurisdiction. It is now too late (9 years after trial) for plaintiff to urge that defendant is liable for overcharges because his representation on bills, that charged rates were lowest available for movement of similar traffic, was incorrect; in view of its long acquiescence therein, the 1955 judgment is interpreted to embrace a finding, and the court finds, that plaintiff failed to sustain its burden of proof on the misrepresentation theory. While that theory was not urged at first trial, it could just as well have been; and, ordinarily, a second trial will not be accorded on basis of a new theory. Complaint dismissed.—United States v. Garner, 236 F. Supp. 632 (634-6).

Motor carrier found not entitled to recover transportation charges on Army officer's house trailer which moved under Government bill of lading, but which it could not deliver because of accident in transit which resulted in total loss of the trailer, when the bill of lading expressly conditioned payment of charges on consignee's receipt of the shipment and his signing the Certificate of Delivery on face of the bill. Under decision in 338 US 421, the evidence on which carrier may rely for payment is the "accomplished" bill of lading, accompanied by the Certificate of Delivery signed on "receipt of the shipment"; without receipt of the goods, the bill was not, and could not have been, filled in under strict terms thereof so as to be "properly accomplished" for purposes of payment to carrier.—National Trailer Convoy, Inc. v. United States, 345 F. 2d 573 (574, 575-6).

Section 65a. [*§3 as enacted.*] **Readjustment of rates, fares, and charges to shippers.**—[Unchanged. See vol. 13, p. 11168, vol. 11, p. 9692.]

Amendments, see footnotes, vol. 13, p. 11168.

Notes of Decisions

Volume 14—p. 11688.

Section 66. [§322 as enacted]. Government traffic; payment for transportation; deduction of overpayments. —[Unchanged. See vol. 18, p. 14702.]

Cross Reference

Notes of Decisions

Volume 18—p. 14703; Volume 19—p. 15984.

1. In general.—[Vols. 18,19].—Though neither Government bill of lading nor plaintiff motor carrier's freight bill indicated that plaintiff was either initial or delivering carrier of shipment intended for movement in piggyback service under its contract with railroads, the Government withheld earned revenues from plaintiff on account of claim for loss of the shipment on line of connecting railroad, and, the railroad being willing to settle with plaintff within limit of their indemnity agreement, plaintiff effected settlement not knowing that the Government's claim was over twice the amount thereof. Since plaintiff was not liable to the Government for destruction of the cargo, it was unjustly enriched by the amount so received, and the government is entitled to credit therefor in law and equity, under principles of subrogation and unjust enrichment, and is entitled to recover the balance remaining after crediting the shipping charges owed by it to plaintiff.—Riss & Co. v. United States, 213 F. Supp. 791 (796-7, 799).

To justify deductions made from charges paid by the government on certain shipments, under claim of the presumption of unreasonableness created by Rule 66(a) of Tariff Circular 20, the government, as the person claiming benefit of the presumption, had the burden of proving by substantial evidence (1) that cars of particular size were ordered from plaintiff carriers, (2) that carriers were given sufficient time to furnish the cars ordered but furnished larger cars for their own convenience, and (3) that shipments on which setoff is claimed would have fitted in cars of size ordered. Since there was a lack of substantial factual evidence on which the commission could find the three basic facts, or any one of them, which would render Rule 66(a) applicable, the commission's finding that that rule rendered the considered charges unreasonable and that plaintiffs had not overcome that presumption was erroneous. The commission's order set aside and the case remanded for further proceedings consonant with the court's opinion.—Baltimore & O. R. Co. v. United States, 217 F. Supp. 918 (922-6)*.

In reliance on two commission decisions in complaints by other parties that rates charged on shipments of knocked-down motor-vehicle chassis were excessive, the General Accounting Office deducted amounts in excess of the rates found reasonable from freight bills due the railroad on other Government shipments; but upon referral of the matter to the commission in the railroad's suit to recover those deductions the commission reversed its prior decisions and found the rates charged not unreasonable. In such complicated matters as rate fixing, strong reliance must be placed on the expertise of the regulating agency; as the commission's findings upon reconsideration are based on substantial evidence and there is no basis for finding the rates approved by it unreasonable, the commission's order ratifying the rates charged is sustained.—United States v. I.C.C., 221 F. Supp. 584 (586, 587, 588)*.

In carrier's suit to recover amount of claimed overpayment, deducted following post-audit from other amounts due plaintiff,

on government shipments of engines, evidence shows that "exclusive use" was requested by shipper when each bill of lading contained a notation that exclusive use of vehicles was authorized to meet a deadline date at destination. While trailers were not loaded to full visual or weight capacity, the floor area of each was completely used, shipper marked "no stowage on top" on each engine, lading remained in original trailers (and no additional freight was added) during entire movement, and the shipments were given expedited service by use of a two-man sleeper cab operation. Defendant's contention that "exclusive use" service does not differ materially from t.l. service is without merit, and its contention that "exclusive use" tariff does not apply in preference to t.l. tariff when vehicles are loaded to capacity is incorrect as a matter of law. Rates based on "exclusive use" were properly charged; plaintiff entitled to recover amount of improper deductions.—Garrett Freightlines, Inc. v. United States, 236 F. Supp. 594 (595-8).

When exclusive use of carrier's vehicles was requested, and received, by the Government on all four shipments in issue, higher tariff rates for exclusive use were applicable. Although three of the shipments each loaded vehicle used to capacity, and no benefit was received from exclusive-use rates, defendant was not entitled to lower t.l. rates; tariff publishing rates applicable when exclusive use is requested makes no exception in case of a vehicle loaded to capacity. While fourth shipment did not load the vehicle to capacity, and notation that exclusive use was requested was not on bill of lading, defendant's certificate on bill of lading that exclusive vehicle use was furnished was tantamount to a request therefor. Plaintiff is entitled to recover amount of transportation charges claimed as overpayment, upon post audit, and deducted from amounts due it for other transportation.—Campbell "66" Express, Inc. v. United States, 302 F. 2d 270 (270-2).

Railroad found entitled to recover amount of overcharges claimed by the Government, which was deducted after post-audit from amounts admittedly due plaintiff for other services, on shipments of army tractor tanks with guns. Although under §22 quotation in effect when shipments moved class or column 35 rates published in tariffs on file with the commission applied on such commodities, and Note 2 thereof provided that where such rate was not published 35 percent of first class would apply, defendant was not entitled to make the deduction in issue in reliance on that quotation and Pacific South-Coast Freight Bureau Tariff No. 234-C; at time of considered movement all class rates in that tariff had been cancelled except classes 1 through A, but tariff supplement cancelling them referred to another tariff for rates to apply in lieu of those cancelled and that tariff provided a class or column 35 rate for tractor tanks; therefore, such rate being published in an available tariff, Note 2 precludes defendant from applying 35 percent of the first class rate as it did. Rate charged by plaintiff was the applicable rate.—Great Northern Ry. Co. v. United States, 352 F. 2d 375 (376-7).

Although plaintiff carrier could not actually move government shipments of jet fuel in tank trucks over 293-mile short-line route which involved some ferry movement, because of Coast Guard regulations prohibiting transportation on ferries of tank trucks loaded with flammable mixtures, that route, rather than 340-mile shortest all-highway route, was properly used as mileage basis for determining transportation charges on those shipments. Governing tariff provided for application of mileage rate to the short-line route where carrier deviates therefrom to avoid violation of federal regulations; and provisions of mileage guide referred to in the tariff indicate that shortest route is to be used for rate-making purposes, regardless of whether it is the actual route chosen by carrier. Plaintiff is not entitled to recover refunds made under protest to defendant because of claimed overpayments determined after post audit of its transportation bills.—M. I. O'Boyle & Son, Inc. v. United States, 303 F. 2d 446 (447-8).

In determining that domestic-rate charges applicable on war-blocked export shipments of Government freight were unjust and unreasonable, the commission properly weighed all pertinent factors, and though it did not expressly find that the lower export rate was

reasonable, what it did was to provide for just and reasonable charges on the shipments concerned. Issue of reasonableness of the rates is not open to the court in carrier's action to recover deductions by the Government in amount of difference between the export and domestic rates; case remanded to the lower court with direction to dismiss the petition for injunction for want of equity.—Pennsylvania R. Co. v. United States, 315 F. 2d 460 (465)*.

Section 66 was enacted to aid the railroads to secure prompt payment of their charges, and the right reserved to the Government to audit and deduct overpayments is for protection of the Government, not the carriers. Requirement of mutual dealings essential to plaintiff's theory of an open, running account, against which the statute of limitations would not begin to run until audit was made, is not met where all services were rendered by plaintiff and the Government's only obligation was to pay for those services, subject to its right to assure by audit the accuracy of the charges; that requirement is not satisfied by the mere fact that the parties have cross-demands against each other. Moreover, plaintiff's claims for additional charges do not constitute a running account when it billed the Government after each shipment and expected and received payment on that basis. As plaintiff did not discover its billing errors until 6 years after the services were performed, its claims for additional charges are barred.—Baggett Transp. Co. v. United States, 319 F. 2d 864 (870-1).

However, plaintiff's claim for refund of amounts deducted in post-audit for weight of dunnage included in shipments is not barred, since that cause of action arose when the deductions were made. Plaintiff is entitled to refund of amounts deducted for dunnage under §22 quotations which did not mention dunnage, including deductions from charges at rates named therein which applied under alternative provision in another quotation which excluded dunnage from computation of charges. But plaintiff is not entitled to refund where deductions were made under quotations which provided for exclusion of dunnage by reference to motor classification rule.—Id., pp. 871-2.

Motor carrier that had filed rates with the United States as a party to a §22 quotation must be considered to be within meaning of "common carrier subject to the Interstate Commerce Act" in this section; therefore, the government could bring action under §66 for restitution of alleged overpayments on shipments which moved between points within a State. Having voluntarily become bound as an interstate carrier, appellee cannot now claim he is not so bound; he has waived any claim of exclusion under §66. Furthermore, while carrier is defending against the government action, instead of suing to recover an amount deducted after post audit, this difference is not sufficient to shift the burden of proof; carrier is entitled to recover only if it satisfies its burden of proving that its charges were computed at lawful and authorized rates. [Citing 355 US 253.]—United States v. Francis, 320 F. 2d 191 (195).

Legislative history of §66, as discussed in 355 US 253, and the Court's action in that case and 352 US 59, are convincing that deductions or setoffs of overcharges for pre-1958 shipments are never time-barred. It was the congressional purpose in enacting §66 to afford immediate payment to carriers, but to provide full protection to the Government by post-audit procedures, and Congress then put no time limit on the §66 right to deduct the amount of any overpayment from any amount subsequently found to be due the carrier; experience apparently demonstrated that this was unwise, and Congress thought it wise to change that policy. Legislative history of the 1958 changes reflects (1) congressional awareness of the pre-1958 law, that the Government's right to deduct for overpayment is not limited as to time, and (2) the legislative judgment then reached, that a reasonable time limitation (3 years) should be established for such deductions; but that amendment does not affect claims for overcharges collected prior to its effective date.—Strickland Transp. Co. v. United States, 334 F. 2d 172 (179-80). [See also same case, §217(b), n. 17.]

Carriers found entitled to recover amounts of claimed overcharges on Government shipments which defendant collected after audit of plaintiffs' bills for freight charges on shipments of household goods for the military. Plaintiffs' previously filed individual §22 rate

tenders on household goods were effectively cancelled by supplements to bureau tenders filed by their respective rate publishing bureaus, which supplements published uniform §22 rate tenders for account of all member carriers and specifically cancelled and superseded all individual tenders previously filed by the carriers; and, after the Department of Defense agreed to such cancellation of the individual tenders and approved the supplements, the new common rates became effective. Therefore, rates in the two bureau supplements applied on shipments in controversy; and the Government was not overcharged, as claimed, to extent that applicable charges exceeded charges computed on basis of plaintiffs' individual tenders filed prior to effective date of those supplements.—United Van Lines, Inc. v. United States, 353 F. 2d 741 (745-4, 746).

Amendment to the statute, providing that settlement of claims for transportation charges on Government shipments shall be barred unless claim is received by General Accounting Office within 3 years after accrual thereof, was intended only to bar administrative settlement of claims presented 3 years after accrual. The proviso does not affect or extend running of the 6-year period provided in 28 USC §2501 which governs filing of suits in the Court of Claims by carriers against the Government to recover transportation charges; and presentment of claim to and decision by General Accounting Office, not being prerequisite to such a suit, does not toll running of that statute. Thus, GAO's refusal of foreign air carrier's claim for freight charges on considered shipments, because bills were not presented to it within 3 years after last one was delivered, is not an adjudication which bars plaintiff's Court of Claims suit to recover those charges filed less than 6 years, but more than 3 years, after delivery. Judgment for plaintiff.—Iran National Airlines Corp. v. United States, 360 F. 2d 640 (641-3).

Section 1-5.—[Unchanged. See vol. 15, p. 12309, vol. 16, p. 12961.]

ADMINISTRATIVE PROCEDURE ACT

[5 USC §§551-559 and §§701-706]

CHAPTER 5—ADMINISTRATIVE PROCEDURE

SUBCHAPTER II—ADMINISTRATIVE PROCEDURE

[The provisions of this subchapter and chapter 7 of this title were originally enacted by act June 11, 1946, ch. 324, 60 Stat. 237, popularly known as the "Administrative Procedure Act". That Act was repealed as part of the general revision of this title by P.L. 89-544 of Sept. 6, 1966 and its provisions incorporated into this subchapter and chapter 7 hereof.] [See vol. 13, p. 11171.]

SEC. 551. DEFINITIONS

For the purpose of this subchapter—

(1) "agency" means each authority of the Government of the United States, whether or not it is within or subject to review by another agency, but does not include—

(A) the Congress;

(B) the courts of the United States;

(C) the governments of the territories or possessions of the United States;

(D) the government of the District of Columbia;

or except as to the requirements of section 552 of this title—

(E) agencies composed of representatives of the parties or of representatives of organizations of the parties to the disputes determined by them;

(F) courts martial and military commissions;

(G) military authority exercised in the field in time of war or in occupied territory; or

(H) functions conferred by sections 1738, 1739, 1743, and 1744 of title 12; chapter 2 of title 41; or sections 1622, 1884, 1891–1902, and former section 1641 (b) (2), of title 50, appendix;

(2) "person" includes an individual partnership, corporation, association, or public or private organization other than an agency;

(3) "party" includes a person or agency named or admitted as a party, or properly seeking and entitled as of right to be admitted as a

party, in an agency proceeding, and a person or agency admitted by an agency as a party or for limited purposes;

(4) "rule" means the whole or a part of an agency statement of general or particular applicability and future effect designed to implement, interpret, or prescribe law or policy or describing the organization, procedure, or practice requirements of an agency and includes the approval or prescription for the future of rates, wages, corporate or financial structures or reorganizations thereof, prices, facilities, appliances, services or allowances therefor or of valuations, costs, or accounting, or practices bearing on any of the foregoing;

(5) "rule making" means agency process for formulating, amending, or repealing a rule;

(6) "order" means the whole or a part of a final disposition, whether affirmative, negative, injunctive, or declaratory in form, of an agency in a matter other than rule making but including licensing;

(7) "adjudication" means agency process for the formulation of an order;

(8) "license" includes the whole or a part of an agency permit, certificate, approval, registration, charter, membership, statutory exemption or other form of permission;

(9) "licensing" includes agency process respecting the grant, renewal, denial, revocation, suspension, annulment, withdrawal, limitation, amendment, modification, or conditioning of a license;

(10) "sanction" includes the whole or a part of an agency—

(A) prohibition, requirement, limitation, or other condition affecting the freedom of a person;

(B) withholding of relief;

(C) imposition of penalty or fine;

(D) destruction, taking, seizure, or withholding of property;

(E) assessment of damages, reimbursement, restitution, compensation, costs, charges, or fees;

(F) requirement, revocation, or suspension of a license; or

(G) taking other compulsory or restrictive action;

(11) "relief" includes the whole or a part of an agency—

(A) grant of money, assistance, license, authority, exemption, exception, privilege, or remedy;

(B) recognition of a claim, right, immunity, privilege, exemption, or exception; or

(C) taking of other action on the application or petition of, and beneficial to, a person;

(12) "agency proceeding" means an agency process as defined by paragraphs (5), (7), and (9) of this section; and

(13) "agency action" includes the whole or a part of an agency rule, order, license, sanction, relief, or the equivalent or denial thereof,

or failure to act.

SEC. 552 PUBLIC INFORMATION; AGENCY RULES, OPINIONS, ORDERS, RECORDS, AND PROCEEDINGS

(a) Each agency shall make available to the public information as follows:

(1) Each agency shall separately state and currently publish in the Federal Register for the guidance of the public—

(A) descriptions of its central and field organization and the established places at which, the employees (and in the case of a uniformed service, the members) from whom, and the methods whereby, the public may obtain information, make submittals or requests, or obtain decisions;

(B) statements of the general course and method by which its functions are channeled and determined, including the nature and requirements of all formal and informal procedures available;

(C) rules of procedure, descriptions of forms available or the places at which forms may be obtained, and instructions as to the scope and contents of all papers, reports, or examinations;

(D) substantive rules of general applicability adopted as authorized by law, and statements of general policy or interpretations of general applicability formulated and adopted by the agency; and

(E) each amendment, revision, or repeal of the foregoing.

Except to the extent that a person has actual and timely notice of the terms thereof, a person may not in any manner be required to resort to, or be adversely affected by, a matter required to be published in the Federal Register and not so published. For the purpose of this paragraph, matter reasonably available to the class of persons affected thereby is deemed published in the Federal Register when incorporated by reference therein with the approval of the Director of the Federal Register.

(2) Each agency, in accordance with published rules, shall make available for public inspection and copying—

(A) final opinions, including concurring and dissenting opinions, as well as orders, made in the adjudication of cases;

(B) those statements of policy and interpretations which have been adopted by the agency and are not published in the Federal Register; and

(C) administrative staff manuals and instructions to staff that affect a member of the public;

unless the materials are promptly published and copies offered for sale. To the extent required to prevent a clearly unwarranted invasion of personal privacy, an agency may delete identifying details when it makes available or publishes an opinion, statement of policy, interpretation, or staff manual or instruction. However, in each case the justifi-

cation for the deletion shall be explained fully in writing. Each agency also shall maintain and make available for public inspection and copying a current index providing identifying information for the public as to any matter issued, adopted, or promulgated after July 4, 1967, and required by this paragraph to be made available or published. A final order, opinion, statement of policy, interpretation, or staff manual or instruction that affects a member of the public may be relied on, used, or cited as precedent by an agency against a party other than an agency only if—

(i) it has been indexed and either made available or published as provided by this paragraph; or

(ii) the party has actual and timely notice of the terms thereof.

(3) Except with respect to the records made available under paragraphs (1) and (2) of this subsection, each agency, on request for identifiable records made in accordance with published rules stating the time, place, fees to the extent authorized by statute, and procedure to be followed, shall make the records promptly available to any person. On complaint, the district court of the United States in the district in which the complainant resides, or has his principal place of business, or in which the agency records are situated, has jurisdiction to enjoin the agency from withholding agency records and to order the production of any agency records improperly withheld from the complainant. In such a case the court shall determine the matter de novo and the burden is on the agency to sustain its action. In the event of noncompliance with the order of the court, the district court may punish for contempt the responsible employee, and in the case of a uniformed service, the responsible member. Except as to causes the court considers of greater importance, proceedings before the district court, as authorized by this paragraph, take precedence on the docket over all other causes and shall be assigned for hearing and trial at the earliest practicable date and expedited in every way.

(4) Each agency having more than one member shall maintain and make available for public inspection a record of the final votes of each member in every agency proceedings.

(b) This section does not apply to matters that are—

(1) specifically required by Executive order to be kept secret in the interest of the national defense or foreign policy;

(2) related solely to the internal personnel rules and practices of an agency;

(3) specifically exempted from disclosure by statute;

(4) trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(5) inter-agency or intra-agency memorandums or letters which

would not be available by law to a party other than an agency in litigation with the agency;

(6) personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy;

(7) investigatory files compiled for law enforcement purposes except to the extent available by law to a party other than an agency;

(8) contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions; or

(9) geological and geophysical information and data, including maps, concerning wells.

(c) This section does not authorize withholding of information or limit the availability of records to the public, except as specifically stated in this section. This section is not authority to withhold information from Congress.

SEC. 553. RULE MAKING

(a) This section applies, according to the provisions thereof, except to the extent that there is involved—

(1) a military or foreign affairs function of the United States; or

(2) a matter relating to agency management or personnel or to public property, loans, grants, benefits, or contracts.

(b) General notice of proposed rule making shall be published in the Federal Register, unless persons subject thereto are named and either personally served or otherwise have actual notice thereof in accordance with law. The notice shall include—

(1) a statement of the time, place, and nature of public rule making proceedings;

(2) reference to the legal authority under which the rule is proposed; and

(3) either the terms or substance of the proposed rule or a description of the subjects and issues involved.

Except when notice or hearing is required by statue, this subsection does not apply—

(A) to interpretative rules, general statements of policy, or rules of agency organization, procedure, or practice; or

(B) when the agency for good cause finds (and incorporates the finding and a brief statement of reasons therefor in the rules issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest.

(c) After notice required by this section, the agency shall give interested persons an opportunity to participate in the rule making through submission of written data, views, or arguments with or without opportu-

nity for oral presentation. After consideration of the relevant matter presented, the agency shall incorporate in the rules adopted a concise general statement of their basis and purpose. When rules are required by statute to be made on the record after opportunity for an agency hearing, sections 556 and 557 of this title apply instead of this subsection.

(d) The required publication or service of a substantive rule shall be made not less than 30 days before its effective date, except—

(1) a substantive rule which grants or recognizes an exemption or relieves a restriction;

(2) interpretative rules and statements of policy; or

(3) as otherwise provided by the agency for good cause found and published with the rule.

(e) Each agency shall give an interested person the right to petition for the issuance, amendment, or repeal of a rule.

SEC. 554. ADJUDICATIONS

(a) This section applies, according to the provisions thereof, in every case of adjudication required by statute to be determined on the record after opportunity for an agency hearing, except to the extent that there is involved—

(1) a matter subject to a subsequent trial of the law and the facts de novo in a court;

(2) the selection or tenure of an employee, except a hearing examiner appointed under section 3105 of this title;

(3) proceedings in which decisions rest solely on inspections, tests, or elections;

(4) the conduct of military or foreign affairs functions;

(5) cases in which an agency is acting as an agent for a court; or

(6) the certification of worker representatives.

(b) Persons entitled to notice of an agency hearing shall be timely informed of—

(1) the time, place, and nature of the hearing;

(2) the legal authority and jurisdiction under which the hearing is to be held; and

(3) the matters of fact and law asserted.

When private persons are the moving parties, other parties to the proceeding shall give prompt notice of issues controverted in fact or law; and in other instances agencies may by rule require responsive pleading. In fixing the time and place for hearings, due regard shall be had for the convenience and necessity of the parties or their representatives.

(c) The agency shall give all interested parties opportunity for—

(1) the submission and consideration of facts, arguments, offers of settlement, or proposals of adjustment when time, the nature of the proceedings, and the public interest permit; and

(2) to the extent that the parties are unable so to determine a con-

troversy by consent, hearing and decision on notice and in accordance with sections 556 and 557 of this title.

(d) The employee who presides at the reception of evidence pursuant to section 556 of this title shall make the recommended decision or initial decision required by section 557 of this title, unless he becomes unavailable to the agency. Except to the extent required for the disposition of ex parte matters as authorized by law, such an employee may not—

(1) consult a person or party on a fact in issue unless on notice and opportunity for all parties to participate; or

(2) be responsible to or subject to the supervision or direction of an employee or agent engaged in the performance of investigative or prosecuting functions for any agency.

An employee or agent engaged in the performance of investigative or prosecuting functions for an agency in a case may not, in that or a factually related case, participate or advise in the decision, recommended decision, or agency review pursuant to section 557 of this title, except as witness or counsel in public proceedings. This subsection does not apply—

(A) in determining applications for initial licenses;

(B) to proceedings involving the validity or application of rates, facilities, or practices of public utilities or carriers; or

(C) to the agency or a member or members of the body comprising the agency.

(e) The agency, with like effect as in the case of other orders, and in its sound discretion, may issue a declaratory order to terminate a controversy or remove uncertainty.

SEC. 555. ANCILLARY MATTERS

(a) This section applies, according to the provisions thereof, except as otherwise provided by this subchapter.

(b) A person compelled to appear in person before an agency or representative thereof is entitled to be accompanied, represented, and advised by counsel or, if permitted by the agency, by other qualified representative. A party is entitled to appear in person or by or with counsel or other duly qualified representative in an agency proceeding. So far as the orderly conduct of public business permits, an interested person may appear before an agency or its responsible employees for the presentation, adjustment, or determination of an issue, request, or controversy in a proceeding, whether interlocutory, summary, or otherwise, or in connection with an agency function. With due regard for the convenience and necessity of the parties or their representatives and within a reasonable time, each agency shall proceed to conclude a matter presented to it. This subsection does not grant or deny a person who is not a lawyer the

right to appear for or represent others before an agency or in an agency proceeding.

(c) Process, requirement of a report, inspection, or other investigative act or demand may not be issued, made, or enforced except as authorized by law. A person compelled to submit data or evidence is entitled to retain or, on payment of lawfully prescribed costs, procure a copy or transcript thereof, except that in a nonpublic investigatory proceeding the witness may for good cause be limited to inspection of the official transcript of his testimony.

(d) Agency subpenas authorized by law shall be issued to a party on request and, when required by rules of procedure, on a statement or showing of general relevance and reasonable scope of the evidence sought. On contest, the court shall sustain the subpena or similar process or demand to the extent that it is found to be in accordance with law, In a proceeding for enforcement, the court shall issue an order requiring the appearance of the witness or the production of the evidence or data within a reasonable time under penalty of punishment for contempt in case of contumacious failure to comply.

(e) Prompt notice shall be given of the denial in whole or in part of a written application, petition, or other request of an interested person made in connection with any agency proceeding. Except in affirming a prior denial or when the denial is self-explanatory, the notice shall be accompanied by a brief statement of the grounds for denial.

SEC. 556. HEARINGS; PRESIDING EMPLOYEES; POWERS AND DUTIES; BURDEN OF PROOF; EVIDENCE; RECORD BASIS OF DECISION

(a) This section applies, according to the provisions thereof, to hearings required by section 553 or 554 of this title to be conducted in accordance with this section.

(b) There shall preside at the taking of evidence—

(1) the agency;

(2) one or more members of the body which comprises the agency; or

(3) one or more hearing examiners appointed under section 3105 of this title.

This subchapter does not supersede the conduct of specified classes of proceedings, in whole or in part, by or before boards or other employees specially provided for by or designated under statute. The functions of presiding employees and of employees participating in decisions in accordance with section 557 of this title shall be conducted in an impartial manner. A presiding or participating employee may at any time disqualify himself. On the filing in good faith of a timely and sufficient affidavit of

personal bias or other disqualification of a presiding or participating employee, the agency shall determine the matter as a part of the record and decision in the case.

(c) Subject to published rules of the agency and within its powers, employees presiding at hearings may—

(1) administer oaths and affirmations;

(2) issue subpenas authorized by law;

(3) rule on offers of proof and receive relevant evidence;

(4) take depositions or have depositions taken when the ends of justice would be served;

(5) regulate the course of the hearing;

(6) hold conferences for the settlement or simplification of the issues by consent of the parties;

(7) dispose of procedural requests or similar matters;

(8) make or recommend decisions in accordance with section 557 of this title; and

(9) take other action authorized by agency rule consistent with this subchapter.

(d) Except as otherwise provided by statute, the proponent of a rule or order has the burden of proof. Any oral or documentary evidence may be received, but the agency as a matter of policy shall provide for the exclusion of irrelevant, immaterial, or unduly repetitious evidence. A sanction may not be imposed or rule or order issued except on consideration of the whole record or those parts thereof cited by a party and supported by and in accordance with the reliable probative, and substantial evidence. A party is entitled to present his case or defense by oral or documentary evidence, to submit rebuttal evidence, and to conduct such cross-examination as may be required for a full and true disclosure of the facts. In rule making or determining claims for money or benefits or applications for initial licenses an agency may, when a party will not be prejudiced thereby, adopt procedures for the submission of all or part of the evidence in written form.

(e) The transcript of testimony and exhibits, together with all papers and requests filed in the proceeding, constitutes the exclusive record for decision in accordance with section 557 of this title and, on payment of lawfully prescribed costs, shall be made available to the parties. When an agency decision rests on official notice of a material fact not appearing in the evidence in the record, a party is entitled, on timely request, to an opportunity to show the contrary.

SEC. 557. INITIAL DECISIONS; CONCLUSIVENESS; REVIEW BY AGENCY; SUBMISSIONS BY PARTIES; CONTENTS OF DECISIONS; RECORD

(a) This section applies, according to the provisions thereof, when a hearing is required to be conducted in accordance with section 556 of this title.

(b) When the agency did not preside at the reception of the evidence, the presiding employee or, in cases not subject to section 554 (d) of this title, an employee qualified to preside at hearings pursuant to section 556 of this title, shall initially decide the case unless the agency requires, either in specific cases or by general rule, the entire record to be certified to it for decision.When the presiding employee makes an initial decision, that decision then becomes the decision of the agency without further proceedings unless there is an appeal to, or review on motion of, the agency within time provided by rule. On appeal from or review of the initial decision, the agency has all the powers which it would have in making the initial decision except as it may limit the issues on notice or by rule. When the agency makes the decision without having presided at the reception of the evidence, the presiding employee or an employee qualified to preside at hearings pursuant to section 556 of this title shall first recommend a decision, except that in rule making or determining applications for initial licenses—

(1) instead thereof the agency may issue a tentative decision or one of its responsible employees may recommend a decision; or

(2) this procedure may be omitted in a case in which the agency finds on the record that due and timely execution of its functions imperatively and unavoidably so requires.

(c) Before a recommended, initial, or tentative decision, or a decision on agency review of the decision of subordinate employees, the parties are entitled to a reasonable opportunity to submit for the consideration of the employees participating in the decisions—

(1) proposed findings and conclusions; or

(2) exceptions of the decisions or recommended decisions of subordinate employees or to tentative agency decisions; and

(3) supporting reasons for the exceptions or proposed findings or conclusions.

The record shall show the ruling on each finding, conclusion, or exception presented. All decisions, including initial, recommended, and tentative decisions, are a part of the record and shall include a statement of—

(A) findings and conclusions, and the reasons or basis therefor, on all the material issues of fact, law, or discretion presented on the record; and

(B) the appropriate rule, order, sanction, relief, or denial thereof.

SEC. 558 IMPOSITION OF SANCTIONS; DETERMINATION OF APPLICATIONS FOR LICENSES; SUSPENSION, REVOCATION, AND EXPIRATION OF LICENSES

(a) This section applies, according to the provisions thereof, to the exercise of a power or authority.

(b) A sanction may not be imposed or a substantive rule or order issued except within jurisdiction delegated to the agency and as authorized by law.

(c) When application is made for a license required by law, the agency, with due regard for the rights and privileges of all the interested parties or adversely affected persons and within a reasonable time, shall set and complete proceedings required to be conducted in accordance with sections 556 and 557 of this title or other proceedings required by law and shall make its decision. Except in cases of willfulness or those in which public health, interest, or safety requires otherwise, the withdrawal, suspension, revocation, or annulment of a license is lawful only if, before the institution of agency proceedings therefor, the licensee has been given—

(1) notice by the agency in writing of the facts or conduct which may warrant the action; and

(2) opportunity to demonstrate or achieve compliance with all lawful requirements.

When the licensee has made timely and sufficient application for a renewal or a new license in accordance with agency rules, a license with reference to an activity of a continuing nature does not expire until the application has been finally determined by the agency.

SEC. 559. EFFECT ON OTHER LAWS: EFFECT OF SUBSEQUENT STATUTE

This subchapter, chapter 7, and sections 1305, 3105,3344, 4301 (2) (E), 5362, and 7521, and the provisions of section 5335 (a) (B) of this title that relate to hearing examiners, do not limit or repeal additional requirements imposed by statute or otherwise recognized by law. Except as otherwise required by law, requirements or privileges relating to evidence or procedure apply equally to agencies and persons. Each agency is granted the authority necessary to comply with the requirements of this subchapter through the issuance of rules or otherwise. Subsequent statute may not be held to supersede or modify this subchapter, chapter 7, sections 1305, 3105, 3344, 4301 (2) (E), 5362, or 7521, or the provisions of section 5335 (a) (B) of this title that relate to hearing examiners, except to the extent that it does so expressly.

CHAPTER 7 — JUDICIAL REVIEW

SEC. 701. APPLICATION; DEFINITIONS

(a) This chapter applies, according to the provisions thereof, except to the extent that—

(1) statutes preclude judical review; or

(2) agency action is committed to agency discretion by law.

(b) For the purpose of this chapter—

(1) "agency" means each authority of the Government of the United States, whether or not it is within or subject to review by another agency, but does not include—

(A) the Congress;

(B) the courts of the United States;

(C) the governments of the territories or possessions of the United States;

(D) the government of the District of Columbia;

(E) agencies composed of representatives of the parties or of representatives of organizations of the parties to the disputes determined by them;

(F) courts martial and military commissions;

(G) military authority exercised in the field in time of war or in occupied territory; or

(H) functions conferred by sections 1738, 1739, 1743, and 1744 of title 12; chapter 2 of title 41; or sections 1622, 1884, 1891—1902, and former section 1641 (b) (2), of title 50, appendix; and

(2) "person", "rule", "order", "license", "sanction", "relief", and "agency action" have the meanings given them by section 551 of this title.

SEC. 702. RIGHT OF REVIEW

A person suffering legal wrong because of agency action, or adversely affected or aggrieved by agency action within the meaning of a relevant statute, is entitled to judicial review thereof.

SEC. 703. FORM AND VENUE OF PROCEEDING

The form of proceeding for judicial review is the special statutory review proceeding relevant to the subject matter in a court specified by statute or, in the absence or inadequacy thereof, any applicable form of legal action, including actions for declaratory judgments or writs of prohibitory or mandatory injunction or habeas corpus, in a court of competent jurisdiction. Except to the extent that prior, adequate, and exclusive opportunity for judicial review in civil or criminal proceedings for judicial enforcement.

SEC. 704. ACTIONS REVIEWABLE

Agency action made reviewable by statute and final agency action for which there is no other adequate remedy in a court are subject to judicial review. A preliminary, procedural, or intermediate agency action or ruling not directly reviewable is subject to review on the review of the final agency action. Except as otherwise expressly required by statute, agency action otherwise final is final for the purposes of this section whether or not there has been presented or determined an application for a declaratory order, for any form of reconsideration, or, unless the agency otherwise requires by rule and provides that the action meanwhile is inoperative, for an appeal to superior agency authority.

SEC. 705. RELIEF PENDING REVIEW

When an agency finds that justice so requires, it may postpone the effective date of action taken by it, pending judicial review. On such conditions as may be required and to the extent necessary to prevent irreparable injury, the reviewing court, including the court to which a case may be taken on appeal from or on application for certiorari or other writ to a reviewing court, may issue all necessary and appropriate process to postpone the effective date of an agency action or to preserve status or rights pending conclusion of the review proceedings.

SEC. 706. SCOPE OF REVIEW

To the extent necessary to decision and when presented, the reviewing court shall decide all relevant questions of law, interpret constitutional and statutory provisions, and determine the meaning or applicability of the terms of an agency action. The reviewing court shall—

(1) compel agency action unlawfully withheld or unreasonably delayed; and

(2) hold unlawful and set aside agency action, findings, and conclusions found to be—

(A) arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law;

(B) contrary to constitutional right, power, privilege, or immunity;

(C) in excess of statutory jurisdiction, authority, or limitations, or short of statutory right;

(D) without observance of procedure required by law;

(E) unsupported by substantial evidence in a case subject to sections 556 and 557 of this title or otherwise reviewed on the record of an agency hearing provided by statute; or

(F) unwarranted by the facts to the extent that the facts are subject to trial de novo by the reviewing court.

In making the foregoing determinations, the court shall review the whole

record or those parts of it cited by a party and due account shall be taken of the rule of prejudicial error.

Historical Note

The Administrative Conference of the United States was established as a permanent Conference, in order to provide for continuous improvement of the administrative procedure of Federal agencies, by the Act of Aug. 30, 1964, Public Law 88-499, 78 Stat. 615. [See also vol. 14, p. 11690, vol. 16, p. 12961.]

Notes of Decisions

Volume 14—p. 11691; Volume 15—p. 12310; Volume 16—p. 12962; Volume 17—p. 13672; Volume 18—p. 14706; Volume 19—p. 15986.

Burden of Proof

Plaintiff's contention, in action to set aside the commission's order authorizing total abandonment of a railroad without imposition of protective labor conditions, that the commission failed to set out sufficient facts to support its refusal to impose protective conditions and failed to set out facts on which its conclusions were based, is in essence an attempt to place the burden of proof upon the commission. No authority has been cited which holds that conditions must be imposed absent a reason for refusing them; and contention that the burden was on the commission to show why they should not be imposed appears to be contrary to provision of §7(c) of APA that "Except as statutes otherwise provide, the proponent of a rule or order shall have the burden of proof."—Brotherhood of Locomotive Engineers v. United States, 217 F. Supp. 98 (103)*.

Burden of proof is on proponent of a rule or order; and it is the general rule that "the burden of proof lies upon him who affirms, not on him who denies." [175 F. 2d 808.] There can be no doubt that plaintiffs seeking to set aside the commission's order, which dismissed their complaint alleging that defendants therein were engaging in unlawful freight forwarder operations, were the "affirming party" before the commission and defendant was the party who denied. The commission's findings that burden was on plaintiffs to establish material allegations of their complaint, and that they failed to present sufficient evidence to sustain that burden, sustained.—National Motor Freight Traffic Ass'n v. United States, 242 F. Supp. 601 (605-6)*.

In suit to set aside Interstate Commerce Commission order requiring cancellation of proposed increased l.t.l. classification rating on certain stuffed toys, the commission's manner of appraising evidence before it (on which it concluded that carriers had failed to sustain their statutory burden of proof) did not contravene requirements of the APA. Commission consideration of the entire record is shown by its sharpening of the issues and analysis of all the evidence; moreover, the APA places burden of proof on the proponent of a rule or order, thus anticipating a decision based on a paucity of proof. As the trier of fact, the commission had the duty to assay the proof; and the court cannot say that its conclusion, that proponent carriers had not proved their case, is without rational basis.—Overnite Transportation Co. v. United States, 266 F. Supp. 88 (90-91)*.

Since a rate effective prior to institution of investigation thereof by the commission is not a "changed" rate, there is no statutory burden of proof on its proponents under §15(7) or §216(g) of Interstate Commerce Act; the statutory burden of proof in such cases is imposed on opponents of the rate by §7(c) of APA, which provides that the proponent of a rule or order shall have the burden of proof. However, question of where the burden of proof lies is of more theoretical than practical importance; regardless of where the burden lies, a carrier is expected to aid in disposition of proceedings to which it is a party by making available all pertinent facts within its knowledge.—Terminal Charge on Order Bills of Lading Shipments, 315 I.C.C. 327 (329, 330)*.

In most commission proceedings the burden of proof is primarily a rule of evidence to ensure orderly procedure; its principal effect is to require the party asserting the affirmative of an issue to go forward in the proof; parties who are proponents of a different result must then sustain their burden of going forward. But burden of proof becomes the master rather than the servant of administrative process when viewed solely in quantitative terms; while proof by a clear preponderance of the evidence may be an appropriate requirement in civil actions involving only private rights, that is not the sense in which Congress used "burden of proof" in ICA and APA; the public interest necessarily involved in the commission's quasi-legislative function of rate-making cannot be determined merely on basis of who proved what by a clear preponderance of the evidence.—Id., pp. 329-30.

In proceedings involving initial rates, protestants who have requested the commission to suspend and investigate the rate schedules involved and ultimately to issue an order canceling them are proponents of an order within purview of §7(c) of APA, thus have the burden of proof. When §7(c) is read in context of a carrier's statutory right to initiate rates, generally without any obligation to justify them, it may not be applied to impose on the proponent of initial rates the burden of sustaining their lawfulness in absence of a prima facie showing that they are unlawful. Respondent is the proponent of a rate rather than an order, in the practical sense that his rate will stand unless the order sought by protestants is issued.—Animal Feed, Miss. and Tenn. to Midwest and Southwest, 319 I.C.C. 257 (259)*.

Where protestants' comparison of proposed initial rates of a class III limited-commodity carrier with average costs of class I and II general-commodity carriers does not establish a prima facie showing that the rates are noncompensatory and therefore unreasonable, and respondent's cost evidence lacks probative value because of defects noted, the showing is insufficient to sustain an order canceling the rates within requirement of §7(c) that such an order be supported by and in accordance with reliable, probative, and substantial evidence.—Id., p. 260. [See also concurrences.]

See also New York, N.H. & H. R. Co. Discontinuance, §13a n. 15.

Declaratory Orders

Interstate Commerce Commission's discretionary refusal of declaratory relief does not require plaintiff to do or refrain from doing anything, fix any liability or responsibility, civil or criminal, upon plaintiff, or finally determine its rights or obligations; therefore, the commission's denial of plaintiff's attempts to secure a declaratory order does not entitle plaintiff to a judicial review.—W. J. Dillner Transfer Co. v. McAndrew, 226 F. Supp. 860 (864)*.

Where the only controverted issue respecting proposed amended tariff provisions is interpretation of respondents' present tariff provisions and their applicability on past shipments, the commission has authority under §5(d) of APA to remove the uncertainty and terminate the controversy.—Nonapplication of Coarse or Feeding Grain Rates, 316 I.C.C. 547 (548).

Where petitioner requested determination pursuant to §5(d) of applicability of transit privilege under certain tariff provisions, reasonableness of neither transit regulations nor charges sought to be collected is put in issue and may not be considered.—Petition of Southern Pacific Co. for Declaratory Order, 316 I.C.C. 661 (665).

Petition requesting issuance of a declaratory order to establish that petitioner's transportation of automobile utility trailers in its own vehicles, for redistribution purposes between trailer rental stations maintained by its members at points throughout the United States, constitutes private carriage is denied. Since the evidence is insufficient for a determination of whether petitioner has engaged in private carriage, a declaratory order would serve no useful purpose.—National Trailer Rental Assn., 94 M.C.C. 526 (531).

A declaratory order will not lie under §5(d) of APA in those instances where there is no statutory requirement for a hearing. Certificates which are subject of petition for declaratory order were issued under §207(a) and, though tenor of §204(c) and §205 is that hear-

ings will be held to make statutory findings required by §207(a), there is no positive mandate that one be held; therefore a declaratory order will not lie with respect to those certificates, even though, as a matter of due process, a hearing might have had to be held. Nevertheless, as the commission's authority to entertain and decide petitions for interpretation of operating rights issued by it is not limited to proceedings covered by APA, instant petition will be so considered.—Renner Motor Lines, Inc., 94 M.C.C. 605 (611).

Petition filed under §5(d) of the APA to clarify and remove any uncertainty with regard to involved permit was proper. The commission's power to issue declaratory orders in proceedings of this nature is well established; moreover, independent of the power conferred by the section, the commission is authorized to entertain petitions seeking an interpretation of certificates or permits. [See 51 MCC 175].—Carolina-Virginia Courier, Inc., Extension, 95 M.C.C. 612 (613).

Applicability of special §22 rates on shipments moving on commercial bills of lading, see Interpretation of Govt. Rate Tariff—Eastern Central, §22(1), n. 5.

Reviewability of declaratory order, see National Van Lines case, under Judicial Review, below.

Examiners: ICA and APA

Social Security Administration had the right to prescribe regulations concerning employee indebtedness, and the duty to carry them out by preferring charges of delinquency; and Civil Service Commission had the responsibility to determine from the evidence the correctness of the charges. That commission's finding that plaintiff hearing examiner was financially irresponsible in failing to meet his personal monetary obligations and thus brought discredit on the agency are supported by substantial evidence, and plaintiff was not denied due process in that the creditors did not testify in person, so that they could be cross-examined; plaintiff does not question truth of contents of creditors' letters to the agency and admits the debts they describe. Civil Service Commission drew a justifiable inference from the established facts, and specific proof that plaintiff's continuing employment caused the agency to be held in lower esteem was not required; the commission's order recommending his removal from his position, sustained.—McEachern v. Macy, 233 F. Supp. 516*.

Hearing examiner of the Social Security Commission, duly appointed under §11 of APA, was entitled to review by the district court of decision and order of the Civil Service Commission that he be removed from that position because of unjustified neglect of his financial obligations. Exception of examiners appointed pursuant to §11 from the exemption of selection or tenure of an officer or employee in §5, pertaining to agency adjudication, restores reviewability of "the selection and tenure" of such examiner. Since review of the Civil Service Commission's order may be obtained by the aggrieved person in the form of a complaint filed in the district court, lower court's dismissal of plaintiff's suit for want of jurisdiction was in error. Remanded, with directions to drop the United States as party defendant, to allow complainant to amend so as to implead proper defendants, and thereafter grant a hearing on the complaint.—McEachern v. United States, 321 F. 2d 31 (32-3)*.

Position of hearings examiners is not a constitutionally protected position, but is a creature of congressional enactment; plaintiff has no vested right to such a position and can be, in accordance with provisions of APA, discharged for cause. The court cannot say that willful refusal or negligent failure to pay lawful debts without sufficient cause or reason does not constitute good cause for dismissal. Social Security Administration regulation providing for dismissal of an employee for those reasons is manifestly within the statutory authorization.—McEachern v. United States, 212 F. Supp. 706 (710-11, 712)*.

An examiner is not required to compel production of every item of evidence which a party desires; he may, in his discretion, deny request for production which is merely cumulative or immaterial to issues presented. Examiner's exclusion as irrelevant, and refusal to compel production of certain evidence

did not deny plaintiffs due process or constitute prejudicial error under the statute; plaintiffs received a full, fair, and impartial hearing.—Fried v. United States, 212 F. Supp. 886 (894-6)*.

The matter of continuances rests in the sound discretion of the administrative agency's hearing examiner, and the reviewing courts will not interfere except upon a clear showing of abuse. Language in §5(a) of the statute relative to fixing time and place for hearings with due regard for convenience and necessity of the parties or their representatives means that convenience of all persons concerned—applicant, the agency, and opposing shippers—must be accorded due recognition in scheduling an application proceeding for hearing. Due regard for convenience and necessity of the parties cannot be divorced from convenience of the agency. Oral request at the hearing for indefinite postponement thereof, predicated only on statement that it was "inconvenient" for applicant to go forward with hearing at that time, was insufficient to compel the examiner to grant a postponement: denial of the request sustained.—Burnham Trucking Co. v. United States, 216 F. Supp. 561 (563-4)*.

The most cursory examination of examiner's report in consolidated application proceedings reveals the exact basis and reasons for the examiner's recommendations; the report amply reviews the evidence, sets forth detailed findings of fact, and in all other respects complies with requirements of APA. In setting forth findings which apprise the court of the essential basis of the commission's decision, the examiner complied with his duty under §8(b) of APA to include a statement in his report, and it was therefore permissible for the commission to affirm and adopt the examiner's report as it did.—North American Van Lines, Inc. v. United States, 217 F. Supp. 837 (842)*.

The Commission is not bound to accept its examiner's findings; it is required to make its own findings based on the evidence.—Vincent Montone Transp., Inc. v. United States, 231 F. Supp. 484 (487)*; Mitchell Bros. Truck Lines v. United States, 225 F. Supp. 755 (758)*; Eagle Motor Lines, Inc. v. United States, 236 F. Supp. 502 (504)*; Eazor Exp., Inc. v. United States, 218 F. Supp. 393 (395)*.

The commission's conclusions are not vulnerable merely because they overruled those of the examiner: the commission, not the examiner, exercises the determinative judgment and discretion. The commission's denial, contrary to the examiner's recommendation. of the extension certificate sought by plaintiff was pursuant to statutory authority and was supported by adequate findings based on substantial evidence; sustained.—Wycoff Co., Inc. v. United States, 240 F. Supp. 304 (312)*.

Interstate Commerce Commission is not bound by factual determinations of its examiners and has all the powers which it would have in making the initial decision; thus, in determining whether plaintiff's certificate authorized transportation of certain commodities, the commission is not bound by prior administrative rulings in other motor carrier application cases which were determined by examiners.—Whitehouse Trucking, Inc. v. United States, 261 F. Supp. 9 (11)*.

There was no error in examiner's failure in his report on further hearing to make certain findings requested by applicant; §8(b) of APA does not require a detailed finding on every subsidiary evidentiary fact or conclusion submitted by a party as proposed findings; requested findings were disposed of in examiner's report or are immaterial to proper disposition of the issues.—Davidson Transfer & Storage Co. Extension, 88 M.C.C. 715 (716)*.

Examiner's finding that applicant's evidence of traffic volume allegedly transported through gateway sought to be eliminated could not be credited in absence of documentary corroboration was not a novel or unwarranted evidentiary approach. Question whether applicant actually operated through its authorized gateways was raised by opposing carriers and thus was specifically in issue; examiner, who heard the testimony and was in position to observe witnesses' demeanor, was unwilling to find that applicant actually did observe its gateways without additional evidence; as such evidence was not proffered, examiner's factual conclusion will not be dis-

turbed.—Mason & Dixon Tank Lines Extension, 91 M.C.C. 7 (14).

There was no error in examiner's allowing witnesses for protestants who were not represented by practitioners to testify orally in narrative form. The commission's Rules of Practice—which should be construed liberally to secure just, speedy, and inexpensive determination of the issues—provide adequate safeguards effectively to protect interests of all parties. Rule 1.70 specifically authorizes the hearing officer to regulate the procedure before him, and he has ample discretion to exclude objectionable testimony or to require a person appearing both as representative of a party and as a witness to prepare his testimony in written form in advance of his oral testimony. Moreover, §10(e) of APA requires that decision be based on substantial evidence, and the examiner and the commission limit their consideration to the type of evidence.—Blythe Extension, 91 M.C.C. 827 (831-2).

Statement of complainant's practitioner, in connection with his allegation that hearing examiner improperly, in absence of opposing counsel, discussed with counsel for defendants a proposal to adjourn the hearing, that the examiner submitted the same proposal to him off the record, noted; also noted, in connection with his allegation that after adjournment the examiner traveled by automobile to another city as guest of defendants' counsel, that he stresses adverse highway conditions on the date in question, making difficult identification of persons in a passing car; those facts were fully considered in commission's special report, 311 ICC 71; conclusions therein absolving the hearing examiner of committing the alleged improprieties and unethical conduct, affirmed.—In Re Willette and Partridge, 315 I.C.C. 359 (363).

There was no violation of §7(a) of APA in the commission's relieving one examiner, at his request, of his assignment as hearing examiner in consolidated complaint and investigation proceedings and assigning the proceedings to a different examiner. As §7(a) provides only for voluntary withdrawal of a presiding officer if he deems himself disqualified, or for disposition by the agency of an allegation of bias or disqualification made by one of the parties, and there is no question raised of bias or disqualification of the examiner concerned, §7(a) is inapplicable. Moreover, §7(a) does not prevent an agency from relieving a hearing examiner of an assignment upon his request, for such reasons as the agency considers adequate; the commission's action was simply one of internal procedure and management, consistent with its inherent powers and duties.—Chicago, B. & Q. R. Co. v. New York, S. & W. R. Co., 318 I.C.C. 180 (182)*.

In administration of proceedings involving hearings, it often becomes necessary, due to unforeseen exigencies, to relieve an examiner of an assignment made in preparation of an itinerary; an examiner may also be relieved of an assignment by mutual agreement with the commission; these views reflect the necessities of proper, efficient, and economical administration of the commission's functions and the relationship of the examiner as an employee of the commission. Since examiner concerned had not presided at taking of any oral evidence, but only at prehearing conferences which dealt solely with procedural matters, he had not presided "at the reception of evidence" in the proceedings within §8 of APA, and thus was not required to make the recommended or initial decision contemplated by §5(c).—Id., p. 183.

The examiner's withdrawal was not ineffective because allegedly based on certain omissions from orders accompanying questionnaires submitted to the carriers, which were subsequently corrected by order of Division 2; such a circumstance does not negate action taken on the request for withdrawal. And though that request was made to Director of Bureau of Rates and Practices, the reassignment order of the Chairman shows on its face that the matter reached the commission's attention, thus the question of an intermediary is of no consequence.—Id., p. 184.

Nor was there any irregularity in failure to assign the proceedings to a successor examiner in rotation; though §11 of APA provides for assignment of cases to examiners in rotation "so far as is practicable," the commission has found assignments to hearing examiners in strict rotation to be impracticable and indeed impossible from standpoint of economy and

efficiency of administration. Assignment of examiners out of rotation in accordance with itinerary requirements for reasons of economy was sanctioned in 227 F. 2d 420; and observance of strict rotation is precluded by assignment of cases requiring special skill or knowledge to examiners thus qualified, also by unavailability of examiners next in rotation because of their absence or their existing workloads. Petitions for reconsideration of orders relating to the change of examiner assignments, denied.—Id., p. 184.

Although orders issued respectively 63 and 15 days before further hearing on "grandfather" application each assigned the matter to a different examiner (also appointed pursuant to APA) from the one who presided at initial hearing, and intervener thus had ample notice of the change in assignment, neither it nor its counsel objected thereto until the second hearing was called to order. If intervener considered the objection vital to its interest, it should have brought it to the commission's attention a reasonable time before the date of further hearing; simple fairness to the commission and to other parties to the proceeding, also due regard for the commission's task of administering the act effectively, dictate that a request for the same presiding officer should have been made within a reasonable time after service of the first order, which apprised intervener that a different examiner was assigned to the further hearing. In the circumstances, intervener's objection was not timely raised.—Holomon, 92 M.C.C. 8 (9, 11).

Even if timely made, intervener's objection is not well founded; §5(c) of APA requires only that the same officer who presided at the reception of evidence shall make the recommended decision, and the court has held that this requirement applies to situations where credibility evaluation of witnesses may affect the findings. In instant case, applicant was the only witness to testify at either hearing and no conflict of testimony was involved; examiner who presided at reception of evidence at initial hearing made his findings on the facts before him, and his report and recommended order were duly served and made part of the record; the same is true of the further hearing and the examiner who presided at it; each report and recommended order was prepared by an examiner who was in position to evaluate the credibility of the only witness, and conclusions of the first examiner and bases therefor were available to the second for consideration with his own evaluation of the witness's demeanor. The commission, having the benefit of both reports, has considered the exceptions and replies filed to each; procedure followed in no way prejudiced intervener's rights or infringed provisions of APA.—Id., pp. 11-12.

Upon full and careful consideration of the record in investigation of operations of Carload Shippers Assn., conclusion is inescapable that conduct of the hearing was not all that is required under the law. The examiner's pronounced and overly active participation in interrogation of witnesses was unfortunate, and, while his basic impartiality is undoubted, further treatment of issue of his allegedly prejudicial conduct would only detract from and confuse the fundamental standards now established for forwarding operations of shipper associations. The examiner's conduct has so beclouded the evidence that a finding of unlawfulness of respondents' operations would be inappropriate; investigation discontinued.—Atlanta Shippers Assn., Inc.—Investigation, 322 I.C.C. 273 (289)*.

Hearing; Whether Required

Since abandonment proceeding before the Interstate Commerce Commission was not a rulemaking proceeding within §4 of APA and there was no statutory requirement for an agency hearing within contemplation of §5 thereof, because §§1(19) and 20a(6) of the Interstate Commerce Act leave the matter of holding hearings in abandonment proceedings to the commission's discretion, no hearing in conformity with §7 of the statute was required. Moreover, in 339 US 33, the Court commented that the limitation in §5 of APA to hearings required by statute exempts those which administrative agencies may hold by regulation, rule, custom, or special dispensation; proceedings on abandonment involved were ones which the agency was discretionar-

ily entitled to hold "by regulation," and plaintiffs have not challenged constitutionality of the governing statute.—Brotherhood of Locomotive Engineers v. United States, 217 F. Supp. 98 (100-1)*.

While courts should not force administrative agencies to hold unproductive hearings, rejection of unopposed expert testimony on a matter susceptible of reasonably precise measurement, without the agency's developing its objections at a hearing, should be upheld only when (1) the agency's uncommunicated criticisms appear to be both so compelling and so deeply held that the court can be fairly sure the agency would not have been affected by anything the witness could have said, had he known of them, and (2) the court would be bound to affirm, despite the expert's hypothetical rebuttal, out of deference for the agency's judgment on so technical a matter. It is insufficient answer that plaintiff was able to present counterarguments by petition for rehearing or reconsideration; argumentative criticisms of expert testimony cannot be refuted by such petitions nearly so well as by the expert himself; moreover, for commissioners, as for judges, freedom of decision is at least subconsciously restricted once a position has been publicly taken.—Davis & Randall, Inc. v. United States, 219 F. Supp.. 673 (679)*.

Letter of plaintiff's counsel denying permission, except on certain conditions, for a commission accountant to examine work sheets and other data underlying plaintiff's cost exhibits can be taken as requesting a hearing in case the commission's examination did not satisfy it as to propriety of the proposed rates, and was appropriate in view of aborting of the modified procedure due to railroads' withdrawal of their protest. The commission's criticism that the basic data in the cost study might be inaccurate is the kind of attack normally required to be made at a hearing where the witness can defend himself or set parameters on any error. In light of the apparently reasonable nature of the cost evidence, insufficiency of the commission's criticisms thereof to require affirmance no matter what a hearing might have produced, and other considerations, enforcement of its order requiring cancellation of the rates is enjoined, without prejudice to any future action it might take concerning the rates upon complaint.—Id., pp. 682, 683.

Provisions of the statute governing hearings, findings and substantial evidence apply only when a hearing is required by law. As considered transfer of motor carrier operating rights is within the exemption of §5(10) of Interstate Commerce Act, the sole governing statute is §212(b) thereof and rules and regulations promulgated thereunder; neither §212(b) nor the transfer rules requires a hearing on an initial transfer application; thus, the APA does not apply. Therefore, the commission's failure to grant an oral hearing upon plaintiffs' petition for reconsideration of its order approving the transfer did not violate Administrative Procedure Act; order of the commission sustained.—A. L. Root Transportation, Inc. v. United States, 280 F. Supp. 152 (155-6, 157)*; Chemical Leaman Tank Lines, Inc. v. United States, 251 F. Supp. 269 (272, 273)*.

It is well settled that the definition of commercial zone limits is "rulemaking" within meaning of §2(c) of APA, which under §4 thereof can lawfully be accomplished without formal hearing. As statements and arguments submitted by the parties concerning proposed redefinition of the commercial zones present sufficient data for an informed decision on the matter, oral hearing is omitted.—St. Louis, Mo.—East St. Louis, Ill., Commercial Zone, 96 M.C.C. 691 (692-3)*; Washington, D.C., Commercial Zone, 98 M.C.C. 106 (110-111)*.

The commission's failure or refusal, in interpreting plaintiff's authority to transport "contractors' machinery and equipment," to consider evidence of facts tending to contradict the restrictions which its interpretation would place on a service claimed to have been performed by plaintiff and its predecessor since 1941 deprived plaintiff of a full and fair hearing and violated §8(b) of APA. Order in interpretation case is erroneous and should be set aside because the commission gave no consideration to plaintiff's actual operations under temporary authority on and prior to October 25, 1946, the date of issuance of permanent certificate describing the authority granted in almost identical terms. Remanded for action in accordance with the opinion.—W. T. Mayfield Sons Trucking Co. v.

United States, 234 F. Supp. 655 (660-1)*.

Section 7(c) of APA is ample authority for failure to accord defendants an evidentiary oral hearing when, after notice and allowance of ample time, they failed to make their request for hearing and cross-examination adequately specific, and their reply statement did not dispute any of material facts stated by complainant's witnesses under modified procedure.—United States v. Missouri Pac. R. Co., 322 I.C.C. 418 (419-20).

Judicial Review

The test of judicial review of the commission's action, in granting applications of seven railroads to provide additional service to Lake Calumet Harbor Port (near Chicago), is whether it is supported by substantial evidence on the record as a whole. The district court erred in striking down conclusions of the commission that were largely based on previous commission findings which the court had approved, since it is the commission's function to draw reasonable and proper conclusions from its findings; and possibility of drawing two inconsistent conclusions from the evidence does not prevent a finding from being supported by the record. Therefore, having found substantial support of record for commission findings as to the port's future potential and the necessity for competitive rail service at the start of development, it was not the lower court's function to substitute its conclusions for those which the commission had fairly drawn; its agreement with the controlling subsidiary findings required the court to sustain the commission's conclusions. Reversed and remanded with instructions.—Illinois Central R. Co. v. Norfolk & W. R. Co., 385 U.S. 57 (65-9)*.

The rule of 332 US 194 is that an agency's discretionary order must be upheld, if at all, on the same basis articulated in the order itself; if those grounds are improper, the court is powerless to affirm the administrative action. When the commission did not find that a cease-and-desist order would be ineffective, as an alternative remedy to issuance of certificate to an additional carrier, to cure a deficiency in service due to trunkline motor carriers' refusal under union pressure to interchange traffic in contravention of a "hot cargo" clause, the courts may not accept commission counsel's post hoc rationalization of its action. For the courts to substitute their or counsel's discretion for that of the commission is incompatible with orderly functioning of the process of judicial review; this is not to deprecate, but to vindicate, the administrative process, for the purpose of the rule is to avoid propelling the court into the domain which Congress has set aside exclusively for the administrative agency.—Burlington Truck Lines, Inc. v. United States, 371 U.S. 156 (168-9)*.

Moreover, there is not substantial evidence of record on which to base a finding that a cease-and-desist order would have been ineffective; there was every indication at the time that such an order would render the deficiencies of service purely temporary phenomena and would thus be effective in promoting adequate, economical, and efficient service and in fostering sound economic conditions among the carriers affected. The judgment of the district court must be reversed and the commission's order set aside as an improvident exercise of its discretion.—Id., pp. 165, 169.

Review of Supreme Court decisions on the issue of reviewability of administrative orders indicates that the test of ripeness for judicial review of such an order, as carried down from 307 US 125 through 363 US 202, is that administrative orders are not reviewable unless and until they impose an obligation, deny a right, or fix some legal relationship as a consummation of the administrative process (333 US 103).—National Van Lines, Inc. v. United States, 326 F. 2d 362 (367-372)*.

While findings and resulting orders in investigation to determine applicability of rates on household goods under certain tariffs were declaratory, they followed an adversary proceeding in which the critical question was sharply disputed, and order discontinuing it was a final order; thus the order resulted from a hearing in tradition of judicial proceedings and was not a stage in an incomplete process of adjudication. And since the commission report (incorporated in the final order) ruled adversely to respondents and found that cer-

tain past charges made contrary to that ruling violated §217(b) of ICA, and on basis of the commission order the Government has already made overcharge deductions from payments due certain carriers, it was not an abstract declaration, but had an immediate and practical impact on the carriers. On balance, the commission's findings resulted in an order declaratory in nature, subject to and ripe for review by the district court.—Id., pp. 367, 373-4.

While due weight should be accorded the commission's construction of a tariff, it is within the courts' competence to construe a tariff differently from the commission's interpretation, particularly when the construction presents a question solely of law; and the application of rules of construction to undisputed facts is classically a question of law. There is no reason to defer to the commission's determination in such circumstances. The commission's determination as to construction of tariff in issue was not reached on voluminous and conflicting evidence, the adequate appreciation of which requires acquaintance with many intricate facts of transportation; its interpretation of the tariff was erroneous, and the lower court erred in upholding its decision.—National Van Lines, Inc. v. United States, 355 F. 2d 326 (333)*.

Scope of the court's authority on review of an order of the commission is limited; if such order lies within scope of the commission's statutory authority, is based on adequate findings, and is supported by substantial evidence, it should not be set aside, modified or disturbed on review by the court.—Atlantic Coast Line R. Co. v. United States, 202 F. Supp. 456 (458)*.

Scope of judicial review of an administrative order is delineated by §10 of APA, 5 USC §1009; the court must sustain the commission if its findings are supported by substantial evidence, or if there is a rational basis for its conclusions, and its rulings and decisions are in accord with the applicable law. However, when the commission's decision based on the stated findings is erroneous and reflects misinterpretation of the law as amended by §15a(3), its order requiring cancellation of considered rail ratings and rates because they constitute a destructive competitive practice must be set aside and enforcement thereof enjoined.—Missouri Pac. R. Co. v. United States, 203 F. Supp. 629 (631-2, 633, 636)*.

Judicial review of the commission's order granting authority for one carrier to purchase a portion of operating rights and property of another carrier is limited to determination of whether the order is based on adequate findings, supported by substantial evidence on the record as a whole, and is entirely rational and lawful. The court has no authority to substitute its opinion for that of the commission; sustained.—West Bros., Inc. v. United States, 203 F. Supp. 839 (840)*.

The scope of the district court's power to review orders of administrative agencies was materially broadened by enactment of the Administrative Procedure Act. New breadth of the court's reviewing responsibility was brought about by insertion in §10(e) thereof of specific direction to reviewing courts that their decisions be based upon a review of the "whole record." [Citing Universal Camera case, 340 US 474.]—Chicago, R.I. & P. R. Co. v. United States, 205 F. Supp. 378 (380-1)*.

In determining whether there is substantial evidence relating to convenience and necessity to support the commission's findings and decision authorizing construction of an extension of a rail line, the court must carefully examine all of the evidence presented to the commission. However, it is not the role of the court to consider the record before the commission by a standard different to that of the commission, but rather to measure with the commission's standard the evidence upon basis of the rule that the determination be reasonable and be supported by substantial evidence. Decision of the commission sustained.—Id., pp. 382, 383-4.

Scope of the court's review of the commission's order is limited to determination, upon the whole record, of whether the commission's findings are supported by substantial evidence, or whether its findings and conclusions were induced by misapplication of the law. Record fails to support the commission's conclusions, and practical effect of its order is to stifle, rather than encourage, fair competi-

tion between rail and motor carriers in derogation of provisions of §15a(3); order annulled and set aside.—St. Louis-S.F. Ry. Co. v. United States, 207 F. Supp. 293 (294-5, 299)*.

Under §10(e) of APA, a reviewing court must determine whether or not there was substantial evidence on the record considered as a whole to support findings of an administrative agency. However, substantial-evidence requirement was not intended to negative the function of an administrative tribunal, like the commission, which is presumably equipped or informed by experience to deal with a specialized field of knowledge, whose findings within that field carry the authority of an expertness which the courts do not possess and therefore must respect. Nor does it mean that even as to matters not requiring expertise a court may displace the commission's choice between two fairly conflicting views, even though the court would justifiably have made a different choice.—General Motors Corp. v. United States, 207 F. Supp. 641 (643)*.

While a court may set aside an administrative agency's order where there is no warrant in the law for its action, or where its findings and conclusions are arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law, the record as a whole supported the commission's decision as to applicability and reasonableness of assailed rates and, in so finding, the commission did not act arbitrarily, capriciously or abuse its discretion.—Id., pp. 644, 646, 648.

In reviewing the commission's decision denying reparation to plaintiff, it is for the court to consider and decide only whether the decision and order are free from error of law and are based on findings supported by substantial evidence; and in determining even that narrow issue, the court may not substitute its own judgment or discretion for that of the commission on questions of credibility, weight of evidence, and the inferences to be drawn from facts deemed proven. Thus, while the court may pass upon the reasonableness of a finding, it may not pass upon its rightness.—William N. Feinstein & Co. v. United States, 209 F. Supp. 613 (619)*.

Mere fact that a commission decision may be inconsistent with a prior commission determination is not a valid ground for reversal. An administrative body such as the commission is not required to deal with a particular case as it has dealt with a prior case that seems similar, since there may be diverse factors in the second determination which the commission feels, in exercise of its special experience, justify a different result. The court can only look at the record before it; if the commission's decision is not arbitrary but based on adequate findings, which are supported by substantial evidence, it must be left undisturbed. The court may not substitute its judgment as to whether a finding which is based on inferences drawn by the commission from the evidence before it was right, or whether a different inference would be better supported; the court can only inquire whether drawing of such inferences was reasonable.—Id., pp. 620, 622.

The scope of judicial review of an order of the commission is governed by APA, particularly §1009(e); only questions affecting constitutional power, statutory authority, and the basic prerequisite of proof can be raised. If these legal tests are satisfied, the commission's order becomes incontestable.—A. L. Mechling Barge Lines, Inc. v. United States, 209 F. Supp. 744 (747)*.

The sole function of a reviewing court under §10(e) of Administrative Procedure Act is to determine whether the commission gave consideration to all of the factors which it was required to consider in making its decision, and whether on the record as a whole there was "substantial evidence" to support its findings and order. [Citing 166 F. Supp. 851.]—Fried v. United States, 212 F. Supp. 886 (889-90)*.

If the essential findings of the commission are supported by evidence, the court should decline to substitute inferences of its own for those drawn by the commission; and the court cannot, except under certain limited conditions, usurp the administrative functions of the commission by setting aside its lawful orders upon the court's conception of whether the administrative power has been wisely exercised.—North American Van Lines, Inc. v. United States, 217 F. Supp. 837 (840, 841)*.

Scope of the court's review, in action to set aside and enjoin the Interstate Commerce Commission's orders finding disparity in rail

rates on meats and packinghouse products unduly prejudicial and unduly preferential, is limited by provisions of §10(e) of the statute.—Atchison, T. & S.F. Ry. Co. v. United States, 218 F. Supp. 359 (362)*.

Although where Congress has expressly conferred ultimate discretion on the executive the determination is not subject to judicial review, and this principle is specifically recognized in §10 of APA, no such absolute or exclusive discretion is conferred on the commission by §208(b) of ICA, and no reason appears why any rules or regulations promulgated under §208(b) and any orders issued under such rules should not be subject to judicial review, unless they are "abstract declarations" not determining rights or obligations and from which no legal consequences will flow (363 US 202). Validity of the commission's deviation rules insofar as they authorize approval of regular alternate routes as deviations is clearly a matter for judicial review; and orders issued thereunder which give plaintiff's competitor a right, though terminable, which it did not have before and which plaintiff asserts adversely affects its rights are not mere abstract declarations and are no less subject to judicial review than ones determining rates or rights to certification.—Greyhound Corp. v. United States, 221 F. Supp. 440 (443)*.

The scope of judicial review of a commission order includes consideration of whether the commission's conclusions are supported by substantial evidence on the record as a whole, are free from errors of law, and are not so arbitrary or capricious as to constitute an abuse of discretion. If the court is affirmatively satisfied that the order does not depart from those standards, it must be sustained, even though the court might have adopted a different view on the same facts and law.—Youngblood Truck Lines, Inc. v. United States, 221 F.upp. 809 (812)*.

The commission's determination of scope of transportation permitted by a certificate issued by it is within its statutory authority and will not be overturned by the courts unless the order is "clearly erroneous" as that term is used in §10(e) of APA. The commission's rulings on plaintiff's contentions were neither arbitrary, capricious, nor otherwise clearly erroneous, and its findings on each point raised were supported by substantial evidence; to consider the weight of that evidence or the soundness of the commission's reasoning is outside the province of the court; the order sustained.—Mitchell Bros. Truck Lines v. United States, 225 F. Supp. 755 (758, 760)*.

A court does not have jurisdiction to review an agency's denial of a declaratory order which denial is discretionary with the agency.—W. J. Dillner Transfer Co. v. McAndrew, 226 F. Supp. 860 (864)*.

In judicial review of commission orders the court's task requires review of the whole record, and is not limited merely to examination of evidence supporting the commission's findings. While, prior to 1951, it was held that a district court need only read the side of the case for which the commission ruled, and that if it found any evidence there the commission's action would be sustained, dissatisfaction with this restrictive scope of review led to enactment of APA, which expressly directs reviewing courts to consider the "whole" record in determining whether administrative findings have the required evidentiary support. [Citing 340 US 474.]—Atchison, T. & S.F. Ry. Co. v. United States, 231 F. Supp. 422 (429)*. (See same case, §17(5), n. 10, concerning reopening by commission while court action pending.)

In action to set aside the commission's order denying plaintiff's petition for reopening of its "grandfather" proceeding (closed in 1943) and waiver of rules 1.101(e) and 1.102 of the Rules of Practice, the review function of the court is limited to determining whether there is warrant in law and fact for the commission's action. If there is, the court must affirm; it cannot substitute its judgment as to what it feels should have been done for that of the commission. The commission had broad discretion in the first instance to determine plaintiff's "grandfather" rights; granting of petition for rehearing made more than 30 days from date of a commission decision or order is not a matter of right, such petition being addressed to the commission's discretion; also it is well within the commission's discretion to refuse to waive rules 1.101(e) and 1.102. The record indicates no abuse of such

discretion and, there being warrant in law and fact for its action, the commission's order is sustained.—Cardinale Trucking Co. v. United States, 232 F. Supp. 339 (344-5, 347-8)*.

Under §10(e) of APA, where agency action is committed to agency discretion there may be no judicial review, and though railroads filed new reduced rates during pendency of court action to set aside order approving reduced rates on same commodity between the same and additional points, the commission's refusal to suspend the rates most recently filed was a matter exclusively within its sound discretion and is not susceptible of review by the district court.—Seatrain Lines, Inc. v. United States, 233 F. Supp. 40 (45, 47).

While the court is cognizant of §10(e) of APA, defining the scope of judicial review of commission action, and the matter of interpretation of plaintiff's operating authority is before the court for the second time, the court is nevertheless required to hold unlawful and set aside agency action found to be arbitrary, capricious, an abuse of discretion or otherwise not in accordance with the law, or without observance of procedure required by law. The commission's failure or refusal to consider evidence of plaintiff's actual operations under temporary authority on and prior to date of issuance of the certificate in question deprived plaintiff of a full and fair hearing; and while the court is without power to perform the functions of the commission, it is its duty to declare the order in the interpretation case erroneous and set it aside for that reason. Remanded for action in accordance with the opinion.—W. T. Mayfield Sons Trucking Co. v. United States, 234 F. Supp. 655 (660-1)*.

The scope of judicial review of the commission's order is fixed by §10(e) of APA. The court must hold unlawful and set aside any action, finding, or conclusion found to be arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with the law, or unsupported by substantial evidence. Otherwise, the court may not reweigh the evidence or question the soundness of the commission's reasoning. And the court must review the whole record, including the examiner's proposed report, for though the proposed report is not binding on the commission, it is entitled to consideration by the court on the issue of substantiality of the evidence.—Stanislaus County v. United States, 236 F. Supp. 146 (148, 151)*.

Orders of the commission should not be set aside, modified, or disturbed by a court on review if they lie within scope of the commission's statutory authority and are based on adequate findings supported by substantial evidence, even though the court might reach a different conclusion on the facts presented. The commission's finding that plaintiff's "driveaway" business is a common carrier operation subject to the act is supported by substantial evidence and is in accord with court decisions on essentially similar facts. Sustained.—Spencer v. United States, 236 F. Supp. 230 (232)*.

Any right of plaintiff labor unions and motor carrier association to sue to set aside a commission order entered against defendant carriers in a rate proceeding must rest on §205(h) of ICA, which in turn refers to §17(9) which provides for judicial relief from the commission's decisions. But suits must be brought in accordance with existing law governing cases seeking to enforce, enjoin, suspend, or set aside the commission's orders, and those sections are further circumscribed by §10(a) of APA, which requires that for judicial review of an administrative action a person must have suffered a legal wrong or be adversely affected or aggrieved by such action within meaning of the relevant statute. Plaintiff unions are not parties in interest nor aggrieved by the order, since their claim that the prescribed helper service rule interferes with their collective bargaining rights is too remote and tenuous to give them standing to sue; and none of carrier members of plaintiff association, itself neither a carrier nor a shipper, are parties to instant suit. Thus plaintiffs are barred by both ICA and APA from any judicial relief; complaint dismissed.—Teamsters Joint Council 40 (J.C.)v. United States, 238 F. Supp. 301 (306, 308)*.

In action to enjoin and set aside the commission's orders prescribing new divisions of joint rail rates on transcontinental traffic, it is not the court's duty to evaluate each bit of evidence and determine whether the commission has drawn the proper conclusion there-

from. The commissioners are experts and their stated opinions as to factual matters, when based on evidence, are sufficient to support their findings. Whether evidence is sufficient for the commission to arrive at the costs of service, and the data and information and the method used, is within its discretion, absent an abuse thereof; but once the necessary factors are determined, there must be findings disclosing that the commission has considered the financial effect of new divisions as to each carrier involved, in order for the court to determine whether the commission has met the statutory requirements. Because of insufficiency of the commission's findings and conclusions, as stated, case remanded to it for further proceedings consistent with the court's opinion.—Atchison, T. & S. F. Ry. Co. v. United States, 238 F. Supp. 528 (534, 535-6, 540)*.

With the commission's expertise in mind, it is the court's duty to review the record and the conclusions reached, in accordance with provisions of §10 of APA that a commission order may be invalidated if it is either "(1) arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law * * * (3) in excess of statutory jurisdiction, authority, or limitations, or short of statutory rights * * * (5) unsupported by substantial evidence." "Arbitrary" and "capricious" are to be understood in their legal sense, and mean "without rational basis"; so if a rational basis for the order is found, so far as arbitrariness or capriciousness is concerned the court will have exhausted its function.—Eastern Central Motor Carriers Ass'n v. United States, 239 F. Supp. 591 (594)*.

To merit judicial approbation, the commission's order also must be within the statutory limits and authority expressed by Congress; and the national transportation policy is the yardstick by which the correctness of the commission's actions will be measured. In reviewing the commission's approval of motor-carrier rates, the court must satisfy itself that the commission has followed the policies of §216(b), which requires all common carriers to establish just and reasonable rates, of §216(d), which requires all charges to be just and reasonable and declares unlawful every unjust and unreasonable charge, and of §216(g), which places the burden of proof on a carrier proposing a changed rate to show that it is just and reasonable. Just as the court would overstep its duty by undertaking to evaluate the evidence according to its own notions of the public interest, so would it shirk its duty were it summarily to approve the commission's evaluation of the record without determining that such evaluation had been made in accordance with the mandates of Congress.—Id., p. 595.

As to the sufficiency of evidence to support the order, while it is not the court's proper function to substitute its judgment or to weigh evidence in place of the commission, it must review the record without a rubber stamp approach. The court is bound to inquire into every aspect of the commission proceeding wherein it may appear that the commission has applied an erroneous standard of law, or has made arbitrary findings, or has reached ultimate conclusions without adequate subordinate facts, or has failed in any other way to observe the procedures of proper administrative determination.—Id., pp. 595-6; the mere fact that the rule stated in 318 ICC 567 and followed in the case under review, as to cost evidence required to show compensativeness of rates covering service provided by a carrier using owner-operators, departs from the rule of an earlier case does not require the court to take corrective action. Nor is the fact that other rulings have followed that case decisive; however, such rulings may be weighed in accordance with their thoroughness of consideration, validity of reasoning, and consistency with earlier or later decisions.—Id., p. 599.

In holding that the commission, in approving reduced rates proposed by a motor carrier using owner-operators, improperly applied the criteria of compensativeness stated in 318 ICC 567, and that those criteria unjustly discriminate against self-sustaining carriers who are required to submit much more detailed cost data to show compensativeness of their rates, the court is not unmindful of the function that the commission is to perform or the discretion that it has. Nor does the court question the selection of methods used to prove that rates are compensative; it merely holds that, in absence of sufficient reasons,

when the cost method is used to prove compensativeness of reduced rates, full production of evidence is required for both the self-sustaining carrier and the carrier employing owner-operators. The order set aside and the case remanded for further consideration.—Id., pp. 600-1.

Upon review, the court is directed by the applicable statutes to compel agency action unlawfully withheld and to set aside as unlawful agency action found to be arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law. Plaintiff, protestant in application proceeding, seeks to set aside the commission's orders refusing to waive rule 101(e) of its Rules of Practice and denying plaintiff's petition for reopening of the proceeding for purpose of changing a portion of the certificate alleged to have been granted upon misrepresentation and by mistake. In its application and petition plaintiff set forth facts which, if found to be true, would require the commission to reopen the proceeding to allow plaintiff to adduce evidence in support of its position and to be heard in opposition to that portion of the commission's order granting authority beyond that recommended by the examiner. Administrative boards and commissions have the duty to so conduct their proceedings as to secure a just result, and it is the court's duty to see that the commission, whose orders it is directed to review, performs this obligation.—James J. Williams, Inc. v. United States, 241 F. Supp. 535 (537-8)*.

Jurisdiction to review agency orders is vested in a court with equity powers, and while the court must act within bounds of the statute and without intruding on the administrative process, it may adjust its relief to the exigencies of the case in accordance with equitable principles governing judicial action. In summarily rejecting, without a hearing, plaintiff's application for waiver of the commission's rule 101(e), the commission did violence to an established principle of law; such action was the type of arbitrary action which the court is required to set aside. At the court's instance, plaintiff demonstrated that it was in a position to prove its allegations with respect to circumstances giving rise to the mistake which it claims occurred. Accordingly, the commission's order denying plaintiff's petition is set aside and cause remanded, with directions to grant the hearing and make the determinations set forth in the court's findings.—Id., pp. 538-9.

In action to set aside the commission's order approving purchase of certain operating rights by intervening defendant, the commission's failure to follow, distinguish, or discuss two prior purchase proceedings involving same vendee did not make its conclusions arbitrary and capricious, or constitute an abuse of discretion. As held in 151 F. Supp. 577, the commission's findings may not be attacked because they are inconsistent with its findings in other cases.—Alabama Highway Exp., Inc. v. United States, 241 F. Supp. 290 (292-3)*; and the commission's express finding that a new service would not emerge from proposed acquisition of authority, which is supported by substantial evidence, is dispositive of plaintiff's contention that approval of the purchase, which would result in completely new service, without proof of convenience and necessity was arbitrary and capricious.—Id., pp. 293-4.

Even though the reviewing court might reach a different conclusion on the facts presented, the commission's order should not be set aside if it is not arbitrary or capricious, or unlawful, and if the findings are adequate and supported by substantial evidence. Based on the entire record, the commission's interpretation of the law cannot be found erroneous; nor can it be said that its findings that activities of the defendant before it are confined to one terminal area and do not include assumption of any origin-to-destination responsibility for shipments, were not supported by substantial evidence. Order of the commission dismissing the complaint, because plaintiffs failed to sustain their burden of proof, sustained.—National Motor Freight Traffic Ass'n v. United States, 242 F. Supp. 601 (604-5, 606)*.

While the court has its statutory limitations upon the scope and range of review in cases involving application for motor carrier operating authority, still the commission does not possess any carte blanche authority to disregard positive, undenied, credible testimony and binding judicial opinions and applicable

legal precedents in such cases. A protesting carrier does not have any property right in his operating authority which would preclude the commission from granting competing authority to another carrier; still the requirements of consistency in the public interest and due process must be observed, otherwise the commission would fail of its purpose and duty to the public.—Dixie Highway Exp., Inc. v. United States, 242 F. Supp. 1016 (1019)*.

Although the scope of review of an administrative order or ruling is limited, and agency findings of fact are conclusive unless unsupported by substantial evidence, "substantial evidence" (specifically listed in the statute as a sine qua non of an agency decision) is such relevant evidence as a reasonable mind might accept as adequate to support a conclusion; it is more than a mere scintilla, must afford substantial fact basis from which an issue can be inferred, and therefore must do more than merely create a suspicion of the existence of fact or facts to be established. Viewing the record in its entirety, including evidence opposed to the commission's conclusions, order of the commission denying plaintiff's purchase application is not supported by substantial evidence.—Interstate Motor Freight System v. United States, 243 F. Supp. 868 (871, 872)*.

The statute precludes judicial review of agency action which is committed by law to agency discretion. Therefore, since the commission is expressly empowered, in its discretion and without hearings or other proceedings, to grant temporary motor carrier authority where an immediate and urgent need for such service, at points having no service capable of meeting that need, is shown, the grant of the temporary contract-carrier authority in question is not subject to judicial review within Administrative Procedure Act.—Union Cartage Co. v. United States, 244 F. Supp. 1005 (1007)*.

Although the scope of judicial review is limited, the court has jurisdiction to review the commission's orders which vacated grant of temporary authority by the Finance Board pending determination of motor carriers' application for permanent control authority. Plaintiff's contention that the orders under consideration were arbitrary, capricious, and unlawful is not supported by the record; complaint dismissed.—Three "I" Truck Line, Inc. v. I.C.C., 246 F. Supp. 410 (412)*.

So long as the commission's findings are supported by substantial evidence, and it has not abused its discretion, its order denying plaintiff authority to purchase operating rights of another motor carrier must be sustained. And where the examiner and the commission reach different conclusions, the court is required to examine the record as a whole, including testimony taken before the examiner and his report, to determine whether there is substantial evidence to support the commission's conclusions. However, since under §8(a) of APA the agency has full power to reach any conclusions it would have reached in the absence of an examiner's initial decision, the final obligation to determine the facts rests solely with the administrative agency; thus, it is the commission's findings and not those of the examiner which the court is to review.—C & H Transp. Co., Inc. v. United States, 249 F. Supp. 97 (98-9)*.

Judicial review of administrative agency action is limited to consideration of all relevant questions of law, constitutional and statutory provisions, and the meaning or applicability of the terms of any such action. While a court can set aside an agency action found to be arbitrary, capricious, an abuse of discretion, or otherwise unlawful, considered report and order of the commission carries a presumption of validity and should stand unless reviewing court can find that it misapplied the law. The commission's legal conclusions are not erroneous and are found to be permissible on the evidence before it; its decision approving proposed reduced multiple-car rates on iron ore is lawful in all respects; complaint dismissed.—Baltimore & O. R. Co. v. United States, 249 F. Supp. 712 (718-20)*.

Scope of the court's review of the commission's orders is limited to determination upon the whole record whether the commission's findings are supported by substantial evidence or whether its findings and conclusions are induced by misapplication of the law; if the findings are supported by substantial evidence and are in accordance with the law, they must be upheld. However, since the commission's regulations governing transfer of water car-

rier certificates have the force of law, and the Federal agency promulgating a rule is as bound by its terms as is the general public, the commission's orders approving transfer of considered certificate must be set aside when record shows that it allowed a concealment and violation of its rules in the application for approval. The commission cannot ignore its own rules under the facts before it.—Mississippi Valley Barge Line Co. v. United States, 252 F. Supp. 162 (163, 166)*.

The court properly performs only a very limited role in reviewing a decision of an administrative agency; once a rational basis for conclusions in such a decision is found, the judicial function is ended. Courts are not empowered to weigh the wisdom of a particular decision of an administrative body.—City of Galveston v. United States, 257 F. Supp. 243 (245)*.

Function of the reviewing court is limited to ascertaining whether there is warrant in the law and the facts for the commission's action. Absent some specific prejudicial departure from requirements of the law or abuse of the commission's discretion, the court is without authority to intervene. However, judicial deference to expertise is not boundless; and expertise is not sufficient in itself to sustain a commission decision; the commission's order must be supported by substantial evidence and must be made within statutory limits placed on its powers by Congress. As to the sufficiency of evidence to support the order, while it is not a proper function of the court to substitute its judgment or to weigh evidence in place of the commission, the court must review the record without a rubber stamp approach.—Campbell Sixty-Six Exp., Inc. v. United States, 258 F. Supp. 529 (532-3)*.

Applying the principles stated in 239 F. Supp. 591 regarding grounds on which a commission order may be invalidated to the situation in instant suit to set aside an order granting intervening defendant an alternate-route certificate, the facts as found by the examiner and adopted by the commission simply do not supply any rational basis for the finding that intervenor is "actually" in competition with plaintiffs between the affected points. Thus, the "ultimate conclusion" reached by the commission on the alternate-route test of actual competition is not based on any "adequate subordinate findings" and is therefore, in the legal sense, "arbitrary and capricious" [230 F. Supp. 646]; order of the commission is set aside and declared void.—Id., pp. 533, 534-5.

In reviewing an order of the Interstate Commerce Commission, it is the court's function only to ensure that the commission's judgments have a rational basis; that is, whether its conclusions are based on substantial evidence and whether it has applied standards of law arbitrarily or erroneously to reach its conclusions. There is substantial evidence to support the commission's findings; even though the court might have reached a different conclusion, were it authorized to be the expert fact finder, reviewing court may not substitute its judgment for that of the commission. The commission acted within its statutory powers, its findings are supported by substantial evidence, and its decision is in accord with applicable law. Complaint dismissed.—Petroleum Carrier Corp. v. United States, 258 F. Supp. 611 (615, 617)*; Id., 258 F. Supp. 617 (619-20)*.

Function of the reviewing court is limited to determining whether the commission's order (which denied plaintiff's application for authority to transport passengers and their baggage, and express and newspapers in same vehicle) is within its statutory authority and is predicated on adequate findings supported by substantial evidence; and, while Joint Board's recommended grant is considered, the court's determination is made on the record as a whole. Record shows in detail the commission's consideration of the application, its review of the evidence, and the reasons for its denial of authority sought. Conclusions of the commission find support in the record as a whole; there is no suggestion that it abused its discretion or that it did not weigh amply the supporting claims; complaint dismissed.—Continental Southern Lines, Inc. v. United States, 265 F. Supp. 218 (221-2)*.

In action to review the commission's report and orders in investigation proceeding, record sustains its finding that, at the time of hearing, operations of respondent association had been reformed and were those of a bona fide shippers' association within statute exempt-

ing such associations from regulation and that, though it had operated unlawfully in the past, it was not then an illegally operating freight forwarder. However, the commission did not rule on question of whether an exempt shippers' association may engage in practice of "co-loading" its trailers with those of other shipper associations in order to secure benefits of rail volume TOFC rates. The issue of coloading having been raised at start of the proceedings and being a material issue, the commission was required to rule thereon and its failure to do so violated §8(b) of the statute. Affirmed in part, and remanded for further proceedings as to the coloading issue.—Freight Forwarders Institute v. United States, 263 F. Supp. 460 (464-5, 466-9)*.

The statute precludes judicial review of agency action which is committed by law to agency discretion, unless that action is arbitrary, capricious, or an abuse of discretion. Thus, since action of the commission in granting the temporary authority in issue is a discretionary action, which the commission is empowered to exercise by an act of Congress, and there is no showing that it acted arbitrarily, capriciously, or abused its discretion, the grant of the temporary authority in question is not subject to judicial review within the Administrative Procedure Act.—Merchants Delivery Co. v. United States, 265 F. Supp. 669 (672-3)*.

The judicial function, in action to set aside Interstate Commerce Commission's orders granting motor carrier authority to intervening defendants, is exhausted when there is found to be a rational basis for the conclusions of the administrative body. The commission's findings and orders are presumptively valid; and, if based on adequate findings and supported by substantial evidence of record, its orders cannot be upset. Therefore, since evidence heard by the commission in each of the application cases supports its findings and, since its conclusions are not arbitrary, but are adequate, supported by the record and in accordance with the law, the commission's orders must be sustained.—United Van Lines, Inc. v. United States, 266 F. Supp. 586 (588, 590)*.

In judicial review of orders of the commission, the test is whether the commission's action is supported by substantial evidence on the record viewed as a whole; and substantial evidence is "enough to justify, if the trial were to a jury, a refusal to direct a verdict when the conclusion sought to be drawn from it is one of fact for the jury." The commission's decision and order denying plaintiff's substitution-of-gateways application in its entirety were based on adequate findings supported by substantial evidence; complaint dismissed.—Bowman Transp., Inc. v. United States, 267 F. Supp. 57 (61)*.

Scope of the court's review of Interstate Commerce Commission's order is limited to a determination of whether the order is arbitrary or not in accordance with law, and whether the commission's findings are supported by substantial evidence; and, within the meaning of the statute, an order is arbitrary if it lacks a rational basis and it is not in accordance with the law if based on an erroneous interpretation or misapplication of the relevant statutes.—Louisville & N.R. Co. v. United States, 268 F. Supp. 71 (75)*.

The scope of judicial review of the commission's order is governed by §10(e) of APA. In addition, the court must be guided by well established principles applicable to review of an administrative agency's order; and, since an order of the commission is presumed valid, the party attacking it has the burden of showing invalidity. When administrative order under review is supported by substantial evidence, it may not be modified or set aside by the court if it is based on adequate findings and arrived at by proper application of relevant legal standards; and where the only question is the weight of the evidence before the commission, the court may not disturb its findings or conclusions. Record shows that the commission carefully evaluated all evidence presented and reached its conclusions based on substantial evidence; therefore, since plaintiff did not show an abuse of administrative discretion or a prejudicial departure from requirements of the law, its complaint must be dismissed.—Hughes v. United States, 278 F. Supp. 11 (14, 22)*.

The scope of judicial review in rulemaking proceedings is not whether agency findings and conclusions are supported by substantial evidence, but whether they are arbitrary, ca-

pricious, an abuse of discretion, or otherwise not in accordance with law. Interstate Commerce Commission's actions in redefining limits of a commercial zone, conceded to be a rule-making function, were not arbitrary, capricious, or an abuse of discretion; and furthermore, a review of the entire record fully supports the commission's findings and conclusions; sustained.—Tidewater Express Lines, Inc. v. United States, 281 F. Supp. 995 (996)*.

See also Baltimore & O. R. Co. v. United States, §1(6), n. 41; City of Williamsport v. United States, 49 USC §13a, n. 2; Dixie Ohio Exp., Inc. v. United States, 28 USC §2325, n. 40; I.C.C. v. Atlantic Coast Line, §17(9), n. 2; New York Central R. Co. v. United States, 28 USC §2325, n. 45; Northwestern Pac. R. Co. v. United States, §1(20), n. 16; R-C Motor Lines, Inc. v. United States, 28 USC §2325, n. 48.

Notice

Although the authority referred to in commission's first notice of rulemaking proceeding concerning detention of motor vehicles, as published in Federal Register, might have included §204(a)(1), reference to §216(e), providing for determination of lawful charges or lawful rules, regulations, or practices in an investigation on the commission's own initiative, was sufficiently precise to apprise interested persons of the agency's legal authority to issue proposed rule and to comply with §4(a) of APA concerning rulemaking proceedings.—Detention of Motor Vehicles—Middle Atl. & New England, 318 I.C.C. 593 (594)*.

Though notice of proposed rule making stated that adoption of cost formulas would obviate or shorten cross-examination of witnesses as to methods used in preparing cost studies, it added that cross-examination would be limited to mathematical accuracy of the computations; thus, total effect of the notice is to impose an undue restriction on scope of cross-examination. In accordance with purpose of the proceeding, the prima facie validity of a formula in future proceedings would relate strictly to the approved method, and adoption of specified formulas would foreclose a party from collaterally attacking the formulas, whether or not so expressly provided by rule. However, a witness' selection of a particular formula, and whether he properly exercised his discretion in using, adjusting, or applying it, would be subject to cross-examination; whether underlying figures relied on by the witness were in error would be an obvious subject for inquiry.—Rules to Govern Assembling & Presenting Cost Evidence, 321 I.C.C. 238 (241).

Protestants' contention that they were unprepared at the hearing to try the issue of whether silver bullion is an article of unusual value within applicants' restricted general-commodity authority because that question is not an issue in instant application proceeding, and that examiner's rulings allowing evidence relating to it were violative of the notice provisions of §5(a) of the APA, has no merit. In an application proceeding the scope of the operating authorities of the parties is always an issue, and protestants should not have been surprised. That they were not prejudiced is further evidenced by the fact that at the time of the filing of instant applications, another proceeding involving the same issue, and in which protestants were parties, was being terminated; in addition, motion for dismissals are commonly used in application proceedings, and properly, as a procedural device for determining the scope of commodity descriptions.—Navajo Freight Lines, Inc., Extension, 95 M.C.C. 551 (555-6).

See also Kowalsky's Exp. Service case, §17(6), n. 15.

Procedure

The commission is charged with choosing the proper remedy for a violation of §5(4), and challenged order of divestiture was within scope of its power; judicial review is accordingly limited to ascertaining whether the commission made an allowable judgment in its choice of remedy. Prerequisite to such review is evidence that a judgment was in fact made, that the parties were heard on the issue, and that the proper standards were applied; no such procedure was followed; mitigating considerations indicate that a doubt can be raised as to necessity for divestiture, and that a remand to the commission is not purely academic for sake of procedural regularity. When the commission has exercised its judgment and issued its considered opinion, the

remedy chosen will be ripe for review; judgment of the district court reversed in part and the case remanded for further proceedings—Gilbertville Trucking Co. v. United States, 371 U.S. 115 (130-1)*.

The commission must exercise its discretion under §207(a) within the bounds of public convenience and necessity, and for the courts to determine whether it has done so, it must disclose the basis of its order by making findings that support its decision and are in turn supported by substantial evidence. In granting a certificate to appellee, rather than resorting to §204 procedures, to cure a deficiency in service due to trunkline motor carriers' refusal to interchange traffic, which in turn was due to union pressure exerted under "hot cargo" clauses, the commission made no findings specifically directed to the choice between two vastly different remedies, and gave no indication of the basis on which it exercised its expert discretion. The APA does not permit, and the Court cannot accept, such adjudicatory practice. The commission's unresponsiveness to argument that the refusals could be terminated through complaint procedures, deeming that availability of the other remedy did not alter the situation, was error.—Burlington Truck Lines, Inc. v. United States, 371 U.S. 156 (167-8)*.

It is well settled that Interstate Commerce Commission rulemaking power in redefining the limits of a commercial zone does not require the holding of an adjudicatory hearing. Plaintiffs were given notice of proposed rulemaking and took advantage of their opportunity to participate in the proceeding; however, they have at no time indicated what additional evidence they would, or could, offer if an oral hearing had been or were to be held. Under such circumstances, the commission fully complied with the statute and its denial of oral presentation was not arbitrary or capricious, or an abuse of its discretion.—Tidewater Express Lines, Inc. v. United States, 281 F. Supp. 995 (997)*.

Prohibition in §5(c) of APA against a person engaged in performance of investigative or prosecuting functions in a case from participating in decision or review in that or a factually related case applied to prohibit [Securities and Exchange] Commission employee who had acted as director of the agency division which instituted the investigation from participation, after he became a member of the commission, in decision therein, despite provision that the prohibition would not apply to the commission or any member or members thereof.—Amos Treat & Co. v. Securities and Exchange Commission, 306 F. 2d 260 (262, 266).

Although all courts in a supervisory role are concerned with delay, and regulatory agencies must exercise the greatest ingenuity in devising procedures which will permit the regulatory process to function with reasonable dispatch, only in the extremely rare case would a court be justified in holding that the passage of time and nothing more presents an occasion for peremptory intervention of a court outside the direct chain of appellate review in the conduct of an agency's adjudicative proceedings. Absent proof of the normal time necessary to dispose of a similar proceeding, or of facts tending to show a dilatory attitude on part of the [Federal Trade] commission or its staff, a judge may not hold that as a matter of law the commission is not proceeding with dispatch when a complaint pends for some 2-1/2 years before a hearing examiner and 11 months thereafter before the whole commission, and the record reveals that extensions of time have been granted the parties.—Federal Trade Commission v. J. Weingarten, Inc., 336 F. 2d 687 (691-2).

There is nothing in the Interstate Commerce Act, the Administrative Procedure Act, the commission's General Rules of Practice, or Article V of the Constitution which entitles parties to a complaint before the commission to oral argument in addition to written argument.—Boston & M. R. Co. v. United States, 208 F. Supp. 661 (669)*.

The provisions of §1009(e) of APA require affirmance of the findings of an administrative agency if, taking the record as a whole, they are supported by such relevant evidence as a reasonable mind might accept as adequate to support a conclusion.[340 US 474.] The APA has not altered the doctrine of administrative finality: the courts will not examine the findings of fact further than to determine whether there was substantial evidence to sustain them; if the evidence was substantial, the

commission alone is authorized to decide upon its weight or the significance of the facts.—Id., p. 670.

Since the [Federal Trade] commission's action in vacating examiner's initial decision and remanding investigation matter for further commission proceedings was at most a procedural irregularity, the court has no jurisdiction to grant declaratory judgment and permanent injunction sought; doctrine of exhaustion of administrative remedy applies. After exhaustion of prescribed administrative remedy, plaintiff would have adequate remedy at law for judicial determination of its asserted claim; preliminary, procedural, or intermediate agency action is subject to review upon judicial review of a cease and desist order which the commission might enter in the investigation.—Sears, Roebuck & Co. v. F.T.C., 210 F. Supp. 67 (70).

In denying plaintiff's application for gateway elimination, the commission did not adopt a conclusion "not grounded on basic findings supported by probative evidence," in violation of §8(b) of APA. Examiner's ultimate conclusion (adopted by the commission) was, in recognition of the ultimate question of law presented under §207(a) of ICA, that plaintiff failed to show proposed operation to be required by public convenience and necessity. This conclusion is supported by statistics detailing characteristics of present circuitous and proposed direct services, which had logical bearing on the subsidiary (though fundamental) question whether the proposed service was so close to the old that original determination of convenience and necessity would cover both; and on that evidence was based the finding that the proposed service would be so different as to constitute a new service and consequently one as to which no determination of convenience and necessity had been made.—Yale Transport Corp. v. United States, 210 F. Supp. 862 (864)*.

Presumption, in absence of clear evidence to the contrary, that the commission has properly performed its official duties is too well settled to require reiteration.—Igert v. United States, 211 F. Supp. 42 (44)*.

Omission of examiner's report in proceeding on total abandonment of a railroad did not constitute reversible error under §8(a) of APA; technical requirements of that section would apply only if there were a statutory requirement of an agency hearing, but provisions of Interstate Commerce Act governing abandonment proceedings expressly leave the matter of holding hearings to the commission's discretion. Even if requirements of APA did apply, §8(a) provides that in cases of application for initial license the hearing examiner's report may be omitted if the agency finds that due and timely execution of its functions imperatively so require; the commission made such a finding, which was not challenged; therefore, if considered abandonment application was one for an initial license, the commission was within its power in dispensing with the examiner's report.–Brotherhood of Locomotive Engineers v. United States, 217 F. Supp. 98 (100, 101)*.

Though the APA nowhere defines "initial license," §2(e) provides that "license" includes "the whole or part of any agency permit, certificate, * * * or other form of permission"; and legislative history of APA indicates that "application for an initial license" may be interchangeable with "initial application for license." Since the railroad held no other license to extend or abandon any part of its line, its application was clearly one for an initial certificate to abandon its railroad, or an initial application for abandonment certificate. Thus, the proceeding was an application for initial license, and, whether APA applied or not, omission of examiner's report was a proper exercise of the commission's discretion and plaintiffs are not entitled to reversal of its decision.—Id., pp. 101-2.

Though the commission's rules governing modified procedure read in terms of an adversary proceeding, investigation of plaintiff's proposed motor rates, which had been an adversary proceeding when modified procedure was ordered, ceased to be one when railroads withdrew their protest; and as the commission did not then direct its Bureau of Inquiry and Compliance or its Cost Section to participate, there was no "other party" to serve a statement of its evidence or seek cross-examination of plaintiff's witnesses. Plaintiff's cost evidence stood uncontradicted and uncriticized when the case was submitted; considering qualifications of plaintiff's

expert witness who prepared that evidence and fact that he employed a cost-finding method published by the commission itself, it would seem inconsistent with policy underlying APA for the agency to reject such testimony on basis of arguments which the expert never heard and which he might well have been able to answer.—Davis & Randall, Inc. v. United States, 219 F. Supp. 673 (678-9)*.

The commission's procedure for receiving evidence and ascertaining the facts, whether by hearing, affidavits, or otherwise, is a matter for its sound administrative discretion so long as some reasonable procedure is adopted.—Greyhound Corp. v. United States, 221 F. Supp. 440 (445)*.

The commission's practice of refusing to reconsider matters to which no objection has been made before the initial hearing officer is a rule of procedure which is within its power to adopt and is reasonable on its face. Plaintiff filed no exception to joint board's report and recommended order denying its application for gateway elimination, claiming failure to consider a partial elimination, nor did it suggest to division 1 that it desired such consideration, and not until it petitioned the full commission for reconsideration did it even propose that it be granted a partial elimination. Thus, such a proposal was never properly or timely presented to the commission, and failure to consider it was therefore not unreasonable.—Youngblood Truck Lines, Inc. v. United States, 221 F. Supp. 809 (819)*.

Had the commission properly concluded that plaintiffs' proposed service would not meet supporting shippers' distinct needs, the proper procedure would have been to deny their contract carrier application; but in holding the application to be one in substance, though not in form, for common carrier authority, and in finding that plaintiffs had not established a public need for their service, what the commission actually denied was a certificate for common carrier operation. This unusual procedure resulted in denial of the full and fair hearing on the merits of the application required by §205 of ICA.—Eddleman v. United States, 229 F. Supp. 231 (236-7)*.

As plaintiff's application sought issuance of a contract carrier permit, they could reasonably expect to be required to present evidence to establish propriety of that step, and their evidence was designed to do so; they could not reasonably be required to present evidence of public need for the services proposed when such evidence was irrelevant to issues presented by their application. The commission's purported preference for substance rather than form does not commend itself when in an administrative proceeding an individual is effectively denied opportunity to know the standards by which he is to be judged; its failure to afford plaintiffs a full and fair hearing on the "step asked to be taken" was clear error (citing 261 US 184). Order set aside and case remanded.—Id., p. 238.

The constitutional principle of separation of executive, legislative, and judicial functions, as it applies to administrative agencies, is expressed in §5 of APA. When, to perfect the defense in court of an agency's judicial determination an ex parte reconsideration thereof is made, it is an executive act done in guise of the judicial and is arbitrary and unfair. It is also arbitrary, and a denial of due process of law, when a judicial branch of a regulatory agency, once made aware of a litigant position taken in seeking higher judicial review of its determination, without notice to the appellant and opportunity to be heard, changes or adjusts its judicial position to facilitate a victory by its executive branch for its original determination. However, though the commission, without notice to the court in which action to enjoin its order was pending, reopened the proceeding before it and "amplified" its original findings, no prejudice to plaintiffs has resulted from the manner of such "reconsideration," and under all the circumstances the court would not be justified in holding its order on reconsideration void and of no effect.—Atchison, T. & S.F. Ry. Co. v. United States, 231 F. Supp. 422 (428, 429)*.

Though plaintiffs contend that there should have been a hearing examiner's report on proposed rate which the commission rejected, the process of decision involved the reaching of conclusions based on documentary evidence. The facts in evidence were not disputed; the argument was over the conclusions to be drawn from them, and there was not question of credibility of witnesses. In such circumstances failure to have the hearing exam-

iner make a report was not error requiring a reversal or vacation of the commission's order.—Middlewest Motor Freight Bureau v. United States, 234 F. Supp. 151 (155)*.

Though plaintiffs also contend that, since their cost evidence followed a formula recommended by the commission, they should have been given a further hearing, after the commission found that that method embodied understatements, to show that it also embodied offsetting overstatements, they admittedly had ample opportunity before issuance of the challenged order to attack the commission's cost formula, and their briefs to the commission and portions of the record indicate that they did so; thus, their objection seems to be not so much that the commission should have granted their petition for reconsideration as that it should have considered their arguments. A full-scale rule-making proceeding would seem a more appropriate place for such considerations.—Id., p. 155.

Administrative boards or commissions owe as much duty to so conduct their hearings and proceedings as to secure a just result as is the case respecting proceedings in court. The doctrine of equity whereby in cases involving mistake or accident an order or judgment may be set aside at any time and the cause reopened to permit a complete hearing and the doing of justice is a very ancient one. The duty of administrative bodies to afford justice by reopening an order which is the consequence of mistake or inadvertence is universally recognized, and the commission may not disregard the established doctrine generally applicable to all hearings and proceedings of administrative agencies. Plaintiff's petition for reopening of application proceeding to change a portion of certificate allegedly granted by mistake, and its application for waiver of the commission's Rule of Practice 101(e) limiting time for filing such petitions, set forth facts which if found true would require the commission to reopen the proceeding to allow plaintiff to adduce evidence in support of its position. In summarily refusing, without a hearing, to waive rule 101(e) the commission did violence to an established principle of law. Order denying the petition set aside and the cause remanded with directions.—James J. Williams, Inc. v. United States, 241 F. Supp. 535 (537-9)*.

When grant of temporary authority under §210a(b) of Interstate Commerce Act by the Finance Board, but revoked by a Division of the commission, and therefore was not a final grant, §§9 and 10 of APA are inapplicable in action to set aside the division's order.—Three "I" Truck Line, Inc. v. I.C.C., 246 F. Supp. 410 (412)*.

Action of the Interstate Commerce Commission establishing informal procedure for settlement of uncontested reparation claims against motor carriers and freight forwarders, following 1965 amendment of 49 USC §§304a and 1006a, was a significant step (in implementation of the new statutory judicial remedy) which was within purview of the rule-making requirements of §4 of the APA. By that action, taken and announced to the public without any prior notice and without opportunity to any party to be heard with respect thereto, the commission was definitely committed to an adjudication of the propriety of carrier's return to shipper of transportation charges theretofore collected. Obviously, such adjudication might affect other carriers and shippers; and it is no answer to say that, being provided only for those who choose to use it, it creates no substantive rights. A right to make use of an administrative adjudication does not become trivial simply because it is optional. Whether the commission should have acted at all and, if so, what the form and scope of the procedure should be, were questions suitable for exploration in formal rule-making; considered action held invalid.—National Motor Freight Traffic Ass'n v. United States, 268 F. Supp. 90 (93, 95-6, 97)*.

Administrative agencies must guard against the tendency of rules of evidence and procedure to become talismanic formulas for disposition of cases involving the public interest.—Terminal Charge on Order Bills of lading Shipments, 315 I.C.C. 327 (329)*.

The commission has no burden under §7(c) of APA to show that order discontinuing suspension and continuing investigation of proposed towing rates is lawful; §7(c) is limited by the expression "Except as statutes otherwise provide," and §307(g) of Interstate Commerce Act authorizes the commission to

investigate new rates or regulations, with or without suspension.—Towing Rates between Points on the Ohio River, 315 I.C.C. 583 (586).

Although the statutory period provided by §204a of ICA for institution of an action at law after disallowance of overcharge claims by the carriers has expired, some of considered shipments may not yet be barred by the 3-year limitation period, and under §5(d) of APA the commission has discretion to consider the issue presented as to such shipments, to terminate the controversy.—Bemis Bro. Bag Co. v. Felten Truck Line, Inc., 316 I.C.C. 417 (418).

Admission in a different proceeding of evidence of operations conducted under tempo rary authority prior to hearing did not involve administrative delay necessarily entailed in applicant's proposal to reopen instant proceeding to receive evidence of its temporary operations. Even if accepted, the proffered evidence would not vitiate examiner's conclusion, adopted by the commission, that applicant had failed to show public need for permanent authority.—Convoy Co. Extension, 91 M.C.C. 461 (464)*.

Determination of limits of the scope of incidental charter rights conferred by §208(c) of ICA, which the commission must administer, is an agency statement of general applicability and future effect designed to implement and interpret the Motor Carrier Act within meaning of §§2(c) and 4 of APA; and application to defendant's challenged charter operations of criteria developed in 29 MCC 25, 48 MCC 521, and pertinent collateral decisions did not amount to denial of due process. Defendant had reasonable and proper notice of complaint brought against it, and had opportunity to put in direct evidence, to cross-examine, and to present rebuttal evidence.—Brunswick Transp. Co., Inc.—Revocation of Certificate, 91 M.C.C. 899 (904).

Investigation of respondent's failure to comply with provisions of Part II of ICA and certain orders and regulations of the commission thereunder is not void for noncompliance with procedural requirements of §9(b) of APA. The right to notice and opportunity to achieve compliance granted by §9(b) is expressly made inapplicable to cases of willfulness; order of investigation specified that respondent's certificates might be suspended or revoked only for willful violations, and necessity of a showing of willfulness as a prerequisite to such revocation or suspension clearly exempts the proceeding from provisions of §9(b).—Safeway Trails, Inc.—Investigation and Revocation, 91 M.C.C. 936 (949)*.

Although at hearing the examiner apparently indicated that all questions of supporting shipper witnesses on direct examination should be asked by one practitioner on behalf of all applicants and that the other practitioners should channel their particular questions through that representative, no formal objection to that procedure was made at the hearing. While at one point counsel for one applicant complained that the procedure was "inconvenient and unhandy," such a generalized complaint cannot be considered a serious objection or argument that that applicant was thereby deprived of a fair hearing. Applicant was represented by counsel who had ample opportunity to present the arguments now raised on exceptions, and, having acquiesced in the hearing procedure it now finds distasteful, it thereby waived the objection it now makes.—Maas Transport, Inc., Extension, 92 M.C.C. 534 (537, 541-2)*.

The provisions of §8(b) of APA do not require findings on all issues raised by the parties, but only on those which are material to a decision.—Service Trucking Co., Inc.—Declaratory Order, 94 M.C.C. 222 (226)*.

Co. v. United States, §5(2), n. 112; Southern Tank Lines case, §204(b), n. 8 liquid chemicals; Trailways of New England, Inc. v. United States, §17(5), n. 20; Walker v. United States, §16(6), n. 1.

Record

In taking official notice of data contained in applicants' more recent annual and quarterly reports on file with commission but not of record, to permit a more informed judgment on merits of control application, in conso-

nance with §7(d) of APA effectiveness of order will be deferred for a sufficient period to allow any party to petition for further hearing for purpose of showing any reasons why such data should not be considered.—Adley Exp. Co.—Control— McFaddin Exp., Inc., 87 M.C.C. 665 (671)*.

Records

See Zuzich Truck Line, Inc. v. United States, §204(d), n. 10.

Reports of Commission

Although it is not required to make detailed findings of fact as required of a trial court, the commission must make basic or quasi-jurisdictional findings essential to the validity of its order. Since the reviewing court is bound thereby, it is important to determine precisely the basis of the commission's decision; grounds upon which the commission's order must be judged are those upon which the record discloses that its action was based.—Missouri Pac. R. Co. v. United States, 203 F. Supp. 629 (632)*.

The commission is required to make not only findings that support its decision, but also findings that are intelligible and complete.—Boston & M. R. v. United States, 208 F. Supp. 661 (671)*.

Contention that the commission failed to set out sufficient findings of fact to support its refusal to impose protective labor conditions on total abandonment of a railroad, in violation of §8 of APA, is refuted by the court's finding that the technical requirements thereof were inapplicable to the abandonment proceeding. Even if §8 applied, the commission's report meets all its requirements, since it discussed factors which the commission believed would justify imposition of protective conditions and found them absent, and further found that there was no evidence of record to warrant such imposition. Though plaintiffs contend that the commission failed to set out facts on which those statements were based, in finding that there was no evidence to warrant imposition of such conditions the commission necessarily found that there were no justifying facts; plaintiffs have not shown how the commission could set out facts which it found did not exist. Motion to set aside the commission's order on that basis denied.—Brotherhood of Locomotive Engineers v. United States, 217 F. Supp. 90 (103)*.

Where examiner's report and recommended orders in consolidated application proceedings fully complied with requirements of §8(b) of APA, it was permissible for the commission to affirm and adopt the examiner's report as it did. While the commission doubtless could have paraphrased the fact findings and conclusions of the examiner, where it found them correct in all respects, and so stated in its order, there was nothing to be gained by doing so. The commission having expressly adopted those matters from the examiner's report, the court was apprised of the essential basis of the commission's decision.—North American Van Lines, Inc. v. United States, 217 F. Supp 837 (842)*.

That the commission gave full attention to plaintiff's exceptions to the examiner's report and found them without merit is clear from statement in its order that the exceptions and reply raise no new or material matters of fact or law not adequately considered and properly disposed of by the examiner in his report, and that the evidence considered in light of the exceptions and reply does not warrant a result different from that reached by the examiner. The specific requirement of §8(b) of APA is satisfied if the total decision, including that portion adopted from the examiner's report, sufficiently informed plaintiff of the disposition of all its exceptions. Adoption of the findings and conclusions of the commission's order clearly informed plaintiff of its rulings and position in regard to the exceptions; further particularity would serve no purpose and is not required by the act. The record and findings made, after consideration of the exceptions, adequately establish the basis of the commission's action; the commission's decision affirmed.—Id., pp. 842-3.

Defendants contend that under §14(1) of the Interstate Commerce Act, the commission need not comply with §8(b) of APA, but no reason appears for exempting the IC Act from the requirements of §8(b) of APA; various decisions refer to that provision as applicable to commission reports. Although, in its report

finding assailed rates unduly prejudicial and preferential, the commission did not specifically find substantial similarity of transportation conditions, it complied with §8(b) when it ruled on the "material issue of fact" regarding the similarity thereof.—Atchison, T. & S.F. Ry. Co, v. United States, 218 F. Supp. 359 (369)*.

Though plaintiffs contend that the commission's report approving proposed control transaction is fatally deficient in lacking adequate subsidiary findings, provision of §8(b) of APA that decisions of administrative tribunals shall include a statement of findings and conclusions, as well as reasons therefor, on all material matters of law, fact, or discretion requires subsidiary findings only on material issues, not on those that are collateral. It is enough if an administrative agency such as the commission sets forth a reasonable review of the evidence before it, the weight given thereto, its own resolution of conflicts therein, and the findings necessary to support its ultimate conclusions. Findings expressed by the commission in its report sufficiently explained its view of the evidence and the basis on which it came to its ultimate conclusion that the criteria essential to approval were present and established by the proofs made before it on its extended hearing. The findings it made were adequate to support its order.—Broth. of Maint. of Way Employees v. United States, 221 F. Supp. 19 (27)*.

Requirement of §8(b) of APA that all decisions include a statement of findings and conclusions, with reasons therefor, on all material issues of fact, law, or discretion presented by the record is intended to have teeth (371 US 167). Thus, an agency's discretionary order must be upheld, if at all, on the basis given by the agency; and the strict requirement of findings and reasons should not be relaxed merely because the choice of remedies is among a variety of divisional scales. The Commission's prescription of the challenged schedule for divisions of joint official-w.t.l. interterritorial rates as between eastern lines and plaintiff transcontinental lines, on ground simply that the eastern lines need additional revenue but the scale they seek is not the proper one, does not meet that requirement. Order set aside and proceeding remanded.—Atchison, T. & S.F. Ry. Co. v. United States, 225 F. Supp. 584 (606-7)*.

Though the commission did not consider sufficiently meritorious for separate comment plantiff's contention that applicant contract carrier's president and controlling stockholder would use his employee relationship to the sole supporting shipper to favor applicant over other carriers, with resulting loss of business by plaintiffs and creation of destructive competitive practices, APA does not require the commission to make separate findings on such arguments, especially when the record shows that the hearing examiner, whose report the commission adopted, considered the facts on which that argument was based. Nor was the commission required by §8(b) of APA to state any reasons for its determination, in denying plaintiffs' motion for reconsideration, that the relationship did not raise an issue of general transportation importance. That decision was not governed by §8(b), which applies to agency review of decisions of subordinate officials, not to a petition for reconsideration of the decision of a division of the commission.—Deioma Trucking Co. v. United States, 233 F. Supp. 782 (784)*.

Division of the commission, acting as an appellate division in considering plaintiff's petitions for reconsideration of findings of the Operating Rights Review Board, was not bound to a choice of the examiner's contrary conclusions if conclusions of the board had substantial evidentiary support on the record. Nor was the division required to paraphrase or restate the board's quite adequate report which it adopted as its own, or specify weight given to any fact or item of evidence or disclose mental operations by which its conclusion was reached. Plaintiffs were sufficiently informed as to basis of the division's action, and function of the reviewing court is not hampered by any obscurity. Statutory requirements as to statements of findings, conclusion and reasons for the division's decision were met; sustained.—Trailways of New England, Inc., v. United States, 235 F. Supp. 509 (512)*.

If plaintiff's contention that the commission's order failed to reflect the reasons and basis for the findings and conclusions, as required by §8(b) of APA, is a claim that Divi-

sion 1 (otherwise satisfied with the examiner's report) has to go through the laborious process of issuing its own decision-report, it quickly fails. The commission, as do other adjudicatory tribunals, court or administrative, has the right, if not the duty, to exercise imaginative resourcefulness and judicial inventiveness in developing procedures which enable it to stem the tide of ever increasing backlogs. The commission's DANDO device is certainly permissible; when pursued it means, of course, that the commission's action stands or falls with the examiner's report. From this viewpoint, there is nothing to the criticism leveled; there was no proper exception taken as to form or adequacy of the findings (as distinguished from underlying evidence), and the examiner's exceptionally detailed and revealing report fully met the APA test. Complaint dismissed.—Younger Bros., Inc. v. United States, 238 F. Supp. 859 (861-2)*.

Although findings of the Interstate Commerce Commission under review are sketchy and its opinion (finding assailed export rates unduly prejudicial and preferential) is so imprecise in revealing just what findings are made that the order borders dangerously on running afoul of the requirement that agencies disclose the basis of their orders, the findings under review are adequate under §8(b) of APA when, based on findings of similarity of transportation conditions, the commission's conclusion that complaining port's disadvantage amounted to undue prejudice was clearly stated.—City of Galveston v. United States, 257 F. Supp. 243 (246-7, 248)*.

The commission's report, in proceeding on proposed increase of l.t.l. classification rating on certain stuffed toys, fully serves as the statement required by §8(c) of the APA when it manifests, throughout, that the entire record was considered by the commission in reaching its ultimate conclusion; this is shown by its careful sharpening of the issues as well as by its analysis of all the evidence. On review of the evidence, the court cannot say that the commission's conclusion is without rational basis; sustained.—Overnite Transportation Co. v. United States, 266 F. Supp. 88 (90, 91)*.

Courts ought not to have to speculate as to the basis for an administrative agency's conclusion. Indeed, to prevent such speculation §8(b) of APA provides that all agency decisions shall include not only the appropriate rule, order, sanction, relief or denial thereof, but also findings and conclusions, as well as the reasons or bases therefor, on all material issues of fact, law, or discretion presented on the record. The court cannot say with assurance whether the Civil Aeronautics Board found lack of need for a third carrier in the market for the reasons it gave, added together, or whether it would have reached its conclusion for any one of those reasons standing alone. From the extended discussion of the reasons in its opinions, and the fact that in its original opinion it said that aid to Eastern Air Lines was a "significant" factor in its decision, but downgraded significance of that factor in its report on reconsideration, it may be assumed that the Board gave some weight to each of its reasons, but how much, except respecting aid to Eastern, the court cannot tell. Therefore the decision of the Board cannot stand; remanded.—Northeast Airlines, Inc. v. C.A.B., 331 F. 2d 579 (586, 587).

Contention that the commission's decision and order denying application is fatally defective in failing to set forth findings and conclusions ignores fact that the order expressly adopts those in the examiner's report, which contains a lucid exposition of reasons for denial and is replete with findings of fact. There is no requirement in §8(b) of APA that the commission may not employ incorporation by reference but must in every instance issue a report containing detailed findings and conclusions. Moreover, fact that neither in its exceptions nor in its petitions for further hearing does applicant directly take issue with the findings and discussion in the examiner's report amounts to at least a tacit admission of the propriety and correctness of his conclusions.—Convoy Co. Extension, 91 M.C.C. 461 (463)*.

Even considering grant of temporary authority to applicant and subsequent denial of its application as an "inconsistency," applicant's contention still lacks merit because the applications for temporary and for permanent authority were decided in proceedings of essentially different nature, the former being

granted without hearing in informal proceeding upon shipper representations of urgency and immediacy, whereas latter was denied on consideration of record made upon formal hearing and of examiner's report based thereon; thus the commission did not contradict itself in adopting the examiner's conclusions. As the actual method of presenting the issues was peculiarly within applicant's knowledge as a participant in all the proceedings, discussion in the decision and order of the lack of evidentiary value of the temporary authority was neither necessary or warranted.—Id., p. 463-4.

The protestants' contention that examiner's recommended report did not include an adequate statement of facts or an adequate discussion of the applicable law as provided by §8(b) of the Administrative Procedure Act was disallowed because, while the report is concise, it did contain a statement of all the material facts, a discussion of the applicable law and all the essential findings. There is no requirement that every evidentiary point be recited in the report or that each finding be annotated with appropriate law.—Ryder Truck Lines, Inc., Extension, 96 M.C.C. 771 (777-8).

BANKRUPTCY

Chapter 8.—Title 11 U.S.C.

Section 205. [§77 as enacted] Reorganization of railroads engaged in interstate commerce.—By Sec. 11 of Pub. Law 87-681, 76 Stat. 572-3, Sept. 25, 1962, subsection (a) is amended to read as follows:

(a) Any railroad corporation may file a petition stating that it is insolvent or unable to meet its debts as they mature and that it desires to effect a plan of reorganization. The petition shall be filed with the court in whose territorial jurisdiction the corporation, during the preceding six months or the greater portion thereof, has had its principal executive or operating office, and a copy of the petition shall at the same time be filed with the Interstate Commerce Commission (hereinafter called the "Commission"). When any railroad, although engaged in interstate commerce, lies wholly within one State, the proceedings shall be brought in the United States district court for the district in which its principal operating office has been located during the preceding six months or the greater portion thereof. The petition shall be accompanied by payment to the clerk of a filing fee of $150. Upon the filing of such a petition, the judge shall enter an order either approving it as properly filed under this section, if satisfied that it complies with this section and has been filed in good faith, or dismissing it, if he is not so satisfied. If the petition is so approved, the court in which the order is entered shall, during the pendency of the proceedings under this section and for the purposes thereof, have exclusive jurisdiction of the debtor and its property wherever located, and shall have and may exercise in addition to the powers conferred by this section all the powers, not inconsistent with this section, which a court of the United States would have had if it had appointed a receiver in equity of the property of the debtor for any purpose. Process of the court shall extend to and be valid when served in any judicial district. The Supreme Court of the United States shall promulgate rules relating to the service of process outside of the district in which the proceeding is pending, and

any other rules which it may deem advisable in order to aid district courts and courts of appeal in exercising the jurisdiction herein conferred upon them. The railroad corporation shall be referred to in the proceedings as a "debtor". Any railroad corporation the majority of the capital stock of which having power to vote for the election of directors is owned either directly or indirectly through an intervening medium, by any railroad corporation filing a petition as a debtor may file, with the court in which the other debtor has filed such a petition, and in the same proceeding, a petition, a copy of which shall also be filed at the same time with the Commission, stating that it is insolvent or unable to meet its debts as they mature, and that it desires to effect a reorganization in connection with, or as a part of the plan of reorganization of the other debtor; and upon the filing of the petition, the judge shall enter an order either approving it as properly filed under this section, if satisfied that it complies with this section and has been filed in good faith, or dismissing it if not so satisfied, and thereupon the court, if it approves the petition, shall have the same jurisdiction with respect to such debtor, its property and its creditors and stockholders, as the court has with respect to the other debtor. Creditors of any railroad corporation, having claims aggregating not less than 5 per centum of all the indebtedness of the corporation as shown in the latest annual report which it has filed with the Commission at the time when the petition is filed, may, if the corporation has not filed a petition under this section, file with the court in which the corporation might file a petition under this section, a petition stating that the corporation is insolvent or unable to meet its debts as they mature and that the creditors have claims aggregating not less than 5 per centum of all such indebtedness of the corporation and propose that it shall effect a reorganization; copies of the petition shall be filed at the same time with the Commission and served upon the corporation. The corporation shall, within ten days after such service, answer the petition. If the answer admits the jurisdiction of the court and the material allegations of the petition, the judge shall enter an order approving the petition as properly filed if satisfied that it complies with this section and has been filed in good faith, or dismissing it, if not so satisfied. If the answer denies either the jurisdiction of the court or any material allegation of the petition, the judge shall summarily determine the issues presented by the pleadings without the intervention of a jury, and if he finds that the material allegations are sustained by the proofs and that the petition complies with this section and has been filed in good faith, the judge shall enter an order approving the petition; otherwise, he shall dismiss the petition. If such petition is so approved, the proceedings thereon shall continue with like effect as if the railroad corporation had itself filed a petition under this section. If a petition is dismissed, neither the petition nor the answer of a debtor constitute an act of bankruptcy or an admission of insolvency or of inability to meet maturing obligations or be admissible in evid-

ence, without the debtor's consent, in any proceedings then or thereafter pending or commenced under this act or in any State or United States court. If, in any case in which the issues have not already been tried under the provisions of this subdivision, any of the creditors, prior to the hearing provided for in paragraph (1) of subsection (c) of this section, appear and controvert the facts alleged in the petition, the judge shall determine, as soon as may be, the issues presented by the pleadings, without the intervention of a jury, and, unless the material allegations are sustained by the proofs, shall dismiss the petition.

Amendments, see footnotes, vol. 10, p. 8310; historical notes, vol. 7, p. 6015, vol. 10, p. 8311, vol. 11, p. 9696, vol. 12, p. 10536, vol. 14, p. 11692, vol. 15, p. 12313, vol. 16, p. 12967, vol. 17, p. 13678; vol. 18, p. 14710.

Historical Note

The Commission recommends, in view of the prohibitions in 28 USC §1001, that §77(p) of the Bankruptcy Act (11 USC §205(p)) be amended so as to eliminate the mandatory oath provision therein, and that such requirement be made discretionary with the Commission.—Annual Report, 1964, p. 72.

Notes of Decisions

Volume 7—p. 6016; Volume 10—p. 8312; Volume 11—p. 9697; Volume 12—p. 10537; Volume 13—p. 11180; Volume 14—p. 11693; Volume 15—p. 12313; Volume 16—p. 12968; Volume 17—p. 13678; Volume 18—p. 14712; Volume 19—15994.

2. Construction and interpretation.—[Vols. 10-17, 19].—When the purpose of §77 and the exact nature of the proceedings under it are considered, no intention can be imputed to Congress that a railroad corporation should escape through a petition for reorganization penalties incurred for violating laws of the United States, which it will be obliged to pay if the reorganization fails and the proceedings are dismissed.—United States v. Dorigan, 236 F. Supp. 106 (109, Note 8).

6. Jurisdiction.—[Vols. 10-18].—Prior approval of the Reorganization Court is a jurisdictional prerequisite to maintenance of condemnation proceeding by the United States to condemn realty of debtor railroad. Since railroad's petition for reorganization had been filed, trustees appointed and qualified, and all property of the railroad vested in them, that court had "exclusive jurisdiction of the debtor and its property, wherever located," under §77(a) of the Bankruptcy Act. Even the right of eminent domain must be exercised subject to the rule that, having possession, the court may not only issue all writs necessary to protect its possession from physical interference, but is entitled to determine all questions respecting it; such orderly procedure does not restrict the power of eminent domain, only the course the government must follow in exercising it.—U.S. v. Certain Land in City of Marlboro, Mass., 234 F. Supp. 426 (427).

Though the statute provides that, during pendency of railroad reorganization proceeding "and for the purposes thereof," the court shall have exclusive jurisdiction of debtor and its property wherever located, in absence of sufficient statutory purpose the bankruptcy court's jurisdiction is not exclusive. See 348 F. 2d 151. State's interest or right, and not the court's general interest in a successful reorganization, must prevail if they are in conflict; thus, while land which state proposes to take by condemnation for use in a transportation corridor is owned by railroad currently in reorganization, the State's special interest or right is paramount to any interest of debtor in the property. With respect to the State's prescriptive rights, the court could not effect any alterations or take any actions ordinarily contemplated in a reorganization proceeding and, in such circumstances, exclusive jurisdiction would not serve the "purposes" of the reorganization. Bankruptcy court's consent is not a jurisdictional prerequisite to maintenance of the State's condemnation action.—Commonwealth of Massachusetts v. Bartlett, 384 F. 2d 819 (820-2)*.

10. Proceedings, in general.—[Vols. 10-17, 19].—Since resolution of primacy of claim, as between underlying mortgages of debtor and its unsecured accounts with other railroads and a fuel supplier, is required to evaluate the possibility of debtor's reorganization, consideration of question of priorities is neither premature nor moot; nothing in the statute forbids ascertainment of the order of liens in advance of formulation of a plan of reorganization.—Southern Ry. Co. v. Flournoy, 301 F. 2d 847 (849, 850).

On appeal from Bankruptcy Court's order authorizing trustees of debtor to file with Interstate Commerce Commission a two-step plan for inclusion of debtor's properties in proposed Pennsylvania-New York Central merger without a vote of security holders, with terms to be accorded security holders subsequently specified and voted on, the court's decision on objections to the plan would be premature. As it is by no means certain that plan approved by the commission and the court, if any plan is approved, will contain features which appellants object to, it would be improper for the Court of Appeals to pass on their objections at this time. Furthermore, since trustees only needed authority to spend money to initiate proceedings before the commission and, meanwhile, keep operating the railroad, there was no reason to involve either the Appeals or Bankruptcy court in an advisory opinion on legal issues that may never arise; considered order should not have included any determination as to validity of the plan. Order modified to read as set forth and, as modified, affirmed.—In re New York, N.H. & H. R. Co., 378 F. 2d 635 (639-41).

Neither petitioner nor employees it represents have been prejudiced in any way by stipulation whereby petitioner agreed to accept a reorganization plan approved by the commission, provided it contained employee-protective conditions embraced in stipulated draft plan, or by the commission's refusal to approve provisions of the stipulated plan without modification; petitioner has been free to raise upon its petition for modification any issue which it could have raised upon exceptions to examiner's proposed report if filing of exceptions had not been waived by the stipulation; although the normal procedure has been shortened by mutual consent of the parties, including petitioner, petitioner's rights have not been abridged in any degree.—Florida East Coast Ry. Co. Reorganization, 312 I.C.C. 744 (745, 747)*.

14. Intervention.—[Vols. 10-12, 14, 15, 18].—Appellant, a Boston & P. R. stockholders development group, has no standing to intervene in reorganization proceedings of New York, N.H. & H. R. as a matter of right; the group does not qualify as a creditor of the New Haven or as an interested party either in New Haven's reorganization or in petition of its trustees for authority to support proposed reorganization plan of Boston & P. R. Denial of intervention was within the lower court's sound discretion; appellant's rights, if any, may be fully protected in Boston & P. R. reorganization proceeding: appeal dismissed.—Boston & P. R. Stockholders development Group v. Smith, 333 F. 2d 651 (652).

15. Staying of suits.—[Vols. 10, 14, 17].—The common law rule is that a receiver pendente lite cannot be sued for torts committed prior to his appointment, although a statutory receiver can be sued for such torts. This is because receivers pendente lite are not successors to the corporation but merely officers of the court without legal powers, their functions being confined to care and preservation of the corporation's properties, whereas statutory receivers succeed to title to the properties and represent or supersede the corporation in the exercise of its powers. And though the proviso of §77(j) expressly excludes from the provisions for stay or enjoiner of suits against the debtor suits for damages arising out of torts caused by operation of trains, whether committed before or after appointment or reorganization trustees, it does not exclude suits for penalties.—United States v. Dorigan, 236 F. Supp. 106 (108).

But while, under principles applicable to statutory receivers, reorganization trustees are liable for acts committed before as well as after their appointment, liability is not synonymous with suability; more important is the nature of the liability, date of its creation, and its classification. With certain exceptions, liabilities created by and inherited from the debtor are stayed, while those created by the

trustees in operation of the railroad are enforceable. Bankruptcy court's orders appointing the debtor-in-possession and the trustees in its place specifically stayed and enjoined all persons from commencing or continuing any suits against either of them except suits for damages arising from operation of trains, whether the acts occurred before or after their appointment. Had the Government's suit to recover penalty for violation of the Safety Appliance Act been commenced before appointment of the debtor or the trustees it would have been stayed, and the Government cannot improve its position by later bringing the action against the trustees.—Id., pp. 108-9.

The purpose of staying suits was to require all suits against the debtor to be determined by the bankruptcy court so that the court might not be frustrated or delayed in expeditiously reorganizing the debtor's properties. However, claims arising after appointment of the debtor or trustees would not be affected by the reorganization proceedings and may therefore be enforced without interfering with the reorganization. Congress has specifically authorized suits against trustees and debtors-in-possession with respect to any of their acts or transactions, without leave of the bankruptcy court. But suit against the trustees for violation of the Safety Appliance Act occurring before debtor filed its petition for reorganization is not predicated on any act of the trustees and therefore requires consent of the bankruptcy court.—Id., p. 109.

Provisions of par. (j), vesting exclusive jurisdiction of suits against a debtor railroad in the reorganization court, do not deprive District Court in Massachusetts of jurisdiction over condemnation suit by the United States to take land in that State owned by railroad undergoing reorganization in District Court in Connecticut absent latter court's consent. Bankruptcy statute is designed to protect debtor from harassment pending reorganization, and reorganization court has both concern and control over ordinary litigation of debtor affecting continued operation of the railroad and orderly liquidation or adjustment of its debts; however, issue in the Government's condemnation suit is determination of amount of just compensation and the claimants thereto. While the reach of the reorganization court's exclusive jurisdiction is sweeping, it should be confined to its objectives and needs; thus, since that court's control is limited to determining application of the proceeds, eminent domain statute under which condemnation suit was filed must prevail.—United States v. New York, N.H. & H. R. Co., 348 F. 2d 151 (152).

20. Priority.—[Vols. 10-17, 19].—In railroad reorganizations, public concern with continued operation of the railroad has been a factor supporting priority accorded general creditors over mortgagees; this is accented by denial of such equity to corporations without public responsibility. Another reason is conservation of the property for maintenance of integrity and mortgage security: bondholders presumably look for security to a live railroad. Both those concepts must at times regard costs of operation as the price of security; mortgagees must then yield priority.—Southern Ry. Co. v. Flournoy, 301 F. 2d 847 (851-3).

Equity warranting deference of mortgages to unsecured claims must embrace following elements: (1) account must cover an expense immediate to continuance of railroad operation, must be a business-operating account; (2) account must have arisen within a reasonable time prior to institution of trusteeship, generally established as 6 months; (3) claim must represent a debt contracted with intention that current earnings would respond thereto; (4) account must first have been given preference in any current debt fund over non-operating debts and mortgage payments; and (5) there must have been such pressing necessity for payment thereof that it was reasonably probable that nonpayment would result in suspension of railroad's operations.—Id., pp. 850-1.

Thus, claims against railroad seeking reorganization for interline accounts, those arising under trackage-rights agreement, under agreements for maintenance of interlocking plant, and under agreement for use of freight facilities house, diesel shop facilities and switching services, and claims for car destruction are entitled to priority over mortgage liens. However, for reasons discussed, neither railroads' claim for installation of au-

tomatic interlocking plant, nor oil company's claim for amount due for locomotive diesel oil sold to debtor is entitled to such priority.—Id., pp. 854-6.

Railroad was not entitled to priority of its claim for freight charges incurred by motor-carrier debtor in Chapter XI proceeding (in accordance with their substituted freight service arrangement) on basis that proceeds from debtor's accounts receivable, to extent they are attributable to the "piggy-back" hauls, constitute trust funds for the railroad's benefit; that debtor may have had a duty to account to the railroad for funds collected as result of such hauls did not necessarily create a trust relationship between them.—In re Chicago Express, Inc., 222 F. Supp. 566 (572)*. [Not arising hereunder]

22. Six-months rule.—[Vols. 10, 13].—The "six-months rule" is not applicable in a Chapter XI proceeding; thus, railroad's claim, representing freight charges incurred by motor-carrier debtor (under their substituted freight service agreement) during the 2-1/2 months prior to filing of arrangements petition, was not entitled to priority status under that rule. Paramount consideration in origin of the rule was public interest in continued operation of "a great public work," see 128 US 416; however, since it is an invasion of established contract rights of lien-holders, it should be strictly contained within narrow confines and limited to purposes which brought it into being. Whatever the relevant economic arguments or equitable considerations, as to applicability of the rule to claims against a railroad debtor and inapplicability thereof to claims against motor-carrier debtor, statutory enumeration of priorities in Chapter XI arrangements neither recognizes the "six-months rule" nor authorizes importation of general equitable doctrines.—In re Chicago Express, Inc., 222 F. Supp. 566 (568-72)*. [Not arising hereunder]

In railroad reorganization proceeding, claims of several unsecured creditors to a priority in debtor's assets, based on so-called "six-months rule," are not entitled to be paid on a priority basis when they must be satisfied from the corpus of the mortgaged property of the railroad. debtor has no current surplus earnings and no unmortgaged property from which the claims could be paid, and the evidence establishes that there has been no "diversion" of a "current expense fund" which would justify invasion of the mortgaged-property corpus to satisfy priority of unsecured operations creditors. It is unlikely that debtor's financial position will improve; however, should sufficient non-corpus assets become available in the future, claimants may renew their request for a priority. Accordingly, the petitions are denied without prejudice to renewal upon a change of circumstances as outlined.—In re New York, N.H. & H. R. Co., 278 F. Supp. 592 (595, 602-7)*.

Generally, the period within which preferred general accounts may be accumulated is limited to the 6 months preceding initiation of receivership proceedings. Such limitation is the result of a balancing of interests: operating creditors must be indemnified for maintenance of mortgagee's security in a lost railroad, yet such general creditors should not be permitted, under guise of maintaining the security, to undermine the mortgage "through secret liens." Unsecured claims accorded priority over underlying mortgages of debtor are limited to those incurred during 6-month period prior to petition for reorganization.—Southern Ry. Co. v. Flournoy, 301 F. 2d 847 (853).

30. Plan of reorganization.—[Vols. 10-19].—Power conferred on the commission by the Bankruptcy Act to approve, reject, or modify a plan proposed by the parties is necessarily a plenary one which, compatibly with the scheme of the statute, may not be circumscribed by private agreement.—Florida East Coast Ry. Co. Reorganization, 312 I.C.C. 744 (746-7)*.

Examiner's recommended plan providing for capitalization of the reorganized company consisting wholly of common stock to be acquired by Erie-Lackawanna R., and for payment of all unliquidated claims in cash, approved.—New Jersey & N.Y. R. Co. Reorganization, 317 I.C.C. 441*.

35. Classification of claims and interests, creditors.—[Vols. 10-15, 16, 18].—Claims arising after appointment of the debtor-in-possession or the trustees in its place would not be affected by the reorganization proceedings and consequently may be en-

forced without interfering with the reorganization; expenses and debts created by them have preference against the assets as administrative expenses. Also, a judgment for violation of the Safety Appliance Act obtained before appointment of trustees is a provable and preferred claim despite provisions of §77(j); but since there is no authorization for such a suit after appointment of trustees, the Government's suit against the trustees to recover penalty for a violation occuring before filing of reorganization petition requires consent of the bankruptcy court.—United States v. Dorigan, 236 F. Supp. 106 (109).

45. General creditors.—[Vols. 10-14, 16, 18].—Unliquidated claims, which under plan approved will be assumed and paid by the reorganized company, are adequately provided for when railroad which under that plan will acquire control of the new company has agreed on the record and has filed undertaking with the control of the new company has agreed on the record and has filed undertaking with the court to furnish the reorganized company all additional cash needed to carry out provisions of the plan.—New Jersey & N.Y. R. Co. Reorganization, 317 I.C.C. 441 (444-5)*.

47.—Former employees.—[Vols. 10-12, 17, 18].—Written employment contract of railroad employee who retired prior to the railroad's reorganization, which specifically set out his pension rights, found not fatal to his claim for pension payments. That petitioner, disturbed by prospect of losing 37 years of accumulated pension rights with another railroad when he changed jobs at age 56, thought it prudent to have the terms of his pension rights embodied in a formal employment contract (which contract was disaffirmed by trustees of the railroad) does not require that he be treated as any other general unsecured creditor whose contract has been disaffirmed; he should be treated as any other pensioner who retired prior to reorganization. Reversed and remanded for district court's determination of petitioner's proper pension; however, that court is not required to give any consideration either to terms of the contract or to actions of railroad's board of directors prior to the reorganization in determining amount of his pension.—Tate v. New York, N.H. & H. R. Co., 332 F. 2d 449 (450-2).

Petitioner's employment contract as railroad's chief executive, providing that he would receive $25,000 annually for 12 years following expiration of his employment "by way of severance pay and as deferred compensation for the services performed and to be performed by him hereunder," cannot be construed as being equivalent to or a substitute for regular railroad company pension payments; compensation thereunder was precisely what it was labelled—deferred compensation. Contract payments due bore no relation to railroad's pension plans, were subject to no conditions as to age or length of service, were limited to the 12-year period and did not terminate on employee's death, and were not referred to as a pension; therefore, petitioner's claim is a nonpreferential ordinary contract claim. Petitioner performed the services before railroad entered reorganization, and his claim to payment did not accrue until thereafter, but the payments cannot qualify as part of debtor's operating expenses. Petitioner has merely an executory contract with the railroad and must wait his turn as a general creditor.—Alpert v. New York, N.H. & H. R. Co., 348 F. 2d 304 (306-7).

48. Protection of employees.—[Vols. 14-19].—Labor organization's petition for adoption in full of employee-protective conditions originally proposed as part of stipulated draft plan of reorganization, in lieu of less onerous conditions imposed in plan approved by the commission, denied; such modification was made primarily on ground of public interest, and adequate reason therefor was stated in 307 ICC 5; petitioner has presented no convincing reason why the rejected provision should be reinstated as a condition of approval of acquisition of control of the reorganized carrier in plan approved.—Florida East Coast Ry. Co. Reorganization, 312 I.C.C. 744 (745)*.

Properly construed, the employee-protective provision of the draft plan was not an agreement between a railroad and representatives of its employees within contemplation of §5(2)(f), since it dealt only with relations between debtor and its employees and did not purport to be an agreement with the reorganized company which is to be the prod-

uct of, and is not a party to, the plan; there is no employment relationship, and no contractual privity as to such relationship, between the parties to the stipulation, and they do not include all who will have an interest in the reorganized company; while they can bind themselves, they may not legally bind the reorganized company.—Id., p. 747.

Neither the commission's duty under the Bankruptcy Act to formulate a reorganization plan compatible with public interest, nor its authority under §5(2)(f) of Interstate Commerce Act, constitutes a divisible and qualified power which may be nullified by such an "agreement." The two statutes are entirely different in nature, scope, and purpose, and power conferred on the commission by the Bankruptcy Act to approve, reject, or modify a plan proposed by the parties is necessarily a plenary one which may not be circumscribed by private agreement.—Id., p. 746.

Moreover, the stipulation by its terms was not a binding agreement between any of the parties with respect to any of the provisions of the draft plan, but was specifically an agreement to accept a plan approved by the commission if it contained the employee-protective and other provisions incorporated in the draft plan, and conditions imposed in order approving the modified plan will not prevent the making of agreements between employee representatives and management of the reorganized company when established.—Id., p. 747.

57. Mortgages; divisional mortgages.—[Vols. 11-14, 16].—In railroad reorganization, a mortgage is a paramount and exclusive lien upon property therein conveyed as against a later unsecured or otherwise junior claim save for an exceptional and supreme equity. Equity warranting deference of mortgages to a general creditor must embrace the following elements: (1) the account must cover an expense immediate to continuance of railroad operation; it must be a business-operating account; (2) account must have arisen within a reasonable time anterior to institution of trusteeship, generally established as 6 months; (3) claim must represent a debt contracted with intention that current earnings would respond thereto; (4) account must first have been given preference in any current debt fund over non-operating debts and mortgage payments; and (5) there must have been such pressing necessity for payment thereof that it was reasonably probable that nonpayment would result in suspension of railroad's operations.—Southern Ry. Co. v. Flournoy, 301 F. 2d 847 (850-1).

60. Capitalization.—[Vols. 10-18].—There is no merit to contention of debtor's trustee that the examiner, in fixing capitalization of the reorganized company at $3,500,000 composed entirely of common stock, based his valuation of the railroad on fact that it permitted distributions proposed in the filed plans, thus improperly fixing value on basis of consent of some of the parties; capitalization recommended reflects a fair valuation, based on examiner's independent consideration of all elements of value shown of record, including debtor's capitalizable assets and especially its earning power; approved.—New Jersey & N.Y. R. Co. Reorganization, 317 I.C.C. 441 (443)*.

61. Valuation; earnings.—[Vols. 11-18].—There was no error in failure of examiner's valuation of debtor's railroad to reflect its relatively large income tax loss carryover, prospective increases in traffic from new or expanded industries on its lines, reductions in per diem rentals and car-line days paid for, and other matters relating to amount of income which debtor might be expected to earn in a normal year, as to which matters no evidence was presented. To obtain a 6-percent return on the capitalization approved, earnings of the reorganized company must equal $210,000, and it has not been shown that greater future earnings might reasonably be expected.—New Jersey and N.Y. R. Co. Reorganization, 317 I.C.C. 441 (444)*.

Nor is there any merit to objection that the examiner failed to evaluate increased value resulting from economies of unified operation with Erie-Lackawanna R., and increased value of traffic contributed by debtor to the Erie, since those considerations pertain to prior plans which provided for sale of debtor's property to the Erie, whereas recommended plan contemplates an internal reorganization of debtor, with acquisition of control by Erie, in which not all elements of value that might be involved in a sale of the property are nec-

essarily present.—Id., p. 444.

62. Liens.—[Vols. 11-15, 16].—Although oil company's unsecured claim against debtor railroad for amount due for locomotive diesel fuel oil is not entitled to priority over debtor's mortgages, this does not affect its lien under State statute, since the preference which State law gives the general creditor against corpus of the railroad's assets is unconditional.—Southern Ry. Co. v. Flournoy, 301 F. 2d 847 (856).

66. Consolidation; acquisition; operation; construction; sale.—[Vols. 10-19].—Debtor's reorganization proceedings have reached final stages, a reorganization plan has been found feasible, and a specific plan—and provision for making inclusion of debtor a condition of merger of Pennsylvania R. and New York Central R.—has been approved and is about to be certified to the bankruptcy court; therefore, it would be error on the court's part to entertain and approve of action by certain of debtor's bondholders (who seek its immediate take over by the Penn-Central or its liquidation and termination of the reorganization) designed to scuttle the entire proceeding when such course of action, which Interstate Commerce Commission stated would be of no benefit to creditors, is not endorsed by representatives of other bondholders or creditors. Also, petitioners may not maintain what in effect is a collateral attack on the commission's report and order; as steps have been taken toward direct review thereof, they will have ample opportunity to present their claims of lack of due process and taking property without just compensation before the reviewing court. Cross-petitions denied.—In re New York, N.H. R. Co., 281 F. Supp. 65 (67-9)*.

Merger.—[Vols. 16, 17, 19].—See also In re New York, N.H. & H. R. Co., n. 10, above.

67. Abandonment of lines.—[Vols. 10-15, 17-19].—See also Commonwealth of Massachusetts v. Bartlett, 49 USC §1(18), n. 30.

85. Bonds and bondholders.—[Vols. 10-18].—Although plan approved provides for payment of principal and interest on bondholders' claims in cash, it does not specify method of payment; however, it provides that such claims shall constitute a prior lien on property of the reorganized company until paid, and that details of payment shall be determined by the reorganization manager under the court's supervision; thus, the mortgage trustees and the reorganization manager can make necessary arrangements to protect the former in case of bonds not promptly presented for payment.—New Jersey & N.Y. R. Co. Reorganization, 317 I.C.C. 441 (442)*.

90. Stock and stockholders.—[Vols. 10-17, 19].—Record in 278 F. 2d 402, in which order eliminating interests of stockholders in the reorganization of Hudson & M. R. was affirmed, shows that notice informing stockholders of the hearing on the proposed reorganization plan was mailed to all stockholders of record; as a consequence, all stockholders are bound by the decision in that case.—Zanca v. Stichman, 317 F. 2d 355 (356).

110. Appointment of trustees; ratification; duties.—[Vols. 10-12, 14-16, 19].—

Trustees under §77 have all powers of a trustee appointed under §44 of the act as well as all powers of a receiver in an equity proceeding, including title to and possession of the debtor's properties, with full authority to exercise its rights and franchises to run the railroad and to represent all creditors and claimants with respect thereto. In effect they are a combination of trustees in bankruptcy and receivers in equity. Applying principles of cases concerning statutory receivers, reorganization trustees are liable for acts committed before as well as after their appointment; but a judgment against the debtor in a suit against it alone, instituted after appointment of trustees and in which they were not joined as parties, would not be binding on them, hence would not be a burden on them or a lien on the estate, and would be of no value to plaintiff. The trustees are indispensable parties in any suit to enforce such liability.—United States v. Dorigan, 236 F. Supp. 106 (108).

The trustees operate the railroad for purpose of preserving the assets for benefit of the public and the creditors, and expenses and debts created by them have preference against the assets as administrative expenses. But the bankruptcy court has exclusive jurisdiction of the debtor and its properties wherever located, and while Congress has specifi-

cally authorized suits against the trustees without leave of court with respect to any of their acts and transactions, the Government's suit against the trustees to recover penalty for violation of the Safety Appliance Act prior to debtor's filing of its petition for reorganization is not predicated on any act of the trustees and requires consent of the court.—Id., p. 109.

Trustees in railroad reorganization proceedings under §77 have all the powers of a trustee under §44 of the Bankruptcy Act, and thus are "vested by operation of law with the title of the bankrupt as of the date of the filing of the application * * *," and protection of the interests of bondholders and all other creditors and stockholders of the debtor is the responsibility of the trustees; and any rule permitting creditors or stockholders of a railroad affected by proposed merger of other lines to interpose themselves in the merger proceeding would be impracticable from an administration standpoint. Moreover, and even more decisive, there can be no occasion for an administrative agency to determine whether trustees should speak for a bankrupt estate; power to instruct them or to turn over the job to someone else is vested exclusively in the bankruptcy court. Plaintiff bondholders have no standing to seek injunction against consummation of approved merger of other railroads.—Oscar Gruss & Son v. United States, 261 F. Supp. 386 (392-3, 394)*.

Trustees' application for loan guaranty under Part V of Interstate Commerce Act, see New York, N.H. & H. R. Co. Trustees' Loan Guaranty, 49 USC §501, n. 2.

112. Compensation of trustees.—[Vols. 10-14, 17].—Debtor's trustee did not receive interim compensation for services over and above his duties as debtor's chief executive. in connection with the reorganization plan and creation of a situation which made possible the takeover of debtor by a public authority. Those services were of type involving public relations, knowledge of factors which influence governmental authorities and legislative bodies, and skill in securing the proper results from those bodies, and are not the type of services customarily found in reorganizations. He is entitled to additional allowance of $200,000 for those services.—In re Hudson & Manhattan R. Co., 224 F. Supp. 815 (825-6)*. [Not arising hereunder.]

Compensation may be allowed an indenture trustee only for services beneficial to administration of debtor's estate.—Id., p. 829.

Submission of reorganization plan to the court before final determination of allowances for debtor's trustee and his counsel and for other parties in interest in the proceeding does not have effect of placing a ceiling on such allowances; §77 provides that a plan shall provide for payment of all costs of administration and all other allowances made or to be made by the judge, and under plan approved those items will be paid in cash. Nothing in the act requires determination of such allowances prior to promulgation of a plan, and in most proceedings plans have been approved and consummated before final determination of all administrative expenses.—New Jersey & N.Y. R. Co. Reorganization, 317 I.C.C. 441 (445)*.

115. Counsel; compensation.—[Vols. 10-18].—Comparison of amount of compensation requested by special counsel for debtor's trustees with maximum limits fixed by the commission as compensation for general counsel of the trustees has little value in determining reasonableness of the former; when maximum limits for general counsel were fixed, the commission had no specific information as to time which would be required for performance of their service to the trustees; also, in fixing maximum limits for special counsel, due regard must be given to fact that they, unlike the general counsel, must devote a large proportion of their income from professional services to payment of general overhead expenses.—New York, N.H. & H.R. Co. Reorganization, 312 I.C.C. 697 (699).

Upon the showing made, the $25,550 requested may not be fixed as a maximum limit for the period specified; no breakdown is given of time devoted to the respective matters involved, some of which were of fairly routine nature, while others entailed a higher degree of expertise. However, as several months have elapsed since end of that period, and a major portion of the work performed was beneficial to the estate, amount requested may properly be fixed as maximum limit of interim compensation to be paid at this time, without relation to the period specified in the

petition; if that amount later appears excessive for services rendered in that period, adjustment can be made.—Id., p. 700.

Available information does not permit fixing of maximum limits for additional allowances in future; in requesting future allowances petitioners should describe in detail the nature of the work performed (with allocations of time to distinct categories), resulting benefits to debtor's estate, and responsibilities placed on them by the trustees for final decision, as distinguished from that reposed in their general counsel respecting identical matters.—Id., p. 700.

But §77(c)(2) does not contemplate fixing of maximum limits for allowances to trustees' counsel for costs and expenses such as travel, telephone, and duplication of documents; subject to orders of the judge, the trustees may reimburse counsel for such expenses without recourse to the commission; however, order will provide that compensation paid within the maximum limits fixed shall cover any office or overhead expenses which should be provided for in connection with the services rendered.—Id., p. 700.

See also §§506, 577, 579, 624, n. 115.

116. Compensation of mortgage trustees; special counsel.—[Vols. 11-13, 17, 18].—The court has power to fix attorneys' fees for legal services rendered by special counsel subsequent to filing of reorganization petition, in litigation commenced long before such filing, without a maximum or ceiling on such compensation having first been fixed by Interstate Commerce Commission under §77(c)(2) of Bankruptcy Act. Criterion of whether legal services do or do not come within those provisions derives from nature of issues involved in the legal work performed, and whether they are part of the reorganization proceedings as such; the test is whether the service rendered is part of the regular, normal legal business of the carrier, which any railroad not in reorganization might carry on, rather than legal work connected with and peculiar to its reorganization proceedings and plans. Case in which involved services were performed started and was maintained as part of debtor's regular legal business, and subsequent intervention of its bankruptcy had no effect on nature thereof.—In re New York, N.H. & H. R. Co., 221 F. Supp. 288 (289, 290).

Mortgage trustee's theory that the test of applicability of §77(c)(2) should be whether the attorney is an independent contractor or whether he is part of "house counsel" and therefore in effect an employee or agent, regardless of any fee or salary, size of amount involved, or importance of the issues, finds no support in history of that section or its application by the commission and the courts. A construction which would require that the commission fix a ceiling on compensation of all special counsel employed during a railroad reorganization would be unnecessarily burdensome, generate costly delays, make it virtually impossible to retain competent counsel for specialized legal problems, and generally be highly prejudicial to the reorganization proceedings.—Id., pp. 289-90.

135. Reorganization managers; proxies; protective committees.—[Vols. 10-18].—Provision in plan approved for appointment of a reorganization manager nominated by Erie-Lackawanna is proper since Erie, which will acquire sole stock control of the reorganized company, is the principal party interested in that company and in debtor's reorganization.—New Jersey & N.Y. R. Co. Reorganization, 317 I.C.C. 441 (445)*.

136. Voting trusts and trustees.—[Vols. 11-15].—Since under plan approved capitalization of the reorganized company will consist entirely of common stock all of which will be owned by Erie-Lackawanna, voting trust proposed by debtor's trustee would serve no useful purpose and was properly excluded.—New Jersey & N.Y. R. Co. Reorganization, 317 I.C.C. 441 (445)*.

Section 208. (a), (b). Petition subsequent to certification of reorganization plan; Duty of commission to report changes, etc., to court; Supplemental report and order, etc.—[Unchanged. See vol. 14, p. 11712, vol. 16, p. 12979.]

Historical notes, see vol. 14, p. 11714.

Chapter 10—CORPORATE REORGANIZATIONS

Subchapters II, VII, XI

Sections 506, 577, 579, 624.—Plan; hearing; confirmation, consummation. —[See vol. 10, p. 8380. Section 229(a), July 7, 1952, Public Law 456, 66 Stat. 431, prescribes terms for consummation of plan.]

Historical note, vol. 11, p. 9745.

Notes of Decisions

Volume 12—p. 10566; Volume 13—p. 11204; Volume 14—p. 11715; Volume 15—p. 12331; Volume 16—p. 12983; Volume 17-p. 13695; Volume 18—p. 14720.

2. Construction and interpreation.—[Vols. 15, 18].—Unlike ordinary bankruptcy, whose objective is fair distribution of assets among creditors, a reorganization proceeding is aimed at rehabilitation and possible ultimate payment in full of all claims; and general provisions of the Bankruptcy Act apply under Chapter X only "insofar as they are not inconsistent or in conflict" therewith. Thus, as principle that insolvent debtor's surety is entitled to have creditor apply debt owing to debtor to satisfaction of his claim is applicable in ordinary bankruptcy, surety of motor carrier undergoing reorganization can be denied the right to have creditors apply debts owed debtor for unpaid freight charges to satisfaction of surety's claim (subject to later appropriate recognition in a reorganization plan) for reimbursement of payments for cargo loss and damage, pursuant to insurance policies issued by it, only if enforcement of such right would interfere with rehabilitation objective of the reorganization. District court order denying surety's right to setoff vacated and cause remanded for determination of whether any setoff would be compatible with the reorganization or what limits would be appropriate.—In re Yale Express System, Inc., 362 F. 2d 111 (116-7)*.

5. Jurisdiction.—[Vols. 13-15, 17, 18].—Petitioning creditors of debtor interstate carrier were entitled to reclaim trucks and trailers purchased from them by debtor when conditional sales contracts and chattel mortgages, executed by debtor in connection with those purchases, were not invalid for lack of prior commission approval of issuance thereof. While, in the broadest sense, such contracts and mortgages are evidences of indebtedness, they do not constitute "stocks, bonds, notes, or other evidence of indebtedness" within §§20a and 214 of the Interstate Commerce Act; moreover, since the mortgages and sales contracts in question do not exceed one million dollars, the commission's approval specifically is not required by §214 of that act.—In re Independent Truckers, Inc., 212 F. Supp. 402 (405-6)*.

Defendant's motion to dismiss action by stockholders and bondholders against former officers, directors, and accountants to recover for alleged improper statements or information in connection with sale of stock of regulated motor carrier, currently in reorganization under Chapter X of the Bankruptcy Act, is without merit and must be denied. While movants urge that the complaints present unusual and intricate problems of compliance or noncompliance with carrier accounting requirements imposed by the Interstate Commerce Commission, they do not seriously argue that ICC is empowered to grant the relief requested therein. Moreover, the ICC authorized issuance of the securities in question, millions of dollars worth were sold through the stock exchanges and, even as-

suming that ICC has the power to declare them void over two years later, it cannot be conceived that it would do so or, if it did, plaintiffs' remedies in the courts would be cut off thereby.—Fischer v. Kletz, 249 F. Supp. 539 (540-2).

And defendants' motion to stay the court actions under the doctrine of primary jurisdiction, pending reference to the ICC for resolution of certain factual matters, is denied. The complaints are based primarily on the Securities and Exchange Act and, from time immemorial, issues raised thereby have been passed upon by the courts; and the possible difficulty of resolution of any intricate or difficult accounting problems that may be raised, of course, is no bar to their determination by the court. The case does not involve transportation matters clearly within jurisdiction and expertise of the ICC, but is a case which essentially a claim for damages based on sales of securities as result of alleged fake and fraudulent statements. In such circumstances, the ICC could not make meaningful contributions to solutions of the problems posed; indeed, the relevant factors indicate that it would be an abuse of judicial discretion ro refer the issues to any administrative agency for resolution.—Id., pp. 542-4.

12. Sale of property.—[Vols. 15, 16, 17].—Motor carriers' assignment of their certificates of convenience and necessity to a loan association, for security purposes, was never recorded under Nebraska law, nor was notice of such assignment given to the Interstate Commerce Commission; equitable lien created by that assignment was not valid as against trustees in reorganization and in bankruptcy of the carrier corporations. Proceeds from sale of both certificates pursuant to orders of the court, which sales were approved by the commission, were allocated first to administrative expenses of reorganization and bankruptcy and priority wage claims, to be determined, then to county for personal property taxes, to chattel mortgagee, and then to the United States for its tax lien.—In re Independent Truckers, Inc., 226 F. Supp. 440 (442, 443, 447, 449)*.

115. Counsel; compensation.—[Vol. 17].—Firm which represented debtor for about 3 months following filing of involuntary petition in bankruptcy is entitled to allowance when it obtained an order authorizing debtor to continue operating and successfully resisted creditors' efforts to vacate it; though its vigorous efforts in contesting the involuntary petition were unsuccessful, the services were rendered on an emergency basis and were necessary to determination of debtor's status and what provisions of the Bankruptcy Act governed its reorganization.—In re Hudson & Manhattan R. Co., 224 F. Supp. 815 (842)*; since indenture trustee and its counsel were not volunteers in the reorganization, it was necessary that they keep informed of the proceedings and participate therein, and counsel is entitled to compensation for such services.—Id., p. 829; although counsel for bondholders' committee was unsuccessful in certain efforts in their behalf, the issue required resolution and allowance should be made for his services.—Id., p. 838.

Rate of compensation which trustee's special counsel would customarily charge to its firm's clients is not an applicable test for determining allowances in Chapter X reorganization; nor should compensation be paid to counsel for a bondholders' committee on basis of rates charged private clients; important criterion is the extent to which the estate benefited from those services.—Id., pp. 828, 834. And division of joint fee allowed to counsel who filed original petition and represented petitioning creditors is a matter for them to handle, not for the court to determine.—Id., p. 833. While the statute permits participation by a number of representatives of same class of security holders, allowances may not be made for duplicating services; the estate is to be charged only one fee for a particular service.—Id., pp. 831, 833, 835. Security holders' counsel are entitled to compensation only to extent that they contributed something of value to the plan or to the administration of debtor's estate; otherwise they should look to their clients for compensation.—Id., pp. 830-1, 838-40, 841-2.

ANTITRUST ACTS

Chapter 1.—Title 15

SHERMAN ACT

Section 1. Trusts, etc., in restraint of trade illegal; exception of resale agreements; penalty.—[Unchanged except that by act of July 7, 1955, "fine not exceeding $5,000" was changed to "fine not exceeding fifty thousand dollars." See vol. 4, p. 3032, vol. 11, p. 9756.]

Historical note, see vol. 4, p. 3032.

Notes of Decisions

Volume 4—p. 3033; Volume 7—p. 6024; Volume 10—p. 8395; Volume 11—p. 9756; Volume 12—p. 10568; Volume 13—p. 11206; Volume 14—p. 11715; Volume 15—p. 12332; Volume 16—p. 12983; Volume 17—p. 13696; Volume 18—p. 14772; Volume 19—p. 15999.

11. Purpose; interpretation generally.—[Vols. 4, 12, 13, 18, 19].—Joint efforts by railroads, railroad associations, and public relations firm to influence legislative and administrative action do not violate the Sherman Act, even when they are jointly made for the purpose of destroying or restricting competition. [Citing 365 US 127.]—Association of Western Rys. v. Riss & Co., 299 F. 2d 133 (135)*.

District Court erred in failing to accept verdict of the jury in civil anti-trust suit finding against five defendants and showing total amount of verdict as "none"; verdict plainly meant that five defendants had conspired and also that the conspiracy had not damaged plaintiff; it was not ambiguous. Gist of such civil anti-trust action is not merely the unlawful conspiracy but is damage to individual plaintiff proximately resulting from defendant's acts which constitute violation of the law. Judgments for all defendants should be entered.—Id., pp. 135-6.

Purpose of the Sherman Act is to preserve for industry free access to competitive markets and to prevent monopolies in restraint of trade.—Crawford Transport Co. v. Chrysler Corp., 338 F. 2d 934 (939)*.

Interruption of commerce arising out of a bona fide labor dispute does not come within the Sherman Act. Defendant railroads' strike insurance plan did not, or could not, place any restriction on commercial competition for any goods or services; thus the sine qua non of condemnation of the statute, "restraint on commercial competition," is totally lacking; complaint dismissed.—Kennedy v. Long Island R. Co., 211 F. Supp. 478 (489-91)*.

Congress did not intend to supplant penal provisions of the Sherman Act, or to relieve from liability any violators thereof, by enactment of §14 of the Clayton Act; to the contrary, it was the purpose of Congress to maintain all penal provisions of the Sherman Act in undiminished force; the Clayton Act was intended to supplement purpose and effect of the Sherman Act.—United States v. North American Van Lines, Inc., 202 F. Supp. 639 (642-4).

Principle of per se illegality is to be applied only to conduct which of necessity produces consequences violative of the statute under consideration, or which produces proscribed consequences in such an overwhelming proportion of cases that minute inquiry in every instance would be wasteful of judicial and administrative resources. Railroads' participation in considered strike insurance plan did not constitute a per se violation of the Antitrust Acts.—Kennedy v. Long Island R. Co., 319 F. 2d 366 (372-3)*.

18. Conspiracy to prevent transportation by others.—[Vols. 10, 11, 16-19].—If cheap rates are monopolistic or in restraint of trade, and

are the result of a combination or conspiracy among carriers, the Government has adequate civil and criminal remedies under the Antitrust Act.—Arrow Transp. Co. v. Southern Ry. Co., 308 F. 2d 181 (185)*.

When indictment, without qualification, charged each of four corporations, five of their officers, and a trade association, with engaging in a combination and conspiracy in unreasonable restraint of trade and commerce in transportation of household goods in violation of §§1 and 3 of the Sherman Act, individual defendants were subject to prosecution under that statute rather than under §14 of the Clayton Act. The Clayton Act supplements, but does not supplant penal provisions of, the Sherman Act; and where more than one statute is violated, the Government may elect to prosecute under either. A defendant cannot complain merely because charge against him is brought under statute carrying more serious penalties when two statutes punish the same general acts. Individual defendants' motion to dismiss as to them, denied.—United States v. North American Van Lines, Inc., 202 F. Supp. 639 (641-6).

Protestant water carrier has not sustained its allegation of conspiracy to eliminate it as a competitor for transcontinental canned-goods traffic; while general tenor of many statements in documents relied on indicates that rail respondents hoped by considered reduced rate to attract some of the traffic then moving by intercoastal water lines, those documents also show that there was considerable disagreement among respondents and between them and important shippers concerning measure of rate which would effect that purpose, and that shippers generally regarded the reduced rate as a step in restoring their market relationships prior to general increases; testimony of witnesses who wrote some of letters principally relied on refutes existence of any unlawful intent to destroy protestant, and one document indicates that Pacific coast respondents proposed the new rate in definite belief that it would not impair competitive position of the water carriers.—Canned Goods from Pacific Coast to Eastern Points, 315 I.C.C. 769 (793-4).

20. Limitation of application of act to interstate commerce.—[Vols. 4, 7, 19.]—Effect of considered restrictive convenant in lease of part of shopping center for a gasoline service center, which prohibits use of any other part of the shopping center for a gasoline station, and its enforcement on interstate commerce is incidental and inconsequential; hence, jurisdictional requirements of the Sherman Act are not met.—Savon Gas Stations No. 6, Inc. v. Shell Oil Co., 203 F. Supp. 529 (534).

28.—Stock control, directly or through holding company.—[Vol. 4].—See § 18, this title, n. 13.

.29.—Restraint of commerce, other than transportation.—[Vols. 4, 10, 12, 18, 19].—Defendant automobile manufacturer's plan for distribution of new automobiles to its dealers, whereby manufacturer selected carriers used to transport the cars, is not the type of tie-in sale that is judicially condemned as a violation of the Sherman Act. Defendant owned no transportation companies, had no financial interest in those it selected, did not attempt to invade or dominate the carriers' business, and made no permanent commitment to any carrier. While defendant benefited financially to the extent of its substantial savings in the cost of transportation, it received no direct profits from the selected carriers. Absent any purpose to create or maintain a monopoly, the statute does not restrict the right of a trader or manufacturer engaged in private business to exercise freely his independent discretion as to parties with whom he will deal. See 250 US 300.—Crawford Transport Co. v. Chrysler Corp., 338 F. 2d 934 (938-9)*.

40. Enforcement of section; authority of Interstate Commerce Commission.—[Vols. 4, 13, 15, 16, 19].—When a charge of violations of antitrust laws involves issues within jurisdiction of an administrative agency such as Interstate Commerce Commission, a court will not adjudicate such charges until the issues have been passed on by the agency.—American Com'l Barge Line Co. v. Eastern Gas & Fuel Ass'n, 204 F. Supp. 451 (453).

The commission has no jurisdiction over shipper claims based on antitrust violations.—Copps v. Alabama G.S.R. Co., 319 I.C.C. 192 (196); nor does it have power to find violations, as such, of the antitrust laws

in respect of monopoly, restraint of trade, or price fixing.—Tennessee Products & Chem. Corp. v. Louisville & N.R., 319 I.C.C. 497 (507).

Section 2,3. [Unchanged except that in both sections the phrase "fine not exceeding $5,000" by act of July 7, 1955, was changed to "fine not exceeding fifty thousands dollars." See vol. 4, pp. 3046-3047.]

Notes of Decisions

§2: Volume 4—p. 3046; Volume 12—p. 10569; Volume 13—p. 11207; Volume 14—p. 11716; Volume 15—p. 12333; Volume 18—p. 14725; Volume 19—p. 16005.

§3: Volume 7—p. 6025.

2. Particular monopolies.—[Vols. 4, 12-15, 18, 19].—Agreement between defendant automobile manufacturer and its dealers (under which manufacturer had sole power to select carriers used to transport new cars to dealers) and manufacturer's adoption of a new plan of distribution, which reduced number of motor carriers to be used from about 80 to 16, did not constitute any contract, combination or conspiracy in restraint of trade; nor did the distribution plan in issue constitute an attempt on manufacturer's part, acting alone or in combination with defendant carrier or any other selected carrier, to monopolize the business of the transportation of new automobiles. Defendant's decision to reduce number of motor carriers to whom it would tender traffic was made for the sole purpose of obtaining economical and efficient distribution of its products; and record contains no evidence of usurpation by the manufacturer of the Interstate Commerce Commission's authority over rates charged and areas served by interstate carriers.—Crawford Transport Co. v. Chrysler Corp., 338 F. 2d 934 (940)*.

Since tariff naming unit train rates on coal concerns an annual volume exceeding present consumption at consignee's electric generating station, consignee has contracted with one producer on a 10-year basis. But though complainant alleges monopolization of the market at that plant, in violation of antitrust policies, as result of favored treatment by defendant, no direct harm to any specific coal shipper is shown, nor any unlawful discrimination or preference by defendant. That the unit train rates provide such stability of transportation as to influence a shipper and a receiver in reaching a 10-year agreement for supplying steam coal cannot be considered creation of a monopoly by defendant. Moreover, in the case of public utilities the assurance of a steady and ample supply of fuel is necessary in the public interest (citing 365 US 320).—Natural Gas Pipeline Co. of America v. N.Y.C. R. Co., 323 I.C.C. 75 (82).

Section 4. Jurisdiction of courts; duty of district attorneys; procedure.—[Unchanged. See vol. 4, p. 3048.]

Historical note, seel vol, 4, p. 3048.

Notes of Decisions

Volume 4—p. 3048; Volume 7—p. 6026; Volume 11—p. 9756; Volume 12—p. 10570; Volume 13—p. 11208; Volume 17—p. 13697; Volume 18—14726.

10. Sufficiency of bill or petition.—[Vols. 4, 13, 17].—Indictment charging each of four corporations, five of their officers, and a trade association with engaging in a combination and conspiracy in violation of §§1 and 3 of the Sherman Act, and not drawn so as to limit charges against individual defendants to acts committed solely as corporate officers, is accepted as written for purposes of individual defendants' motion for dismissal as to them. Individuals suggest that the United States be

required to furnish a bill of particulars stating each act and capacity in which each is claimed so to have acted, however, bills of particulars and statements of parties should not be considered as part of an indictment, or as a substitute therefor or amendment thereto, and can neither weaken the indictment nor change the crime charged.—United States v. North American Van Lines, Inc., 202 F. Supp. 639 (641-2).

Section 5-7. Bringing in additional parties; Forfeiture of property in transit; "Person" defined.—[Unchanged, See vol. 4, pp. 3055, 3056.]

Historical notes, see vol. 4, pp. 3032, 3055, 3056.

Notes of Decisions

§6: Volume 4—p. 3055.

CLAYTON ACT

Section 12. Words defined.—[Unchanged. See vol. 4, p. 3057.]

Historical note, see vol. 4, p. 3057.

Notes of Decisions

Volume 4—p. 3058; Volume 19—p. 16006.

2. Purpose.—[Vols. 4, 19].—The Clayton Act was intended to supplement the purpose and effect of other antitrust legislation, principally the Sherman Act; Congress did not intended by §14 of the Clayton Act to supplant the penal provisions of the Sherman Act or to relieve from liability any violators thereof. To the contrary, legislative history of §14 makes it plain that it was the purpose of Congress to maintain all penal provisions of the Sherman Act in undiminished force.—United States v. North American Van Lines, Inc., 202 F. Supp. 639 (642-4).

Sections 13-17.—[Unchanged. Editorial comment, see vol. 4, p. 3059.]

Section 18. Acquisition by one corporation of stock of another.—[Unchanged. See vol. 15, p. 12334.]

Notes of Decisions

Volume 4—p. 3061; Volume 7—p. 6028; Volume 10—p. 8397; Volume 12—p. 10570; Volume 15—p. 12335; Volume 17—p. 13698; Volume 18—p. 14726.

13. Stock acquisition prohibited.—[Vols. 4, 7, 10].—When plaintiff sold short 400 shares of stock of Central of Georgia during a period ending some 16 months prior to the time defendant began acquiring stock of that carrier, there was no causal connection between defendant's action and any losses plaintiff sustained in covering his short sales, and it need not be determined whether defendant by its stock purchases violated any of the antitrust

laws; even if it were so held, plaintiff has not established that he was injured in his business or property by reason of anything forbidden in the antitrust laws, with a resultant damage proximately caused thereby.—Goldsmith v. St. Louis—S.F. Ry. Co., 201 F. Supp. 867 (870).

Section 19. Interlocking directorates and officers. [Editorial comment, vol. 4, p. 3065; vol. 15, p. 12335.]

See Historical note to §21, infra.

Section 20. Purchases by common carriers in the case of interlocking directors, etc.—[Unchanged. See vol. 4, p. 3067.]

Historical note, see vol. 4, p. 3068, vol. 18, p. 14727.

Notes of Decisions

Volume 4—p. 3068; Volume 7—p. 6033; Volume 10—p. 8398; Volume 12—p. 10571; Volume 16—p. 12984; Volume 17—p. 13698; Volume 19—p. 16007.

1. In general.—[Vols. 4, 7, 10, 12, 17, 19].—A criminal statute is to be strictly construed, and fact that a particular activity may be within same general classification and policy of those covered does not bring it within ambit of the criminal prohibition. In criminal proceeding against railroad and its officers for violation of §10 of the Clayton Act, by participating in sale of railroad coaches, without competitive bidding, to another corporation in which they had "substantial interest," strict construction of words "substantial interest in," as used in the statute, presupposes either an existing investment in the purchasing corporation, or its creation by the individual defendants for their use, or a joint venture or continued course of dealings, licit or illicit, with the corporation for profit sharing.—United States v. Boston & M.R. Co., 380 U.S. 157 (158-60, 162)*.

Section 10 of the Clayton Act is not strictly a conflict-of-interest statute; it was described in 361 US 173 as "an antitrust law," and indeed has its roots in a message by President Wilson to Congress on the subject of "trusts." While bribery (which the indictment, in light of the bill of particulars, in effect charges) might well be within the family of offenses covered by a conflict of interest law, it is more remote from an antitrust frame of reference; §10 is a narrow prohibition applicable to activity within the antitrust philosophy, and cannot be broadened to include present case. Since an amended bill of particulars may be filed, and allowed by the District Court, case is vacated and remanded, leaving open all questions except construction of the statute.—Id., pp. 160-2.

In absence of any interlocking directors, alleged understanding and concert of action among individual and corporate defendants, and others, for purpose of producing profits for defendants from dealings in property acquired from Boston & M. R. without competitive bidding, was not within "any substantial interest" as used in the statute. The statute is limited to one who has a then present legal interest in the buying corporation; it does not include one whose only interest is in the outcome of what may have been an illegal and illicit plan to siphon off for his personal benefit property of the railroad through the medium of the corporation.—United States v. Boston & M. R., 225 F. Supp. 577 (578)*.

Regulations of the Commission

29 FR 15493, Nov. 19, 1964, Part 8: Competitive Bids, §8.1 Specifications, form of proposal and contract; publication of request for bids; variation from the generally accepted procedure. New paragraph (c) added, effective on date of order.

30 FR 8847, July 14, 1965, Part 8: Competitive Bids, §8.5 Examination, last sentence of section revised, effective on date of order.

Section 21. [*§11 as enacted.*] Enforcement provisions; procedure.—[Unchanged. See vol. 18, p. 14727.]

Historical notes, see vol. 18, p. 14732.

Historical Note

The commission renews its recommendation for amendment of various provisions of the Clayton Antitrust Act and the Federal Trade Commission Act, and the exemptions therein, so as to make them applicable to contract carriers as well as common carriers subject to the Interstate Commerce Act; and to increase the limitation on the exemption from competitive bidding in §10 of the Clayton Act to a more realistic figure in light of present day costs of doing business.—Annual Report, 1959, p. 167.

Notes of Decisions

Volume 4—p. 3072; Volume 7—p. 6034; Volume 10—p. 8399; Volume 18—p. 14732; Volume 19—p. 16008.

3. Jurisdiction of Federal Trade and Interstate Commerce Commissions, as to carriers.—[Vols. 4, 7, 19].—In amending the Clayton Act in 1950, Congress did not repeal the provisions of §11 vesting authority in the commission to enforce compliance with certain provisions of that act where applicable to common carriers subject to Interstate Commerce Act. But though, while §11 of the Clayton Act remains on the books, it would presumably authorize the commission to require divestiture of control effected without prior commission approval, in violation of §7 of that act, as an alternative remedy to ordering divestiture under §5(7) of ICA, §11 cannot be read so as to require enforcement of provisions of §7 when an application for commission authorization is before the commission under §5(2) of ICA. And recent Supreme Court decisions confirm the view that an exemption such as is afforded by §5(2) of ICA. And recent Supreme Court decisions confirm the view that an exemption such as is afforded by §5(11) of ICA cuts across the antitrust laws and avoids necessity of their enforcement by the agency exercising regulatory jurisdiction.—Seaboard Air Line R. Co.—Merger—Atlantic Coast Line, 320 I.C.C. 122 (133, 134)*.

Sections 24, 25. Liability of directors and agents; restraining violations.—[Unchanged. See vol. 4. p. 3074.]

Historical notes, see vol. 4, p. 3057.

Notes of Decisions

§24: Volume 4—p. 3074.

Section 26. Injunctive relief for private parties; exception.—[Unchanged. See vol. 4, p. 3076; vol. 11, p. 9757.]

Historical notes, see vol. 4, pp. 3057, 3076.

Notes of Decisions

Volume 4—p. 3076; Volume 7—p. 6037; Volume 10—p. 8400; Volume 13—p. 11209; Volume 16—p. 12985; Volume 17—p. 13699.

5. Proviso as to injunctive relief against carriers.—[Vols. 4, 7, 10, 16, 17].—Under §16 of the Clayton Act jurisdiction of the commission does not delimit jurisdiction of the federal courts to restrain violation of the Sherman Act; it affects only the capacity of a private party to maintain a suit to restrain violations; its purpose is to preclude any interference by injunction with any business of interstate carriers of sufficient public significance and importance to be within the jurisdiction of the commission, except when the suit is brought by the Government.—Arrow Transp. Co. v. Southern Ry. Co., 308 F. 2d 181 (185)*.

A private litigant cannot properly bring an action under §16 of Clayton Act for divestiture of assets allegedly acquired in violation of the antitrust laws.—American Com'l Barge Line Co. v. Eastern Gas & Fuel Ass'n, 204 F. Supp. 451 (453).

Section 27. Effect of partial invalidity.—[Unchanged. See vol. 4, p. 3082, vol. 11, p. 9758.]

Historical note, see vol. 4, p. 3082.

PANAMA CANAL ACT

Section 31. [Unchanged. See vol. 4, p. 3083, vol. 11, p. 9758.]

FEDERAL TRADE COMMISSION ACT

Sections 45, 46. Unfair methods of competition unlawful, etc.

Historical note, see vol. 18. p. 14733:

Section 51. [Unchanged. See vol. 4, p. 3084]

Chapter 6.—STANDARD TIME ACT

Section 261. Zones for standard time.—[Unchanged. See vol. 4, p. 3085.]

Historical notes, see vol. 4, p. 3085; vol. 11, p. 9758; vol. 12, p. 10571; vol. 13, p. 11210; vol. 14, p. 11717; vol. 15, p. 12340; vol. 19, p. 16008.

Notes of Decisions

Volume 4—p. 3086; Volume 7—p. 6040; Volume 10—p. 8402; Volume 11—p. 9758; Volume 12—p. 10572; Volume 14—p. 11718; Volume 15—p. 12340; Volume 17—p. 13699; Volume 19—p. 16009.

Historical Notes

The commission recommends that the scope of the Standard Time Act be broadened by amending it to provide that the time of the zone shall be the exclusive measure of time for all purposes, with certain possible exceptions, and by adding more definite standards and provisions for administration and enforcement. In any event, it is further recommended that there be a thorough survey for purpose of determining whether the commission is the most appropriate agency to fix limits of the zones or to administer provisions of any such statute.—Annual Report, 1962, pp. 151, 198; renewed, Annual Report, 1963, p. 18.

The commission recommends establishment of a uniform system of time standards and measurement for the United States; that observance of such standards be required for all purposes; that the question of whether the commission is the most appro-

priate agency to administer any future law relating to standard time be carefully considered; and that, in the event the present Standard Time Act (15 USC §§261-264) is not amended so as to provide for more efficient and effective time regulation, the commission be relieved of responsibility for its administration.—Annual Report, 1964, p. 73.

6. Boundary lines between zones.—[Vols. 4, 19].—In drafting time zone boundaries, natural and well-defined boundaries have been used so far as possible. Existing boundary between central and mountain zones in South Dakota, which has been observed for over 40 years, for most of its length follows the Missouri River, an ideal natural boundary.—Standard Time Zone Investigation, 319 I.C.C. 529 (533)*.

7. Modifications in zone boundaries.—[Vols. 4, 19].—Extension of Federal time zones is not warranted solely because business of an area properly in one zone has close relations with enterprises located in another; fixing of time standards cannot be based on the narrow concept of the commercial life of a single community or of a relatively limited area, when a much greater overall territory would be affected.—Standard Time Zone Investigation, 319 I.C.C. 529 (532)*.

9.—Between central and mountain zones.—[Vols. 4, 7].—Interests of western South Dakota are predominantly agricultural, apparently best suited to mountain time schedule as shown by experience, and proposed inclusion of entire State in central time zone is supported by a single municipality and by only 2 of 22 counties that would be affected. Widespread local opposition to proposed change more nearly represents majority sentiment of the area as a whole, and adherence of its people to mountain time for over 40 years raises strong presumption that such time results in greater convenience for commerce of the locality than would requested change to central time. Petitions for modification of present boundary, denied.—Standard Time Zone Investigation, 319 I.C.C. 529 (532-3)*.

Section 262. Duty to observe standard time zones.—[Unchanged. See vol. 4, p. 3088, vol. 11, p. 9758.]

Notes of Decisions

Volume 4—p. 3088; Volume 10—p. 8404; Volume 14—p. 11718; Volume 15—p. 12341; Volume 19—p. 16013.

Notes of Decisions

(Former §383): Volume 4—p. 3099; Volume 7—p. 6072; Volume 10—p. 8419; Volume 11—p. 9763; Volume 13—p. 11212; (Former §835); Volume 14—p. 11724; Volume 15—p. 12843; Volume 16—p. 12987; Volume 17—p. 13701; Volume 18—p. 14734; Volume 19—p. 16017.

Cross Reference

Section 103(g) of the National Traffic and Motor Vehicle Safety Act of 1966, Pub. Law 89-563, 80 Stat. 720, provides that the commission, in prescribing safety regulations covering motor vehicles subject to the Transportation of Explosives Act, shall not adopt or continue in effect any safety regulation which differs from a motor vehicle safety standard issued by the Secretary of Commerce under Title I thereof, except that the commission is not prohibited from prescribing for such a vehicle a safety regulation which imposes a higher standard of performance subsequent to its manufacture than that required by the applicable Federal standard at the time of tis manufacture.

3. Force and effect of Commission's regulations.—[Vols. 4, 7, 13, 17, 18].—In criminal prosecution involving alleged violation of the commission's regulations for the transportation of explosives, considered regulations lack the clarity required of a criminal statute, i.e., "must be sufficiently definite to give notice of the required conduct to one who would avoid its penalties, and to guide the judge in its application and the lawyer defending one charged with its violation." Vagueness and ambiguity of the regulations preclude a finding that defendant railroad "knowingly" violated them as required by the statute; judgment of acquittal allowed.—United States v. Seaboard Air Line R. Co., 225 F. Supp. 38 (41).

12. Violations; penalties.—[Vols. 17,

19.]—In criminal prosecution of railroad for violation of the commission's regulations for the transportation of explosives, specifically the paragraph designating the proper position in a train of cars placarded "Explosives," it must be shown that defendant knew the regulations required placarded cars to be placed at least six cars behind the engine and yet voluntarily and purposely violated such requirement, or that it wilfully neglected to ascertain the requirements. And fact that defendant was familiar with the regulations as written does not mean that it was guilty of "wilfull neglect" in failing to ascertain their meaning, as interpreted by the Government, when the regulations lack the clarity required of criminal statutes and are susceptible of different constructions. In the circumstances, it cannot be found that defendant "knowingly" violated the regulations; motion for judgment of acquittal allowed.—United States v. Seaboard Air Line R. Co., 225 F. Supp. 38 (41-2).

15. Motor-vehicle transportation.—[Vols. 10, 11, 14-17, 19].—Though quasi-expert testimony was presented that nitro carbo nitrate and ammonium nitrate carbonate mixtures are the same thing, the commission's regulations permit bulk transportation of the latter (subject to certain loading requirements), but not of the former, and it cannot be inferred that the regulations would permit bulk transportation of a commodity by one name but not another, if in fact it had the same chemical structure under both. Accordingly, official notice is taken of definition of the latter by U.S. Interagency Committee on hazards of transporting ammonium nitrate, and of NCN in note to §73.182(a)(1) of the regulations, which show that they are entirely different commodities. Therefore, under the regulations, motor carriers may not transport NCN in bulk, but may transport bulk shipments of ammonium nitrate, in closed vehicles with wooden floors and sides, or in all-metal open vehicles.—Monkem Co., Inc., Extension, 94 M.C.C. 749 (756-8).

Applicant's description of shipments of ammonium nitrate as merely "fertilizer" when the explosives regulations require specific identification of the commodities therein enumerated is an inexcusable violation of the act.—Id., p. 755.

Regulations of the Commission

27 FR 3425, Apr. 11, 1962, Parts 71-78: Explosives and Other Dangerous Articles, miscellaneous amendments to regulations, effective June 27, 1962.

27 FR 6735, July 17, 1962, Parts 71-78: Explosives and Other Dangerous Articles, miscellaneous amendments, effective Oct. 3, 1962.

27 FR 11849, Dec. 1, 1962, Parts 71-78: explosives and Other Dangerous Articles, miscellaneous amendments, effective Feb. 17, 1963.

28 FR 4495, May 4, 1963, Parts 71-78: Explosives and Other Dangerous Articles, miscellaneous amendments to the regulations, effective July 24, 1963.

28 FR 13265, Dec. 6, 1963, Part 77: Shipments Made by Way of Common, Contract, or Private Carriers by Public Highways, §77.824 Retesting of cargo tanks, amended by deleting present paragraph (d) and adopting new paragraph (d).

28 FR 14504, Dec. 31, 1963, Parts 71-78: Explosives and Other Dangerous Articles, miscellaneous amendments to the regulations, effective March 18, 1964.

29 FR 3401, Mar. 14, 1964, Part 77: Shipments Made by Way of Common, Contract, or Private Carriers by Public Highway, §77.824 Retesting of cargo tanks. (d) Compressed gas cargo tanks, spec. MC-330, amended to read as set out, effective on date of order.

29 FR 5375, April 22, 1964, Parts 71-78: Explosives and Other Dangerous Articles, miscellaneous amendments, effective July 4, 1964.

29 FR 10431, July 28, 1964, Parts 71-78: Explosives and Other Dangerous Articles, miscellaneous amendments, effective Oct. 12, 1964.

29 FR 12588, Sept. 4, 1964, Part 77: Shipments [explosives] Made by Way of Common, Contract, or Private Carriers by Public Highway, §77.824 Retesting of cargo tanks, paragraph (d)(1) amended, effective on date of order.

29 FR 12776, Sept. 10, 1964, Part 77: Explosives, §77.824 Retesting cargo tanks, corrected amendment of paragraph (d)(1).

29 FR 13428, Sept. 29, 1964, Part 77: Explosives, §77.824 Restesting cargo tanks, paragraphs (d)(1) and (d)(4)(i) amended to read as set forth, effective on date of order.

29 FR 13927, Oct. 9, 1964, Parts 71-78: Explosives and Other Dangerous Articles, miscellaneous amendments, effective Dec. 19, 1964.

29 FR 14118, Oct. 14, 1964, Part 73: Explosives, corrections of order appearing at 29 FR 13927.

29 FR 13997, Oct. 10, 1964, Parts 71-78: Explosives and Other Dangerous Articles, miscellaneous amendments, effective

Dec. 19, 1964.

29 FR 14406, Oct. 20, 1964, Part 79: Specifications for Tank Cars, corrections of order published at 29 FR 13997.

29 FR 14495, Oct. 22, 1964, Part 79: Specifications for Tank Cars, paragraph (a) of §79.500-7 (29 FR 13997) corrected.

29 FR 18652, Dec. 29, 1964, Parts 71-90: Explosives and Other Dangerous Articles, regulations revised and republished in entirety, because of the numerous amendments, for convenience.

30 FR 579, Jan. 16, 1965, Part 78: Shipping Container Specifications, §78.337 Specification MC 331 (steel cargo tanks for compressed gas) through §78.337-18, added; applicable to all such tanks constructed after Sept. 1, 1965.

30 FR 5742, Apr. 23, 1965, Parts 71-79: Explosives and Other Dangerous Articles, miscellaneous amendments, effective July 7, 1965.

30 FR 7419, June 5, 1965, Parts 71-79: Explosives and Other Dangerous Articles, miscellaneous amendments, effective Aug. 22, 1965.

30 FR 8588, July 7, 1965, Parts 71-79: Explosives and Other Dangerous Articles, miscellaneous amendments, effective on date of order.

30 FR 8588, July 7, 1965, Parts 71-79: Explosives and Other Dangerous Articles, §73.22 Specification containers prescribed, paragraph (a)(1) amended, effective 5 days after date of order.

30 FR 13936, Nov. 4, 1965, Parts 73 and 77: Miscellaneous Amendments to regulations applying to transportation of Explosives and Other Dangerous Articles by private motor carriers.

31 FR 537, Jan. 15, 1966, Part 77: Transportation and explosives by private motor carriers, effective date of order of Oct. 21, 1965 (30 FR 13936) postponed until further order.

31 FR 2950, Feb. 19, 1966, Part 77: Shipments Made by Way of Common, Contract, or Private Carriers by Public Highways, §77.823 Required exterior marking on motor vehicles and combinations, amended entire §77.823 (29 FR 18799, Dec. 29, 1964), effective Sept. 1, 1966.

31 FR 6492, Apr. 29, 1966, Parts 71-79: Explosives and other Dangerous Articles, miscellaneous amendments, pertaining to radioactive materials; and also setting forth, for clarification, relationship between A.E.C., B of E. (AAR), and the Commission concerning transportation thereof. Special Permits issued prior to Apr. 1, 1966 under §73.22(a)(1) for transportation of radioactive materials, terminated. Effective July 12, 1966.

31 FR 9067, July 1, 1966, Parts 71-79: Explosives and other Dangerous Articles, miscellaneous amendments, pertaining to regulations governing the transportation of explosives and other dangerous articles, amended as set forth, effective July 1, 1966.

31 FR 9676, July 16, 1966, Parts 71-79: Explosives and other Dangerous Articles, miscellaneous amendments, corrects (31 FR 9067) as set forth, effective on date of order.

31 FR 6591, May 3, 1966, Parts 71-79: Explosives and other Dangerous Articles, miscellaneous amendments, corrects (31 FR 6422) as set forth, effective on date of order.

31 FR 6422 April 28, 1966. Parts 71-79: Explosives and other Dangerous Articles, miscellaneous amendments, amended as set forth, effective July 12, 1966.

31 FR 10531, Aug. 5, 1966, Part 77: Shipments Made by Way of Common, Contract, or Private Carriers by Public Highways; postponement of effective date of order (31 FR 2950).

31 FR 11549, Sep. 1, 1966, Part 77: Shipments Made by Way of Common, Contract, or Private Carriers by Public Highways; §77.823 Required Exterior Marking on Motor Vehicles and Combinations, revised, effective Jan. 1, 1967.

31 FR 11756, Sep. 8, 1966, Parts 71-79: Explosives and Other Dangerous Articles, Postponement of effective date of order (31 FR 9067) only insofar as the amendments to §§73.22(a) and 73.315(b) stayed pending disposition of the matter, effective date of order No. 71, dated 6-6-1966, remains as 9-5-66.

31 FR 16495, Dec. 24, 1966, Parts 71-79: Explosives and Other Dangerous Articles, effective date of order of Dec. 15, 1966 (31 FR 16318) regarding transportation of dangerous commodities by motor carriers, postponed until March 1, 1967.

32 FR 6, Jan. 4, 1967, Part 73: Shippers, miscellaneous amendments, §73.22 Specification containers prescribed, paragraph (a) amended and §73.315 Compressed gases in cargo tanks and portable tank containers, amended by addition of new paragraph (b)(1), effective 30 days after date of service.

32 FR 413, Jan. 14, 1967, Part 73: Shippers, §73.22(a) amended to correct typographical errors, and 73.315 amended by addition thereto of paragraph (b)(1), effective Jan. 28, 1967.

32 FR 1180, Feb. 2, 1967, Part 73: Shippers, ffective date of order of Dec. 21, 1966 (32 FR 413) postponed from Jan. 28, 1967 until March 1, 1967.

32 FR 2818, Feb. 11, 1967. Part 77: Shipments Made By Way of Common, Contract, or By Private Carriers By Public Highway, Subpart F—Regulations Applying to Transportation of Explosives and Other Dangerous Articles by Private Motor Carriers (30 FR 13936), as revised, cancelled and new Subpart F substituted in lieu thereof, effective May 1, 1967.

32 FR 3452, March 2, 1967, Parts 71-90: Explosives and Other Dangerous Articles, miscellaneous amendments, effective May 14, 1967.

32 FR 4360, Mch. 22, 1967, Part 77: Shipments Made By Way of Common, Contract, or Private Carriers By Public Highway, Subpart F — Regulations applying to transportation of Explosives and Other Dangerous Articles by private motor carriers, petition for modification of effective date in order of Jan. 12, 1967 (32 FR 2818) as to §77.875 and 77.876, denied.

32 FR 5273, Mch. 29, 1967, Parts 71-90: Explosives and Other Dangerous Articles, miscellaneous amendments, effective June 14, 1967.

NOTE: For recodification, see 49 CFR, Editorial Note, 32 FR 5606, April 5, 1967.

THE SUPREME COURT

Chapter 81.—Title 28

Section 1253. Direct appeals from decisions of three-judge courts.—[Unchanged. See vol. 14, p. 11727.]

Notes of Decisions

Volume 15—p. 12345; Volume 19—p. 16020.

1. Direct appeal to Supreme Court.—[Vols. 4, 7, 10, 19].—On direct appeal from decision of three-judge court upholding the commission's grant of certificate to supply deficiencies in service resulting from refusal of trunk-line motor carriers to interchange with applicant's carrier stockholders because of "hot cargo" clauses in their union contracts, the Supreme Court took jurisdiction because of important questions raised as to relationship between remedies available under Interstate Commerce Act and under Labor Management Relations Act.—Burlington Truck Lines, Inc. v. United States, 371 U.S. 156 (158-161)*.

Over a year before the district court sustained the commission's action the Labor Management Relations Act was amended by addition of §8(e), the plain language of which raised serious questions as to legality of direct union-employer agreements to boycott another employer; the district court erred in declining to consider effect of the new law in absence of authoritative judicial interpretation. Under that amendment the pressures which

generated the trunkline carriers' unwillingness to serve might be effectively removed; these intervening facts so changed the complexion of the case that the reviewing equity court should, in exercise of its sound discretion, have remanded it to the commission for further consideration in light of the changed conditions. Case remanded to the district court with direction to remand to the commission for further proceedings consistent with the Court's opinion.—Id., pp. 171-2, 174.

The Supreme Court has jurisdiction of a case, on direct appeal from a district court, if it was one required to be heard and determined by a three-judge district court. Since question, squarely raised by the issue as finally joined, of whether State regulatory scheme is unconstitutional because it burdens the exercise by the United States of its power to maintain a civilian service and carry out other constitutional functions is a substantial one, a three-judge court was required for its adjudication. There being a direct conflict between State law and provisions of the Constitution, there is a clear case for convening a three-judge court; once convened, the case may be disposed of below or in the Supreme Court on any ground, whether or not it would have justified the calling of a three-judge court.—United States v. Georgia Public Service Commission, 371 U.S. 285 (287)*.

Notes of Decisions

Volume 15—p. 12345; Volume 16—p. 12989; Volume 17—p. 13704; Volume 18—p. 14735; Volume 1—p. 16021.

COURTS OF APPEALS

Chapter 83.—Title 28

Section 1291. Final decisions of district courts.—[Unchanged. See vol. 18, p. 14736.]

Section 1292. Interlocutory decisions.—[Unchanged. See vol. 18, p. 14736.]

Notes of Decisions

Volume 14—p. 11728; Volume 15—p. 12345; Volume 16—p. 12889; Volume 17—p. 13704; Volume 18—p. 14737; Volume 19—p. 16021.

1. Appeals to Court of Appeals.—[Vols. 7, 10, 13-19].—Function of the court, on appeal of shipper's action to set aside and annul order of the Interstate Commerce Commission, is limited to determination of whether the commission's order was supported by substantial evidence and correctly applied the law; decision of the commission that rail rates charged on plaintiff's shipments were applicable, sustained.—General Motors Corp. v. United States, 299 F. 2d 233 (234-6)*.

While the district court gave no reasons for entering order dismissing "complaint" seeking review of a declaratory order of the commission as to applicability during certain periods of rates published on household goods in

certain tariffs, the order of dismissal is treated as a final appealable order. Where a plaintiff prosecutes an appeal from an order of dismissal of the complaint, he thereby elects to stand on the complaint and waives any right to request leave to amend.—National Van Lines, Inc. v. United States, 326 F. 2d 362 (366)*.

Since suit for an injunction against operation of motor carrier "driveaway" service without interstate authority was brought by the Interstate Commerce Commission rather than the United States, the appeal from the district court's dismissal of the complaint was properly taken to the Court of Appeals and not to the Supreme Court under 49 USC §45.—I.C.C. v. AAA Con Drivers Exchange, Inc., 340 F. 2d 820 (821, note)*.

Inasmuch as order denying motion to stay all proceedings in suit seeking an injunction and damages is not a final decision under §1291, it is appealable, if at all, only as an interlocutory order refusing an injunction under §1292; and an order staying or refusing to stay District Court proceedings is appealable as an interlocutory injunction only if the action in which it was made is essentially an action at law and the stay is sought to permit prior determination of some related equitable matter. The suit for injunctive relief is essentially equitable in nature, even though an award of damages is also sought; equitable injunction includes the power to provide complete relief in light of the statutory purpose; considered order denying motion to stay is not appealable.—Ephraim Freightways, Inc. v. Red Ball Motor Freight, Inc., 376 F. 2d 40 (41)*.

DISTRICT COURTS; JURISDICTION

Chapter 85.—Title 28

Section 1331. Federal question; amount in controversy; costs.—[Unchanged. See vol. 18, p. 14737.]

Notes of Decisions

Volume 16—p. 12990; Volume 17—p. 13704; Volume 18—p. 14738; Volume 19—p. 16022.

1. Federal questions, generally.—[Vols. 16, 17, 19].—Federal District court had jurisdiction in action by lessor and lessee railroads and their officers and employees for declaratory judgment that suit brought against them in State court by appellee city was for purpose of suspending and annulling Interstate Commerce Commission's order which approved their lease application. The case is Federal, for purpose of jurisdiction, since, the least contract having been authorized by the commission pursuant to 49 U.S.C. §5(2)—and without such authorization it would have no validity—it involves the commission's statutory power to authorize and give validity to provision thereof which, in accordance with commission decision and order, relieved the railroads from obligation to maintain offices and shops at any particular place, including appellee city, now claimed by the city to exceed the power that Congress granted to the commission. Following the decision in 328 F. 2d 720, lower court's conclusion that there was no federal jurisdiction, and its dismissal of the complaint, reversed and remanded.—St. Louis S. W. Ry. Co. v. City of Tyler, Texas, 375 F. 2d 938 (940-2).

The jurisdiction of federal courts lies within the power of Congress to regulate: if Congress has given the district court power to entertain jurisdiction, it may do so, but not otherwise. Courts created by statute can have no jurisdiction but such as the statute confers; unless a statutory basis for jurisdiction exists, persons have no right to proceed, or be proceeded against, in the first instance in a federal rather than a state court. Where there is no diversity of citizenship of the parties, the major category of cases which the federal courts have authority to hear is that involving "federal questions" arising under the Constitution, laws, and treaties of the United States;

and merely making the United States an additional party to an otherwise private suit neither creates diversity of citizenship nor imports a federal question.—McFaddin Exp., Inc. v. Adley Corp., 240 F. Supp. 791 (794, 797)*.

For federal-question jurisdiction to exist, a controverted question of federal law must form a substantial part of the plaintiff's case; but in seeking remedies for alleged breaches of stock-purchase and management contracts plaintiffs' complaint is based, in all its essential features, on contracts negotiated at arms' length in the open market, which owed nothing to federal legislation, and every question raised depends for decision on conventional common-law concepts applicable in suits to enforce purely private rights. While in construing the contracts it might be expedient or even necessary to refer to or consult the statutes upon which the parties' applications to merge and to temporarily operate plaintiff carrier's business were based, that does not make the case one of federal cognizance; neither the cause of action nor the defense is founded on a law of the United States in any such sense as to bring the suit within jurisdiction of the federal courts.—Id., pp. 794-5.

Any effect of the management contract attached to the application for temporary control authority was merely to corroborate applicants' representations as to completeness of the control being conferred. The legal requirements for ICC approval are grounded in the purposes underlying the whole statutory scheme for regulation of interstate motor freight transportation, as affecting not only carrier-shipper relations but also the general public interest in adequate nondiscriminatory transportation at reasonable rates. The commission's concern with any possible effect of the contracts, other than as basis for temporary permission for defendant's control of plaintiff carrier, was completely divorced from any concern the parties to the contracts might have inter sese. The commission's function, under the order granting temporary control authority, was only to enforce compliance with its rules and regulations, not to enforce either the management contract or the stock-purchase contract; and no violation of any ICC regulation is alleged. As no federal question is presented, complaint is dismissed without prejudice.—Id., pp. 795, 796.

The test of federal jurisdiction, whether asserted under the federal question or the commerce and antitrust section of the jurisdiction statutes, is that it must appear from the complaint that the construction of a federal statute will have an adverse effect on the right of recovery if construed in one, rather than another, way.—Florida East Coast Ry. Co. v. Jacksonville Terminal Co., 328 F. 2d 720 (722)*.

Federal court has jurisdiction in action for breach of contract for joint ownership and management of defendant railroad terminal company when a specific contract for joint ownership of the terminal had been approved by the Interstate Commerce Commission, the contract contained express provisions dealing with management personnel, and the complaint specifically alleges a breach of that contract touching upon management personnel. The contract, which was authorized by federal statute and made legal only because of such statute, may be construed by the federal court upon plaintiff's application.—Id., p. 722.

4. Suits arising under the Constitution or laws of the United States.—[Vols. 18-19].—Survival of a judicial remedy under the saving clause of §216(j) of Interstate Commerce Act does not depend on whether the commission has primary jurisdiction to decide the basic question on which relief depends. The doctrine of primary jurisdiction is designed to apply where a claim is originally cognizable in the courts and its enforcement requires resolution of issues placed within the special competence of an administrative body. Survival of judicial remedy depends on effect of its exercise on the statutory scheme of regulation; according to §216(j), if the remedy is inconsistent with that scheme, it does not survive.—Hewitt-Robins Inc. v. Eastern Freight-Ways, Inc., 371 U.S. 84 (88-9)*.

In action to recover damages for death of valuable quarter horse from heat exhaustion, which occurred during shipment in enclosed van type trailer across southern California in very hot weather, complainant owner was not bound by the $150 declared value thereof shown in the bill of lading when he had not requested that the horse be shipped to him by

motor carrier, nor was he aware that such action was being taken. Although owner had temporarily placed his horse in exclusive control of operator of breeding ranch, and latter's employee had signed the bill of lading, mere possession carries no indication of any right to engage in any transactions of any serious consequence to the owner; placing the horse in control of the ranch did not vest latter with "apparent authority" to enter into a contract binding upon the owner for purpose of effecting its return. The rule is long standing that possession of a chattel, standing alone, does not authorize an agent to effect the principal's interest. Lower court's judgment for owner, in amount of $25,000, affirmed.—Lux Art Van Service, Inc. v. Pollard, 344 F. 2d 883 (887-9).

District court properly dismissed, for want of federal jurisdiction, complaint of motor carrier and its stockholders for injuries allegedly inflicted by defendant carrier during temporary control that was authorized by Interstate Commerce Commission under §210a(b) of the act, pending determination of their purchase application which the commission disapproved. Claim that defendant (vendee in purchase proceeding) exceeded its temporary authority by going beyond terms of the control agreement in its management of plaintiff carrier (vendor), thus violating §5(4) of IC Act and giving rise to a private claim on plaintiffs' part arising under a federal law, must fail. In enacting the Motor Carrier Act, Chap. 8 of the IC Act, Congress omitted any provisions comparable to §§8 and 9 of Chap. 1 thereof which make carriers subject to Chap. 1 liable for damages for any violation and give injured parties the remedy of complaining to the commission or of bringing suit in federal court; that omission was not inadvertent.—McFadding Express, Inc. v. Adled Corporation, 363 F. 2d 546 (547-8)*.

It can be argued that, as motor carrier's subjection to §5(4) since 1940 derives not from the Motor Carrier Act but from §5(13) defining motor carriers as within "carrier" as used in §5, violation of §5(4) by a motor carrier is a violation by "a carrier subject to the provisions of this chapter" within terms of §§8 and 9; however, desire of draftsmen of the 1940 legislation, which set out the National Transportation Policy and adopted the Water Carrier Act, to have a single comprehensive provision relating to consolidation of all three forms of transportation, rather than frame separate sections for each, would not suggest a legislative purpose to provide a private remedy for unlawful control by a motor carrier that had previously been withheld. In addition, no private right of action for motor carrier's violation of §5(4) having existed prior to the 1965 amendment of §204a and §222(b), the court should not assume a desire to change that in absence of some indication of Congressional intent; neither language of the 1965 law nor the legislative history affords any such indication.—Id., pp. 548-9.

The court reads §§8 and 9 to concern only violations of 49 U.S.C., Chap. 1, by carriers generally subject to its provisions, that is, those, primarily railroads, to which §1(1) says provisions of the chapter apply. Therefore, absent a provision in the Motor Carrier Act, no private right of action against a motor carrier for a §5(4) violation exists. Furthermore, having withheld a private remedy for violation of the Interstate Commerce Act, it would be highly unlikely that Congress intended that acts by an acquiring carrier against carrier to be acquired, allegedly in excess of its management contract rights, should give rise to a claim under 28 U.S.C. §1331 or §1337; and, while there is doubtless a federal policy that a carrier authorized to exercise temporary control of another will use such permission in accordance with its agreement, merely infusing the agreement with such policy is not enough to cause a suit for breach of contract to constitute a federal claim. Affirmed.—Id., p. 550.

In order for an agency of the government to be sued in its own name, the congressional act creating such agency must so provide. Since Congress has not authorized suit against defendant (an agency of Department of Agriculture), any action against it would be equivalent of a direct suit against the Government which cannot be maintained in absence of congressional waiver of sovereign immunity. Suit to recover damages from defendant allegedly resulting from certain action by it is accordingly dismissed.—Winneshiek Mutual Insurance Ass'n v. Farmers Home Admin., 233 F. Supp. 691 (692).

For a controversy to arise "under laws of Congress regulating commerce" so as to enable the court to exercise jurisdiction over the matter, there must, at the very least, first be such "laws." Nothing in complaint alleging mismanagement of plaintiff's business by defendant during temporary control under authority from the commission advises defendants what is the law that creates the cause of action, nor does it anywise appear what law regulating commerce might require judicial construction; examples of the wide scope of congressional legislation under the Commerce Clause are not pertinent, for the court's jurisdiction is not coextensive with the powers of Congress. Complaint dismissed for lack of jurisdiction.—McFaddin Exp., Inc. v. Adley Corp., 240 F. Supp. 791 (795)*.

10. Costs.—[Vol. 18].—See (also) United States v. Indiana Harbor Belt, 45 USC §6, n. 14.

Section 1332. Diversity of citizenship; amount in controversy; costs.—[Note: by §2 of Public Law 88-439, the following amendment to 28 USC §1332(c) applies only to causes of action arising after the date of enactment.] (c) For the purposes of this section and section 1441 of this title, a corporation shall be deemed a citizen of any State by which it has been incorporated and of the State where it has its principal place of business: Provided further, that in any direct action against the insurer of a policy or contract of liability insurance, whether incorporated or unincorporated, to which action the insured is not joined as a party-defendant, such insurer shall be deemed a citizen of the State of which the insured is a citizen, as well as of any State by which the insurer has been incorporated and of the State where it has its principal place of business. (Aug. 14, 1964, Public Law 88-439, 78 Stat 445.) [See also vol. 18, p. 14738.]

Notes of Decisions

Volume 4—p. 3121; Volume 11—p. 9767; Volume 12—p. 10576; Volume 13—p. 11214; Volume 14—p. 11729; Volume 15—p. 12346; Volume 16—p. 12991; Volume 17—p. 13705; Volume 18—p. 14379; Volume 19—p. 16023.

3. Citizenship of parties and amount in controversy.—[Vols. 4, 11-19].—Diversity of citizenship is not established by statement in complaint that plaintiff is a corporation organized under laws of Tennessee and defendant is a foreign corporation, a citizen of Missouri; express allegation should have been made that defendant is incorporated or organized and existing under laws of Missouri, and the principal place of business of each party should have been alleged.—First Flight Co. v. National Carloading Corp., 209 F. Supp. 730 (732, note); however, it is immaterial whether there is diversity of citizenship where both principal and third-party complaints are based at least partly on a federal question; such federal claims, where not plainly wanting in substance, confer jurisdiction on the court to entertain the nonfederal aspects of the case under the concept of pendent jurisdiction, and once jurisdiction of the principal suit is established no independent basis of jurisdiction is required to sustain the third-party suit.—Id., p. 735.

Failure of petition for removal of case to federal court to allege citizenship arising from State of defendant's incorporation and location of its principal place of business was a fatal defect that could not be cured by amendment after time within which removal could have been effected had elapsed.—Young v. Railway Exp. Agency, Inc., 209 F. Supp. 953.

Railroad's liability to its employees who were adversely affected by rail merger, approved by the Interstate Commerce Commission subject to conditions for protection of employees, being a several and not a joint liability, employee claims cannot be aggregated for jurisdictional purposes; court action may be sustained only with respect to those employees whose claims individually involve requisite jurisdictional amount. Though test for determining amount in controversy is value to plaintiff of the right he is seeking to protect, jurisdictional amount is determined by the claim and not by actual amount awarded. However, it must appear to a legal certainty that the claim is really for less than the jurisdictional amount to justify dismissal.—Louisville & N. R. Co. v. Cantrell, 215 F. Supp. 229 (231)*.

When it is necessary, in order to ascertain the amount in controversy, to consider conflicting testimony, or to decide disputed questions of law, such necessity alone gives the court jurisdiction; the court must hear the case, and reach its conclusion judicially; in other words, must take jurisdiction. Thus, since both issues of law and fact are presented relative to validity and effectiveness of election by certain employees to accept lump sum settlement, requisite jurisdictional amount is involved as to claims of those employees. And contention that railroad's total liability should be reduced by the employees' outside earnings fails to recognize that the amount in controversy is ascertained without reference to events occurring subsequent to institution of suit which might reduce that amount below the statutory limit.—Id., pp. 232-3.

In diversity of citizenship cases, the court will look to the law of the State in which it is sitting to determine whether a foreign corporation is doing business in the State so as to be subject to jurisdiction of the federal court; and under Wisconsin law solicitation of business, especially where continuous, constitutes "doing business" for purpose of amenability to court jurisdiction.Defendant railroad, a Kansas corporation which owns no tracks and carries neither freight nor passengers in Wisconsin, is therefore amenable to jurisdiction of the federal district court in that State when it maintains an office in Milwaukee for solicitation of freight and passenger business, and plaintiffs purchased their tickets, for use on its railroad, in Wisconsin.—Hornstein v. Atchison, T. & S.F. Ry. Co., 229 F. Supp. 1009 (1010-11).

When plaintiffs brought separate actions in State court against a nonresident railroad and against the estate of a resident, but did not join claims or defendants in the State suits, they were not entitled to remand following railroad's removal of actions against it to federal court. Writs issued against the railroad show no defect of federal jurisdiction, and there is complete diversity of citizenship and amounts in controversy exceed $10,000. While the cases arise out of the same railroad crossing collision, and plaintiffs could have prevented removal by the railroad had they joined defendants in the original suits, they chose to bring separate actions; the court is not required to revise plaintiffs' choice at this time, to recast their original pleading and so deprive the railroad of its right to remove.—Roby v. Maine Central Railroad, 243 F. Supp. 153 (154-6).

Legislative history of the statute is conclusive that the locus of corporate operations is a more important factor than the locus of over-all policy direction or control in determination of the "principal place of business" of a corporation. Thus, when defendant railroad carries on a predominance of its corporate operations in Oklahoma (most of its track mileage, offices, depots, and assets being located in, and most of its personnel being employed in, that State) no federal diversity jurisdiction is present in suit brought by an Oklahoma resident in State court and removed by defendant to Federal court. Case remanded to State court.—Foster v. Midland Valley R. Co., 245 F. Supp. 60 (61-2).

Section 1334. Bankruptcy matters and proceedings.—[Unchanged. See vol. 16, p. 12991.]

Section 1336. Interstate Commerce Commission's orders.—

Act of Aug. 30, 1964, Public Law 88-513, 78 Stat. 695, designates the present text as subsection (a) and adds new subsections (b) and (c) as follows:

(b) When a district court or the Court of Claims refers a question or issue to the Interstate Commerce Commission for determination, the court which referred the question or issue shall have exclusive jurisdiction of a civil action to enforce, enjoin, set aside, annul, or suspend, in whole or in part, any order of the Interstate Commerce Commission arising out of such referral.

(c) Any action brought under subsection (b) of this section shall be filed within 90 days from the date that the order of the Interstate Commerce Commission becomes final. [See vol. 14, p. 11730.]

Notes of Decisions

Volume 15—p. 12346; Volume 16—p. 12991; Volume 17—p. 13706; Volume 18—p. 14739; Volume 19—p. 16023.

2. Construction and interpretation.—[Vols. 15-19.]—Since §9 of Interstate Commerce Act does not impair shipper's right to obtain judicial review of adverse commission orders merely because the order was sought as a basis for reparations, district court had jurisdiction in shipper's action to set aside and annul an adverse order of the commission.—General Motors Corp. v. United States, 299 F. 2d 233 (234)*.

Giving deference to the commission's expertise in the exercise of its primary jurisdiction, following decision in 352 US 59 as to one of the basic problems of the controversy in issue, the district court's action sustaining the commission's conclusion that railroads' classification rating on incendiary bombs applied on Government shipments of napalm gel and Pyrogel bombs, minus bursters and fuses, is affirmed. In view of the commission's analysis, and its conclusion therefrom, record affords no basis for a different result in the Courts.—United States v. I.C.C., 315 F. 2d 44 (46-7)*.

Validity of the commission's decision in proceeding involving the same tariff, like traffic, and a similar situation, wherein appellee was a party, that "transit privilege" as used in tariff item in issue did not include inspection or reconsignment, cannot be questioned in subsequent action for recovery of alleged overcharges; to rule otherwise would be to permit a collateral attack on that decision.—United States v. Great Northern Ry. Co., 337 F. 2d 243 (248)*; and while the possibility of unreasonable results flowing from that interpretation might well have provided a basis to attack the commission's construction of the tariff initially, such attack cannot now be made in a collateral action.—Id., p. 249.

Suit seeking severance pay or alternative mandatory arbitration, brought by railroad employees who were retired at age 65 without severance pay pursuant to 1962 union contract with defendant railroads, is based on theory that the contract contravened conditions of 1961 Interstate Commerce Commission decision providing severance pay for employees who lose their jobs as a result of the abandonment authorized therein; however, plaintiffs complained of the same wrongs in earlier lawsuit between the same parties wherein the contract was attacked as a violation of the Railway Labor Act. This court held in the earlier suit, 323 F. 2d 219, affirming 211 F. Supp. 379, that involuntary retirement provisions in the 1962 contract were valid and binding on plaintiffs; therefore, since reliance on different statutes does not render their claims different "causes of action" for purposes of res judicata, plaintiffs cannot now obtain reconsideration of that holding even on

a ground not heretofore urged. Lower court's judgment reversed and cause remanded for summary judgment in defendants' favor on the ground of res judicata.—Clemens v. Central R. Co. of New Jersey, 399 F. 2d 825 (826-8)*.

Neither the commission's order giving notice that it had concluded not to enter upon an investigation of proposed train discontinuance, nor its order denying petition for reconsideration of such decision, qualifies as an "order" subject to judicial review within meaning of 28 USC §1336; neither action was final, both were completely gratuitous and in effect of no more technical significance than informal statements of commission policy.—Sludden v. United States, 211 F. Supp. 150 (154)*.

The commission's order determining that certain rates charged on Government shipments were unreasonable, as reflected in deductions made by General Accounting Office on post audit, is one "for the payment of money," hence action to enjoin or set aside that order in whole or in part may be heard and determined by a single judge without necessity of a three-judge court.—Baltimore & O. R. Co. v. United States, 217 F. Supp. 918 (919)*.

While the statute provides for appeals from "any order" of the commission, the reasoning behind a decision on a matter within the commission's sole discretion is not something which the court can review. When, after investigation into railroad's proposed discontinuance of passenger trains, the commission decided not to interfere with the service cutbacks and entered an order discontinuing the investigation, the decision to take no action is not reviewable by the courts; and the order terminating the investigation is not an appealable order within meaning of the statute. However, even if the court had jurisdiction to review the commission's findings that value of the service was outweighed by the burden on the railroad, the result would be the same. Such a decision of the commission will not be set aside if it supported by substantial evidence and, even though the commission's conclusion might not have been the only possible one, ample evidence in the record supports it. Complaint dismissed.—State of Minnesota v. United States, 238 F. Supp. 107 (110, 112-13)*.

That the commission approved defendant's temporary control of plaintiffs' carrier business under §210a(b) of Interstate Commerce Act has no significant bearing on jurisdiction of the district court to act on complaint seeking damages for defendant's alleged mismanagement of the business under such temporary authority. No mandatory order of the commission is involved, the authority granted being permissive only. Plaintiffs' contention that they are seeking to "enforce an order of the ICC" and that jurisdiction therefor lies under 28 U.S.C. §1336 is rejected.—McFaddin Exp., Inc. v. Adley Corp., 240 F. Supp. 791 (796)*.

Section 1337. Commerce and anti-trust regulations.—[Unchanged. See vol. 15, p. 12347.]

Notes of Decisions

Volume 4—p. 3121; Volume 7—p. 6080; Volume 10—p. 8425; Volume 11—p. 9767; Volume 12—p. 10576; Volume 13—p. 11214; Volume 14—p. 11729; Volume 15—p. 12347; Volume 16—p. 12991; Volume 17—p. 13706; Volume 18—p. 14740; Volume 19—p. 16026.

1. Suits arising under law regulating commerce.—[Vols. 4, 7, 10, 12, 13, 15-19].—Complaint in shipper's action (brought in State court) for damage to goods tendered in good condition for interstate movement by defendant, but delivered in damaged condition, states a claim or right "arising under" federal law. There can be little doubt now that the Carmack amendment, 49 USC §20(11), pre-empts the field and su-

persedes all state common law rights as to liability of carriers for damage to shipments moving on interstate bills of lading; under that amendment and the bills-of-lading statutes, carrier liability for damage to interstate shipments is a matter controlled by federal statutes and decisions; and mere fact that plaintiff does not allege that his cause of action is based on federal law cannot be decisive in determining jurisdiction. Accordingly, the District Court has jurisdiction over the matter; plaintiff's motion to remand to the State court is denied.—Sylgab Steel & Wire Corp. v. Strickland Transp. Co., 270 F. Supp. 264 (267-9, 271).

That both contracts between interstate motor carriers, one providing for vendee's purchase of vendor's stock and the other providing for former's temporary control of latter pending Interstate Commerce Commission's determination of the purchase application, could not lawfully be carried out without the commission's approval does not, without more, demonstrate that Congress meant all aspects of their performance or nonperformance to be governed by federal law rather than state laws applicable to similar contracts relating to businesses not under federal control. This is not to say that a particular issue concerning such a contract would not require determination under federal principles, but instant complaint does not suggest presence of any such issue. Lower court's decision that federal-question jurisdiction had not been established, and its refusal to entertain complainant's claims under state law on a theory of "pendent jurisdiction," affirmed.—McFaddin Exp., Inc. v. Adley Corp., 346 F. 2d 424 (425, 427)*.

Suit to restrain application of rates under investigation in proceeding before the commission, which have become effective by virtue of expiration of the statutory suspension period, in essence asks the court to declare that the statutory period is inadequate; however, Congress has fixed 7 months as the maximum period of suspension, and in extending that period, in face of the clear mandate of §15(7) that, if the proceeding has not been concluded and an order made by end of that period, the proposed change shall go into effect, the courts would in effect be amending the statute, which is a matter beyond their power. District court's denial of appellants' motion for preliminary injunction, affirmed.—Arrow Transp. Co. v. Southern Ry. Co., 308 F. 2d 181 (186)*.

Demurrage charges are no part of the rate charges for transportation of shipments; although in prior proceeding which arose out of same bill-of-lading transaction judgment for plaintiff was entered upon agreement between the parties on an amount in full settlement of all claims asserted for additional transportation charges, no claims for demurrage were there asserted, and the prior judgment is not res judicata as to suit to recover demurrage charges on same shipments.—Great Northern Ry. Co. v. United States, 312 F. 2d 906 (910).

The test of jurisdiction under 28 USC §1337, as laid down in 299 US 109, is that the right or immunity must be such that it will be supported if the Constitution or laws of the United States are given one construction or effect, and defeated if they receive another. Whether dispute between railroad and employees should be settled as provided in protective agreement approved by the commission under Interstate Commerce Act, or by procedures prescribed in Railway Labor Act, presents a substantial problem of statutory construction that fully satisfies that test.—Brotherhood of Locomotive Engineers v. Chicago & N.W. Ry. Co., 314 F. 2d 424 (428)*.

The principle is firmly established that, in cases requiring exercise of administrative discretion, agencies created by Congress for regulating the subject matter should not be passed over. This is so even though the facts, after they have been appraised by specialized competence, serve as a premise for legal consequences to be judicially defined. Uniformity and consistency in the regulation of business entrusted to a particular agency are secured, and the limited functions of review by the judiciary are more rationally exercised, by preliminary resort for ascertaining and interpreting the circumstances underlying legal issues to agencies that are better equipped than courts by specialization, by insight gained through experience, and by more flexible procedure.—Carnation Co. v. Pacific Westbound Conference, 336 F. 2d 650 (655).

Since issue in controversy involves interpretation and effect of §5(11) of the Interstate Commerce Act on the commission's order approving merger, jurisdiction of the matter before the court is conferred by 28 USC §1337. Such being the case, diversity of citizenship and jurisdictional amount are not essential.—Chicago & N.W. Ry. Co. v. Brotherhood of Locomotive Engineers, 202 F. Supp. 277 (282)*.

If an administrative agency such as Interstate Commerce Commission has jurisdiction to deal with issues of fact raised in an action before the court, the doctrine of primary jurisdiction applies regardless of whether the agency's jurisdiction has already been invoked.—American Com'l Barge Line Co. v. Eastern Gas & Fuel Ass'n, 204 F. Supp. 451 (453).

Changes in operation of sleeping-car service proposed to be made by the Pennsylvania and Pullman Co. constitute changes in existing pooling agreement within scope of §5(1) of Interstate Commerce Act. Plaintiffs, Pullman conductors who would lose their jobs as result of such changes, bring suit on behalf of other Pullman conductors similarly situated, who constitute a class so numerous that it would be impracticable to bring them all before the court; plaintiffs fairly and adequately represent that class, and action is properly brought as a true class suit.—Brogan v. Pennsylvania R. Co., 211 F. Supp. 881 (885, 886).

Federal district court has original jurisdiction of carrier's action to recover undercharges allegedly due because plaintiff failed to charge and collect full tariff charges applicable on considered shipments. There being no genuine issue of any material fact, only a question of law remains to be decided, namely, construction of the published tariff to determine proper charges to be made by carrier and to be paid by shipper.—Miller v. Ideal Cement Co., 214 F. Supp. 717 (718, 720).

While the courts have not always agreed on the question of what is a suit arising under a federal statute, paramount among established guides is the postulate that a right or immunity created by federal statute must be involved. Federal nature of the right is decisive, and jurisdiction cannot be determined by the source of the authority to establish the right; the federal right must be a paramount, not collateral, issue in the suit. Thus, even though one of the parties is engaged in interstate commerce and subject to regulation under a federal statute, the court has no jurisdiction of a matter concerned solely with a contract between the adverse parties. Plaintiff's rights, whatever they are or may be, arise out of its joint-trackage agreement with defendant, not out of provisions of the Interstate Commerce Act; complaint dismissed for want of federal jurisdiction.—Chicago & N. W. Ry. Co. v. Toledo, P. & W. R. Co., 217 F. Supp. 64 (67-8, 70)*.

Motion for dismissal, for lack of subject-matter jurisdiction, of suit to collect money claimed due and owed plaintiff railroad because of alleged underpayments for use of freight cars it furnished defendant, denied. While the Interstate Commerce Act does not expressly require one railroad to pay another just and reasonable charges for use of latter's cars, that requirement and the right of furnishing carrier to sue for such charges is implicit in provisions of §1(4), (5), and (11) of that act. A carrier may be held liable, both civilly and criminally, for violating the duties imposed by those sections; and it would be both illogical and inequitable were carrier precluded from suing for the just and reasonable charges required by §1(5) after having provided car service pursuant to §1(11). The obligation to furnish cars is a duty arising under a federal law; the right which implicitly attends that duty must also "arise" from statute creating the duty; thus, plaintiff's action arises under an Act of Congress regulating commerce.—Clinchfield R. Co. v. Boston & Maine Corp., 258 F. Supp. 467 (468-9).

See also Pennsylvania R. Co. v. Sharfsin, §13a, n. 1.

Section 1339. Postal matters.—[Unchanged. See vol. 15, p. 12348.]

Notes of Decision

2. Construction and interpretation.—[Vol. 17].—Action seeking injunctive relief against proposed increase in size and weight of parcel post packages dismissed as premature because (1) the court has no jurisdiction until the Interstate Commerce Commission either approves or disapproves the proposed action of the Postmaster General, and (2) plaintiff Railway Exp. Agency cannot sustain damage until there is an increase in size and weight of parcel post packages.—Railway Exp. Agency, Inc. v. Day, 209 F. Supp. 766 (768).

Section 1398. Interstate Commerce Commission's orders.—

Act of Aug. 30, 1964, Public Law 88-513, 78 Stat. 695, designates the present test as subsection (a) and adds a new subsection (b) as follows:

(b) A civil action to enforce, enjoin, set aside, annul, or suspend, in whole or in part, an order of the Interstate Commerce Commission made pursuant to the referral of a question or issue by a district court or by the Court of Claims, shall be brought only in the court which referred the question or issue.[See vol. 14, p. 11730.]

Notes of Decisions

Volume 4—p. 3126; Volume 7—p. 6081; Volume 10—p. 8427; Volume 12—p. 10577; Volume 14—p. 11731; Volume 15—p. 12348; Volume 16—p. 12993; Volume 18—p. 14740.

2. Suits to enforce, suspend, or set aside orders of commission.—[Vols. 4, 12, 18.]—Action, termed loosely one "to enforce" a commission order, asking Missouri single judge court to order the Interstate Commerce Commission to issue motor carrier permit to plaintiff, and to restrain defendants from pursuing suit filed in Alabama three-judge court (wherein defendant carrier is seeking to have the commission's grant of contract carrier authority to plaintiff set aside) pending determination hereof, presents no cause of action within the court's jurisdiction. In effect, plaintiff is really seeking to accomplish a transfer of matters before the Alabama court to the Missouri single-judge court; in other words, plaintiff seeks to compel carrier to challenge validity of the commission decision (if it is to have any right of challenge) in an improper forum.—H. Messick, Inc. v. Baggett Transp. Co., 268 F. Supp. 459 (460, 461).

The commission's decision that plaintiff should be awarded the permit sought is under timely review before the Alabama court that earlier had remanded the case for further action, and enforcement thereof is temporarily enjoined by that court; thus, issuance of order requested by plaintiff would have effect of depriving defendant carrier of its three-judge court review of the propriety of that decision and order, and also would place the commission in the unconscionable position of being forced to violate the order of one of the two federal courts. It would be improper now to direct the commission to issue the permit to plaintiff in direct violation of the Alabama court's order. As the case now stands, plaintiff has no legal right to seek "to enforce" the unissued order in the Missouri court; complaint dismissed with prejudice.—Id., pp. 460, 461.

The commission's decision denying reparation, being correctly dealt with procedurally, is properly reviewable by a one-judge District Court.—William N. Feinstein & Co. v. United States, 209 F. Supp. 613 (619)*.

Plaintiff being an Illinois corporation with headquarters in Chicago, its suit to set aside the commission's order in question was improperly brought in Minnesota; the statute provides that such action be brought in the judicial district where plaintiff resides; and the parties choose not to waive improper venue. Thus, the court must either dismiss the case, as sought by intervener with concomitant dissolution of temporary restraining order obtained by plaintiff on basis of alleged

irreparable damage, or transfer it to the proper forum as urged by plaintiff. Since plaintiff acted in good faith in laying the venue in Minnesota, and its action reflects no effort to circumvent process statutes or any other imrpoper or questionable purposes, such as would call for the more drastic dismissal, it would be an injustice to it to dismiss the suit and thus terminate the temporary injunction. Case is a proper one, "in the interest of justice," for transfer to the proper forum; transferred to Northern District of Illinois, with temporary injunction maintained in force until its determination by that court.—Clark Transport Co. v. I.C.C., 228 F. Supp. 236 (237-8).

See also Borough of Moosic v. United States, 28 USC §2325, n. 11; I.C.C. v. Atlantic Coast Line, 49 USC §17(9), n. 2.

4. District of residence of party upon whose petition order was made.—[Vols. 4, 14, 15, 16].—Suit asking the Missouri court to order the commission to issue motor carrier permit to plaintiff, and to restrain defendants from pursuing action in Alabama court (wherein defendant carrier seeks to have commission order granting the permit set aside) pending determination hereof, presents no cause of action within the court's jurisdiction. Defendant carrier, unsuccessful party before the commission, has a statutory right to seek to have the order set aside by filing a proper suit in its home district; it cannot be compelled directly or indirectly to have such action tried in Missouri, as that would not only deprive it of its rightful forum but would also disrupt the orderly process of judicial review intended by pertinent statutes. If plaintiff is allowed to do what it is attempting, any successful party before the commission could prevent its opponent from obtaining judicial review in the district of its residence simply by filing its own suit "to enforce" the decision, and by asking that opponent's be stayed. Such a proceeding, if tolerated, would clearly disrupt the statutory scheme of review established by Congress. Complaint dismissed.—H. Messick, Inc. v. Baggett Transp. Co., 268 F. Supp. 459 (460, 461).

Section 1391(c), which provides that the judicial district in which a corporation is incorporated or is doing business shall be regarded as its "residence" for venue purposes, is a general venue statute which is not applicable to, and does not enlarge the meaning of, the provisions of §1398, which is a special statute brought to review orders of the commission and makes venue dependent on plaintiff's "residence"; and the Supreme Court has consistently held that the "residence" of a corporation is only in the State and district in which it was incorporated. Plaintiff which was incorporated under the laws of Montana and has its principal office and place of business at Chicago may not bring action to set aside an order of the commission in the Western District of Pennsylvania by reason of its processing plant at Sharpsburg, Pa., but under §1398 may do so in Montana or in the proper district in Illinois.—Zonolite Co. v. United States, 209 F. Supp. 597 (598-9)*.

While, in complaint seeking to set aside an order of the Interstate Commerce Commission, venue provisions should be clearly laid, objections to defects in venue as prescribed by the statute need not be asserted. Federal district court in which complaint was filed clearly has jurisdiction of subject matter therein; and, if objection to venue is not made, suit can be maintained in a district where proper venue does not exist. Three-judge statutory court prayed for by plaintiff will be created.—Rhodes v. United States, 218 F. Supp. 382 (382-3).

Section 1404. Change of venue.—[Unchanged. See vol. 16, p. 12993.]

Notes of Decisions

Volume 16—p. 12993; Volume 17—p. 13707; Volume 18—p. 14740; Volume 19—p. 16028.

1. Transfer of actions.—[Vols. 16, 17, 18, 19].—The venue statutes are a safeguard against inconvenient litigation at a distance from the "home" or place of business of the defendant, and under §1391(c) a corporation generally may challenge the venue (not the

jurisdiction) of any suit brought against it in a federal district in which it is not "doing business." While the venue privilege is not open to a third-party defendant, such a defendant may ask that the court exercise its discretion under Rule 14 of Federal Rules of Civil Procedure against permitting maintenance of the third-party suit. Finally, there is always available a motion for change of venue under the forum non conveniens statute, which is defendant's last resort, since inconvenience and distance of litigation have no bearing on the question of personal jurisdiction.—First Flight Co. v. National Carloading Corp., 209 F. Supp. 730 (739-40).

Interests of justice require that defendant's motion to transfer action to recover damages on considered shipments because of forum non conveniens be granted. Plaintiff chose to do business in Colorado, its shipments moved from that State to the East, but none moved through Texas; and, even though plaintiff may have moved all its records to Texas, it would be more unfair to require defendant to bring its records to southern Texas, where it had never done business, than to require complainant to take its records back to State where it chose to do business. Action transferred to District court for State of Colorado.—McBride Produce Co. v. Denver & R.G. W. R. Co., 227 F. Supp. 399 (400).

Third-party defendant's motion to transfer motor vehicle collision case from district where instituted to the district where the collision occurred, where other suits arising out of the same collision have been instituted, and where it might be reached earlier for trial, denied. While it may perhaps be advantageous to try the case in the district to which transfer is sought, alleged inconvenience to parties, witnesses and the administration of justice do not outweigh plaintiff's right to choose his forum; plaintiff resides in district where suit was brought. there is no indication that bringing suit there was for purpose of harassing or imposing undue hardship on defendant, and third-party defendant (not sued by plaintiff) can make no charge of unfair advantage against plaintiff. Sufficient equities to justify exercise of the court's discretion to transfer the action, not demonstrated.—Sell v. Greyhound Corp., 228 F. Supp. 134 (136-7).

On defendant's motion to transfer personal injury action by passenger on its train from one federal district to another for convenience of parties and witnesses and in the interest of justice, plaintiff's choice of forum should prevail unless the balance as to convenience is strongly in favor of defendant. The ultimate inquiry is where the trial will best serve convenience of the parties and the ends of justice; much is left to discretion of the court to whch plaintiff first resorts. District court where suit was brought and the one to which transfer is sought are both current; defendant's supporting affidavits do not indicate harassment; motion for change of venue, denied.—Johnson v. Chicago, R.I. and P. R. Co., 228 F. Supp. 160 (161).

Action to set aside the commission's order authorizing issuance of a motor carrier permit is a proper case, "in the interest of justice," for transfer. Plaintiff, an Illinois corporation with headquarters in Chicago, acted in good faith in beinging suit in Minnesota: however, the statute provides that such action be brought in the district where plaintiff resides and, since the parties do not choose to waive improper venue, the court must either dismiss the suit or transfer it to the proper forum. As commencing the action in Minnesota is not reflective of effort to circumvent process statutes or of any other improper or questionable purpose, such as would require dismissal, and because venue properly should be in the Northern District of Illinois, the case is transferred to that jurisdiction.—Clark Transport Co. v. I.C.C., 228 F. Supp. 236 (237-8).

While plaintiff's choice of forum is not an absolute and uncontrolled privilege, it should not be disturbed unless the balance of convenience is clearly in favor of defendants. In proceedings on motion to transfer the movant must make a clear-cut showing that, considering all the interests, convenience of the parties and the interests of justice will be better served in the other district; thus, where the interests are evenly balanced transfer should be denied. And, in considering such motions, the courts accord some, but not decisive, weight to calendar conditions. Issues raised by motion to tranfer being closely contested,

and defendants having failed to sustain their burden of proof, motion is denied.—Securities and Exchange Com'n v. Golconda Mining Co., 246 F. Supp. 54 (56.60).

REMOVAL OF CASES FROM STATE COURTS

Chapter 89.—Title 28

Section 1445. Nonremovable actions.—[Unchanged. See vol. 14741.]

Notes of Decisions

Volume 12—p. 10582; Volume 13—p. 11220; Volume 14—p. 11731; Volume 15—p. 12349; Volume 16—p. 12994; Volume 17—p. 13708; Volume 19—p. 16030.

1. In general.—[Vols. 14-17, 19].—Plaintiff-shipper's motion to remand to State court (where it was brought) its action against motor carrier for loss and damage to shipments transported by defendant, on ground of lack of jurisdiction because no cause of action under federal law is alleged, is denied. The Carmack amendment, 49 USC §20(11), which also applies to motor carriers, pre-empts the filed and supersedes all state common law rights with regard to carrier liability for damage to interstate shipments; and, though only one carrier is involved, plaintiff's damage suit has its origin in, and is controlled by, the Carmack amendment. Therefore, complaint states a claim or right "arising under" federal law and, since amount claimed is over $3,000. the District Court has jurisdiction.—Sylgab Steel & Wire Corp. v. Strickland Transp. Co., 270 F. Supp. 264 (266, 268-9, 271).

Action to recover cost of repairing plaintiff's trailer allegedly delivered in damaged condition following defendant's piggyback transportation thereof, in addition to being within purview of §1337, was controlled by §20(11) of the Interstate Commerce Act which grants concurrent jurisdiction to both Federal and State courts. Although Congress has granted the right to transfer certain cases from State to Federal courts, removal of plaintiff's suit in assumpsit filed in State court was unwarranted when amount in controversy did not exceed $3,000, exclusive of interest and costs; remanded to State court.—Eazor Exp. v. Pennsylvania R. Co., 214 F. Supp. 695 (696-7).

Plaintiff's motion to remand to state court his personal injury suit against railroad and its section foreman, which had been removed to Federal court after dismissal as against the resident (individual) defendant, on ground that the local defendant's removal from the case was over his objection, overruled. State court's order on resident defendant's motion for a peremptory instruction at conclusion of plaintiff's case is an "order * * * *from which it may first be ascertained that the case is * * * or has become removable" for the first time upon the happening of such event. Something must be read into the statute which Congress did not write into it before it can be said that a case can become removable from a state court during the trial only in event a plaintiff voluntarily does something to extricate and completely remove the resident defendant from the suit.—Lyon v. Illinois Central R. Co., 228 F. Supp. 810 (811).

EVIDENCE: DOCUMENTARY

Federal Business Records Act

Chapter 115.—Title 28

Section 1732. Record made in regular course of business; photographic copies.—[Unchanged.]

Notes of Decisions

Volume 16—p. 12995; Volume 17—p. 13708; Volume 18—p. 14742; Volume 19—p. 16031.

2. In general.—[Vols. 16-19].—In order for a document to come within the business records rule, it must be made in the systematic conduct of a business and reflect regular business transactions; it should not be one calculated for use essentially in litigating a claim. Fact that defendant makes similar summaries in other accidents does not make considered summary of car inspection reports, prepared for use in disposing of plaintiff's claim for personal-injury damages, a business record made in the regular course of business.—Trout v. Pennsylvania Co., 300 F. 2d 826 (830).

Purpose of the statute was to permit introduction into evidence of reports in substitution for actual testimony in court of person making such reports, and the broad policy thereof was to bring the rules of admission into evidence of business writings, records, and memoranda more nearly into line with standards relied on by business men in making business decisions outside of court. Official report relating to injuries sustained by Government employee on defendant's pier, which was required by Federal Employees' Compensation Act and was made day after the accident, should have been admitted in action by plaintiff, as assignee of its employee under that statute, alleging that employee's injuries were caused by negligence of defendant, owner of the pier; report was not made for purposes of litigation, and maker thereof testified in court and was available for cross-examination thereon.—United States v. New York Foreign Trade Zone Operators, Inc., 304 F. 2d 792 (796-8).

Written reports of highway accident by driver of tractor-trailer to the owners of the equipment and to defendant-lessee, the carrier, shortly after collision with plaintiff's automobile were not privileged as the "work product" of defendant's lawyer; they were made in the ordinary course of business under Interstate Commerce Commission safety regulations and do not represent the lawyer's work product. Plaintiff showed good cause for production of those documents; lower court's denial of his motion for production was an abuse of discretion.—Goosman v. A. Duie Pyle, Inc., 320 F. 2d 45 (50-3).

In action for death of railroad employee as result of accident, intra-company written report of the accident made by foreman of the work detail (who was not an eyewitness) on regular printed form used by the railroad for required reporting of accidents by its employees was not admissible under exception to hearsay rule provided by the Federal Business Records Act. Such report is not a record made for systematic conduct of railroad's business as a business; while an accident report may affect that business in the sense that it affords information on which management may act, it is not typical of entries made systematically or as a matter of routine to record events or occurrences, reflect transactions with others, or to provide internal controls. Fact that a company makes a business of recording employees' versions of their accidents does not put those statements in the class of records made "in the regular course of business" within meaning of the statute (318 US 109).—Dilley v. Chesapeake & O.

Ry. Co., 327 F. 2d 249 (251).

File copies of freight waybills kept by the carriers in regular course of business, covering movement of the cars from origin to transit point, the outbound movement to destination, and the corrected billing for the undercharges sued for, were obviously admissible without limitation of use under the Business Records Act, having been properly authenticated and objections to authenticity having been categorically waived. Those documents were enough to establish the weight of the shipments involved, and shipper's effort to negative a concession on correctness of weight did not affect either their admissibility or the judicial weight to be accorded them. As there is no question that those papers were kept in the respective carriers' regular course of business and used by them as basis for further commercial action in relation to the movement of the shipments and the billing and payment of freight therefor, there is no merit to shipper's objection that none of the carrier witnesses identifying the papers knew who weighed the shipments.—Louisville & N. R. Co. v. Knox Homes Corp., 343 F. 2d 887 (895-6)*.

It is the purpose of the Business Records Act to dispense with the necessity of proving each and every entry by the persons actually making them. The probative reliability of the waybill copies as proof of the matters reflected therein is established by the system under which they were made; it is the business record in the form regularly kept by the particular business and reliance thereon that gives trustworthiness and hence legal admissibility to such records. The waybill records are not only admissible but are binding on shipper for the considered shipments, since shipper paid the charges originally billed for the movement to the transit point, and in so doing placed its own imprimatur of accuracy on the very same weights. There is neither proof nor suggestion that in making payment based on those weights shipper was misled or acted inadvertently or erroneously. Under the peculiar circumstances of the case, the considered records merely proved what shipper by its conduct had already demonstrated beyond question—that the weights were those shown. The district court's instructed verdict on that score should have gone for the carrier, not the shipper; so much of the judgment as held the proof on weights inadequate is therefore reversed.—Id., p. 896.

The main purpose of the Federal Business Records Act and rule 1.79 of the commission's Rules of Practice, which is almost identical in language, is to lighten the burden of producing or accounting for witnesses by permitting records to be verified by anyone who knows that they are made in the regular course of business; and fact that the witness neither prepared the records nor supervised their preparation does not affect their admissibility.—Von Der Ahe Van Lines, Inc.—Lease and Purchase—Bee-Line, 93 M.C.C. 498 (504)*.

REVIEW.—MISCELLANEOUS PROVISIONS

Chapter 133.—Title 28

Section 2101. Supreme Court; time for appeal or certiorari; docketing; stay. —[Unchanged. See vol. 15, p. 12349.]

1. In general.—Record is clear that appeal was properly taken from the District Court's second order (entered after commission report on reconsideration following remand of application proceeding) which vacated the commission's action and, also, permanently enjoined it from issuing a certificate to the applicant; therefore, without passing on appropriateness of the All-Writs procedure used by appellees in the second suit for re-

view, their argument that the appeal was untimely because filed more than 60 days after lower court's initial judgment is palpably untenable.—United States V. Dixie Highway Exp., Inc., 389 U.S. 409 (411, note)*.

Sections 2106, 2109. Determination; quorum of Supreme Court justices.—[Unchanged. See vol. 14, p. 11732, vol. 16, p. 12995.]

Notes of Decisions

§2106: Volume 16—p. 12995; Volume 17—p. 13709; Volume 19—p. 16032.

5. Remand.—[Vols. 16, 17, 19].—Since Congress entrusted the issue of reasonableness of rates charged solely to the commission, and the commission properly weighed all pertinent factors in finding that charges applicable on involved shipments were unreasonable, the issue of reasonableness was not open to the district court in injunction proceeding, and that court erred in reversing the commission's decision; remanded with direction to dismiss carrier's petition for want of equity.—Pennsylvania R. Co. v. United States, 315 F. 2d 460 (465)*.

DECLARATORY JUDGMENTS

Chapter 151.—Title 28

Section 2201. Creation of remedy.—[Unchanged. See vol. 18, p. 14742.]

Notes of Decisions

Volume 15—p. 12351; Volume 16—p. 12996; Volume 17—p. 13709; Volume 18—p. 14743; Volume 19—p. 16032.

2. Construction and interpretation.—[Vols. 15-19].—Action against the city by transfer company (employed by railroads to transfer passengers and baggage between rail terminals in Chicago) asking the court to declare that provisions of Chicago Ordinance requiring it to obtain city licenses are invalid as unconstitutional burdens on, and attempts to regulate, interstate commerce, was not premature. The controversy is alive and ready for action; it has lasted over a decade and, though it obtained licenses after filing suit challenging the ordinance, carrier has continued operation only by paying the license fees into court; city, even while suit was pending, amended its ordinance so as to further regulate the carrier and has continually demanded its full compliance therewith. Also, while disclaiming power to stop transfer company's operation, the city retains power under the ordinance to find it and arrest its drivers for operating without a license and to revoke for discretionary reasons all licenses it may obtain; thus, the company continues to operate only at the city's sufferance. Trial court's dismissal of the action as premature, affirmed by the Court of Appeals, reversed.—Railroad Transfer Service, Inc. v. Chicago, 386 U.S. 351 (355-8)*.

Since an actual controversy existed between railroads and unions, as to whether the procedures governing personnel changes prescribed in Railway Labor Act, or those set out in "stipulation" of the parties authorized by the Interstate Commerce Commission as a part of its order approving merger of railroad

yards, should be followed, a declaratory judgment declaring the rights of the parties should be entered.—Chicago & N.W. Ry. Co. v. Brotherhood of Locomotive Engineers, 202 F. Supp. 277 (283)*.

The Declaratory Judgment Act requires "an actual controversy" before the court's jurisdiction may be invoked, "actual" being used for emphasis rather than definition, and judicial discretion should be exercised in deciding whether or not a declaratory judgment should be rendered. Railroads' actions for declaratory judgment against collective bargaining representatives of railroad employees were dismissed when differences of opinion between the parties were too nebulous and contingent for adjudication, and there was considerable uncertainty whether any harm would ever result to plaintiffs. Speculative anticipation of a future course of action or mere forecasts and predictions of irreparable injury would not warrant grant of relief requested.—Southern Ry. Co. v. Brotherhood of Locomotive Fire. & Eng., 223 F. Supp. 296 (304-8)*.

Plaintiff railroad's properly filed tariff determined rights of the parties, for purposes of its motion for summary judgment to recover demurrage claimed for detention of its lighters, when defendant consignee, while refusing to concede its applicability and pleading this as a question of law, relied on that tariff to bar plaintiff's claim in its affirmative defenses, and its entire legal argument centered on interpretation of regulations therein. While rate applicable on consignee's cargo included unloading of lighters by carrier, under the tariff, that duty to unload would not arise until consignee signified its readiness to receive; and it is immaterial that defendant's inability to receive, which relieved plaintiff of duty to unload before demurrage charges could accrue, was due to a strike over which it had no control. Summary judgment in favor of plaintiff.—Pennsylvania R. Co. v. Moore-McCormack Lines, Inc., 246 F. Supp. 143 (144-7)*.

In declaratory judgment action arising out of highway accident, question of agency of driver of leased tractor and trailer involved must be resolved not only on basis of written agreement between lessor and lessee motor carriers, but also from facts surrounding their continuing relationship and the facts and circumstances surrounding the accident. When driver was carrying out lessee's instructions to return the equipment to lessor, his employer, at time of the accident, he had not abandoned lessee's service or that of his employer; on the contrary, he was continuing to act for their mutual benefit and was subject to their joint control. That the mutually beneficial lease contained no provisions respecting exclusive possession, control and use or assumption of responsibility, would not excuse lessee from liability it might otherwise have; and lessee's liability would not serve to release lessor if, when collision occurred, it had joint right of control over the driver. In death action pending against both carriers, liability rests upon both.—Vance Trucking Co. v. Canal Insurance Co., 249 F. Supp. 33 (35-6, 39).

The Interstate Commerce Commission is an indispensable party to action for declaratory judgment as to common meaning and connotation of terminology in plaintiff's interstate motor carrier certificate, since interpretation of the certificate should be made in the first instance by the commission upon whom Congress has placed the responsibility. Plaintiff's quarrel is not basically with defendant who is employed by the commission as a regional district supervisor; the real controversy, if any, is between the commission and plaintiff.—W. J. Dillner Transfer Co. v. McAndrew, 226 F. Supp. 860 (862)*.

The Declaratory Judgments Act vests in the court discretion whether or not to "declare the rights and other legal relations of any interested party seeking such declaration." For such an action to be justiciable, the issues must be definite and concrete, touching on legal relations of parties having adverse legal interests, and must constitute a real and substantial controversy admitting of specific relief. Plaintiff's complaint does not measure up to standards of justiciability set by the statute; alleged actions, threats, and lack of knowledge of defendant-employee do not give rise to a case or controversy, and cannot be judicially reviewed; disagreements between plaintiff and defendant are not such that the court can see what legal issues it is

deciding; plaintiff does not request an adjudication that it has a right to do, or to have, anything in particular.—Id., pp. 863-4.

Moreover, the declaratory judgment procedure will not be used to pre-empt and prejudge issues that are committed to the Interstate Commerce Commission. It would not be tolerable that a declaratory judgment interpret a motor carrier certificate in order to forestall proceedings by the commission, which is authorized to try such issues in the first instance; responsibility for effective functioning of administrative process cannot be thus transferred from the commission to the courts. Complaint dismissed.—Id., p. 864.

The commission's decision in proceeding to which appellee was a party and which involved the same tariff, like traffic, and a similar situation, that "transit privileges" as used in that tariff did not include inspection or reconsignment, was consistent with its traditional view, accepted by the courts, and was entitled to be given the greatest deference and weight by the district court in subsequent action to recover alleged overcharges. The district court was in error in its interpretation of that term as including reconsignment and its consequent granting of summary judgment to appellee; reversed, with direction to enter judgment for appellant.—United States v. Great Northern Ry. Co., 337 F. 2d 243 (248, 249)*.

There is no doubt as to availability of summary judgment procedure in suit seeking a declaration as to whether certain acts of the parties would constitute a violation of the [National Labor Relations] statute; however, before a court can issue a declaratory judgment the underlying claim for declaratory relief must present an actual controversy between parties having adverse legal interests of sufficient certainty and immediacy; complaint dismissed.—International Longshoremen's Ass'n. v. Seatrain Lines, Inc., 212 F. Supp. 653 (655).

Summary judgment procedure is appropriate where sole question for adjudication is one of law, namely, the legal effect and enforceability of agreement between plaintiff railroad and defendant shippers that their tariff dispute be governed by outcome of a suit by plaintiff in another district court, involving the identical question. Plaintiff's suit is analogous to situation where parties seek collaterally to attack a judgment rendered in another forum; clearly, if the original forum had jurisdiction over both the parties and the subject matter, collateral attack would fail ab initio without reference to what the new forum's views might be on the merits of the controversy.—Western Maryland Ry. Co. v. Continental Grain Co., 219 F. Supp. 126 (127, 128, 130).

Moreover, both sides agreed that the question should be disposed of by adjudication of a single case; no-one should be permitted to gamble on the result of a judgment and then repudiate the result when the judgment is adverse (citing 1 F. 2d 465). Agreements of type under review should be encouraged if otherwise valid and not contrary to any specific statutory provision, and refusal to enforce agreements which would promote expeditious disposition of multiple claims would be incompatible with policy of the Federal Rules of Civil Procedure. Plaintiff has failed to sustain its burden of showing why the agreement should not be enforced; defendants' motion for summary judgment, granted.—Id., p. 131.

In action seeking summary judgment, or dismissal, with respect to cease and desist order previously issued by the [Federal Trade] commission, the court should not deny the commission the reasonable discretion which necessarily must rest in it in proceedings to enforce such order so long as judicial rights of plaintiff are safeguarded and so long as it is not deprived of an available forum in the event any of its rights are transgressed. Plaintiff cannot be harmed until an enforcement order is entered; and if it is denied the right of due process, those questions may be raised before the Court of Appeals. Plaintiff's motion for summary judgment denied.—Nash-Finch Co. v. F.T.C., 233 F. Supp. 910 (916-7).

That bill of lading included, although not expressly written into it, requirement of rule 27 of uniform classification that owner unload shipment moving at c.l. rate did not create a contract of indemnity entitling carrier to recover from consignee (third-party defendant) any sums awarded its employee in his suit to

recover for injuries sustained while unloading car and allegedly due to carrier's negligence. Nothing in language of that rule could be reasonably interpreted to impose on consignee an indemnity liability for an accidental injury to its employee where the employee is covered by workmen's compensation and that act insulates the employer from common law liability therefor. Consignee found entitled to summary judgment and third-party complaint dismissed.—Halstead v. Norfolk & W. Ry. Co., 236 F. Supp. 182 (184, 187-9).

Since it is the consensus of federal decisions that a carrier may not waive, or be estopped from asserting, the bill-of-lading requirement for shipper's filing of a written claim for damage to a shipment, and plaintiff's supplemental invoice showing estimated cost of repairs to machine damaged in transit was not a claim sufficient to apprise defendant that plaintiff was presenting a claim for damages and expected recompense, and no other writing or written claim was presented, defendant's motion for summary judgment is granted.—Lucas Mach. Div., New Britain Mach. Co. v. New York Cent. R. Co., 236 F. Supp. 281 (282-3).

See also Auto Drive-Away Company of Hialeah, Inc. case, §222(b), n. 30; Garrett Freightlines, Inc., v. United States, Government Traffic, 49 USC §65, n. 10; Georgia S. & F. Ry. Co. v. Atlantic Coast Line R. Co., 49 USC §1(20), n. 17.

Section 2202. Further relief.[Unchanged. See vol. 15, p. 12351.]

INJUNCTIONS: THREE-JUDGE COURTS

Chapter 155.—Title 28

Section 2284. Three-judge district court; composition; procedure.—[Unchanged. See vol. 14, p. 11733; vol 19, p. 16034.]

Notes of Decisions

Volume 15—p. 12351; Volume 16—p. 12997; Volume 17—p. 13711.

9. Validity under Federal Constitution, of State order.—[Vol. 15].—Inasmuch as plaintiffs seek an injunction, on Federal constitutional grounds, to restrain enforcement, operation, and execution of State segregation statutes by restraining action of State officers in enforcement thereof, the proceedings are properly heard by a court of three judges under 28 USC §2281. Thus, the court may dispose of all issues raised in the cases.—United States v. Lassiter, 203 F. Supp. 20 (24).

As the complaint alleges that State statutes involved are unconstitutional in that they constitute direct regulation of interstate commerce by the State contrary to the federal constituion, and that orders and actions of State officials complained of, under color of authority of those statutes, is an unlawful and unconstitutional interference with, and obstruction of, licensed and authorized interstate commerce, a district court composed of three judges, under 28 USC §2284, has jurisdiction. That it is determined, after final submission and upon consideration of briefs and argument, that the statute does not apply, and that constitutional question should not therefore be ruled, does not oust the three-judge court of jurisdiction.—Great Northern Ry. Co. v. Thompson, 222 F. Supp. 573 (579-80, 587).

Evidence conclusively establishes that actions taken, or threatened, by defendant offi-

cials of North Dakota directly affect both the business operations of plaintiff and its rights under its interstate common-carrier authority, and infringe personal, constitutional rights of plaintiff's drivers; in addition, they have the effect of nullifying plaintiff's interstate operating rights, and of illegally preventing the interstate commerce in issue unless and until plaintiff secures a certificate of necessity and convenience from the Public Service Commission of the State; such actions have and will in the future cause irreparable damage to plaintiff. Remedies available to plaintiff in the State courts, which were suggested by defendants' counsel, are inadequate and would be totally ineffective; plaintiff is entitled to permanent injunctive relief against all defendants as sought.—Id., pp. 584-6, 587.

10. State orders, generally.—[Vols. 16, 17].—When plaintiff railroad, after Pennsylvania commission had denied its application to discontinue a pair of trains between Harrisburg, Pa., and Hagerstown, Md., filed discontinuance notice with Interstate Commerce Commission under §13a(1) of Interstate Commerce Act, jurisdiction over the matter vested exclusively in ICC, and the railroad had authority, upon ICC's conclusion not to investigate, to discontinue the trains in accordance with the notice. Pennsylvania commission's subsequent order directing the railroad to restore and continue service in compliance with its prior order was therefore completely abortive; that invalid order could not on any theory be res judicata, and ICC was under no obligation to give it full faith and credit. Comity between State and Federal authority is not at issue, and the court has found §13a(1) to be constitutional. Defendants are therefore permanently enjoined, individually and as members of the Pennsylvania commission, from pursuing any of the remedies provided by Pennsylvania law to compel plaintiff to reinstate the discontinued trains.—Pennsylvania R. Co. v. Sharfsin, 240 F. Supp. 233 (236-7)*.

Suit seeking to enjoin enforcement of State commission order holding that plaintiff was engaging in both intrastate and interstate for-hire transportation of crude oil, and ordering it to cease and desist therefrom until it obtained proper operating authority, is not a proper case for convening a three-judge district court. Under §2281 a three-judge court is necessary when an injunction is sought on ground of federal unconstitutionality of a State statute; an agency determination, being primarily a finding of fact, is not the kind of an order contemplated by that statute. Since plaintiff's attack is directed against what the State commission has done—not against what the statutes authorize it to do—there is no substantial claim of unconstitutionality requiring a three-judge court. The case must be left for disposition by the single judge to whom it was originally assigned.—McWood Corp. v. State Corp. Commission of N. M., 237 F. Supp. 963 (964-5).

INTERSTATE COMMERCE COMMISSION ORDER; ENFORCEMENT AND REVIEW

Chapter 157.—Title 28

Section 2321. Procedure generally.—[Unchanged. See vol. 14, p. 11734, vol. 15, p. 12352, vol. 19, p. 16034].

Historical Note

The commission recommends that procedures for review of commission orders be changed to provide that (a) review be upon appeals to the U.S. Court of Appeals in all cases where a special three-judge court is presently used, (b) review be permitted in any judicial circuit wherein a party or any of the parties filing request therefor have their residence or principal office, (c) final

review by the U.S. Supreme Court be only by petition for a writ of certiorari, (d) review proceedings be brought against the commission as defendant, rather than the United States, with the Department of Justice to have the right to intervene in any proceeding, and (e) that certain other changes be made with respect to time within which a petition for review must be filed, form of such petition, service of notice of appeal, and (where several appeals are taken from the same commission order) determination of venue and consolidation and handling of appeals.—Annual Report, 1963, p. 16, Annual Report, 1964, p. 73-4.

Section 2322. United States as party.—[Unchanged. See vol. 14, p. 11734; vol. 15, p. 12352.]

Notes of Decisions

Volume 17—p. 13711.

See Historical Note to §2321, above.

1. In general.—[Vol. 17].—In view of provisions of this section, §§16(12) and 222(b) of the Interstate Commerce Act, and the Elkins Act, relating to enforcement of Interstate Commerce Commission orders, there is no serious question as to the Government's standing to bring suit against interstate carriers for injunctive relief against racial segregation in rail and bus terminals. By implication, those statutes provide a basis for action against city and city officials who, through maintaining signs on sidewalks adjacent to the terminals which indicate that those facilities are separated on basis of race, unlawfully effect segregation therein. Statutory power to enforce substantive provisions of law must carry with it the power to make such enforcement effective; enforcement can be made effective only if relief is granted against noncarrier defendants who are causing the carriers to violate the law. Injunction should be issued against all defendants.—United States v. City of Jackson, Miss., 318 F. 2d 1 (8-9, 16-17)*.

The United States is an indispensable party to a suit for review of adverse orders of the commission in plaintiffs' application proceedings, and naming of "Interstate Commerce Commission, an agency of the United States Government" does not make the United States a party; argument that the commission and "its parent proprietorship" are one and the same is untenable; despite the court's reluctance to dismiss a complaint filed by a group of laymen on their own behalf, it must rule in accordance with the law as declared by Congress and as stated by the Supreme Court; complaint dismissed, without prejudice.—Cox v. I.C.C., 207 F. Supp. 957 (959)*.

The United States is not an indispensable party to action for declaratory judgment as to common meaning and connotation of terminology in plaintiff's interstate motor carrier certificate. Substantial authority exists for the proposition that the United States may not be sued under the Declaratory Judgments Act without its consent; and, although 28 USC §§2321 and 2322 require that actions to enforce, suspend, annual, or set aside any order of the Interstate Commerce Commission shall be brought against the United States, those statutes do not govern in declaratory judgment action in which plaintiff does not seek to have the court do any of those things.—W. J. Dillner Transfer Co. v. McAndrew, 226 F. Supp. 860 (863)*.

Since the Attorney General, representing the United States, opposes proposed railroad merger, the United States is realigned as a party plaintiff in action to set aside and enjoin the commission's orders approving merger of Atlantic Coast Line into SeaBoard Air Line.—Florida East Coast Ry. Co. v. United States, 242 F. Supp. 14 (17)*.

The United States is not only an indispensable party to, but its absence as a party is a fatal jurisdictional defect in, stockholder's derivative action to set aside railroad corporation's sale of owned stock, on ground that purchasing company (Alleghany Corp.) had failed to comply with registration requirements of the Investment Company Act, when, although an attack on Interstate Commerce Commission orders specifically regu-

lating Alleghany as a common carrier was involved, the action was not brought against the United States as required by the statute. Requirements for review or enforcement of ICC orders are not mere matters of procedure; they were imposed by Congress as a matter of policy in order to protect the public interest in the specialized area entrusted to the commission's jurisdiction; and a commission order cannot be attacked unless those requirements are met.—Schwartz v. Bowman, 244 F. Supp. 51 (66-9)*.

As required by law, the United States was named a defendant in suit to set aside Interstate Commerce Commission's order, as was the commission; however, the United States, admitting that "the order of the Interstate Commerce Commission is invalid," was treated as an additional plaintiff for purposes of brief and oral argument.—Louisville & N. R. Co. v. United States, 268 F. Supp. 71 (73)*.

Section 2323. Duties of Attorney General; intervenors.—[Unchanged. See vol. 14, p. 11735, vol. 15, p. 12352.]

Notes of Decisions

Volume 4—p. 3133; Volume 7—p. 6083; Volume 12—p. 10577; Volume 14—p. 11735; Volume 15—p. 12352; Volume 17—p. 13711; Volume 19—p. 16034.

See Historical Note to §2321, above.

2. Parties who may intervene.—[Vols. 14, 15, 17, 19].—On review by the full court, a single judge of three-judge court properly permitted motor carrier association to intervene as a party plaintiff in suit brought by one of its members to set aside an order of the commission; provisions of §2323 clearly permit intervention by associations interested in such a controversy. Defendant's objection to the association's intervention on ground that it was not a party to the proceeding before the commission, overruled.—United Transports, Inc. v. United States, 214 F. Supp. 34 (38)*; and exhibit consisting of affidavit by the association's traffic manager, which is offered for sole purpose of establishing the association's interest in the proceeding and not to supplement the record before the commission in order to secure a trial de novo, is admissible for that limited purpose only.—Id., p. 38.

3. Parties before commission may attack the order in courts.—[Vols. 4, 7, 12, 15, 17].—See H. Messick, Inc. v. Baggett Transp. Co., 28 USC §1398, n. 4; National Motor Freight Traffic Ass'n., Inc., v. United States, 28 USC §2325, n. 14.

Section 2324. Stay of Commission's order.—[Unchanged. See vol. 14, p. 11735.]

Notes of Decisions

Volume 16—p. 12998; Volume 19—p. 16034.

See Historical Note to §2321, above.

10. Stay of operation of commission's order.—[Vols. 16, 19].—In arguing that reopening of docket No. 29885 renders unreasonable the application of the basis of divisions therein prescribed to rates involved in the case under review, plaintiffs in effect ask the court to annul or stay the commission's order on assumption that the commission will decide

the reopened proceedings in their favor, that the decision will be made retroactive, and that if challenged in the courts it would be upheld; those assumptions cannot reasonably be made. In addition, to suspend operation of the order until the reopened proceedings are concluded would be tantamount to reversal by the court of the commission's refusal to consolidate the instant proceeding with the reopened docket No. 29885, which was clearly within the commission's discretionary power.—Boston & M.R. v. United States, 208 F. Supp. 661 (677)*.

Section 2325. Injunction; three-judge court required.—[Unchanged. See vol. 14, p. 11735.]

Notes of Decisions

Volume 4—p. 3139; Volume 7—p. 6085; Volume 10—p. 8429; Volume 11—p. 9767; Volume 12—p. 10578; Volume 13—p. 11215; Volume 15—p. 12353; Volume 16—p. 12998; Volume 17—p. 13712; Volume 18—p. 14745; Volume 19—p. 16035.

See Historical Note to §2321, above.

Jurisdiction of Courts to Retain Enforcement of Commission's Orders

7. Jurisdiction of district court.—[Vols. 4, 7, 10, 12, 14, 16, 18, 19].—

Derivative stockholder's action under the Urgent Deficiencies Act, following dismissal of similar action (under the Investment Company Act) in 244 F. Supp. 51, affd. 360 F. 2d 211, cert. denied 385 US 921, for lack of subject matter jurisdiction, failed to state a cause of action cognizable by the court as constituted. Complaint seeks recision of Chesapeake & O. R.'s sale of its New York Central R. stock to Alleghany Corp. (a registered investment company which had been made subject to the Interstate Commerce Act when it was authorized to acquire control of C&O) because at the time of considered transaction Alleghany, having secretly sold its C&O stock, was again an investment company and had not registered under the Investment Company Act. The only claim which the district court, constituted under the Urgent Deficiencies Act, can determine is that an ICC order is invalid; therefore, plaintiff's express disclaimer of any attack on an ICC order would seem to remove its claim of jurisdiction under that statute.—Schwartz v. Alleghany Corporation, 282 F. Supp. 161 (162-3)*.

Argument that Alleghany's sale of its C&O stock, which plaintiff alleges was a condition precedent to sale of the NYC stock in issue, automatically terminated its subjection to ICC regulation was rejected in the cited decision wherein the court found that the commission's order subjecting Alleghany to its jurisdiction was not terminated until the year following the one in which considered transactions took place. Accordingly, since plaintiff apparently seeks a holding that in spite of the commission ruling, defendant was subject to registration requirements of the Investment Company Act once it disposed of its C&O stock, but does not attack the basis of the rulings that it was still subject to ICC control, he has not stated a claim within the court's jurisdiction since, as convened the court is concerned only with the validity of the commission's rulings; complaint dismissed.—Id., pp. 163-4.

Inasmuch as the court has jurisdiction to review the commission's determination in proceeding on railroad's proposed discontinuance of passenger trains, the District Judge acted properly in entering considered temporary restraining order before the commission's order became final. The court agrees with the Judge, after considering the evidence and plaintiffs' arguments, that effective judicial review would be impaired, and irreparable harm to plaintiffs and the public would result, if the trains were allowed to be discontinued while petitions for reconsideration

were pending before the commission; thus, the railroad was properly restrained from discontinuing those trains until a final commission order is issued, or until further order of the court. Therefore, railroad's motion to dissolve the temporary restraining order, on ground that the court lacks authority to review such passenger train discontinuances, is denied.—City of Williamsport v. United States, 273 F. Supp. 899 (901-4)*.

As stated in 251 F. Supp. 421, thrust of 1958 amendment to the Interstate Commerce Act, which became §13a, was relief of hard pressed railroads from heavy losses from passenger train operations by giving the roads the option of having the commission, rather than State bodies, pass on discontinuance of interstate passenger train operations; however, there is no convincing evidence that Congress intended the unusual and unfair result of granting judicial review of the commission's determination solely to the roads, and not to opposing parties. A road can obtain review and reversal of an order wrongfully granted; and, if an order is wrongfully refused, ordinary principles of review, as well as fairness, call for judicial review at the instance of opposing parties. Congress having set statutory standards for the commission, its decision not to order continuance, as well as a decision to order it, should be reviewable. Three-judge district court has jurisdiction in State's action to enjoin and set aside, or to remand, commission reports and orders permitting discontinuance of considered passenger trains.—State of Vermont v. Boston and Maine Corp., 269 F. Supp. 80 (81, 83-4)*.

Section 1336 confers on the district courts jurisdiction of civil actions with respect to "any order of the Interstate Commerce Commission"; and Congress, in §17(6) of the Interstate Commerce Act, authorized the commission to adopt rules regulating applications for rehearing. Under the commission's Rules of Practice, the division's denial of plaintiff's petition for reconsideration of the order under attack purported to clothe that order with administrative finality, and all parties concede that the administrative process has come to an end; thus there is not the utter lack of jurisdiction which the court should notice sua sponte. Nor does §17(9) operate to forbid judicial review of minor orders denied administrative review, though final; the court has jurisdiction of the parties and the subject matter.—Malone Freight Lines, Inc. v. United States, 204 F. Supp. 745 (753-4)*. [But see dissent.]

Administrative determinations must have a basis in law and must be within the authority granted. It is a judicial function, not an administrative one, to determine the limits of the statutory power of an administrative agency.—J. B. Montgomery, Inc. v. United States, 206 F. Supp. 455 (458)*.

Though the legal validity of a contract subject to the commission's approval under §5 is a judicial question for the courts, not the commission, the function of the reviewing court, in a suit challenging the commission's order approving the transaction on modified terms, is no more extensive than that of the commission in that regard.—Walker v. United States, 208 F. Supp. 388 (396)*.

Although injunctive order of federal district court prevented carriers from charging reduced rate lawfully on file with, and approved by, the commission during the time it was in effect, such order did not affect validity of the lawful rate during that period. A stay order does not adjudicate rights, but merely preserves the status quo; and, while courts do not have power to establish rates, the restraining order having been issued, it could not be ignored. That defendants were prevented from collecting the reduced rate while the stay order was in effect, however, does not mean that they may retain overcharges they were required to collect during that period. To permit such retention would result indirectly in establishing a rate by court order for the period; courts are not entitled to engage in any semblance of ratemaking whatsoever, either direct or indirect.—Humble Oil & Refining Co. v. Great Northern Ry. Co., 212 F. Supp. 747 (752-6).

Though complaint seeking to set aside the commission's order approving certain reduced all-rail rates presented a prima facie case for adjudication by a three-judge court [which was duly constituted in accordance with prayer therein] and a show-cause and temporary restraining order was issued, that matter has now become moot; and relief now

sought by way of order to show cause why the earlier show-cause order and the temporary restraint therein should not apply to subsequently filed rates on the same commodity between two of the same points is not within jurisdiction of the district court because the commission's refusal to suspend the most recently filed rates is a matter exclusively within its sound discretion and is not susceptible of review by the court.—Seatrain Lines, Inc. v. United States, 233 F. Supp. 40 (45, 46, 47).

In action to set aside and remand the commission's denial of plaintiff's application for motor carrier certificate, plaintiff asks, in the alternative, that the court instruct the commission to grant the requested authority; however, such alternative prayer for relief exceeds the court's scope of authority. Reviewing courts have no authority to order an administrative body, such as the commission, to perform a discretionary act; nor does the court have authority to perform the act itself.—Watkins Motor Lines, Inc. v. United States, 243 F. Supp. 436 (438, note)*.

Request of the United States, acting through the Attorney General, that proposed railroad merger be permanently enjoined is denied when, while a three-judge district court has power to enjoin the commission's orders approving the merger, it is doubtful if such court has power permanently to enjoin the merger. Functions of the reviewing court are limited; requested permanent injunction would require the court to go beyond the present record and to find that upon no set of facts which applicants might present could proposed merger be found consistent with the public interest. Resolving such considerations would require extensive facilities, expert judgment and considerable knowledge of the transportation industry; wisdom and experience of the commission, not of the courts, must determine whether proposed transaction is consistent with the public interest.—Florida East Coast Ry. Co. v. United States, 242 F. Supp. 14 (23-4)*.

See also H. Messick, Inc. v. Baggett Transp. Co., 28 USC §1398, n. 2; Naph-Sol Refining Co. v. United States, 49 USC §15(7), n. 1; United States v. Saskatchewan Minerals, §17(6), n. 10.

8. Exclusive jurisdiction of district court of three judges.—[Vols. 4, 7, 10].—Disposition of an action to enjoin railroads from making proposed rate changes effective, the statutory suspension period having expired, pending the commission's decision in the suspension proceeding would seem to require some consideration of claim that proposed rates are unreasonable; such a procedure would permit a single judge to pass before final commission action upon the question of reasonableness of a rate, which the statute expressly entrusts to a court of three judges reviewing the commission's completed task.—Arrow Transp. Co. v. Southern Ry. Co., 372 U.S. 658 (669-71)*.

Where Congress has provided administrative and judicial procedures which are designed to permit agency expertise to be brought to bear upon a particular problem, the prescribed procedures are exclusive; this is true even though Congress may not have expressly provided for exclusiveness of such procedures. When the railroad did not contest validity of the commission's emergency car service order, by seeking administrative review pursuant to §17(6) and §17(9) of Interstate Commerce Act, until after commencement of action against it in single-judge district court for civil penalties for alleged violations of the order, the district judge had no authority to consider railroad's challenge to the order's merits. Provisions of governing statutes were intended to confine presentation of such challenges to a specially convened three-judge court after the carrier has filed, and the commission has ruled on, a petition for "rehearing, reargument or reconsideration"; reversed and remanded with instructions.—United States v. Southern Ry. Co., 380 F. 2d 49 (53-5, 57)*.

Where Congress has provided administrative and judicial procedures which are designed to permit agency expertise to be brought to bear upon particular problems, such as those applicable to all suits to enforce, enjoin, suspend or set aside orders of the commission, the prescribed procedures are exclusive; this is true even though Congress may not have expressly provided for exclusiveness of such procedures. Therefore, railroad challenging validity of the commission's car distribution Service Order (issued

during period of acute car shortage) is required to first seek administrative relief from an appellate division of the commission and, if dissatisfied with the administrative review, to seek judicial review by a three-judge district court. In action against railroad to recover penalties for alleged violations of the car service order, district judge had no power to inquire into validity of the order, although the attack was collateral in nature, when the railroad had not exhausted its administrative remedies by seeking review by a three-judge court. Judgment set aside and cause remanded.—United States v. Southern Ry. Co., 364 F. 2d 86 (91-3, 96).

9. Three-judge court.—[Vols. 4, 7, 10, 14-19].—Sections 2284, 2321-2325 of 28 USC provide that an order of Interstate Commerce Commission may be set aside or annulled only by a three-judge court convened pursuant to §2284, and a single district judge has both the power and the duty to determine whether a three-judge court should be convened; this should not be done if the complaint is jurisdictionally defective.—Cox v. I.C.C., 207 F. Supp. 957 (959)*.

When an application for a statutory three-judge court is addressed to a district court, the court's inquiry is limited to determining whether the complaint at least formally alleges a basis for equitable relief, and whether the case presented otherwise comes within requirements of the three-judge statute. Manner in which a three-judge court must function once it has been convened is governed by §2284; that section assumes jurisdiction in the district court over the controversy, and its provisions come into play only when that jurisdiction exists and after a three-judge court has been convened. It remains for the judge who is asked to convene a three-judge court to determine whether jurisdiction exists in the district court, and if he properly concludes that there is no jurisdiction, his power to dismiss the complaint, as well as to deny the motion to convene a three-judge tribunal, is in no way circumscribed by §2284.—Seatrain Lines, Inc. v. United States, 233 F. Supp. 40 (46).

Complaint seeking to set aside the commission's order approving certain reduced all-rail rates disclosed a prima facie cause of action requiring a three-judge court for adjudication, and the single judge to whom the case was assigned ordered defendants to show cause why that procedure should not be followed, incidentally staying operation of the commission's order, and provided for convening of the three-judge court. Subsequently, plaintiffs by affidavit represented that the railroads (intervening defendants) had filed new reduced rates on one of the same commodities between two of the same points, which the commission had declined to suspend, and upon their application the single judge directed defendants to show cause why the original show-cause order, including the temporary restraint, should not apply to and restrain the taking effect of the new rates. That new issue, which should have been presented by a supplemental or new separate complaint, evoked the temporary restraining order embodied in the order to show cause, which is clearly within authorization of §2284(3).—Id., pp. 42-4, 46-7.

Upon return of the order to show cause it appeared for the first time that the matters presented by the original complaint had become moot, and that the court, whether consisting of a single judge or of three judges, is without jurisdiction to grant the relief now sought. The matter at present before the court is an order to show cause why relief not prayed for in the complaint should not be granted to plaintiffs in the pending action, which has been referred to a three-judge court under the statute. Language of §2284(5) authorizing a single judge to "perform all functions, conduct all proceedings except the trial, and enter all orders required or permitted by the rules of civil procedure" is authorization for disposition of the order to show cause by a single judge, despite the fact that a three-judge court has been constituted. Order to show cause and restraint therein contained as to the new rates is therefore dissolved for want of jurisdiction, but whether the pending action should be dismissed for mootness is left to the three-judge court.—Id., p. 47.

11. Suits to restrain, set aside, annul, suspend, or enforce commission orders.—[Vols. 4, 7, 10, 12-17, 19].—Motions of defendant and intervening defendants for stay of proceedings in action seeking to enjoin and set

aside the commission's orders in railroad merger proceedings, pending outcome in a similar suit that was instituted earlier in adjoining State, granted. Venue language of 28 USC §1398 does not preclude granting the stay sought in view of the Supreme Court's statement, in 282 US 760, that it is for the discretion of the District Court in which such a suit is brought to determine whether it should be permitted to continue or proceedings therein should be stayed, pending outcome of an earlier suit, in order that there not be a multiplicity of suits without substantial reason. In addition, both the Supreme Court and the Court of Appeals have approved the rule that "the court which first has possession of the subject must decide it." Therefore, proceeding is stayed until after date of final hearing in earlier suit pending in court in adjoining State, or until the court's further order, with leave to any party or amicus curiae to seek modification of such stay should future circumstances so justify.—Borough of Moosic v. United States, 272 F. Supp. 513 (517-8)*.

Since challenged bus operations through Air Force Base are lawfully conducted under a valid certificate therefor, and are not dependent upon the commission's administrative ruling concerning service at military establishments which can be entered within one aerial mile of an authorized route, validity of that administrative ruling is not justiciable in action to set aside and enjoin the commission's order authorizing the operations.—Carolina Scenic Stages v. United States, 202 F. Supp. 919 (922)*.

Although the court sustains the commission's conclusion, in conversion proceeding initiated by it under §212(c), that plaintiff should be converted from a contract to a common carrier, there is considerable merit to argument that plaintiff's failure to question that conclusion in its petition for reconsideration by the entire commission now precludes it from raising that issue in court.—P. Saldutti & Son, Inc. v. United States, 210 F. Supp. 307 (313)*.

In action to set aside the commission's report and order, plaintiffs' argument that decision of another district court in an essentially similar proceeding was "incorrect, unjustified and should not be accepted by this Court" is rendered untenable by the Supreme Court's affirmance of that decision.—Chief Freight Lines Co. v. United States, 230 F. Supp. 79 (81)*.

Where plaintiff's attack, in proceeding for review of the commission's order, is directed against conclusions reached by the commission on the evidence, the order may be set aside only if it is not supported by substantial evidence, or is arbitrary or capricious. Since plaintiff failed to make the evidence before the commission a part of the record before the court, the commission's findings must be accepted as conclusive; and, as the commission's findings support its order, the complaint is dismissed.—Lynden Transfer, Inc. v. United States, 237 F. Supp. 124*.

In action to enjoin and set aside report and order of the commission in rail-highway grade-crossing investigation, entire record of the proceedings before the commission was admitted in evidence, over defendants' objection to its materiality.—American Trucking Associations, Inc. v. United States, 242 F. Supp. 597 (601)*.

See also New York Central R. Co. v. United States, §14(1), n. 1; Shelby Biscuit Co. v. United States, §203(c), n. 3.

12. Collateral attack.—[Vols. 4, 7, 10, 11, 13, 16-18, 19].—The court has no jurisdiction to annul or set aside Interstate Commerce Commission orders, which specifically make Alleghany Corp. subject to its regulation as a common carrier, in stockholder's derivative action to set aside railroad corporation's sale of owned stock because the purchasing company (Alleghany) had failed to comply with registration requirements of the Investment Company Act. Congress established an exclusive method for review or enforcement of ICC orders in the Urgent Deficiencies Act, in order to insure that the public interest as well as interests of all parties concerned would be protected, and compliance therewith has been strictly enforced. None of the statutory requirements have been met in the case at bar; the court has no power to consider and determine the question which is basic to relief under Investment Company Act—the validity of the ICC orders, since validity of those orders can be tested only in appropriate action under the Urgent Deficiencies Act.—Schwartz v.

Bowman, 244 F. Supp. 51 (66-9)*.

See also United States v. Great Northern Ry., 28 USC §1336, n. 2.

13. Orders of commission.—[Vols. 4, 7, 10, 12-14, 16-19].—The court does not sit de novo in cases dealing with orders of the commission; Congress has delegated exclusively to the commission a wide latitude of discretion in determining public convenience and necessity, and the scope of review by the court is limited by the doctrine of administrative finality. Only questions affecting constitutional power, statutory authority, and the basic requisites of proof can be raised; if these legal tests are satisfied, the commission's order becomes incontestable.—Edwards Motor Transit Co. v. United States, 201 F. Supp. 918 (920-1)*.

Since the commission's order permitting Southern Pac. Co. to discontinue certain intrastate passenger trains is justified and supported by the findings in the commission's report, the order must stand; complaint dismissed.—People of State of California v. United States, 207 F. Supp. 635 (636)*.

The commission's order is the product of expert judgment which carries a presumption of validity, and he who would upset the order under the act must make a convincing showing that it is invalid because unjust or unreasonable in its consequences. However, though presumed valid, the order may be annulled if shown to rest on a misconstruction of the act or on inadequate or unsupported findings of fact; the commission's expertise is not sufficient by itself; findings supported by substantial evidence are required.—Boston & M. R. Co. v. United States, 208 F. Supp. 661 (670)*.

Although appeal calls in question an opinion of the commission giving its general interpretation of the statute, rather than a definitive order applicable to any particular party, the close similarity of the matter involved to that considered in 351 US 40 requires that jurisdiction be assumed and the matter further investigated.—Lester C. Newton Trucking Co. v. United States, 209 F Supp. 600 (602)*.

In its interpretive order the commission set out three criteria to be applied in future in determining the exempt or nonexempt status of agricultural products in general. Each of the specific frozen foods mentioned in the proceedings before the commission comes within the first criterion, and insofar as that criterion determines the status of those commodities it is such an "order" as to form the basis of the present action. However, insofar as that criterion refers to the status of commodities not before the commission or considered by it, it is not such an "order" as to form the basis of injunctive proceedings or proceedings in nature of appeal, but rather an indication of probable future course of conduct should occasion arise. Few of the commodities involved are embraced in either of the other two criteria, and no substantial testimony concerned either; therefore, questions arising from the criteria and their application to commodities not considered by the commission should be directly presented upon a hearing on a cease-and-desist order if such occasion arises.—Id., pp. 605-6.

Reviewability of an order of the commission does not depend on the form which it takes, whether affirmative or negative, but on whether it determines rights or obligations from which legal consequences may flow; regard must be had to the immediate and practical impact it will have on affected carriers and shippers. Where the immediate and practical effect of an order is to subject a carrier to risk of civil or criminal sanctions if he continues to operate in disregard of the order or of the determinations expressed therein, the order is reviewable even though purely negative in form and even though the shipper seeking review was not a party to the agency proceedings which resulted in the order being issued. [351 US 40.]—Ballentine Produce, Inc. v. United States, 209 F. Supp. 679 (681)*.

But where the order complained of is a mere abstract declaration, where it does not command the carrier to do or refrain from doing anything, where it neither grants nor withholds any authority, privilege, or license, where it does not extend or abridge any power or facility, where it does not subject the carrier to any liability or change its existing or future status or condition, and where it determines no right or obligation, it is not reviewable; such an order does not tender any judiciable controversy.—Id., p. 681.

The commission's order denying petitions

for declaratory order concerning "grandfather" rights to transport certain frozen vegetables is not reviewable, since it imposed no duty or obligation, conferred no right which did not exist before, and subjects plaintiff to no penalty to which it was not subject before; it involved no affirmative interpretation of the law and no classification of commodities as exempt or nonexempt either before or after the Transportation Act of 1958, but merely denied the petitions on ground that the relief sought was unnecessary in view of prior agency interpretations. Plaintiff has not been adversely affected by the challenged order, and although it may have been damaged by virtue of decision in 81 MCC 649, that proceeding has been expressly excluded from the instant litigation.—Id., pp. 681, 682.

Neither the commission's order giving notice that it had concluded not to enter upon an investigation of proposed train discontinuance, nor its order denying petition for reconsideration of such decision, qualifies as an "order" subject to judicial review within meaning of 28 USC §2325; neither action was final, both were completely gratuitous and in effect of no more technical significance than informal statements of commission policy.—Sludden v. United States, 211 F. Supp. 150 (154)*.

The commission's report and order finding that carrier-made rates were not just and reasonable, and requiring them to be canceled, is a determination that the railroads could not impose certain charges and thus is an order that determines a "right or obligation" so that "legal consequences" will flow from it. Such an order is reviewable.—Pennsylvania R. Co. v. United States, 216 F. Supp. 199 (200-1)*.

In order issued under §211.1(c)(8) of its deviation rules, authorizing plaintiff's competitor to use a shorter alternate route between two cities, the commission received no evidence and made no findings with respect to any of the criteria spelled out in that rule, but merely found generally that requirements of the deviation rules were met; there is thus no basis for ascertaining whether the order is supported by facts establishing that the reasonable standards prescribed by the regulations have been met, and whether the order has a rational basis in fact. While the court may not substitute its evaluation of the evidence for that of the commission, common sense and fair play require that the ground upon which an administrative agency acts be clearly disclosed and adequately sustained. Order set aside and the case remanded for further proceedings.—Greyhound Corp. v. United States, 221 F. Supp. 440 (444-5)*.

The findings and orders of the commission are presumptively valid; and function of the court, in action to set aside orders granting motor carrier authority to intervening defendants, is exhausted when there is found to be a rational basis for the commission's conclusions. Therefore, since the commission's findings and conclusions are supported by substantial evidence of record, are not arbitrary, but are adequate and in accordance with the law, the court must affirm its decisions and enforce the orders; commission orders based on adequate findings and supported by substantial evidence cannot be upset.—United Van Lines, Inc. v. United States, 266 F. Supp. 586 (588-9)*.

See also DeCamp Bus Lines case, 49 USC §17(9), n. 2; National Van Lines, Inc., v. United States, §17(9), n. 2.

14. Parties entitled to restrain enforcement of commission's orders.—[Vols. 4, 7, 10, 12-19].—Associations of motor carriers, authorized under §5a of Interstate Commerce Act, perform significant functions in administration of that act, including representation of member carriers in proceedings before the commission; since individual member carriers of appellant associations will be aggrieved by the commission's order approving forwarder volume rates, and since appellants are proper representatives of their members, they have standing to challenge the validity of the commission's order in the district court.—National Motor Freight Traffic Assn. v. United States, 372 U.S. 246 (247)*.

Plaintiff has no right to complain that, under modified control transaction approved by the commission, it is acquiring carrier's controlling stockholder who, as to either the note to be given plaintiff by the carrier or the cash payment, ultimately bears the risk and will end up owning the noncarrier involved. Since the court regards the report in the finance docket (authorizing issuance of the note) as a

supplemental and integral part of the control proceeding under review, whatever attack plaintiff makes as to the report in the latter is available to him as to the former, even though no separate appeal has formally been taken. Reading all the commission reports together, practically all points urged by plaintiff wash out, and it is unnecessary specifically to consider the threshold dispute as to whether he has standing to challenge the commission's orders; it may be assumed, without deciding, that he does.—Walker v. United States, 208 F. Supp. 388 (393, 394)*.

Although validity of certificate under attack was upheld by a different district court in 205 F. Supp. 831, instant plaintiff was not a party to that case and is not bound by the result.—Sloan's Moving & Storage Co. v. United States, 208 F. Supp. 567 (571)*.

Regulated carriers for hire of fresh meat and other packinghouse products, some of whom participated as active parties throughout the commission's proceedings, including the phase in which order under review was entered, are parties in interest with standing to maintain action challenging validity of that order; they have lost and are continuing to lose substantial amounts of traffic in considered commodities to private carriers. Since the commission's erroneous construction of the statute authorizes unlawful transportation by private carriers, plaintiffs have standing to sue to the end that the commission may be guided in the future by the court's construction of the act.—Atchison, T. & S.F. Ry. Co. v. United States, 209 F. Supp. 35 (45)*.

The broad issue of the commission's statutory authority over substituted rail-for-motor freight service, as raised by intervening forwarders, is not properly part of proceeding to set aside the commission's findings and order holding plaintiffs' substituted service to be unlawful and requiring cancellation of rates proposed thereon. Interveners are in no way affected by the commission's order and have no interest in setting it aside.—Strickland Transp. Co. v. United States, 219 F. Supp. 618 (620)*.

Since plaintiff, in action seeking to temporarily enjoin reparation orders issued by the commission against Baltimore & O. R. Co., need not pay any of the reparations in issue, it cannot be damaged by the commission's orders. Plaintiff cannot be held in contempt or be forced to make such reparation until a shipper to whom reparations are due brings a suit under §16(2) of the Interstate Commerce Act and prevails therein. Granting of a temporary injunction is justified only where there is a showing of irreparable injury during pendency of the action; denied.—Central Vermont Ry., Inc. v. United States, 231 F. Supp. 967 (968)*.

Plaintiff labor unions and motor carrier association have shown no ground entitling them to seek judicial relief from the commission's order requiring certain carriers to publish prescribed tariff rule governing furnishing of helper service for loading and unloading of t.l. freight. The association is neither a carrier nor a shipper, none of its member carriers are parties to instant suit, and it does not contend that the order is illegal or beyond the commission's powers. Plaintiff unions charge only that the order impairs their labor contract, but the court finds that it does not impair the validity of their collective bargaining agreements with motor carrier employers, and the claimed interference with their bargaining rights is too remote and tenuous to give them standing to set aside the commission'a order. None of plaintiffs has any legal right or interest that would be injuriously affected by the order within doctrine of 192 F. Supp. 12 (affirmed per curiam in 365 US 649), and they therefore have no standing to sue; complaint dismissed.—Teamsters Joint Council 40 (J.C.) v. United States, 238 F. Supp. 301 (302, 306, 307-8)*.

The courts are unanimous in holding that, for a person to be in position to maintain a complaint to set aside an order of the commission, he must show that he has a legal right or interest that would be injuriously affected by the order. Complaint seeking to set aside the commission's order denying plaintiff leave to intervene in motor-carrier control proceeding, on ground that, having sold his stock in acquired carrier, he had no sufficient interest in the §5(2) proceeding that would entitle him to intervene, is devoid of any allegation which if proven would convince the court of a legal right or interest that would be adversely affected by the order. Complaint dismissed and

application for appointment of a three-judge court denied.—Kulp v. United States, 238 F. Supp. 390*.

Plaintiffs, a motor carrier association and two common carrier conferences, clearly have standing to challenge validity of the commission's order dismissing their complaint seeking a finding by the commission that one defendant therein was operating as a freight forwarder in interstate commerce without appropriate authority and that two other defendants were aiding and abetting in such activities.—National Motor Freight Traffic Ass'n v. United States, 242 F. Supp. 601 (602-3)*.

Plaintiffs, holders of bonds of New York, N.H. & H. R. (currently in reorganization), which the commission required to be included in approving merger of the New York Central and the Pennsylvania R., have no standing to raise question of whether the condition with respect to inclusion of the New Haven gives that railroad adequate protection by an action to enjoin consummation of the merger. The merger as proposed did not involve any transaction relating to the New Haven; and, while it threatened injury to that railroad, it posed no individualized threat to plaintiffs as distinguished from all other claimants against debtor's estate. Moreover, protection of plaintiffs' interests and those of all other New Haven creditors and stockholders was, and is, the responsibility of the Trustees in the bankruptcy proceeding. Complaint dismissed.—Oscar Gruss & Son v. United States, 261 F. Supp. 386 (391, 392, 395)*.

Plaintiff is not precluded from maintaining suit to set aside orders of the commission simply because he was not a participant in the commission proceedings if, in the court action, the orders are attacked as exceeding the powers of the commission; however, it is not clear on what basis the orders are attacked in instant action, or even that they are in fact being attacked.—Schwartz v. Alleghany Corporation, 282 F. Supp. 161 (163)*.

15. Parties defendant.—[Vols. 4, 7].—United States a necessary party, see §2322, this title, n. 1.

Equitable Relief

21. Other remedies available upon application to the commission.—[Vols. 4, 7, 10, 12, 14-17, 19].—Even assuming that the commission's order denying petitions for a declaratory order concerning "grandfather" rights to transport certain frozen foods were reviewable under decision in 351 US 40, the court could give plaintiff no effective relief at this time. Though all products transported by plaintiff are now nonexempt, it is the commission's function, not the court's, to determine in the first instance whether all were exempt prior to the Transportation Act of 1958 and thus within the "grandfather" provisions of §7(c) thereof. Plaintiff is free to take its certificate to the commission for construction and clarification and thereafter to seek judicial review of an adverse administrative ruling; the controversy will then be before the court in concrete form and upon an adequate record, with the court having the benefit of the commission's informed judgment as to proper classification of the products involved and whether they are covered by plaintiff's certificate. Complaint dismissed without prejudice.—Ballentine Produce, Inc. v. United States, 209 F. Supp. 679 (683)*.

22.—Necessity of application for rehearing before commission.—[Vols. 4, 7, 10, 12, 15].—See also Teamsters Joint Council 40 case, 49 USC §17(9), n. 2.

—Temporary restraining order.—[Vols. 4, 7, 17, 18].—Order issued temporarily restraining operation and effective date of the commission's order authorizing merger of Atlantic Coast Line into Seaboard Air Line until convening of a three-judge court to hear plaintiffs' motion for interlocutory injunction. Otherwise, it appears, based on the pleadings, the exhibits attached thereto, and evidence presented at hearing, that the irreparable damage specifically alleged by plaintiffs will result.—Florida East Coast Ry. Co. v. United States, 228 F. Supp. 340 (343-4)*.

However, motion of Coast Line and Seaboard that plaintiffs be required to post bond during pendency of the temporary restraining order is denied. Lack of reported cases indicates that, upon the requisite showing of ir-

reparable damage, it has been the custom throughout the Federal judiciary to issue temporary restraining orders in statutory three-judge cases without requiring bond. The statutory scheme embodied in the Interstate Commerce Act, the Administrative Procedure Act, and the three-judge court provisions of 28 USC §§2281-2284 and 2321-2325 contemplates that in course of orderly procedure there may be review of the commission's orders after administrative procedures are final. At present stage of the proceedings neither the proposition (1) that the merger is lawful, nor (2) that if merger in presently approved or modified form is finally allowed the expected savings of $20 million per year will be realized, is established with such certainty and finality as to require indemnification for the delay caused by the final step in the statutory scheme, judicial review.—Id., p. 343.

Had Congress intended that bond be required in statutory three-judge cases, it could have included in 28 USC §§2324 and 2284 a provision for execution of a bond for damages similar to that in §16 of the Clayton Act; absence of such a provision is persuasive that posting of an indemnity bond by plaintiffs should not be required. Furthermore, plaintiffs have clearly shown that no bond requirement of nature proposed, or remotely approaching it, could be met, and the result would be to permit the merger to proceed while its legality is litigated; should plaintiffs ultimately prevail, the resulting chaos could never be restored to order, nor the injury to plaintiffs be repaired. Such a result cannot be reconciled with a statutory scheme that envisions that interested parties be entitled to seek orderly and effective judicial review of administrative orders.–Id., p. 343.

While, in view of voluminous record on which the order of the commission in issue was based and the short time before effective date thereof, it is impossible for the court to find that plaintiffs have a reasonable probability of success when the case is submitted to a three-judge court on its merits, record before the court on motions seeking to temporarily restrain operation of the order makes a determination of possibilities feasible. In the circumstances, the court deems it within contemplation of the law and of the authorities cited to grant relief when record shows that plaintiffs have a reasonable possibility of success on the merits. A balancing of the equities and a consideration of the public interest require that a temporary restraining order, maintaining, pendente lite, the status quo existing at time of filing of the complaint, be granted.–Cincinnati, N.O. & T.P. Ry. Co. v. United States, 220 F. Supp. 46 (47-8)*.

In determining whether a temporary restraining order should be issued against the commission's order prescribing increased divisions to L. & N. R. out of certain joint rates with Southern Ry., comparison of injuries to the parties is a sounder approach than trying to weigh the likelihood of success, since the actual controversy is between those railroads and it would be useless to speculate on the merits before the matter is heard by a three-judge court. If cost to plaintiffs of establishing and operating a different accounting system be deemed irreparable injury, it is counterbalanced by the detriment to L&N from delaying of monthly payments otherwise due it, on which interest, if allowed, would be considerable. Plaintiffs have shown no probability of ultimately prevailing, nor any likelihood of irreparable injury outweighing detriment to the party who would be denied relief by a restraining order; entry of such an order is therefore not justified under either criterion.–Carolina & N.W. Ry. Co. v. United States, 230 F. Supp. 581 (582)*.

However, denial is subject to conditions that (1) if plaintiffs are successful in permanently enjoining the commission's order, L&N shall resettle its accounts with Southern on basis of present divisions on all shipments after date specified, with interest at 6 percent on the monthly differences between the two divisional bases, computed from customary settlement dates, and (2) that the question of whether and to what extent L&N may be required to bear plaintiffs' accounting changeover expense in event they are successful is reserved for further consideration by the court.—Id., pp. 582-3.

See also City of Williamsport v. United States, n. 7, above; Seatrain Lines, Inc., v. United States, n. 9, above.

27.—Preliminary or pendente lite injunction.—[Vols. 4, 7, 14, 19].—Plaintiffs' appli-

cation to enjoin the commission pendente lite from issuing a certificate of convenience and necessity in accordance with the challenged orders was denied, since no prospect of irreparable injury to plaintiffs could be shown, beyond possible loss of some trade if carrier involved should proceed to operate under the certificate before suit to set aside the commission's orders could be decided on the merits.—Aero-Mayflower Transit Co. v. United States, 208 F. Supp. 303 (304)*.

Plaintiff seeking to enjoin Securities & Exchange Commission from prosecuting a "stop order" proceeding, in which notice of hearing has been issued, has not exhausted its administrative remedies when its allegations concerning methods and tactics employed by the commission's investigators in accumulating evidence are subject to motions to suppress, objections, etc., in proceedings before a hearing examiner, and the entire proceedings may thereafter be subject to judicial review. Preliminary injunction denied.–Wolf Corp. v. Securities & Exchange Commission, 209 F. Supp. 481 (482). [Not arising hereunder.]

A preliminary injunction will not be granted merely on a balancing of the equities, as plaintiffs propose, but rather upon a showing of probable cause for ultimate relief on the merits. The court cannot, and will not, act in action seeking an injunction temporarily restraining defendants from acquiring "control" of plaintiff railroad through further purchases of latter's capital stock, in order to maintain the status quo in the matter until the commission can determine merits of plaintiffs' complaint filed with it alleging violations by defendants of §5(2) and (4) of the IC Act. The court may not, under a "status quo" label, usurp the functions of a specialized agency uniquely qualified to deal with such matters.–Chicago S.S. & S.B. R. v. Monon R., 235 F. Supp. 984 (985, 987-8).

Grant of preliminary injunction is the exercise of a very far-reaching power, never to be indulged in except in a case clearly warranting it; and since plaintiffs failed to show they would suffer irreparable harm if the Interstate Commerce Commission is not restrained from issuing certificate to intervenor, pending decision on merits of their complaint, preliminary injunction is denied. There is a formal difference between an order of the commission and a certificate issued pursuant thereto. While there is no statutory provision for review of a certificate, there is no limitation on jurisdiction of the court to review the commission's order and to take whatever action may be appropriate with respect to the resulting certificate itself. To extent that the court's judgment affects the commission's order, the certificate is commensurately affected and the court's power over the certificate is implicit in its power of review of the order that it issue.—Asbury Transp. Co. v. United States, 236 F. Supp. 322 (324, 325)*.

Record failed to show such irreparable injury as would entitle plaintiff to requested preliminary injunction requiring Interstate Commerce Commission to issue an "authorization" enabling plaintiff to continue forwarding used automobiles independently of and not in connection with the forwarding of used household goods, and restraining the commission from any enforcement action against it, pending determination of its application for a freight forwarder permit. Main premise of plaintiff's case (that the commission's holding in 323 ICC 382 that forwarding of used automobiles separately from used household goods is not within exemption of §402(b), and such forwarder's entire service requires a permit, constituted a reversal or change of its prior interpretation of that exemption) is wrong; it is incorrect to find from line of cases cited the sudden change in the commission's position alleged.-Routed Thru-Pac, Inc. v. United States, 242 F. Supp. 781 (782-4).

While plaintiff may have lost some Department of Defense business when that agency changed its policy following the commission decision, it does not allege that the commission was in any way responsible for that; no real evidence of threatened loss of commercial contracts was adduced; moreover, whatever speculative loss of business plaintiff faces is only for a limited time, since its pending application proceeding is expected to be completed in about 6 months. And, plaintiff can eliminate the threat of future enforcement action against it by temporarily stopping the prohibited type of shipments, while continu-

ing the rest of its business.–Id., p. 784.

Plaintiff's request for preliminary injunction, pending final determination of its action to review the commission's order permitting railroad to abandon branch of its line in issue, denied when, the record failing to reveal a probable basis for setting aside order of the commission, probability that plaintiff would prevail on the merits is not shown. Moreover, plaintiff failed to show that it would suffer irreparable harm if preliminary injunction is not granted. Although abandonment of the line would necessitate plaintiff's trucking its sand an additional distance to the railroad, probably increasing its transportation costs, record does not show that irreparable injury would result therefrom; financial loss or diminished profits are not necessarily synonymous with irreparable injury.–Whitehead Bros. Co. v. United States, 247 F. Supp. 614 (615-6)*.

Record in action by union, seeking suspension of preliminary injunction restraining work stoppage at lake port where Canadian unions were picketing the loading of coal into Canadian vessels by plaintiff's employees, fails to show that the union will be injured if the preliminary injunction remains in force; there is no claim that it is affiliated with the picketing unions, or that its members are engaged in the same trade, craft, or occupation as members of those unions. Conversely, if the injunction is suspended, inability of the terminal company and its owning railroads to handle the coal tonnage may involve substantial loss of revenue, and could result in irreparable loss to carriers. Plaintiff's loss might be avoided if Canadian consignee selected other lake carriers for transshipment of the coal; however, as a common carrier, plaintiff would have no right to dictate to consignee what vessels it must have its coal shipped in; preliminary injunction not suspended.—Lakefront D. & R.T. Co. v. International Longshoremen's Ass'n, 333 F. 2d 549 (552-3).

30.—Perpetual injunction.–[Vols. 4, 16].–See United States v. Dixie Highway Exp., Inc., §207(a), n. 9.

Scope of Judicial Review of Commission's Orders

40. In general.–[Vols. 4, 7, 12-15, 17, 19].—The court's powers of review are limited; if the commission has not misapplied the law, if its ultimate conclusions are supported by substantial evidence, and if it has not acted arbitrarily or capriciously, its action must be sustained.—Cope v. United States, 222 F. Supp. 596 (601)*; A. L. Mechling Barge Lines, Inc., v. United States, 218 F. Supp. 837 (839)*; Alabama, T. & N. R. Co. v. United States, 207 F. Supp. 638 (638-9)*; Atwood's Transport Lines, Inc., v. United States, 211 F. Supp. 168 (173)*; Boston & M. R. v. United States, 202 F. Supp. 830 (834, 838)*; Chicago, S.S. & S.B. R. v. United States, 221 F. Supp. 106 (109)*; Commercial Motor Freight, Inc., v. United States, 276 F. Supp. 264 (268-70)*; Cooper Transfer Co., Inc., v. United States, 281 F. Supp. 917 (917-18)*; DeCamp Bus Lines v. United States, 224 F. Supp. 196 (201-2)*; Frozen Food Exp. v. United States, 219 F. Supp. 131 (136)*; Great Northern Ry. Co. v. United States, 209 F. Supp. 230 (232)*; Id., 209 F. Supp. 234 (236)*; Id., 209 F. Supp. 238 (240)*; J. B. Acton, Inc., v. United States, 221 F. Supp. 174 (177)*; J. B. Montgomery, Inc., v. United States, 206 F. Supp. 455 (458-9)*; Motor Truck Supply Co. v. United States, 238 F. Supp. 645 (647-8)*; Safeway Trails, Inc., v. United States, 234 F. Supp. 362 (365)*; Denton Produce, Inc., v. United States, 270 F. Supp. 402 (405-7, 408)*; North American Van Lines, Inc., v. United States, 217 F. Supp. 837 (840-1)*; Pre-Fab Transit Co. v. United States, 262 F. Supp. 1009 (1010-11, 1016)*; Resort Bus Lines, Inc., v. I.C.C., 264 F. Supp. 742 (746-7)*; Sea-Land Service, Inc., v. United States, 222 F. Supp. 558 (566)*; Sloan's Moving & Storage Co. v. United States, 208 F. Supp. 567 (569, 571)*; State Corporation Comm. of State of Kansas v. United States, 216 F. Supp. 376 (379)*; United States v. I.C.C., 221 F. Supp. 584 (587)*; United Transports, Inc., v. United States, 214 F. Supp. 34 (39)*; United Van Lines, Inc., v. United States, 249 F. Supp. 984 (985)*

The jurisdiction conferred on three-judge statutory district courts to review orders of the commission is very definitely circumscribed: if an order of the commission lies within scope of a statute it is authorized to administer and enforce, and if the order is based on adequate findings which are in turn supported by substantial evidence, the order may not be set aside by a court on review even though the court might disagree with the

commission's conclusions or might consider them contrary to the weight of the evidence.—Edwards Motor Transit Co. v. States, 201 F. Supp. 918 (920)*.

If an order of the commission lies within scope of a statute which the commission is authorized to administer and enforce, and if it is based on adequate findings which in turn are supported by substantial evidence, it may not be set aside by a court on review, even though the court might disagree with the commission's conclusions or consider them contrary to weight of the evidence. In finding that considered transportation with leased vehicles was for-hire carriage by plaintiff lessor, rather than private carriage by shipper-lessees, the commission acted within its statutory authority and rational bases for its conclusion and order exist; consequently, its decision must be affirmed.—John J. Casale, Inc. v. United States, 208 F. Supp. 55 (60)*.

It is beyond the court's province to consider the weight of the evidence before the commission, the soundness of the reasoning by which its conclusions were reached, or whether the findings are consistent with those made in other cases; the judicial function is exhausted when there is found to be a rational basis for the conclusions approved by the administrative body.–Aero-Mayflower Transit Co. v. United States, 208 F. Supp. 303 (305, 306)*.

The function of the court is to review the administrative action, not to determine whether the court on the evidence would have reached the same result as did the commission; and the judicial function is exhausted when there is found to be a rational basis for the conclusion approved by the administrative body. Since the findings of fact made by the commission are supported by substantial evidence and supply a rational basis for the order, and in arriving at its decision the commission substantially observed the standards prescribed by the act, plaintiffs' complaints are dismissed—Boston & M. R. v. United States, 208 F. Supp. 661 (671, 679)*.

Congress has conferred jurisdiction to determine whether rates are just and reasonable upon the commission; it is for the courts to decide whether the commission's findings are supported by substantial evidence and whether there is a rational basis for its conclusions. Determination of the commission that proposed reduced rate, although somewhat in excess of out-of-pocket costs, was not just and reasonable because of resulting loss in net carrier revenue, sustained—Atlantic Coast Line R. Co. v. United States, 209 F. Supp. 157 (159, 160)*.

Scope of judicial review of an order of the commission embraces only questions affecting constitutional power, statutory authority, and the basic prerequisite of proof; if those legal tests are satisfied, the commission's order becomes incontestable.–A. L. Mechling Barge Lines, Inc. v. United States, 209 F. Supp. 744 (747)*.

Jurisdiction of a three-judge statutory District Court to review orders of the commission is limited to determination of whether the orders are within its statutory authority, are based on adequate findings, which in turn are supported by substantial evidence. But though Congress has entrusted to the commission delineation of the area which a carrier may serve, the commission's discretion must be exercised in conformity with the policies of Congress, and the courts should evaluate the evidence to determine if the commission's ruling accords with public interest.—Winter Garden Co. v. United States, 211 F. Supp. 280 (285)*.

The reviewing court's function, in action to set aside the commission's interpretation of plaintiff's certificate, does not involve a de novo construction of the certificate or a reevaluation of the undisputed facts concerning services performed under color thereof. The court is not concerned with weight of the evidence; scope of review is confined to the interpretation placed by the commission on a certificate of its own creation, and the court is bound by that interpretation unless persuaded that it was capricious and arbitrary, constituted an abuse of discretion, or did violence to some established principle of law; and it is beyond the court's province to consider the soundness of the reasoning by which the commission's conclusions were reached.—Bowman Transp., Inc. v. United States, 211 F. Supp. 354 (357)*.

Where plaintiff, in action to set aside the commission's order denying it certain exten-

sion authority, challenges the commission's interpretation of existing carrier's authority, the court's function does not involve a de novo construction of the certificate; scope of review is confined to the interpretation placed by the commission on a certificate of its own creation, and the court is bound by that interpretation unless persuaded that it was capricious or arbitrary, constituted an abuse of discretion, or did violence to some established principle of law; and it is beyond the court's province to consider the soundness of reasoning by which the commission's conclusion was reached.–McKenzie Tank Lines, Inc. v. United States, 211 F. Supp. 876 (878)*.

In absence of an overreaching of the commission's constitutional power, its order approving railroad merger should not be set aside by the reviewing court unless convincing proof is offered to show that it is unjust and unreasonable or not supported by substantial evidence. Reviewing court must be aware of extensive facilities, specialized knowledge, and expertise which the commission brings to the constitutional exercise of its statutory power, and must defer to the commission's judgment and experience in weighing complicated facts, balancing conflicting interests, and predicting future consequences of a complex transaction.–Fried v. United States, 212 F. Supp. 886 (889)*.

Orders of the Interstate Commerce Commission, when issued within its statutory authority and based on adequate findings supported by substantial evidence, are not to be disturbed even though the court might reach a different result on the record. The commission is presumed to have properly performed its official d..ties, and that presumption supports its acts in absence of clear evidence to the contrary. But, while the administrative ratemaker has broad discretion so long as no statutory requirement is overlooked, it is not the function of a reviewing court merely to apply a rubber stamp of approval regardless of whether or not criteria for affirmance are established by the record: to merit judicial approbation the commission must have made certain basic, essential findings, and it is the court's responsibility, giving full recognition to the commission's expertise and according to its order all presumptions it is entitled to by law, to determine whether its findings are supported by substantial evidence, are clear and precise, and are not arbitrary, capricious, or an abuse of discretion.–Cincinnati, N.O. & T.P. Ry. Co. v. United States, 229 F. Supp. 572 (574-5)*.

It is not the proper function of a reviewing court to substitute its judgment for the commission's on matters of fact, or even on such mixed questions of fact and law as may have been committed by law to agency discretion; nor are the commission's findings of fact to be disturbed if based on substantial evidence. However, the court is bound to inquire into every aspect of the proceedings below wherein it may appear that the commission has otherwise applied an erroneous standard of law, or has made arbitrary findings, or has reached ultimate conclusions without adequate subordinate findings, or has failed in any other way to observe those procedures of investigation and elaboration which have become the hallmarks of proper administrative determination.–Nashua Motor Exp., Inc. v. United States, 230 F. Supp. 646 (650)*.

The court's task is limited to ascertaining whether there is warrant in the law and the facts for what the commission has done. Review of the record compels conclusion that plaintiff has failed to demonstrate that the commission's findings were unwarranted or contrary to the evidence. There was a rational and legal basis for the commission's decision; sustained.–Clark Transport Co. v. I.C.C., 233 F. Supp. 839 (842)*.

Where there is warrant in the law and the facts for what the commission has done, a reviewing court is without authority to intervene. The commission acted within the scope of its authority, acted neither capriciously nor arbitrarily, and its ultimate findings of fact are supported by substantial evidence; sustained.–Clay Hyder Trucking Lines, Inc. v. United States, 234 F. Supp. 673 (676)*.

The commission is presumed to have properly performed its official duties; and this presumption, which stems from the deference due the commission because of its familiarity with conditions in the industry it regulates, supports its actions in absence of clear evidence to the contrary. However, judicial deference to expertise is not boundless, and exper-

tise is not sufficient in itself to sustain a decision: the commission's order must be supported by substantial evidence and must be made within the statutory limits placed on its powers by Congress.–Eastern Central Motor Carriers Ass'n v. United States, 239 F. Supp. 591 (594)*.

In action to set aside the commission's order denying plaintiff's application for authority to extend its rail line into newly developed Florida territory, and granting application of Atlantic Coast Line for similar authority, the function of the reviewing court is to determine whether there is substantial evidence on the record as a whole to support the commission's findings, and whether the commission applied proper legal standards in conducting the proceeding before it and in reaching its conclusions. Record of commission proceeding, received in evidence, sustains its finding that public convenience and necessity required granting Coast Line's application and denying plaintiff's; and that finding being supported by substantial evidence, the commission's decision must be upheld; complaint dismissed.–Florida East Coast Ry. Co. v. United States, 242 F. Supp. 490 (491-2, 493)*.

While the judicial function is exhausted when there is found to be a rational basis for an administrative body's conclusion, this does not mean that it is the function of the court to search the records for evidence which in and of itself justifies the administrative decision; "substantial evidence" must be determined with full consideration of contradictory evidence, or evidence from which conflicting inferences could be drawn. Moreover, in action to set aside the commission's order denying plaintiff's application to purchase operating rights of another motor carrier, the court is acting in its historical equity jurisdiction in considering an injunctive remedy and should, therefore, be able to view the situation in its entirety, including related matter of a third carrier's subsequent application to purchase the same rights. However, without considering such related matter, the record affords ample basis for holding that the commission's finding as to creation of substantially duplicate authority is unsupported by substantial evidence.–Interstate Motor Freight System v. United States, 243 F. Supp. 868 (871, 872)*.

Record is convincing that the commission committed no error of law in holding that railroad employees of unincorporated terminal association, created by "arrangement" of several railroads, were entitled to employee-protective benefits if, in fact, they were adversely affected by the railroad merger approved; nor was the commission's action arbitrary, capricious, or an abuse of discretion. The findings being supported by substantial evidence, the court has no authority to disturb conclusions of the experienced Government agency charged with manifold duties in the field of transportation, no small part of which is in the area of mergers and affiliations; complaint dismissed.–Louisville & N. R. Co. v. United States, 244 F. Supp. 337 (338, 342)*.

In action to set aside commission orders granting motor carrier certificate to one rail-subsidiary applicant and finding that the other did not need such authority because it could already provide proposed service, the reviewing court's function is to ascertain whether the commission correctly applied the law and, if so, whether its findings support the conclusions reached, and whether the findings are supported by substantial evidence. The commission's conclusions (1) that "special circumstances" justified granting first applicant unrestricted authority to serve shipper's new plant when it had been serving the old plant, its existing authority contained no rail-auxiliary restrictions, and it sought only a slight extension thereof, and (2) that as second applicant could serve the new plant under its rail parent's authority, plant site being within the railroad's terminal area, it did not need a certificate, were both correct; findings and conclusions of the commission are substantially supported by the evidence of record;sustained.–American Trucking Associations v. United States, 260 F. Supp. 386 (387-8, 388-90)*.

In reviewing an administrative proceeding, the court is confined to the record made before the agency; it is not a trial de novo. On examination of the record as a whole, there is substantial evidence therein to support the commission's findings in consolidated complaint and application proceedings; and its findings and conclusions are neither arbitrary

nor capricious. Action to vacate order of the commission, dismissing plaintiff's complaint and granting motor carrier authority to intervenor, dismissed.–Armored Carrier Corp. v. United States, 260 F. Supp. 612 (615-6)*.

While the reviewing court is bound by the commission's construction of plaintiff's "grandfather" certificate unless it is clearly erroneous, arbitrary, or capricious, and, also, is bound to acknowledge and give weight to the commission's expertise, it is incumbent upon the commission to present sufficient factual findings and reasoning from which the court may determine whether it has properly executed its substantial responsibility. In action to set aside commission orders in consolidated proceeding involving (1) interpretation of plaintiff's certificate and its applications for (2) modifications of commodity and route descriptions in the certificate and (3) for a certificate containing proposed modifications, only in event of denial in the modification proceeding, the commission failed to provide the court with sufficient findings or reasonings as to any of the matters in issue; therefore, orders under review must be remanded for further consideration and findings.–Dixie Ohio Express, Inc. v. United States, 263 F. Supp. 993 (999, 1001-04)*.

In action seeking review of an order of the commission, it is the court's duty to review the record and determine the substantiality of the evidence of the record as a whole. Therefore, since examination of the entire record does not disclose a rational basis for the commission's conclusion that a cease and desist order should issue against plaintiff corporation, the order under review cannot stand; reversed and set aside.–Farmers Feed & Supply Co. v. United States, 267 F. Supp. 72 (76)*.

While administrative agency determinations are normally entitled to considerable deference upon review, and orders of the commission that are in accordance with the law and not arbitrary are not to be disturbed even though the court might reach a different result upon the record, it is not the function of a reviewing court merely to apply a rubber stamp of approval regardless of whether or not criteria for affirmance are established by the record.–Louisville & N. R. Co. v. United States, 268 F. Supp. 71 (75)*.

Though plaintiff seeks to have the court set aside the commission's order denying its motor contract carrier application, and to require approval thereof, the court may not direct the commission to issue to plaintiff the permit sought in the application. A reviewing court has no power to order an administrative agency to perform discretionary acts in a particular manner, or itself to exercise administrative functions. However, since the commission did not properly employ statutory procedures, did not correctly evaluate requisite criteria for issuance of a permit, and made findings not supported by substantial evidence, the order is set aside and the case is remanded to the commission for further consideration consistent with the court's opinion.–Midwest Truck Lines, Ltd. v. United States, 269 F. Supp. 554 (556, 567)*.

See also Calcium Carbonate Co. v. United States, 49 USC §6(7), n. 260, Chicago, R. I. & P. R. Co. v. United States, 205 F. Supp. 378, APA, 5 USC, procedure; Soo Line R. Co. v. United States, 49 USC §5(2), n. 52; State of Illinois v. United States, 49 USC §1(22), n. 12; State of Montana v. United States, 49 USC §13a, n. 2; Walled Lake Door Co. v. United States, §16(12), n. 10; Whitfield Transp., Inc., v. United States, §212(a), n. 1; Zantop Air Transport, Inc., v. United States, 49 USC §303(b), n. 40.

41. Construction of orders.–[Vols. 4, 7, 10, 17].–See Walker v. United States, 49 USC §5(2), n. 100 securities.

42. Constitutionality of orders.–[Vols. 4, 7, 12, 14, 17, 19].–Where an order of an administrative agency operates to deprive an owner of property without due process of law, evidence relating to the confiscatory effect may be introduced in the reviewing court; however, prerequisite to granting the right to introduce such evidence, it must be shown that the aggrieved party was possessed of property in the constitutional sense and had been deprived of it by such order without a fair opportunity to be heard. While an interstate motor carrier has no vested right to use public highways for gain, it does have a right to reasonable compensation for services it is required to render under operating authority issued to it; and unreasonable denial of that

right by arbitrary administrative action does raise the constitutional question of deprivation of property without due process of law.–Cardinale Trucking Co. v. United States, 232 F. Supp. 339 (343-4)*.

However, reasonable control of extent and nature of a carrier's operations, exercised by the commission pursuant to legislative enactment in furtherance of the paramount public interest, does not constitute an unlawful invasion of any constitutional right. Therefore, since record in action to set aside the commission's order (which denied plaintiff's petition for reopening of its "grandfather" proceeding) indicates no arbitrary action, or abuse of discretion, on the part of the commission, there is no constitutional issue which invites a trial de novo, or justifies an oral hearing, on the question of confiscation.—Id., pp. 343, 344.

43. Necessity of notice and hearing before commission.—[Vols. 4, 7, 16, 19].—Since the commission's consideration of the question of reasonableness of proposed rates, through its Suspension Board, involves only a brief and informal hearing, automatic acceptance of a finding of unreasonableness which preceded a suspension order of the commission would delegate a greater effect to such administrative process than the process warrants. As the basis for a decree of a single district judge, such procedure would be inconsistent with §15(1) of the Interstate Commerce Act, which provides that effective rates may be struck down as unlawful after a "full hearing" by the commission.–Arrow Transp. Co. v. Southern Ry. Co., 372 U.S. 658 (671-2)*.

44. Review of questions of law–[Vols. 4, 7, 10-12, 15-19].—Where the applicable statutory language has been construed by the commission in light of its legislative history, such construction commands greater respect than that usually accorded administrative determinations of questions of law—Tar Asphalt Trucking Co. v. United States, 208 F. Supp. 611 (615)*.

While construction of a statute by administrative body charged with its enforcement is entitled to special weight, that principle does not apply where the commission's interpretation is not based in any wise upon its accumulated knowledge and experience but only upon a reading of the dictionary and the Congressional Record, tools which a court is equally able to use. Moreover, the commission's explanation of its turning to aids not specially related to its own expertise deprives its interpretation of any force. And, since the commission for the first time adopted a view antagonistic to the construction it had previously followed, the new interpretation is entitled to no weight as an administrative determination. Permanent injunction granted, and the matter remanded to the commission.—Atchison, T. & S.F. Ry. Co. v. United States, 209 F. Supp. 35 (41-2, 45)*.

The reviewing court must decide whether the commission correctly applied the law, not whether it followed its own precedents; fact that a new decision of an administrative tribunal departs from the rule of an earlier one does not require corrective action by the court.—Yale Transport Corp. v. United States, 210 F. Supp. 862 (864)*.

Though as a rule legislative intent must be ascertained from text of the statute if the words are clear and unambiguous, where the literal words bring about an absurd or futile result, or one plainly at variance with purpose of the legislation as a whole, legislative purpose is followed rather than the literal words; and there is no rule of law forbidding resort to explanatory legislative history, no matter how clear the words may appear on superficial examination. In construing an ambiguous statute, all relevant light shed on the purpose of Congress may be utilized: this includes reports of committees and committee members in charge of a bill, as well as interpretation by the executive department or agency charged with its administration and enforcement; an expression of opinion by the same congressional committee which considered the statute may be considered, particularly where it is made within a reasonable time after its enactment and relates specifically to the construction in question—Daniels v. United States, 210 F. Supp. 942 (949-50)*.

Though in the field of transportation the commission possesses expert knowledge, and its judgment is entitled to great deference because of its familiarity with conditions in the motor carrier industry, there are limits to its statutory powers as fixed by Congress and

the duty of the courts on judicial review is to determine those limits.–Winter Garden Co. v. United States, 211 F. Supp. 280 (285)*.

Notwithstanding limitations on the scope of judicial review of the commission's orders, the courts are still charged with a serious responsibility of seeing that they are reached by application of recognized legal standards [citing 312 US 126]. The court's duty is to determine only whether the challenged findings and rulings of the commission either show affirmatively that its order was not the result of proper application of all the pertinent legal standards, or make it impossible to say that those standards were properly applied.—Frozen Food Exp. v. United States, 219 F. Supp. 126 (136-7)*.

The commission has exercised its primary responsibility for interpreting plaintiff's certificate and determining what items fall within the contested commodity description therein, has delineated the scope of plaintiff's operating authority, has found that plaintiff had been and was willfully transporting commodities not authorized by its certificate, and has issued its order to cease and desist. There was rational factual and legal basis for the commission's order and it is not clearly erroneous, capricious, arbitrary, or the result of any abuse of the commission's discretion; and there is substantial basis for the order; sustained.—J.B. Acton, Inc. v. United States, 221 F. Supp. 174 (178-9)*.

The commission's interpretation of 298 US 349 as laying down the rule that it need not consider any evidence of specific rates in a case involving divisions of joint interterritorial rates as between the respective carrier groups, notwithstanding that the purpose and function of such a proceeding is to establish just and equitable divisions of particular joint rates, is palpably erroneous. No divisions case has even suggested that such is the rule; the consistent requirement sanctioned by the divisions cases in which the Supreme Court has written opinions is that evidence showing specific rates and specific divisions of specific carriers must be in evidence in the controversy and be considered by the commission.—Atchison, T. & S.F. Ry. Co. v. United States, 225 F. Supp. 584 (597, 598)*.

In summarily denying plaintiffs application because "no inadequacy was shown in protestants' services," the court understands the commission to have enunciated a rule of law to effect that a showing of present inadequacy of protestants' services is indispensable to issuance of a certificate of public convenience and necessity; but while there is some authority for this view, the better rule is embodied in the more numerous cases to the contrary. This apparent announcement of an erroneous standard of law requires that the order be vacated and the cause remanded for further proceedings.—Nashua Motor Exp., Inc. v. United States, 230 F. Supp. 646 (652-3)*.

The commission erred in its interpretation and application of §3(4) to the facts of the case under review. While it correctly found that plaintiff Seatrain Lines is a connecting carrier within §3(4), its report does not indicate what consideration was given to the claimed discrimination resulting from western railroads' continued maintenance of an origin port rate on Seatrain's route on a relatively higher level, tested by costs and relation to first-class rates, than level of either the reduced all-rail rate in which they participated on same traffic or the division they accepted out of that rate. Apparently, the commission considered the disparities shown by Seatrain of no significance, in view of its ultimate finding of no discrimination, based on dissimilarity of transportation conditions. However, those disparities are of such magnitude as to make a prima facie case of discrimination, and the burden thereupon passed to the western railroads to show that the difference in conditions justified the rate disparities shown to exist; this they failed to do. The commission's order on the §3(4) issue is therefore set aside and the matter remanded for further proceedings.—Seatrain Lines, Inc. v. United States, 233 F. Supp. 199 (203-4, 210)*.

The courts should respect commission findings in cases involving rates and tariffs, as such findings involve exercise of administrative expertise; however, the courts have held an issue of tariff construction to be a question of law where the construction does not involve technical words within the commission's expertise, or at least a mixed question of law and fact. Thus, in appeal from commission finding that assailed rates applied on

plaintiff's shipments of steel switchboxes, question of whether shipments were entitled to lower rates on boxes made of 14-gauge steel is not within exclusive domain of the commission's expertise, since meaning of "14-guage" as used in that tariff item is equally capable of construction by the court or the commission. However, as technical questions involving the significance of including shipments in one classification or another are faced by the commission often, and rarely by the courts, the commission should have an opportunity to reexamine the case in the light of evidence and arguments in the court record (not previously considered by it) and any relevant evidence plaintiff may yet adduce.—Roach Appleton Mfg. Co. v. United States, 265 F. Supp. 568 (576-7)*.

See also National Van Lines, Inc. v. United States, 355 F. 2d 326, APA, 5 USC, *Judicial Review*.

45.—Orders within scope of delegated authority.-[Vols. 4, 7, 10, 12-19].-Judicial review of orders of the commission is not to determine how the public interest will best be served. That is a function of the commission and is made such by terms of the statute.—Atlantic Coast Line R. Co. v. United States, 202 F. Supp. 456 (458)*.

The commission had power to implement §216(d) by issuance of a general order prescribing regulations to prevent race discrimination between passengers in vehicles and facilities used in interstate commerce, when there was adequate basis for its conclusion that case-by-case action on individual complaints did not afford an adequate remedy.—State of Georgia v. United States, 201 F. Supp. 813 (815)*.

When the commission has disregarded no statutory command, has made findings based on substantial evidence, and its action is warranted by its findings, the reviewing court must accept the commission's conclusions; the court's role in reviewing the commission's order is necessarily very limited.—Carolina Scenic Stages v. United States, 202 F. Supp. 919 (925)*.

Since §212(c) of the Interstate Commerce Act specifically provides that certificate issued thereunder shall authorize transportation of same commodities between same points as authorized in the carrier's permit, and does not authorize the commission to specify territory or determine bona fides of prior motor carrier operations, the commission had no statutory authority to impose restrictions as to points of pickup and delivery on certificate issued under that statute to plaintiff, in lieu of its permit, when the permit contained no such restrictions. Order of the commission set aside, and the matter remanded for further action in accordance with views expressed.—J. B. Montgomery, Inc. v. United States, 206 F. Supp. 455 (458, 460-1)*.

The commission was not barred from granting the certificate under attack by failure of applicant, its parent company, and its carrier affiliates to seek approval under §5(2) of the corporate control involved; the commission's jurisdiction to grant a certificate under §207 is not limited by §5, and there was factual and legal basis for the commission's order and the certificate issued pursuant thereto. Sustained.—Sloan's Moving & Storage Co. v. United States, 208 F. Supp. 567 (572-3)*.

The court may not set aside an order of the commission which is within scope of its statutory authority and based on adequate findings supported by substantial evidence; the commission's interpretation of §212(c) is in accord with the legislative history thereof, and its order, in conversion proceedings initiated on its own motion, finding plaintiff to be a common rather than a contract carrier and granting certificate in lieu of plaintiff's permits, being supported by substantial evidence, is affirmed.—Tar Asphalt Trucking Co. v. United States, 208 F. Supp. 611 (614, 615)*.

There is no merit to argument that the commission's attempt to convert plaintiff's status from contract to common carrier, against plaintiff's will, amounts to a taking of private property for public use without just compensation and without due process of law in violation of the Federal Constitution; the act does not authorize, or the commission's order effect, a conversion of plaintiff from a private carrier to a public utility; the statute merely embodies a new definition of "contract carrier" and empowers the commission to determine whether one holding a contract-carrier permit comes within that definition; ample evidence sustains conclusion that

plaintiff does not.—Id., p. 615.

An administrative interpretation of a statute by the agency charged with its application and enforcement, though not controlling or binding on the courts, is entitled to great weight; in concluding that separate transfers of operating rights of two transferors to a single transferee, neither alone being subject to §5, did not constitute a single transaction which might be subject to §5, and in permitting the transfers under §212(b), the commission did not exceed its statutory authority; the separate orders sustained.—Ship-By-Truck Co. v. United States, 208 F. Supp. 847 (851-2)*.

The commission exceeded its statutory authority in requiring segregation of plaintiffs' private-carrier operations from for-hire operations for which "grandfather" authority was granted under §7(c) of Transportation Act of 1958; that section contains nothing that authorizes such restriction, which would drastically change the basic character of plaintiffs' bona fide operations as conducted on the statutory date and thus deny them the substantial parity of future and past operations contemplated by the "grandfather" clause; proceeding remanded for further consideration in accordance with the views expressed.—Winter Garden Co. v. United States, 211 F. Supp. 280 (291)*.

The commission's application of the "15,000-pound rule," in holding that heavy hauler's authority entitled it to transport Army cargo trucks weighing over 15,000 pounds each, although no special equipment was required or used, served to enlarge the carrier's operating authority in a manner not prescribed by law; such finding was clearly erroneous and beyond its statutory authority. The commission's order set aside and declared a nullity.—United Transports, Inc. v. United States, 214 F. Supp. 34 (42-3, 44)*.

The commission has no power to set aside an ordinance of a municipality on the ground that it does not mean what it declares itself to mean; in holding that ordinance of Orange, Tex., annexing an extensive but narrow strip of land and declaring that the annexed strip is for all purposes part of the city, did not extend the boundaries of Orange for purpose of the commercial zone regulations, the commission extended its quasi-judicial power beyond any conferred upon it by Congress. Order set aside and the case remanded for further proceedings consistent with the court's views.—Yellow Transit Freight Lines, Inc. v. United States, 221 F. Supp. 466 (468)*.

Reviewing court may not modify or set aside the commission's order if it lies within the scope of the commission's statutory authority and is based on adequate findings, which in turn are supported by substantial evidence on the record as a whole. The commission is charged with determining whether a proposed §5 transaction is consistent with public interest; it is the wisdom and experience of the commission, not that of the court, which must determine whether control transaction in question is consistent with the public interest; order authorizing acquisition of control sustained.—Black Ball Freight Service v. United States, 223 F. Supp. 191 (194, 197, 199)*.

The function of the reviewing court is limited; in absence of some specific prejudicial departure from requirements of law or abuse of the commission's discretion the court may not intervene. The commission acted well within its statutory powers and on substantial evidence when it found that public convenience and necessity required issuance of considered motor carrier certificates, and that protestant's (plaintiff's) operating rights did not authorize it to provide proposed service. Even if scope of plaintiff's certificates had not been so interpreted, the commission's conclusion that its joint-line service would not meet shippers' requirement for single-line service in refrigerated equipment is supported by the record as a whole. Sustained.—Worster Motor Lines, Inc. v. United States, 226 F. Supp. 603 (605-7, 608)*.

The commission was correct in dismissing §5(2) application for control and merger of an intrastate carrier and related §207 application for continuance of interstate operations purportedly conducted by it under single-State exemption proviso, upon finding that acquired carrier's proviso status was void from the beginning because of illegal common control with a multistate carrier, and that the transaction was therefore not within scope of §5. It was proper to consider prior illegal control in

a §5(2) proceeding, and the statute should not be construed to require the commission to decide applications not properly before it. Plaintiffs are not entitled to a mandatory injunction directing the commission to take jurisdiction of the subject matter of the two applications in question.—Hart v. I.C.C., 226 F. Supp. 635 (641, 643, 644, 645)*.

The commission's conclusion that minimum-rate limitation on proposed rates violates §3(1) is inadequately supported by its finding of similarity of competitive transportation conditions as between the prejudiced and preferred points, which is itself unsupported by substantial evidence, and constitutes an abuse of discretion in that it was made despite other findings by the commission that the transportation conditions are in fact not similar; and finding that level of the proposed rates would be inadequately compensatory if the prejudice so found were removed, being based largely on the erroneous §3 finding, is likewise invalid. Accordingly, the commission's conclusion that the proposed rates must be increased to avoid unfair and destructive competition in violation of the national transportation policy exceeds the statutory authority granted it and is also invalid; the order is therefore null and void and must be set aside.—Cincinnati, N.O. & T.P. Ry. Co. v. United States, 229 F. Supp. 572 (579-80)*.

In suit to set aside the commission's grant of motor carrier authority, the function of the reviewing court is limited to determining whether the commission's order is within the range of its statutory authority and is based on adequate findings supported by substantial evidence. The court may not choose between competing views of the commission's examiner and its employee review board; while the examiner's report is considered in determining substantiality, the court's determination is made on the record as a whole. The commission's finding of a need for the proposed unique service is well within the realm of its authority; its judgment on that score is entitled to the same respect it commands for other matters within its purview, and the court is afforded no basis for disturbing it.—Trailways of New England, Inc. v. United States, 235 F. Supp. 509 (513, 514)*.

While a construction by the body charged with enforcement of a statute, which construction long has been in effect (and impliedly sanctioned by reenactment without change in the particulars construed) must be treated as read into the law, and the commission's ruling that joint motor-rail or motor-rail-motor rates are subject to 49 US §4 is based on its decision in 219 ICC 245 (1936) that has been followed in numerous cases, administrative interpretations do not become the ruling law on the issue, regardless of time they have been in effect, if the initial interpretation was erroneous or beyond the agency's authority in the first place. The commission, as a creation of Congress, has only the power bestowed on it by its constituent legislation; and ultimate responsibility and power to determine limits of that administrative power lies in the courts.—New York Central R. Co. v. United States, 267 F. Supp. 619 (624-5)*.

In reviewing the commission's authority, it is the court's duty to measure the administrative action solely against statutory grounds invoked by the agency; and administrative construction is merely an aid to judicial review and is not binding on the court. No statutory authority is set forth for the ruling in issue; indeed analysis of the relevant statutes, and of judicial consideration thereof, supports a conclusion contrary to that of the commission; accordingly, the ruling that motor-rail or motor-rail-motor rates are subject to provisions of §4, and the commission's findings that considered TOFC rates violated §4(1), are annulled and set aside.—Id., pp. 625-6, 631-2.

See also Auclair Transp. case, 49 USC §207(a), n. 6 *prior or subsequent movement by rail.*

46.—Arbitrary orders.—[Vols. 4, 7, 10-19].—In limiting "grandfather" authority to two origins in Tennessee, the commission acted arbitrarily and without supporting evidence when characteristics of the traffic and proof of multiple pickup service at 8 widely scattered points entitled plaintiff to statewide origin authority; remanded for further consideration in light of the views expressed.—Winter Garden Co. v. United States, 211 F. Supp. 280 (286)*.

There being no substantial evidence in the

record to support the commission's finding that plaintiffs have been and are engaging in unauthorized transportation of sugar in interstate commerce as a common or a contract carrier in violation of the Interstate Commerce Act, in so finding and entering its cease-and-desist order the commission arbitrarily exceeded its legal authority; order permanently enjoined.—Shannon v. United States, 219 F. Supp. 781 (782-3)*.

That the commission, after adopting the examiners' statement of facts, reached different conclusions does not make its decision arbitrary, capricious, or unlawful. The commission, upon substantial evidence, made three basic changes in the examiners' findings which necessitated reversal of their conclusion; order sustained.—Eazor Exp., Inc. v. United States, 218 F. Supp. 393 (395)*.

In finding that a condition on approval of proposed issue of stock to carrier's employees under an option plan, that the stock be sold at not less than its par value, was necessary to support the required finding that the proposed issue would be compatible with public interest, the commission properly exercised a statutory discretion; under the facts and circumstances of the case, imposition of that condition rests on a rational basis and is not arbitrary or capricious. The commission's order sustained.—Chicago, S.S. & S.B. R. v. United States, 221 F. Supp. 106 (109)*.

The commission's ruling that good-faith operations require that authority issued be read, and that if plaintiff did not read his certificate he is lacking in bona fide operation, or that if he did his considered operations were willfully unlawful, is an erroneous statement of law and an inadequate substitute for actual findings as to whether plaintiff and its predecessors did or did not read the certificate and whether the circumstances were such as to preclude a bona fide operation. The commission leaps to its hypothetical alternative disposition of the issue without making the requisite subordinate findings as to what actually happened and why the concrete circumstances of the case support the legal conclusion that bona fide operation was lacking; it is at best unclear what the commission purports to find, or, at worst, its ultimate finding is wholly arbitrary. Order denying plaintiff's petition for modification of its "grandfather" certificate must therefore be vacated and the cause remanded for further proceedings.—Nashua Motor Exp., Inc. v. United States, 230 F. Supp. 646 (650-2)*.

Ambiguity in a certificate that is merely superficial, resulting only from routine administrative consolidation of two separate grants of authority, neither of which is ambiguous when considered separately, justifies inquiry only to the point of source of original authority, and does not allow examination of what is then indicated to be a secondary source—the original proceeding. The commission's making of the latter inquiry, in such circumstances, was but a thinly veiled violation of the protection allowed existent and operating authority by §212(a) of the act. The commission's order is faulty in law and clearly erroneous; set aside and enjoined.—Parkhill Truck Co. v. United States, 240 F. Supp. 842 *845)*.

48. Soundness of commission's reasoning.—[Vols. 4, 11-19].—Record of proceedings before the commission adequately supports its finding that the policy of requiring racial segregation in facilities used for interstate commerce has been practiced on such regular basis that case-by-case action on individual complaints under §216(e) does not afford an adequate remedy; existence of statutes in many states requiring race segregation in such facilities would be an adequate basis for that conclusion.—State of Georgia v. United States, 201 F. Supp. 813 (815)*.

The courts are not concerned with correctness of the commission's reasoning or with consistency or inconsistency of decisions which it has rendered.—Atlantic Coast Line R. Co. v. United States, 202 F. Supp. 456 (458)*.

While it is the commission, not the court, that brings expertise to bear on the problem, judicial deference to the commission's administrative findings is not boundless. Determination of whether the commission's construction of the certificates and the statute involved is unreasonable must rest, at bottom, on the rationality of application of its findings of fact to its ultimate rulings of law.—Roadway Exp., Inc. v. United States, 213 F. Supp. 868 (874)*.

The commission's fact inference, where shipper supplies C & S containers and carrier provides neither loading nor unloading services but merely transports shipper's [loaded] containers in ordinary vehicles, that the aggregate of facilities provided constitutes a property-carrying unit which is the practical equivalent of a tank or hopper type vehicle, was a legitimate inference within its particular competence as a trier of the facts.—Id., p. 874.

In determining plaintiff's "grandfather" rights under Transportation Act of 1958 to transport bananas and frozen fruits, berries, and vegetables, the commission improperly refused to consider evidence of its operations prior to 1957 and of its holding out and solicitations throughout the "grandfather" period. Both those matters were proper standards the commission was required to consider in determining scope of plaintiff's bona fide operations, and failure to consider either one of them was enough alone to invalidate its order. Order set aside and proceeding remanded to the commission for further proceedings consistent with the court's opinion.—Frozen Food Exp. v. United States, 219 F. Supp. 131 (137, 140)*.

The commission's order striking down plaintiffs' all-commodity boxcar rates on mixed or straight shipments of manufactured articles, finding them to be unreasonable and a destructive competitive practice, is unlawful because based on an erroneous interpretation of §1(6) of Interstate Commerce Act. Issues of the case should never have been framed under §1(6) nor the meaning of the national transportation policy, as referred to in §15a(3), been distorted to supplement it; the order set aside.—New York, N.H. & H. R. Co. v. United States, 221 F. Supp. 370 (372, 376)*.

The approach and interpretation adopted by the commission in construing plaintiff's authority for a route between New York City and Orange, N.J., via Newark as contemplating an east-west operation, and declaring an inordinate amount of indirectness or circuity thereunder unlawful, stands on a firm and rational basis. The commission's rejection of plaintiff's assertion of authority to operate over Garden State Parkway in East Orange and Bloomfield either under that grant or by tacking it with its authority between New York City and Bloomfield is not without justification, and the finding that plaintiff's challenged operations were unlawful is warranted. Such interpretation does not modify or revoke any of plaintiff's operating rights, but merely defines those possessed by it under the grant, and is not clearly erroneous; sustained.—DeCamp Bus Lines v. United States, 224 F. Supp. 196 (208, 209)*.

In action to set aside the commission's order in consolidated proceeding involving, among others, a reopened "grandfather" proceeding, the court's task ends if the commission properly applied the statutory standards. The commission considered very thoroughly all the evidence, both documentary and oral, with respect to plaintiff's service prior to, on, and since the statutory date, and determined that its permit reflected all the "grandfather" authority to which it was entitled; and proper statutory standards were applied in making that determination. Fact that the commission adopted the examiner's findings, with slight modifications, and rejected his recommendations does not compel a different conclusion. The Commission not only is at liberty to reach its own conclusions on the evidence but is required to do so; sustained.—Zuzich Truck Line, Inc. v. United States, 224 F. Supp. 457 (465-6)*.

Courts are not concerned with the soundness of the commission's reasoning or with the wisdom of its decisions; and fact that it may have reached a different conclusion than that recommended by its examiner is of no importance, since the commission has a legal duty to arrive at its own conclusion. The judicial function is exhausted when there is found to be a rational basis for the conclusions reached by the administrative body; the commission's interpretation of plaintiff's certificate is entirely consistent with logic and common sense and is not arbitrary or clearly erroneous; sustained.—Mitchell Bros. Truck Lines v. United States, 225 F. Supp. 755 (758, 760)*.

The commission's disapproval of purchase of vendor's active operating rights does not constitute a "punishment" when the examiner found a deliberate attempt to build up its

dormant rights for purpose of passing them off as bona fide and further found, on adequate evidence, no clear public need for proposed service. Also, denial of the application because of vendee's unlawful control of vendor is not inconsistent with granting vendee authority to acquire other motor carriers in contemporaneous proceedings; if the commission feels that denial of only considered application will be sufficient punishment to keep vendee from flirting close to the line of illegality, the court sees no reason why its judgment should be disturbed.—Lombard Bros., Inc. v. United States, 226 F. Supp. 905 (908)*.

A reviewing court will not disturb an order of the commission if the order is within the commission's statutory authority and is based on adequate findings which are supported by substantial evidence. While the commission has wide discretion in deciding whether additional motor service should be authorized, for the court to decide whether it properly exercised that discretion (in partially denying plaintiff's application) it must disclose the basis for its order. The commission made no specific findings as to factors which motivated the partial denial, other than its conclusion that the proposed service would be competitive and that there was no clear showing of inadequacy of existing service; this was insufficient. That part of the order partially denying the application must be set aside and the cause remanded to the commission for action in accordance with the court's opinion.—Vincent Montone Transp., Inc. v. United States, 231 F. Supp. 484 (487-9)*.

The commission's basic findings must be supported by the evidence, and its ultimate finding must flow rationally from the basic findings; if a basic finding is supported by the evidence and affords legally adequate basis therefor, the commission's order must be affirmed. However, the ultimate finding that assailed rates were not unlawfully prejudicial or preferential is not, as a matter of law, supportable by either of the basic findings that (1) conditions with respect to allegedly preferred areas in San Francisco rate group, when compared with allegedly prejudiced points in Stanislaus County, do not require rates to and from the county on same basis as the lower group rates and (2) complainants failed to show that the rate disparity resulted in damage to the area claimed prejudiced; also, the evidence does not support those basic findings.—Stanislaus County v. United States, 236 F. Supp. 146 (148-51)*.

While the preferred areas were originally included in the San Francisco group because of intermediacy, transportation conditions have changed and, as there is no showing of any present difference in that respect between preferred and prejudiced points, intermediacy does not justify present rate disparity; nor does the fact that competitive motor carrier rates follow the rail grouping, when those rates are not themselves shown to be lawful; nor does the proximity of preferred areas to San Francisco, with its greater population and industrial density, when that condition is not shown to result in lower costs to the railroads serving those areas. As to the commission's second basic finding, the evidence discloses numerous instances of competition between prejudiced points and those in preferred areas, as well as instances of actual injury to the county, sufficient to warrant a presumption of damage from the rate disparity.—Id., pp. 149-50.

While it is possible that the commission could have looked to other conditions in arriving at its finding that conditions with respect to the preferred areas were not present with respect to points in Stanislaus County, the grounds on which an administrative order must be judged are those which the record discloses that the order was based upon, and the conditions described are the ones discussed by the commission in its order. This does not preclude the possibility that the record as it stood before the commission might have shown other conditions which would justify its finding, or that justifying evidence might be adduced on reconsideration. Accordingly, the order is set aside and the case remanded with directions to take action consistent with the views expressed.—Id., pp. 150, 152.

Considering that in five recent court decisions on facts essentially similar to those presented on the present record, in each of which it was held that a "driveaway" operation was subject to the Interstate Commerce

Act, and considering also the commission's rulings in 64 MCC 475 and 77 MCC 365, both of which involved operations not materially distinguishable from those of plaintiff, the commission's conclusion that plaintiff's "driveaway" business ia a common carrier operation subject to application of the act is supported by substantial evidence; sustained.—Spencer v. United States, 236 F. Supp. 230 (232)*.

In action to set aside the commission's order approving proposed purchase transaction, it is neither the duty nor the right of the reviewing court to inquire into the soundness of the commission's reasoning, the wisdom of its decisions, or the consistency of its conclusion with those reached in similar cases.—Alabama Highway Exp., Inc. v. United States, 241 F. Supp. 290 (293)*.

If, judged by applicable standards of law, the commission was right in concluding, on reconsideration, that public convenience and necessity required continuation of intervening defendant's operations without an "in truckload lots" restriction in its certificate, it is unimportant that a different result was reached at an earlier time. The question is whether the commission's conclusion under review reflects a permissible judgment in conformity with statutory standards. Furthermore, as noted, the record considered by the commission in the present proceedings was not identical with record in the earlier proceedings. The commission's orders sustained, and complaint dismissed.—R-C Motor Lines, Inc. v. United States, 241 F. Supp. 124 (126-7)*.

Even if the commission did depart from its precedents by granting motor carrier authority to intervening defendants, that would not be a basis for annulling the orders under review. The court is concerned only with whether or not the evidence presented will support conclusions actually reached by the commission in granting considered certificates, not with the consistency or inconsistency of commission decisions. The fact that there is substantial evidence for other conclusions is not decisive, since transcript of testimony heard by the commission in each of the cases reveals substantial evidence in support of its findings and conclusions therein; orders of the commission sustained.—United Van Lines, Inc. v. United States, 266 F. Supp. 586 (589-90)*.

In action to review the commission's order denying, in part, "grandfather" authority sought by plaintiff, the court is not concerned with the commission's reasoning or with the consistency or inconsistency of its decisions. The commission's judgment is to be exercised in the light of each individual case; and it is only where an error is patent that the court may say it exceeded its statutory authority. Considered order is not erroneous, but is reasonable and supported by substantial evidence; complaint dismissed.—Denton Produce, Inc. v. United States, 270 F. Supp. 402 (405, 407)*.

49. Expediency or wisdom of order, substitution of judgment.—[Vols. 4, 7, 10-19].—The reviewing court may not substitute its own judgment concerning need for considered motor carrier service or speculate what the commission may have done had its experience and administrative practices and rulings taken a different course in the past. The commission's findings in the application proceeding, supported by evidence, of public need for proposed service are accepted, as they must be.—Carolina Scenic Stages v. United States, 202 F. Supp. 919 (925)*.

In reviewing an order of the commission, judicial function of the court is exhausted if a rational basis for the commission's conclusions is found. The court may not substitute its view for the judgment of the commission if that judgment has support in the record and the applicable law.—Atlantic Coast Line R. Co. v. United States, 205 F. Supp. 360 (363)*.

Judicial function of a reviewing court is exhausted where there is found to be a rational basis for the conclusions of an administrative agency; once this rational basis is established, the court cannot substitute its own view concerning what should be done; the commission's order affirmed.—General Motors Corp. v. United States, 207 F. Supp. 641 (643, 648)*.

As much as the court might feel inclined to do at times, it cannot substitute its judgment for that of the commission or challenge the wisdom of its actions.—Great Northern Ry. Co. v. United States, 209 F. Supp. 230 (232)*;

Id., 209 F. Supp. 234 (236)*; Id., 209 F. Supp. 238 (240)*.

A court cannot substitute its judgment for that of the commission, but can only ascertain whether there is warrant in the law and facts for the order under review; review of entire record shows that the commission's order converting plaintiff's contract-carrier authority to common-carrier is supported by substantial evidence, and is in accord with applicable law; affirmed.—P. Saldutti & Son, Inc. v. United States, 210 F. Supp. 307 (315)*.

In action to enjoin in part or void entirely the commission's order authorizing railroad merger, the court will not substitute its judgment for that of the commission as to importance of factors which plaintiffs claim should be given greater weight, including book value and stockholder rights, in the determination of a just and reasonable ratio for exchange of stock of the merging railroads for stock of the merged company.—Fried v. United States, 212 F. Supp. 886 (889, 892)*.

The commission is the expert in the field of transportation and its judgment is entitled to great deference because of its familiarity with conditions of the industry it regulates. It is not the court's function to substitute its independent judgment for that of the commission, for the commission's discretion is to draw its conclusions from all the circumstances which occur in specific instances; the court's function is exhausted when rational basis is found for the commission's conclusions.—Roadway Exp., Inc. v. United States, 213 F. Supp. 868 (873).

Function of the reviewing court is limited to ascertaining whether there is warrant in the law and the facts for what the commission has done; it cannot substitute its own view concerning what should be done, whether with reference to competitive situations or others, for the commission's judgment on matters committed to its determination, if that has support in the record and the applicable law.—Refrigerated Transport Co. v. United States, 214 F. Supp. 536 (538-9)*.

Judgment of the reviewing court may not be substituted for that of the commission when the commission's finding, that railroads had failed to show that differences in competition justified the rate disparity in question, was warranted by the record; such finding cannot be easily overturned. It is the type of finding on which the commission's expertise is brought to bear; sustained.—Atchison, T. & S.F. Ry. Co. v. United States, 218 F. Supp. 359 (376, 377)*.

The court's scope of review is limited; it may not review the evidence de novo but must sustain the commission's findings and conclusions where they are found to be supported by substantial evidence. Unless specific and prejudicial departure from requirements of the law or abuse of discretion is shown, the reviewing court is without authority to intervene and substitute its judgment on the issue of fact committed to the commission's determination; no such showing is made. There is substantial basis on the record for the commission's order; sustained.—Studna v. United States, 225 F. Supp. 973 (981-2, 984)*.

In action to set aside the commission's order granting motor carrier operating authority, it is not the court's function to examine the evidence before the commission and substitute its judgment for that of the commission. The expertise of the commission is entitled to great deference and gives rise to a presumption of validity, if its findings are supported by substantial evidence.—Worster Motor Lines, Inc. v. United States, 226 F. Supp. 603 (605-6, 608)*.

A court may not substitute its judgment for that of the commission, but may only ascertain whether there is warrant in the law and facts for the order under review; if, upon review of the whole record, there is a rational basis for the commission's action and no abuse of discretion or prejudicial departure from the requirements of law, the commission's determination will not be disturbed.—Seatrain Lines, Inc. v. United States, 233 F. Supp. 199 (203)*.

So long as the commission has not violated the law or abused its discretion, a reviewing court is without authority to intervene and substitute its determination of the paramount public interest for that of the commission. Since the commission has neither violated the law nor abused its discretion in finding that grant of contract carrier permit is not in contravention of the national transportation poli-

cy even though applicant's majority stockholder is an employee of the sole supporting shipper, the court may not overrule its expert decision. Moreover, even if it could do so, the court would not reverse the commission's determination, since it agrees with that conclusion.—Deioma Trucking Co. v. United States, 233 F. Supp. 782 (784)*.

Since the commission is one of those agencies presumably equipped or informed by experience to deal with a specialized field of knowledge, whose findings within that field carry the authority of expertness which courts do not possess and therefore must respect, the commission's action, if supported by substantial evidence and adequate findings, must be affirmed.—Safeway Trails, Inc. v. United States, 234 F. Supp. 362 (365)*; even as to matters not requiring expertise, a court may not displace the commission's choice between two fairly conflicting views, even though the court would justifiably have made a different choice had the matter been before it de novo.—Id., p. 365.

A statutory three-judge court cannot substitute its judgment for that of the agency, if a rational basis exists to support the commission's order. The commission's conclusions that protestant in application proceeding (complainant) could not provide contract-carrier service requested by shipper, that it did not have authority to haul pig iron to the area claimed, and that pig iron is not a bulk commodity, being amply and substantially supported by the facts and law, complaint is dismissed.—Erskine & Sons, Inc. v. United States, 235 F. Supp. 907 (908-9)*.

The courts are not to substitute their discretion for that of the commission. When the commission's action is based on proceedings had by it pursuant to its authority and its order is based on due consideration of substantial evidence, that is all that is required of it, and the court may not substitute its judgment for that of the commission.—Teamsters Joint Council 40 (J.C.) v. United States, 238 F. Supp. 301 (303, 307)*.

The court's duty in reviewing the commission's order authorizing an acquisition of control is to determine whether the commission's conclusions find support in the record as a whole, even though the court would justifiably have made a different choice had the matter been before it de novo. If the commission has made adequate findings which are supported by substantial evidence, the court may not set aside the order even though it may disagree with such findings. The wisdom and experience of the commission, not of the courts, must determine whether the proposed consolidation is consistent with public interest, and if the commission did not exceed the statutory limits within which Congress has confined its discretion, it is not the court's function to upset its order.—Alamo Exp., Inc. v. United States, 239 F. Supp. 694 (697)*.

The court may not substitute its own judgment for that of the commission when acting within scope of its authority and supported by substantial evidence.—Andrews Van Lines, Inc. v. United States, 240 F. Supp. 763 (769)*.

The function of the reviewing court is a very limited one. So long as the commission has not abused its discretion and its findings are supported by substantial evidence, its order disapproving proposed sale of motor carrier operating rights must be sustained even though the court would have reached a different conclusion had the matter been before it *de novo*. Complaint dismissed, and temporary restraining order vacated.—C & H Transp. Co., Inc. v. United States, 249 F. Supp. 97 (98, 101)*.

The reviewing court cannot weigh the wisdom of the commission's decision and order finding export rates on cotton from specified origins unduly prejudicial to one port and unduly preferential of others. Principle that the court may not substitute its own view concerning what should be done, whether as to competitive considerations or others, for a judgment of the commission on matters committed to its determination that is supported in the record and the law, has long been applied to discriminatory rail rate situations. It is for the commission to determine whether a discrimination or preference is undue, unreasonable and unjust, since Congress has constituted it as the expert body which is informed by experience to make such a determination; thus, beyond determining whether the commission followed legal principles and procedures, the court has no

greater role than ascertaining whether a rational basis exists for the order under review.—City of Galveston v. United States, 257 F. Supp. 243 (245-6)*.

50. Affirmative or negative orders.—[Vols. 4, 7, 10-13, 15, 16, 17].—Order requiring cancellation of increased switching charges (that had been permitted to go into effect) is a determination that the railroads could not impose certain charges, thus an order that determines a "right or obligation" so that "legal consequences" will flow from it, and is reviewable by the courts.—Pennsylvania R. Co. v. United States, 216 F. Supp. 199 (200-1)*.

53. Legality of order moot.—[Vols. 4, 7, 10, 17-19].—Since the commission orders under attack are those requiring the railroads to cease and desist from charging the rates found to cause unlawful discrimination, and those orders are found by the court to be adequately supported and in accordance with law, therefore valid, questions raised by motion to dismiss the complaint in part, on ground that the commission's finding specifically directed to assailed rates from Tennessee River ports is not attacked, are moot. Complaint dismissed.—Chicago, R.I. & P. R. Co. v. United States, 233 F. Supp. 381 (385, 388)*.

See also Seatrain Lines, Inc. v. U.S., n. 9, above.

54. Review of commission's findings of fact.—[Vols. 4, 7, 10-19].—In order for an administrative tribunal's basic or essential findings of fact to be given conclusive weight, they must not only be supported by substantial evidence, but such findings must be set out with clarity and completeness.—General Motors Corp. v. United States, 207 F. Supp. 641 (644)*.

In determining plaintiff's "grandfather" application under the Transportation Act of 1958 the commission rejected evidence of shipments in 1955 and 1956 as too remote to have probative value, but its order fails to contain findings which support that conclusion, and the record is not clear whether, or to what extent, consideration was given to shipments subsequent to 1958. This uncertainty in the findings makes it difficult to ascertain what standards were used in the determination and whether the findings were supported by the evidence; findings of that kind are insufficient. Whether the commission has applied the proper standards in arriving at its conclusions and order cannot appear until the order reflects consideration of the applicable evidence; remanded for rehearing in conformity with the opinion.–Hale Distributing Co. v. United States, 221 F. Supp. 266 (269, 270-1)*.

Extent of the "grandfather" rights to which an applicant is entitled is primarily a question of fact which Congress has entrusted to the commission to determine; the task of the court ends if the commission has properly applied the statutory standards. The commission considered very thoroughly all the evidence with respect to complainant carrier's service prior to, on, and since the statutory date and determined that its permit reflected all "grandfather" rights to which it was entitled; proper statutory standards were applied in making that determination; therefore, the commission's order denying modification of the permit must stand.–Zurich Truck Line, Inc. v. United States, 224 F. Supp. 457 (466)*.

Determination of the justness and reasonableness of rates is peculiarly for the commission's judgment and discretion; its judgment is to be exercised in light of the facts of each case, and the courts have no concern with consistency or inconsistency of its decisions. Furthermore, the presumption that it has properly performed its official duties supports its acts in asbence of clear evidence to the contrary. There is ample warrant in the statute and the evidence for finding considered general rate increases unreasonable insofar as they resulted in higher rates to border points than to points beyond in another territory; the report clearly expresses and explains the conclusions reached, and those conclusions are not inadequate, immaterial, or arbitrary. There is no meritorious legal basis for attacking the order requiring cancellation of the rates found unlawful, without prejudice to application of the lower more-distant-point rates as maxima at the intermediate border points. The order sustained.—Accelerated Transport-Pony Exp., Inc. v. United States, 227 F. Supp. 815 (820-1)*.

Where Congress has entrusted to the commission the power to determine the issues of fact involved in a proceeding, the scope of

judicial review is limited to ascertaining whether there is warrant in the law and the facts for what the commission has done; unless there has been a departure from the law or an abuse of the commission's discretion, the court has no authority to intervene.—Melman v. United States, 231 F. Supp. 503 (506)*.

The commission's conclusion that plaintiff Seatrain Lines failed to prove a violation of §3(4) in western railroads' participation in reduced all-rail rate on aluminum articles from Sandow, Tex., to Cressona, Pa., while continuing to maintain a rate on higher level to Texas City, where the traffic is interchanged with Seatrain, based on findings that the all-rail and rail-water-rail routes comprehend entirely different services, that the relevant transportation circumstances and conditions at the respective points of interchange are so radically different that a finding of discrimination against Seatrain would be arbitrary and capricious, and that Seatrain had not sufficiently identified the discriminating carriers, is not adequately supported by the evidence. Disparities established by Seatrain respecting rates, costs, and divisions of revenue are of sufficient magnitude to make out a prima facie case of discrimination, which is not overcome by the differences noted in transportation conditions. Order on the §3(4) issue is therefore set aside and the matter remanded for further proceedings.—Seatrain Lines, Inc. v. United States, 233 F. Supp. 199 (204, 213)*.

The commission's conclusion that a complete service was shown to be required by supporting shipper was a sufficient finding of "distinct need" for applicant's proposed contract-carrier service. Examiner's report, which the commission adopted, describes facts which caused shipper to seek the service applied for; those facts clearly show a distinct need on shipper's part, and his failure to list them under the heading "Findings" or "Conclusions" does not detract from their weight or acceptance. The commission's order sustained.—Deioma Trucking Co. v. United States, 233 F. Supp. 782 (783)*.

The commission's decision that plaintiff had been operating in violation of §§5(4) and 206(a)(1) of the Interstate Commerce Act for about 4 years, that territory involved would be adequately served in the future without consummation of proposed purchase, and (on those premises) that it would not be consistent with public interest to approve the purchase, is a factual judgment permitted by §5(2)(c) of the Act. The subsidiary facts being precisely and completely recounted, and the commission's ultimate inference from them being securely founded, the court's power of review ends. Sustained.—Tank Lines, Inc. v. United States, 236 F. Supp. 354 (356)*.

The commission's denial of plaintiffs' proposed purchase transaction was based eclusively upon its findings that to allow the application would establish a new and different service in considered area, that no need for the extra facility was shown, and that its creation would not be "consistent with the public interest"; the quoted phrase expresses the criterion by which the commission is required by statute to appraise such a transaction. Altogether factual, the holding is clearly stated and, being neither manifestly without foundation in the evidence, nor unsound in law, it may not be up-ended by the court, sustained.—Great Coastal Exp., Inc. v. United States, 243 F. Supp. 943 (944-5)*.

In action to set aside the commission's decision and order granting railroad's application to discontinue interlocking plant, the commission's findings relative to density of movement through the interlocking were factual determinations; thus, they are subject neither to revision nor substitution by the courts.—Legge v. United States, 244 F. Supp. 878 (881)*.

55.—Weight of evidence.-[Vols. 4, 7, 10, 12, 13, 15-19].-It is the task of the commission and not of the courts to pass upon the weight and credibility of the evidence in commission proceedings.—Alabama Highway Exp., Inc. v. United States, 241 F. Supp. 290 (293)*; Atchison, T. & S. F. Ry. Co. v. United States, 218 F. Supp. 359 (377)*; Denton Produce, Inc., v. United States, 270 F. Supp. 402 (405)*; Cincinnati, N. O. & T. P. Ry. Co. v. United States, 229 F. Supp. 572 (574)*; U. S. A. C. Transport, Inc., v. United States, 235 F. Supp. 689 (692)*; Worster Motor Lines, Inc., v. United States, 226 F. Supp. 603 (605)*.

Bindings and conclusions of the commission may not be disturbed where only a question of the weight of the evidence is involved. [See 315 US 475.] And that restriction applies to "grandfather" application proceedings.—Frozen Food Exp. v. United States, 219 F. Supp. 131 (136)*.

Weighing of the evidence before it is for the commission exclusively, and the reviewing court may not substitute inferences of its own for those drawn by the commission from testimony or weigh anew any conflicts therein. The commission's report adequately reviewed the weight it gave to evidece of opposing parties on effect of proposed affiliation of Chesapeake & Ohio and Baltimore & Ohio, not only on New York Central, but on all other railroads whose traffic might be affected; its findings carefully reviewed the testimony of Central's witnesses, gave its reasons why it found their estimates unreliable, and reviewed the evidence supportive of its conclusion that the claimed diversion would not be undue. This was sufficient.—Broth, of Maint. of Way Employees v. United States, 221 F. Supp. 19 (24, 25-6)*.

See also State Corporation Com'n of State of Kansas v. U.S. 49 USC §13(4), n. 71.

56.—Substantial evidence to sustain order.—[vols. 4, 7, 10-19].—It is not the court's function to weigh the evidence before the commission or to substitute its judgment for that of the commission on the question of public need for the service involved; the court's sole responsibility is to determine whether there was before the commission evidence to support its finding that the present and future public convenience and necessity required applicant's proposed service; testimony of 67 public witnesses and of representative of railroad which had abandoned virtually all service in the area amply supported commission's conclusion; sustained.—Edwards Motor Transit Co. v. United States, 201 F. Supp. 918 (922)*.

Findings made by the commission must be supported by substantial evidence before they will be upheld by the courts. The commission's finding that adequate existing service is available and will reasonably meet supporting shipper's asserted needs, is supported by substantial evidence which affords a logical basis for conclusion that plaintiff has not met his burden of proof. Denial of extension application, sustained.—Robbins v. United States, 204 F. Supp. 78 (82, 83)*.

All orders of the commission are entitled to be judged by the report, read as a whole, and by the record as a whole out of which the report arose; so judged, challenged orders granting certificate for a new carrier service and authorizing control of the new carrier by three other motor carriers are supported by findings which are neither arbitrary nor capricious, but are adequately sustained by the record, and there is rational basis for the administrative conclusions. The commission's orders sustained.—Aero-Mayflower Transit Co. v. United States, 208 F. Supp. 303 (305-6)*.

The commission had abundant evidentiary support for its approval in principle of the acquisition of control proposed in proceeding under review; it expressed doubt only as to overcapitalization of acquiring carrier without the conditions and provisions imposed by its supplemental reports and orders; so far as these represent matters which plaintiff may challenge, the commission's reports are sufficient to indicate the basis for its action; the orders under review are approved.—Walker v. United States, 208 F. Supp. 388 (395, 396)*.

The Interstate Commerce Act in general, and §207 in particular, gives the commission broad authority to pass on present and future public convenience and necessity; examination of the record is convincing that the essential findings made by the examiner and adopted by the commission are supported by substantial evidence and that such findings support the commission's order granting the certificate under attack; the commission's order sustained.—Sloan's Moving & Storage Co. v. United States, 208 F. Supp. 567 (569, 571)*.

The commission's finding, in denying plaintiff railroad's application for modification of its motor-carrier certificates to permit an unrestricted service competitive with independent motor carriers in the area involved, that it had failed to sustain its burden of showing that such service was required by public convenience and necessity, is supported by substantial evidence; plaintiff's arguments are contentions which the commission was within

its authority in rejecting, and its action was not arbitrary or capricious; sustained—Great Northern Ry. Co. v. United States, 209 F. Supp. 230 (233, 234)*.

In scrutinizing the evidence upon which a challenged order is premised, the court will not consider the expediency or wisdom of the order, or whether on like testimony it would have made a similar ruling, but only whether in the record as a whole there is substantive evidence to support the order.—A.L. Mechling Barge Lines, Inc. v. United States, 209 F. Supp. 744 (749)*.

Examiner's conclusion (adopted by the commission) that plaintiff had failed to show proposed gateway elimination and resulting more direct operation to be required by public convenience and necessity is supported by statistics detailing characteristics of present circuitous and proposed direct services, which had logical bearing on the subsidiary (though fundamental) question whether the proposed service was so close to the old that original determination of convenience and necessity would cover both; and on that evidence was based the finding that the proposed service would be so different as to constitute a new service as to which no determination of convenience and necessity had been made. Even if the court disagreed with the ultimate conclusion, it cannot be said that denial of plaintiff's application was not grounded on basic findings supported by probative evidence, sustained.—Yale Transport Corp. v. United States, 210 F. Supp. 862 (864-5)*.

While it is the commission, not the court, that brings expertise to bear on the problem, judicial deference to the commission's administrative findings is not boundless. Expertise is not sufficient by itself; the agency must make findings that support its decision, and those findings must be supported by substantial evidence. Sustained.—Roadway Exp., Inc. v. United States, 213 F. Supp. 868 (873-4)*.

Evidence adduced in application proceeding abundantly supports the commission's findings as to feasibility and public need for proposed service, fitness of applicant, and adverse effect on protestants in granting authority sought; record also shows that need for the service was based on considerations other than rates. However, entire application was premised on need for mixed truckload service, but authority to transport mixed shipments was granted; as there is no rational basis of record for grant of authority beyond that sought, case must be remanded for imposition of a proper restriction.—Refrigerated Transport Co. v. United States, 214 F. Supp. 536 (539-40)*.

It is clear from examination of the record as a whole that there was sufficient warrant in the evidence for examiner's findings, which were adopted by the commission, granting authority sought by intervening defendant and denying plaintiff's application for similar authority. Whether the court would find likewise upon the same evidence is a question not open for review; it is sufficient that the commission's action is supported by substantial evidence in the record; the commission's decision affirmed.—North American Van Lines, Inc. v. United States, 217 F. Supp. 837 (841)*.

The commission was warranted in ruling that defendant railroads had failed to show that differences in competition justified the rate disparity in question. Evidence of relative degree of competition was meager; there was no evidence regarding competitive motor rates; nor did railroads show any other details necessary to determine whether rate disparities between alleged prejudiced and alleged preferred points were warranted Sustained—Atchison, T. & S.F. Ry. Co. v. United States, 218 F. Supp. 359 (376)*.

Substantial evidence was presented at hearing from which the commission could justifiably conclude that plaintiffs' routes via New Jersey between Philadelphia and certain other Pennsylvania points were highly circuitous and time-consuming compared with direct operation over Pennsylvania highways, and that no intermediate stops were made in New Jersey to pick up or deliver freight. Evidence as a whole overwhelmingly supports the commission's findings that plaintiffs, which hold no intrastate authority between considered points, have abused their interstate certificates in utilizing such tacked-on routes as a deliberate expedient to escape the rightful jurisdiction of the Pennsylvania commission. The commission's cease-and-desist orders sustained.—Hudson Transp. Co. v. United

States, 219 F. Supp. 43 (46-8, 49-50)*.

There being substantial evidence in the record before the commission to support its action in authorizing abandonment of considered line of railroad, the commission's decision is affirmed. Complaint dismissed and restraining order dissolved.—State of Arizona v. United States, 220 F. Supp. 337 (342)*.

The commission's findings that Baltimore & Ohio was in precarious financial condition and could not by its own efforts obtain necessary financing, and that Chesapeake & Ohio was able and willing to aid it; that the affiliation sought would provide opportunity for cooperative effort and substantial economies and thus enable B & O to become a stronger and more efficient railroad; and that the affiliation would not cause any undue diversion of traffic from other eastern railroads, are all supported by substantial evidence, and such findings add weight to its ultimate conclusion that the affiliation was consistent with public interest. The commission's order sustained and temporary restraining order dissolved.—Bros. of Maint. of Way Employees v. United States, 221 F. Supp. 19 (25, 26-7, 30-1)*.

Although plaintiff contends that the condition imposed by the commission on approval of its proposed stock issue to employees under an option plan, that the stock be sold at not less than par value, was not supported by substantial evidence because, hearing having been denied, there was nothing from which any factual information could be derived to support the condition, the commission had before it plaintiff's financial statements submitted with its application, also its petition for modification which contained reference to price quotations of its stock on Midwest Stock Exchange, and thus could properly take official notice of the price quotations of the stock which appeared regularly in publications of wide daily circulation. Plaintiff has failed to show that the commission acted without substantial evidence; the c mmission's order sustained.—Chicago, S.S. & S.B. R. v. United States, 221 F. Supp. 106 (108-9)*.

Plaintiffs have failed to show that the commission's findings are insufficient as a matter of law to support its discretionary judgment that public convenience and necessity require issuance of certificates granted Railway Exp. Agency for motor operations in lieu of discontinued train service. Nor have they shown that the findings are unsupported by substantial evidence: record contains voluminous evidence of public need for REA's service, and shows that it is handling a substantial volume of express traffic from and to the points involved under temporary authority; moreover, plaintiffs do not challenge the finding that to date they have shown no willingness to perform express service of any kind. The commission's order sustained.—Auclair Transp., Inc., v. United States. 221 F. Supp. 328 (332, 333, 334)*.

The voluminous record before the hearing examiner, whose conclusions the commission adopted, contains a great deal of testimony and exhibits tending to sustain the fairness of the rates approved by the commission, and it is evident that the examiner's decision and the subsequent ruling of the commission were reached after careful study of all the relevant and extensive data presented at the hearings. There is no basis for holding that the commission's order was not supported by substantial evidence, or for concluding that the rates approved are unreasonable or excessive; sustained.—United States v. I.C.C., 221 F. Supp. 584 (587-8)*.

Record justified the commission's action in permitting acquired carrier, upon consummation of control transaction, to retain and exercise its authority to transport explosives between Idaho and Washington; from all the evidence before the commission, a reasonable mind might have found adequate basis to support its conclusions that the carrier's transportation of explosives between points in those States had been substantial and continuous, that it held itself out to handle all such traffic, commensurate with its facilities and abilities, and that the acquisition, if approved, would be consistent with public interest; sustained.—Black Ball Freight Service v. United States, 223 F. Supp. 191 (194-7)*.

The commission's finding that needs of shippers supporting plaintiff's application can all be met by protesting carriers and that those shippers have not adequately utilized the services of carriers now authorized and will-

ing to meet their needs, and its conclusion that plaintiff has failed to establish a need for motor transportation in addition to that available at time of the order, are borne out by substantial evidence. Plaintiff's showing that some supporting shippers might be more conveniently served by a locally based carrier does not overcome the ample evidence of record that existing service is adequate. Order denying plaintiff's application sustained.—Colorado-Arizona-California Exp., Inc. v. United States, 224 F. Supp. 894 (897, 900)*.

The commission's prior denial of authority to five applicants for charter operations from Long Island in no way detracts from the deference the court must afford its ultimate conclusion that the authority sought should be granted; the first determination was never reviewed by the court and might well have been in error, as the commission itself subsequently concluded. More basically, "substantial evidence" may well support two conflicting points of view; to say that only one position in any given case could be supported by "substantial evidence" would deprive the commission of the discretion afforded it by law, and would in effect be reviewing its determination to see if the "correct" result had been reached. This the court cannot and will not do; the commission's conclusions are supported by substantial evidence and must be upheld.–Campus Travel, Inc. v. United States, 224 F. Supp. 146 (148)*.

The commission's ultimate finding or conclusion must be predicated on basic findings supported by substantial evidence, and if such basis is found there is no need to examine the evidence further. The court is not concerned with the weight given to the evidence by the commission, the soundness of the reasoning by which its conclusion was reached, or whether the findings are consistent with those made in similar cases. The evidence of record is ample to show that all destinations in controversy could be served with reasonably adequate speed and volume by existing carriers; thus the commission did not err in holding that as to those destinations plaintiff failed to meet the demands of proof of convenience and necessity; the order sustained.—Curtis. Inc. v. United States, 225 F. Supp. 894 (898, 900, 901)*.

The reviewing court must sustain the commission when, viewing the record as a whole, its findings are supported by substantial evidence.—Worster Motor Lines, Inc. v. United States, 226 F. Supp. 603 (605-6, 608)*.

Scope of review of the commission's decision that control of a purported single-State proviso carrier in common interest with a multistate carrier, which would disqualify it from engaging in interstate operations under the proviso, was unlawfully effected prior to filing of its BMC-75 statement, is limited by the substantial evidence test. Substantial evidence must be enough to justify, if the trial were to a jury, a refusal to direct a verdict when the conclusion sought to be drawn from it is one of fact for the jury. Evidence of the role played by individual controlling the multistate carrier, both in financing acquisition of the intrastate carrier's stock by its present owner and in its subsequent operation and management, amply supports the commission's conclusion that he was the guiding and moving force behind it; the commission's conclusion sustained.—Hart v. I.C.C., 226 F. Supp. 635 (641-3)*.

The commission's findings and order are presumptively valid. Careful examination of the record before the commission, including plaintiffs' cost evidence, reveals no error in its finding that a cost differential which would justify higher compensation to the outbound carrier on ex-barge than on ex-rail grain from same river ports to same destinations was not substantiated. The commission's findings that such difference in treatment for the movement beyond the ports unjustly discriminated against shippers of grain moving to the ports by for-hire barge transportation, to extent that charges on such traffic exceeded the lowest division to the outbound carrier on like shipments of ex-rail grain, are not arbitrary, but are adequate, supported by the record, and in accordance with law, and there is rational basis for the commission's conclusions; sustained.—Chicago, R.I. & P.R. Co. v. United States, 233 F. Supp. 381 (385, 388)*.

The commission's authorization of Greyhound's proposed service to and from Camden, N.J., area is within scope of its statutory authority and fully supported by substantial

evidence. Camden County is a burgeoning suburban area, and many witnesses testified to inconvenience and delay occasioned by having to change to a Greyhound bus in Philadelphia on trips beyond that city; express picked up in or destined for Camden was likewise delayed in shipment. After weighing this public interest against the relatively small amount of business that plaintiff may lose as result of Greyhound's new service, the commission found that the additional Greyhound service was required by present and future public convenience and necessity. The court is in no position to gainsay that statement, which is supported by substantial evidence and adequate findings. The commission's order sustained.—Safeway Trails, Inc. v. United States, 234 F. Supp. 362 (365)*.

There was ample evidence to justify the commission's holding that the diversion of traffic is not apt to be great because of the difference between type of service afforded by the plaintiffs and defendant carrier. Plaintiffs do not intend to provide door-to-door service and their rolling stock consists of large buses, and many witnesses have expressed a desire for door-to-door service. That proposed special and charter-party operations would afford plaintiffs some amount of competition and occasion some diminution in their operating revenues does not justify an upset of the commission's action.—Trailways of New England, Inc. v. United States, 235 F. Supp. 509 (513-514)*.

There being substantial evidence in the record to sustain the commission's finding, that plaintiff's authority to transport general commodities "except liquid petroleum products, in bulk, in tank trucks" does not authorize transportation of petrochemicals, it is not within the court's province to upset that finding; complaint dismissed.–Consolidated Freightways Corp. of Del. v. United States, 237 F. Supp. 391 (392)*.

In action by labor unions and carrier association to set aside the commission's order requiring carrier defendants in proceeding before it to cease providing helper service without charge for loading and unloading of t.l. freight and to publish the remedial tariff rule prescribed, plaintiffs do not aver any lack of substantial evidence before the commission or contend that the order is in any way illegal, but charge only that it impairs their labor contract. However, the proceeding before the commission was a tariff or rate case, and there was substantial evidence to support the commission's findings that defendants' practice of furnishing helper service free of charge to favored shippers amounted to undue preference in violation of §216 of Interstate Commerce Act and also violated §217 in that such service was furnished without tariff charge or authority. Complaint dismissed.—Teamsters Joint Council 40 (J.C.) v. United States, 238 F. Supp. 301 (302, 306, 307)*.

In the proceeding before the commission, plaintiff had the burden of satisfying the commission that sectionalized homes are within its authority to transport "trailers designed to be drawn by passenger automobiles." Although the facts pertaining to their mobility were presented only casually to the examiner, substantial evidence supports the finding that such homes are not sold to customers as mobile units designed to be drawn upon the highways as trailers, but are merchandised as stationary, factory-built homes; this finding supports the conclusion that they do not retain mobility after initial delivery and therefore are not trailers within the described authority. The commission's order sustained.—National Trailer Convoy, Inc. v. United States, 240 F. Supp. 286 (289)*.

The commission's finding that needs of shippers supporting plaintiff's application can all be met by protesting carriers and that those shippers have not adequately utilized the services of carriers authorized and willing to meet their needs, and its conclusion that plaintiff failed to establish a need for motor transportation in addition to that available at that time, are amply supported by substantial evidence of record. Order denying plaintiff's application sustained.—Watkins Motor Lines, Inc. v. United States, 243 F. Supp. 436 (441-2, 443)*.

The commission's finding relative to density of movement at interlocking plant, which railroad sought to discontinue, was not so erroneous as to amount to an abuse of discretion. Tonnage handled by the railroad had reduced by 25 percent between the first and

second of two 5-year periods, and the finding that the number of movements is related to the tonnage was unreasonable; also, there was evidence of record that the number of moves made daily through the interlocking had reduced between the two 5-year periods. Evidence supports the commission's findings, particularly the one "that adequate protection and safety would continue under applicant's proposal"; the court cannot substitute its opinion for that of the commission as it draws its conclusions from the evidence. Order approving discontinuance of interlocking, sustained.—Legge v. United States, 244 F. Supp. 878 (881-2)*.

See also Boston & M.R. v. United States, 49 USC §1(4), n. 126; Chicago, M., St. P. & P.R.Co. v. United States, 242 F. Supp. 698; Cope v. United States, §207(a), n. 6 tacking; State Corporation Comm. of State of Kansas v. United States, 49 USC §13(4), n. 58.

57.—Lack of evidence to sustain order.—[Vols. 4, 7, 12, 17, 19].—Since the commission's order requiring cancellation of plaintiffs' proposed reduced export-import rates is not supported by essential basic facts particularly stated, it cannot be sustained; order set aside.–Boston & M. R. v. United States, 202 F. Supp. 830 (834, 836, 838)*.

Although the commission's interpretation of plaintiff's certificate, in complaint proceeding, as restricting its transportation of general commodities to truckload lots is not shown to be arbitrary, capricious, or contrary to some established principle of law, there is no substantial evidence to support its subsidiary conclusions that plaintiff's past transportation of l.t.l. shipments was obviously illegal and not performed in good faith; those conclusions were gravely prejudicial to plaintiff's application for removal of the "in truckload lots" restriction on its present authority; application proceeding remanded for further hearing.–Bowman Transp., Inc., v. United States, 211 F. Supp. 354 (356, 359)*.

While the commission may base a finding of need for proposed service on future public convenience and necessity, finding for the future must have some evidentiary basis of the anticipated need. Grant of statewide authority to transport interstate shipments of cement from shipper's St. Louis plant to points in Missouri was not supported by substantial evidence; portion of the commission's order granting such authority, set aside.—L. A. Tucker Truck Lines, Inc. v. United States, 215 F. Supp. 261 (264-6)*.

The commission's order directing plaintiff, who holds no intrastate authority between involved Pennsylvania points, to discontinue transporting traffic between them over its authorized interstate routes through New Jersey, is not supported by substantial evidence; no direct evidence was offered of bad faith on plaintiff's part or subterfuge to evade State regulation. Since the commission bottomed its finding of bad faith solely on the circuity of such routing, this unwarrnated conclusion must be rejected; cease-and-desist order reversed.—Jones Motor Co. v. United States, 218 F. Supp. 133 (137, 138)*.

In determining plaintiff's "grandfather" application under the Transportation Act of 1958, the commission acted arbitrarily in refusing to consider shipments in 1955 and 1956 on ground that they were too remote from the critical date to have probative value; those shipments support and aid in evaluating plaintiff's contention that origin and destination points in its principal operations change from year to year in the normal course of business, owing to the special characteristics of the traffic involved. And while it is not clear whether shipments in 1959 and 1960 were arbitrarily excluded from consideration, if they were because applicant failed to file exceptions to an overall acceptable decision of the examiner, refusal to consider such evidence upon the commission's review of the examiner's decision was error. The commission should have considered the proffered evidence for what bearing it might have on the character of plaintiff's operations; remanded for rehearing in conformity with the opion.—Halde Distributing Co. v. United States, 221 F. Supp. 266 (270)*.

The commission's finding that plaintiffs' rates under consideration, which are admittedly compensatory, constitute a destructive competitive practice is not supported by any finding based on evidence that they would destroy the inherent advantages of other modes of transportation. The commission's order condemning the rates, set aside.–New

York, N. H. & H. R. Co. v. United States, 221 F. Supp. 370 (376)*.

Record is devoid of substantial evidence to support the commission's finding that assailed 500-A scale is unlawful for dividing joint official-w.t.l. rates as between eastern lines and plaintiff transcontinental western lines. Such a determination must be made on evidence adequate to sustain it, and the commission must show a rational connection between the finding made and the evidence on which it is based; but there is no substantial showing that the commission considered evidence of any specific rates and divisions, as required by the typical evidence rule. Though it asserts that information about plaintiffs' traffic is available in an earlier docket concerning east-west divisions with a few midwestern lines, it is not shown that such data (which is not before the court) is substantial and representative of plaintiffs' current divisions, or if so, that the commission considered it; and in view of the commission's erroneous conclusion that it need not consider specific rates, the court is not warranted in assuming that it did so.—Atchison, T. & S.F. Ry. Co. v. United States, 225 F. Supp. 584 (599-600)*.

Nor is the commission's prescription of the same divisional scale currently in effect between the eastern and midwestern lines as basis for divisions with plaintiffs supported by substantial evidence. The commission not only improperly excluded as irrelevant evidence offered to show that the prescribed formula had greatly benefited the short-haul midwestern lines, which was evidence of type necessary for application of the commission's own comparison test, but it failed to apply evidence already of record which tended to support plaintiffs' claim of adverse effect of application of that formula to their traffic, because of their long hauls. And in basing its prescription mainly on revenue needs of the eastern lines, the commission does not appear to have considered substantial evidence of revenue needs of all the parties, either as groups or as individual railroads. Order set aside and cause remanded for further proceedings consonant with the court's opinion.—Id., pp. 603, 606.

The commission's purported finding on the essential element of similarity of transportation and competitive conditions is not supported by substantial evidence in the record and is therefore inadequate to support a finding of undue prejudice; and finding that the proposed rates would be inadequately compensatory if such prejudice were removed, based on findings as to car utilization and costing procedures that are not supported by substantial evidence, is likewise invalid. Accordingly, the commission's conclusion that the proposed rates must be increased to avoid unfair and destructive competition is also unsupported by substantial evidence; the commission's order is therefore null and void and must be enjoined and set aside.—Cincinnati, N.O. & T.P. Ry. Co. v. United States, 229 F. Supp. 572 (579-80)*.

On review of the commission's report and order in motor carrier application proceeding, the court is interested in determining whether the commission's decision is supported by substantial evidence in the record; and whether the decision is responsive to uncontroverted, credible evidence of record, or is legally arbitrary and capricious because of failure to respond to and act on any such evidence. Findings and conclusions of the commission must be based on the record and upon fair inferences and must support and justify subsidiary findings and conclusions based thereon.—Dixie Highway Exp., Inc. v. United States, 242 F. Supp. 1016 (1020, 1021)*.

In action to set aside the commission's order denying plaintiff's application to purchase operating rights of a second motor carrier, the record as a whole furnishes ample basis for holding that the commission's decision is not supported by substantial evidence; even without consideration of the facts surrounding subsequent application of a third carrier (intervener in court suit) to purchase the same rights. However, the court is acting in its equity jurisdiction in considering an injunctive remedy, though limited statutorily in extent of the relief it may grant, and it should be able to view the situation in its entirety, including the related matter of third carrier's application. Order of the commission set aside as to two reasons for denial, and case remanded for further hearing on the question of competition and diversion of traffic.–Interstate Motor Freight System v. United States, 243 F. Supp.

868 (870, 872-3)*.

See also Greyhound Corp. v. U.S., n. 13 above; Whitfield Transp., Inc., v. United States, §207(a), n. 24.

58.—Admission of evidence.–[Vols. 4, 7, 19].—In proceeding on "grandfather" application under Transportation Act of 1958, the commission abused its discretion in rejecting evidence of shipments transported in 1956 as too remote; seasonal, changing, and unpredictable nature of traffic involved made consideration of those shipments crucial; their elimination from the evidence denied plaintiffs their statutory right to prove that origin and destination points in their bona fide operations change from year to year, owing to nature of the traffic, and deprived them of their statutory right to continue serving many points they would be entitled to serve under proper application of standards derived from consideration of characteristics of the business. Remanded for further consideration in light of views expressed.–Winter Garden Co. v. United States, 211 F. Supp. 280 (288, 290)*.

While defendant's claim that the commission's refusal to consider evidence of plaintiff's holding out and solicitations during the "grandfather" period should not be considered because, by failing to except to examiner's ruling that certain such evidence was inadmissible, plaintiff waived its right to complain of rejection thereof, and while the question of admissibility of the rejected evidence is not properly before the court, such action and remarks in connection therewith may be considered as an indication that the commission erroneously regarded solicitation and holding out as an improper standard for determining the issue of bona fide operations.—Frozen Food Exp. v. United States, 219 F. Supp. 131 (137, 140)*.

Judicial review of the commission's orders must be confined to the record made by the commission. Evidence outside that record is inadmissible for any purpose and may not be considered by the court.–Denton Produce, Inc. v. United States, 270 F. Supp. 402 (405)*.

59.—Evidence not before the commission.—[Vols. 4, 10, 12, 14, 16].—Objection to plaintiff's exhibit consisting of a tariff filed with the commission by motor carrier conference (intervening defendant), showing carriers parties to the conference and that operating authority of each is limited to transportation of commodities "which because of size or weight require special equipment," sustained; it does not appear that contents of that exhibit were called to attention of, or considered by, either the examiner, Division 1, or the entire commission; nor has it any materiality or bearing on issue of whether a heavy hauler's authority includes transportation of Army cargo trucks which admittedly require no special equipment.—United Transports, Inc. v. United States, 214 F. Supp. 34 (38)*.

In suit to review the commission's orders interpreting scope of plaintiff's operating authority, the court may review the commission's action only on the record which was before the commission; therefore, motion to strike affidavits appended to plaintiff's original complaint will be granted.—U.S.A.C. Transport, Inc. v. United States, 235 F. Supp. 689 (695)*.

Although plaintiff seeks rehearing to present evidence of development and operation of the mobile home industry since the hearing before the examiner in the commission proceeding, the court's review is confined to the record made before the commission. If plaintiff believes that the commission was wrong in its interpretation of plaintiff's certificate because important evidence was not brought to its attention, the appropriate remedy is to make a new application to the commission, which has the power and duty to grant relief if the evidence warrants the change. Petition for rehearing denied.—National Trailer Convoy, Inc. v. United States, 240 F. Supp. 286 (289)*.

The rule is well settled that proceedings for review of commission orders are not de novo, and ordinarily it is improper to allow the commission's findings to be attacked or supported in court by evidence which the commission had no opportunity of considering. Departure from those established principles is not warranted by fact that a rulemaking proceeding involving the same questions intervened between entry of the challenged order and institution of suit to set it aside, or by the subsequent entry of a modified order consistent with the new regulations adopted, after filing of plaintiff's original complaint. Nor

does the limited purpose for which the new evidence was offered–to assist the court in determining the true scope of the exemption statute involved-justify its admission.—Wycoff Co., Inc. v. United States, 240 F. Supp. 304 (308)*.

60.—General order based on evidence which is typical.–[Vols. 4, 7, 10, 16].–See also Atchison, T. & S. F. Ry. v. United States, and Boston & M. R. v. United States, 49 USC §15(6), n. 22 *sufficiency of evidence*.

61. Burden of proof.–[Vols. 4, 7, 10, 14, 16, 19].–In action to annul and set aside the commission's order rejecting plaintiff's tariff, because it published rates on commodities for which carrier held no operating authority, plaintiff's burden of proof is heavy; it must show that the commission's order was invalid as unjust and unreasonable. The court, in 193 F. Supp. 823, held that plaintiff's authority did not embrace some commodities listed in the tariff; the tariff seeks to establish rates on commodities plaintiff is not authorized to transport, language used by plaintiff in the tariff apparently was an attempt to circumvent the commission's orders and also the ruling of the court.—W. J. Dillner Transfer Co. v. United States, 214 F. Supp. 941 (943-4).

An order of the commission is presumed to be valid, and the party attacking it has the burden of showing invalidity.—Frozen Food Exp. v. United States, 219 F. Supp. 131 (136)*.

There is no burden on the commission to prove that the challenged condition imposed on authorization of plaintiff's stock issue was in public interest; once the commission has made its decision, based on substantial evidence, the one attacking the decision has the burden of showing that it is unjust and unreasonable in its consequences. Plaintiff thus has the burden of proving that its proposed stock issue conforms to the public interest and that the commission's order, with the attached condition, was arbitrary, capricious, and erroneous because it was not based on any substantial evidence; plaintiff has failed to carry that burden.—Chicago, S.S. & S.B. R. v. United States, 221 F. Supp. 106 (109)*.

Whoever attacks an order of the commission has the burden of clearly and convincingly establishing that errors of fact or law have been committed and result in an order which is unreasonable or unjust. Plaintiffs having failed to carry that burden, complaint is dismissed.—R-C Motor Lines, Inc. v. United States, 241 F. Supp. 124 (127)*.

62. Review of mixed questions of law and fact.—[Vols. 4, 7, 10, 12, 17].—In action to set aside the commission's report and order granting motor carrier certificate to Railway Exp. Agency for transportation of general commodities, moving in express service, between Kansas City, Mo., and Coffeyville, Kans., (to replace express service formerly performed in passenger train service) plaintiffs failed to establish that the commission's findings are insufficient, as a matter of law, to support the exercise of the discretionary judgment vested in it by Congress; and examination of the record is convincing that those findings are supported by substantial evidence. Sustained.—Chief Freight Lines Co. v. United States, 230 F. Supp. 79 (81)*.

Determination of undue preference and prejudice involves a finding by the commission on a mixed question of fact and law in each case, and its conclusion may be upheld by the court on review only if there is a rational basis in law for the conclusion thus reached. The commission's basic findings must be supported by the evidence, and its ultimate finding must flow rationally from the basic findings. Since, for the reasons discussed, the commission's ultimate finding that the rate disparity complained of is not unlawfully prejudicial or preferential is not, as a matter of law, supportable by either of its basic findings, which in turn are not adequately supported by the evidence, and the commission might not have reached the same result in absence of the basic findings that have been set aside, the matter must be remanded to the commission for further consideration in light of the views expressed.—Stanislaus County v. United States, 236 F. Supp. 146 (148, 151)*.

63. Contentions not raised before commission.—[Vols. 4, 13-19].—Though plaintiff, in suit to set aside and annul the commission's order granting certificate application, contends that applicant's parent company and its carrier affiliates should have been made parties thereto, and that failure to seek approval under §5(2) of the corporate control involved

barred issuance of the certificate, the unlawful control issue was not adequately or properly raised before the examiner or the commission by appropriate pleadings, briefs, exceptions, or otherwise, and the court declines to consider that issue except to the limited extent of determining the contention that the commission lacked jurisdiction to issue the certificate.—Sloan's Moving & Storage Co. v. United States, 208 F. Supp. 567 (572)*.

Plaintiffs' contention that there is no undue advantage or detriment from rate disparity in issue unless the injury can be cured by any method carrier may choose to erase the disparity was not made before the commission; consequently, it is not properly raised before the court in action to set aside the commission's order which permits the railroads to remove the undue prejudice by raising the preferential rate or lowering the prejudicial rate, or both.—Atchison, T. & S.F. Ry. Co. v. United States, 218 F. Supp. 359 (373)*.

Having failed to raise the issue of whether his considered operations constitute "transportation" within 49 USC §303(a)(19) in the commission proceeding in which those operations were found to be for-hire transportation, plaintiff is precluded from raising such issue for the first time in court action to set aside the commission's order requiring him to cease and desist from such operations.—Studna v. United States, 225 F. Supp. 973 (982)*.

It is a sound principle of administrative law that an administrative agency should not be reversed unless it has had whatever opportunity is appropriate under its procedure to correct its alleged error, and this principle has been applied in ICC cases where parties attempt to raise issues in review proceedings not raised in the petition for reconsideration. Issue that, even if the commission was correct in finding that liquidating carrier in proposed merger has no status as an interstate carrier under single-State exemption proviso, it should have considered plaintiff's (survivor's) convenience-and-necessity application for continuance of the purported proviso operations on the merits may not be properly before the court on review, since it was not raised in plaintiff's petition for reconsideration by the commission.—Hart v. I.C.C., 226 F. Supp. 635 (643)*.

An administrative agency should be given the initial opportunity to correct its alleged error. Plaintiff's contention that there should have been a hearing examiner's report on proposed rate which the commission rejected was not raised before the commission and should not be considered on review by the court.—Middlewest Motor Freight Bureau v. United States, 234 F. Supp. 151 (155)*.

Court review of commission proceedings is not de novo, and ordinarily it is improper to allow commission findings to be attacked or supported in the courts by evidence which the commission had no opportunity to consider; however, since technical questions raised in appeal from decision in commission complaint proceeding alleging overcharges (involving determining significance of including shipments in one rate classification or another) are faced by the commission often, and rarely by the courts, the commission should reexamine the matter. On rehearing by the commission, consideration should be given to arguments and evidence which are part of the record before the court, and which the commission has not previously considered; also, consideration should be given to any relevant evidence plaintiff may yet adduce.—Roach Appleton Mfg. Co. v. United States, 265 F. Supp. 568 (572, 576-7)*.

In action to set aside the commission's order approving transfer of motor carrier operating rights, plaintiffs are precluded from raising for the first time the issue of imposition of commodity and territorial restrictions when they failed to request that such restrictions be imposed in their petition to the commission for reconsideration of its order. Thus, plaintiff's contention that the commission erred in not imposing those restrictions is not properly before the reviewing court and they are deemed to have abandoned it.—A.L. Root Transportation, Inc. v. United States, 280 F. Supp. 152 (155)*.

See also Fried v. United States, §5(2), n. 5; Youngblood Truck Lines case, APA, 5 USC *Procedure*.

64. Judicial notice.—[Vols. 7, 10, 12, 13, 16, 17].—The court takes judicial notice of existence of statutes in many states expressly re-

quiring segregation by race in facilities used in transportation of passengers in interstate commerce.–State of Georgia v. United States, 201 F. Supp. 813 (815)*.

UNITED STATES AS PARTY GENERALLY

Chapter 161.—Title 28

Section 2401. (a) Time for commencing action against United States.–[Unchanged. See vol. 16, p. 13003.]

Notes of Decisions

Volume 16—p. 13003; Volume 17—p. 13721; Volume 18—p. 14753; Volume 19—p. 16053.

10. Claims against the Federal Government.—[Vols. 16, 17, 18, 19].–Although, under §22 quotation naming a lower alternative rate on a "truckload minimum weight" of 50,000 pounds, plaintiff should have computed charges on certain shipments on a truckload rather than a volume minimum basis, its claim for additional freight, in suit filed in the Court of Claims, is barred by the 6-year statute of limitations (28 USC §2501). The rule is long established that claims for freight accrue when the services are rendered, and the right to demand payment accrues immediately on delivery of the property; the statute is not tolled while plaintiff awaits government audit or even actively pursues any available administrative remedies, unless the statute requires that a particular remedy be exhausted.—Baggett Transp. Co. v. United States, 317 F. 2d 864 (868-9). [Not arising hereunder.]

The requirement of mutual dealings essential to plaintiff's theory of an open, running account, against which the statute would not begin to run until audit was made, is not met where plaintiff performed all the services and the Government's only obligation was to pay for the services rendered, subject to its right to assure by audit the accuracy of the charges. The general rule is that where the account is all on one side the cause arises from each item so far as the statute of limitations is concerned. Plaintiff did not discover its errors in billing until 6 years after the services were performed; it could not expect the Government to point out those errors, since the right of audit is reserved for protection of the Government, not the carriers, who can conduct their own audits and sue for additional freight at any time within 6 years.—Id., pp. 868-71.

But plaintiff's claim for refund of charges deducted on weight of dunnage included in shipments is not barred, since that cause of action accrued when the deductions were made; the two causes of action are separate, even when growing out of the same shipment, since evidence to support one claim would not necessarily prove the other.—Id., pp. 869, 871.

Section 2403. Intervention by United States; constitutional question.—[Unchanged. See vol. 16, p. 13004.]

FAIR LABOR STANDARDS

Chapter 8—Title 29

Section 213, 215. Exemption; Prohibited acts, prima facie evidence.—[Unchanged with respect to applicable provisions, except that "not included in other exemptions contained in this section;" in §213(a)(9) was changed to read "not an enterprise described in sections 3(s)(2);"[1] by section 9 of the act of May 5, 1961, 75 Stat. 71. See vol. 10, p. 8449.]

Notes of Decisions

Volume 10—p. 8449; Volume 11—p. 9770; Volume 12—p. 10583; Volume 13—p. 11221; Volume 14—p. 11739; Volume 15—p. 12358; Volume 17—p. 13721; Volume 19—p. 16054.

1. In general.—[Vols. 10-15, 17, 19].—If the Interstate Commerce Commission has the power to regulate maximum hours of service of employees, such employees are exempt from overtime provisions of the Fair Labor Standards Act; and, as held in 310 US 534, the commission's power to establish maximum hours is limited to those employees whose activities affect the safety of operation of vehicles in interstate or foreign commerce.—Opelika Royal Crown Bottling Co. v. Goldberg, 299 F. 2d 37 (42).

Warehouseman, whose primary job was handling soft drink bottles within the warehouse, and whose infrequent help in loading supply trucks operated in interstate commerce was within de minimus rule set down in 330 US 695, was not exempt from overtime provisions of the Fair Labor Standards Act. However, driver-helpers on the trucks were exempt from overtime provisions of that statute as employees whose maximum hours of service are subject to regulation by the Interstate Commerce Commission; they are on the trucks at all times and perform a number of recurring functions which relate to safety of operation of the vehicles.—Id., p.43.

Employment of mechanic in defendant's garage was not exempt from overtime provisions of the statute when his duties consisted of service and repair only of industrial machinery, such as fork lifts and front end loaders, and he was never employed in repair and service of tractors and trailers used by defandant in delivering its products in interstate commerce. The employee was not regularly employed in safety-affecting work; and, his occasional service in line-up wlrk being trivial, casual, and insubstantial, his employment was not within provision of the statute which exempts employees over which the Interstate Commerce Commission has the power to establish qualifications and hours of service.—Wirtz v. Tyler Pipe & Foundry Co., 369 F. 2d 927 (929-30).

On appeal from an adverse summary judgment of the trial court, appellant truck drivers who were employed by corporation engaged in general cartage business as a carrier by motor vehicle, and that derived more than 4 percent of its total revenues from hauling traffic moving directly in interstate commerce, were without remedy under the Fair Labor Standards Act to recover for claimed overtime pay; inasmuch as appellants were full-time employees and assignments of work were made indiscriminately to the company drivers, appellants were "exempt employees" within §13(b)(1) of the statute. Summary judgment in favor of appellee-employer affirmed.—Bumgarner v. Joe Brown Company, Inc., 376 F. 2d 749 (750-1)*.

While §13(b)(1) of the Fair Labor Standards Act provides that overtime provisions of §7 of that act shall not apply to

[1]Section 203(s)(2) of this title, in U.S. Code

employees with respect to whom the Interstate Commerce Commission has power to establish qualifications and maximum hours of service, it does not provide an exemption from the minimum wage provisions of that act for such employees.—Wirtz v. Pioneer Steel Co., 212 F. Supp. 945 (946).

There is no concurrent jurisdiction between the Fair Labor Standards Act and the Motor Carrier Act; if the Interstate Commerce Commission has the power to regulate hours of service of employees, regardless of whether or not it chooses to do so, then the exemption of §213(b) is applicable. And to come within that exemption, a motor vehicle need not actually cross a state line, but it is necessary that the property transported be interstate shipments; therefore, fact that a driver's operation is wholly intrastate is not decisive when the activities constitute part of a continuous or through movement of freight received from points outside the State for movement to retail points within.—Southland Corporation (Cabell's Dairy Division) v. Shew, 248 F. Supp. 12 (14-15)*.

See also Wirtz v. Highway Transportation, Inc., §204(a)(2), n. 20.

Motor-carrier employees: Defendant truck driver found exempt from overtime requirements of the Fair Labor Standards Act although he was employed solely as a driver of plaintiff's trucks carrying refrigerated products from its milk processing plant to branches of its dairy in other points in the State, in private carriage. Since he regularly transported shipments of out-of-state dairy products with the milk shipments, his duties constituted transportation of goods in interstate commerce within meaning of Fair Labor Standards Act; and, since his duties were solely those of a truck driver on highways of the State, his actions directly affected the safety of operation of his vehicle. Under §204(a)(3) of the Interstate Commerce Act, the commission has authority to establish qualifications and maximum hours of service of drivers employed by private carriers; therefore, since, whether that power is exercised of not, the exemption of §213(b) is applicable, defendant is within that exemption.—Southland Corporation (Cabell's Dairy Division). v. Shew, 248 F. Supp. 12 (13-15)*.

Plaintiffs who were employed by private motor carrier to drive pump trucks used in its oil and gas well-servicing business, to load and unload portable job equipment, operate the pumps, and to do routine maintenance work on the trucks and generally keep them in safe operating condition, were not entitled to recover overtime compensation allegedly due them under the Fir Labor Standards Act. Since each plaintiff, at all pertinent times, performed duties which substantially and directly affected safety of operation of defendant's trucks in interstate commerce, under §13(b)(1) of the Fair Labor Standards Act all of them are barred from recovery of any overtime compensation.—Harshman v. Well Service, Inc., 248 F. Supp. 953 (958-60)*.

In determining whether motor carrier's employee is exempt from overtime provisions of the Fair Labor Standards Act, the true determinant is whether he performs any duties which substantially affect the safety of operations, and is therefore subject to regulations of the Interstate Commerce Commission, rather than whether his duties affecting safety are substantial. District court's findings that duties of carrier's assistant dock foreman had no substantial effect on safety of operation of motor vehicles in interstate commerce, so that he was not exempt from those overtime provisions, are supported by substantial testimony; sustained.—Yellow Transit Freight Lines, Inc. v. Balven, 320 F. 2d 495 (499).

In determining whether local truck drivers are engaged in transportation of goods in interstate commerce, and thus are within the motor-carrier exemption from overtime requirements of the Fair Labor Standards Act, "movement," cessation of movement, and interruption of movement are each factual matters. Lower court had ample basis to conclude that "interstate" movement of meat shipments from Iowa ceased upon delivery thereof to Florida storage and processing plant of drivers'

employer; the meat was stored and processed at the plant before local delivery to customers, thus interrupting continuity of its movement from out-of-state origin to ultimate destination. Local delivery truck drivers were not within the motor carrier exemption from overtime requirements of the statute.—Kline v. Wirtz, 373 F. 2d 281 (282).

PARCEL POST ACTS—TRANSPORTATION OF MAIL BY RAILROAD

Chapters 6 and 95.—Title 39

Chapter 6

Section 247. Reformation of classification, etc.—[Unchanged. See vol. 4, p. 3193.

Historical notes, see vol. 4, p. 3194, vol. 15, p. 12359.

Notes of Decisions

Volume 4—p. 3194; Volume 7—p. 6119; Volume 10—p. 8453; Volume 11—p. 9771; Volume 16—p. 13005; Volume 17—p. 13721; Volume 19—p. 16056.

1. Consents given by Interstate Commerce Commission.—[Vols. 4, 10, 16, 17, 19].—The commission consents to increases proposed by the Postmaster General in zone rates on parcel post and catalogs and proposed new schedules of rates for bulk shipments of catalogs. Proposed increases average 13.1 percent and revenue produced thereby, assuming that the 1962 volume of traffic is retained, will raise coverage of cost of the service to 91.3 percent. While those increases will not produce full cost coverage, they represent the Postmaster General's conclusion, in recognition of fact that rate increases can have a diversionary effect on traffic, as to the highest level of rates which present circumstances will permit. Proposed reformation of rates and conditions of mailability for those two categories of fourth-class mail will promote the service to the public, ensure revenues more adequate to attain the statutory objective of meeting costs of service, and are in conformity with the purposes of 39 USC §247.—Reformation of Rates—Fourth-Class Mail, 323 I.C.C. 1 (5, 34).

In support of his finding that cost of fourth-class mail service was permanently greater than revenue therefrom, the Postmaster General submitted an analysis based on the Department's cost ascertainment system (discussed in detail on pp. 5-24). Examination of the method of estimation and method of estimating sampling errors is convincing that proper formulas were used and that results produced provide a reliable foundation for developing costs and revenue distribution. Upon consideration of the cost data submitted and protestants' criticisms thereof, it is concluded that results shown for 1961 and 1962 may be accepted as substantially accurate for purposes of instant proceeding; and it follows that the Postmaster General correctly determined that present rates and other conditions of mailability for parcel post and catalogs are such as permanently to render the cost of the service greater than the revenues therefrom.—Id., pp. 5, 17, 24.

Costs measured by the marginal (added) cost method urged by protestants have generally been found unsatisfactory for purpose of computing rates; use of such a basis to measure parcel post costs requires assumption that the service is entitled to a preference over other mail services, to

extent that it may accept benefit of all expenditures necessary to them, without contribution. There is no warrant for use of marginal costs to measure sufficency of the return from fourth-class mail; it is required to bear, and the Postmaster General's proposal must be considered in relation to, the fully allocated costs of providing the service.—Id., pp. 10, 12.

A number of increases in Department operating costs have occurred since the present rates became effective in 1960; costs for all classes of mail have gradually increased from 1958 to 1962, resulting in an average increase of about 20 percent per pound for all mail and 18 percent for fourth-class mail; and while increase in cost per pound for catalogs was only about 3 percent, increase per piece was over 46 percent and revenues from catalog shipments have been below costs for a considerable time. Proposed parcel-post rates are designed to improve cost coverage on smaller shipments, where need therefor is greatest; but, to avoid drastic increases, a scale was devised producing less than costs for smaller parcels and somewhat increasing present cost coverage on heavier parcels. Prposed schedules provide a reasonable progression of rates and give appropriate consideration to piece and pound elements of all costs, with full coverage reached, except in local movements, at about the 12-pound weight.—Id., pp. 17-8, 24-5.

Proposed rates on catalogs are on lower level than for parcel post, with average increase of 30.1 percent for single-piece mailings and overall increase of about 12 percent under proposed bulk schedule. With expected distribution of the traffic, at 1962 volume the rates will reflect an average increase of 13 percent and produce added revenue raising cost coverage on catalogs to 74.7 percent. The new schedule for bulk shipments in quantities not less than 300 pieces will promote service to the public by affording shippers of larger catalogs a service like that now enjoyed by those able to use third-class service, on assumption that about 95 percent of catalogs in fourth-class service would move on the bulk rates. That schedule is constructed on separate piece and pound rates, with one series for catalogs weighing 1 to 2 1/2 pounds and a lower-rated series on those over 2 1/2 pounds, to reflect efficiencies of the heavier shipments; but even with the greater increases on small catalogs, the rates do not cover estimated unit costs.—Id., pp. 30-2.

And future promulgation of reasonable regulations standardising details of handling bulk shipments of catalogs, in respect of manner of address, method of payment of postage, statement of mailing, and separation, sacking, and labeling of sacks, with opportunity to revise such regulations from time to time when found necessary and proper by the Postmaster General, without specific consent thereto by the commission in each case, will promote the service to the public.—Id., p. 33.

Also, with increased use of motor carriers and extension of the Nation's highway system, occasion for application of the proviso in effect since 1915, imposing zone 3 rates on both parcel post and catalogs when the shortest practicable mail route involves distances over 300 miles, has become rare and revenue benefits from its use are more than offset by time lost by clerks in determining its applicability to particular shipments; proposed cancellation of that proviso will promote the service to the public.—Id., pp. 33-4.

2. Construction.—[Vols. 7, 10, 16, 17, 19].—It is not the commission's function to determine whether the Postmaster General has exceeded his powers under the postal laws; neither Public Law 82-199 (limiting size and weight of parcels) nor any related postal statute suggests that the commission has been delegated any such power. Considering that the Postmaster General, as a member of the Cabinet, shares in responsibilities of the Executive Branch respecting the fiscal problems of the Federal Government and that, subject to judicial review, he is primarily responsible for administration of the postal laws, the commission refrains from any conclusion as to his statutory authority to reform rates and other conditions of mailability of fourth-class mail.—Reformation of

Rates—Fourth-Class Mail, 315 I.C.C. 751 (754-5)*.

However, the commission has the duty of any tribunal to consider the scope of its own power to proposed changes under the 1912 act; its role of giving or withholding consent under the postal laws is limited to the auditing functions essential to determining whether the proposal falls within the statutory range of compensativeness. Were it clear that Congress had withdrawn from the commission the power to consent to changes in size and weight limits for parcel-post packages, it would be its duty to reject the Postmaster General's proposals on that ground; but, balancing the rule of construction against implied repeals with the language and history of Public Law 199, it cannot be concluded with certainty that Congress withdrew in 1951 the power it granted in 1912 to change the size and weight limits.—Id., p. 754; denied for lack of jurisdiction, Id., 318 I.C.C. 858*.

Enactment of 31 USC §695 and amendment thereof by Act of May 27, 1958, together with indicated congressional review of the entire parcel post operation, do not authorize or require the Commission to reevaluate the entire future of parcel post in light of standards provided in the Parcel Post Policy Act of 1958; the statutory standards governing exercise of the commission's function respecting proposed reformation of postage rates and conditions of mailability for fourth-class mail are set forth in 39 USC §247. Whether parcel post has kept pace with national production or consumption, and whether its costs compare favorably or unfavorably with those of privately owned transporters of parcels, are not matters the commission is required to consider; and it is not to determine whether the Postmaster General might have devised or accepted some other proposal, but only to determine whether it may consent to the proposal as made.—Reformation of Rates—Fourth-Class Mail, 323 I.C.C. 1 (3-4).

Numerous congressional reports reflect the policy that fourth-class mail should pay its own way; and restriction on withdrawal of funds imposed by 31 USC §695 was designed to ensure that the Postmaster General would take action as might be necessary to increase revenues from fourth-class mail sufficiently to cover cost of the service. Suspension of that restriction for a 3-year period by the Act of June 29, 1963, does not, as pointed out by the House Committee on Post Office and Civil Service, alter the fundamental statutory requirements of 39 USC §247. Regardless of whether Congress may conclude, after study of the fourth-class mail service, that some other standards are necessary to its continued functioning, in passing on the proposal before it the commission must be guided by the statutory standards as they now exist.—Id., pp. 11-12.

Since the enactment of Public Law 199, 82d Congress, effective Jan. 1, 1942, restricting the size and weight of parcels that may be transported by the Department, reformations which result in increased charges are the only method to which the Postmaster General may resort in attempting compliance with the duty imposed on him by 39 USC §247. That Congress expects him to make all efforts within his power to comply with those requirements was made clear in connection with its rejection of proposal to repeal §247 and substitution of the 3-year moratorium on §695.—Id., pp. 25, 34.

5. Weight limits.—[Vols. 7, 11].—Language of 39 USC §4552 limiting weight and size of fourth-class mail packages is clear and unambiguous, and the Postmaster General is bound by the statute.—Railway Exp. Agency, Inc. v. Day, 209 F. Supp. 766 (767, 768).

6. Size restrictions.—[Vol. 7].—Language of 39 USC §4552 limiting size and weight of fourth-class mail packages is clear and unambiguous, and the Postmaster General is bound by the statute.—Railway Exp. Agency, Inc. v. Day, 209 F. Supp. 766 (767, 768).

12. Competition with express haulage.—[Vols. 7, 10, 16, 19].—While it is probable that the more recent rate increases on parcel post have caused some diversion to other forms of transportation, use of parcel post service has also been affected by greater availability of private

truck transportation, relative quality of competing services, use of drop shipping, and increased use of "will call" outlets by major mail-order companies, as well as changes in retailing practices, declining rural populations, and rise of suburban shopping centers. Short-haul parcels have on the whole been less resistant to diversion than long-haul, and in recognition thereof proposed increase was held to about half that necessary to make revenue balance costs, assuming no loss of volume. Present proposal is designed to increase cost coverage in areas where need therefor is greatest, and while some diversion may result, effect of the proposal cannot be foreseen and the Postmaster General's judgment is entitled to substantial weight.—Reformation of Rates—Fourth-Class Mail, 323 I.C.C. 1 (25-6).

Ratemaking for the future and forecasting of probable traffic losses from increased rates depend predominantly on exercise of informed judgment. Protestants' analyses of volume losses and net revenue differences following the 1960 increase do not warrant conclusion that the differences are solely the product of that increase. Nor can it be found that the difference in volume between 1959 and 1962 provides a reliable measure of volume reductions which may be caused by the present proposal; it cannot be assumed that a reduction in volume between any 2 years is solely the product of an intervening change, or that the percentage of reduction in volume is so positively related to the percentage of the rate increase as to provide a probative measure of the future impact on volume of a proposed increase.—Id., p. 28.

And while competition from motor parcel carriers and Railway Exp. Agency has increased in recent years, neither such carriers nor buslines and forwarders provide the extensive service to all individuals desirous of sending parcels from and to any part of the country that parcel post does. Desirability and value of parcel post service for small shipments to nearby zones is demonstrated by large shippers' use of drop shipping, i.e., trucking parcels part way and mailing them as parcel post when close to their destination. Based on experience, the Postmaster General could reasonably conclude that, while some loss of volume might be expected, the proposal would result in significant net revenue improvements.—Id., p. 30.

Section 434. Failure to enter into or perform contract; proceedings, temporary contracts; adjustment of compensation; extension of term of contract.—[For text of paragraph, see vol. 17, p. 13723. Repealed by Public Law 86-682, Sept. 2, 1960, 74 Stat. 578-730.

Supplemental Appropriations Act, September 27, 1950, Fourth-Class Mail Service.—[31 U.S.C. §695].—[Unchanged. See Vol. 15, p. 12359; Vol. 19, p. 16057].

Historical Note

The act of June 29, 1963, Public Law 88-51, 77 Stat. 71, provides that this paragraph, as amended, shall not be in effect during the period beginning on July 1, 1963, and ending June 30, 1966.

Section 536.—[For text of this paragraph, see vol. 4, p. 3198. This section was not incorporated in Chap. 95 of Title 39 which was enacted by Public Law 86-682, Sept. 2, 1960, 74 Stat. 578.]

Section 550, 552.—[For text of these paragraphs, see vol. 4 pp. 3209, 3211. These sections were not incorporated in Chap. 95 of Title 39 which was enacted by Public Law 86-682, Sept. 2, 1960, 74 Stat. 578.]

1. Manner and conditions of service.—[Vols. 4, 7, 10, 15, 17, 19].—Although the railroad has the statutory duty to transport mail offered by the United States under conditions prescribed by the Postmaster General, in transporting mail cars on intrastate train it seeks to discontinue it acted, not as a common carrier with corresponding rights and liabilities, but as an agency of the Government subject to the laws and regulations of the Post Office Department. The Government is a carrier of mails and its dealings with the railroad are contractual matters between carriers; and the Postmaster General has authority to prescribe the service required of the railroad in carrying the mail. Since routing of mail and the transportation media used in its distribution are matters solely within authority of the Post Office Department, any jurisdiction of the State commission over involved train would not extend to mail cars included therein.—Pennsylvania R. Co. Discontinuance of Passenger Service, 317 I.C.C. 737 (741)*.

Notes of Decisions

Volume 4—p. 3226; Volume 7—p. 6155; Volume 10—p. 8466; Volume 11—p. 9771; Volume 13—p. 11223; Volume 14—p. 11743; Volume 15—p. 12364; Volume 16—p. 13007; Volume 17—p. 13726; Volume 18—p. 14757; Volume 19—p. 16066.

3. Exclusiveness of Federal legislation.—[Vols. 4, 7, 10, 11, 13].—Where federal legislation admits of a gap the State may pass appropriate laws, to take care of needed protection, which do not conflict with their federal counterparts. Appellant railroad's "hot metal" movement of ladle cars between steel company's furnaces on either side of river at Pittsburgh, Pa., is the sort of operation specifically excluded by §1 of the Safety Appliance Act; thus, because of its position in relation to the federal statute and its extremely hazardous nature, such movement comes within the sphere of appropriate state regulation.—Monongahela Connecting R. Co. v. Pennsylvania Public Utility Com'n, 373 F. 2d 142 (147-8)*.

4. Purpose of acts.—[Vols. 4, 7, 11, 14].—Purpose of Safety Appliance Acts is to promote safety of railroad employees, of persons using the facilities of the railroad, and of the public; to effect this humanitarian purpose the act must be liberally construed.—Carbon County Ry. Co. v. United States, 309 F. 2d 938 (941)*.

See also Legge v. United States, §25, n. 2.

6. Construction.—[Vols. 4, 7, 10, 14, 16, 18, 19].—The Safety Appliance Act does not purport to confer a right of action upon anyone. However, the statute defines the standard of care required of a railroad and, although complainant is not an employee within the Federal Employers' Liability Act, he is a member of a class of persons for whose benefit the Safety Appliance Act was enacted; that statute is applicable in personal injury action against railroad based on violation thereof.—Barney v. Staten Isand Rapid Transit Ry. Co., 316 F. 2d 38 (40-1).

Since an offset duplicating machine is not "equipment" as specifically set forth in the Safety Appliances Act, provisions of that statute do not apply in railroad employee's action (initiated and tried under the Federal Employers' Liability Act) for personal injury which occurred while he was cleaning duplicating machine which he operated to print passenger tickets for the railroad. The issue of responsibility was limited to the claim under the FELA measured by "due care" rather than by "absolute" responsibility; trial court's

instruction to the jury, submitting question of responsibility under both statutes, was error.—Southern Ry. Co. v. Fox, 339 F. 2d 560 (562-3).

10. Duty imposed on carriers.—[Vols. 4, 7, 10, 11, 13, 14, 16-19].—Literal compliance with the Safety Appliance Acts is required, and ignorance of a defect does not excuse a violation of those statutes; a requirement of the Acts cannot be satisfied by rendering a performance equivalent to that required. Defendant railroad was in violation of the Safety Appliance Acts when it operated a train with one car, connected on the air brake line, with inoperative air brakes, even though brakes on the train were inspected before gebinning of trip during which considered brake failure occurred.—United States v. Atchison, T. & S. F. Ry. Co., 205 F. Supp. 589 (590-1).

Duty imposed on carriers by provisions of the Safety Appliance Acts is an absolute one, requiring proper and efficient performance of appliances on the occasion in question.—Trout v. Pennsylvania R. Co., 300 F. 2d 826 (828).

Violation of the Safety Appliance Acts is a breach of an absolute duty imposed by statute rather than negligence; and that duty cannot be avoided by a showing of freedom from negligence, since liability for breach of a statutory duty is imposed irrespective of whether or not negligence is present. However, there is no reason why a railroad, as a private party rather than as a common carrier, cannot make a contract with an industry (such as the side track agreement which is the basis of railroad's action against indemnitor industry for reimbursement of amount paid pursuant to judgment obtained against it by industry employee for violation of Safety Appliance Acts) to relieve itself by indemnity, not only for its own negligence if the contract is sufficiently specific, but also against absolute liability as imposed by statute.—Colorado Milling & Elevator Co. v. Terminal R. Ass'n, 350 F. 2d 273 (275-6, 278-9).

Violations of the Safety Appliance Acts constitute negligence *per se*; however, while negligence *per se* may be negligence as a matter of law, this does not mean that a violation of a safety statute may not also be negligence as a matter of fact. Railroad's violation of Safety Appliance Acts in supplying cars with inefficient brakes to defendant coal mining company constituted negligence *per se* and also negligence as used in sidetrack contract between them; therefore, railroad was entitled to indemnity or contribution in accordance with sidetrack agreement provisions for payment railroad made in settlement of negeligence litigation against it by company's employee.—Chicago, M. St. P. & P. R. Co. v. Alva Coal Corp., 365 F. 2d 49 (54-6).

Although personal injury action against railroad by employee of consignee was not brought under the Federal Employers' Liability Act (jurisdiction being based on diversity of citizenship), it was premised on the Safety Appliance Act and complainant is a member of a class of persons for whose benefit that statute was enacted. Railroad employees are no longer the only ones within the protection of latter statute; and Congress intended to prescribe therein absolute liability on behalf of those within protection thereof. Injuries complained of resulted when ladder on tank car, which complainant was ascending to obtain sample of car's contents prior to unloading, swung out causing him to fall; after the accident, a break in safety railing attached to the ladder was found. Railroad's liability for violation of Safety Appliance Act is absolute in absence of evidence that complainant was contributorily negligent.—Barney v. Staten Island Rapid Transit Ry. Co., 316 F. 2d 38 (40-1).

Power Or Train Brake Provisions

32. Construction.—[Vols 4, 7, 10, 13, 15, 16, 18].—Fact that appellant railroad is engaged in interstate commerce does not of itself subject it to provisions of Safety Appliance Acts. Accordingly, its "hot metal" movement of ladle cars over bridge between steel company's furnaces on either side of river at Pittsburgh, Pa., is not subject to air-brake provisions of the statute when such ladle cars do not move in interstate

traffic and, naturally, the locomotive cannot be moving in interstate traffic. Statute deals with interstate railroad traffic and the hot metal operation cannot be so classified when it is strictly local, confined to the company's industrial complex, and the cars are not received in rail interchange and have no prior or subsequent line-haul movement. Therefore, not being within purview of 45 USC §1, the hot metal movement is subject to regulation by the State commission.—Monongahela Connecting R. Co. v. Pennsylvania Public Utility Com'n, 373 F. 2d 142 (144-5, 147-8)*.

However, appellant's "Talbot" movement of hopper cars over the bridge to furnaces on south side of the river is a train movement and is subject to the Safety Appliance Acts. The hopper cars are picked up from trunk line railroads at interchange points after they have been shipped into Pennsylvania from other States and (though assembling of the cars is a switching type of collection) once they are brought together and movement to the furnaces begins, a valid train operation emerges. As the Supreme Court explained in 237 US 402, when a train is thus made up and is proceeding on its journey it is within the operation of the air-brake provision of the statute. Reversed and remanded for entry of judgment in accordance with the court's opinion.—Id., pp. 144-5, 148-9.

33. Requirements.—[Vols. 4, 13, 17].—Though there is considerable variance in stopping distances of trains, and it is suggested that the commission prescribe a reasonable stopping distance for all trains and authorize its field staff to place out of service any equipment contributing to failure to meet such a requirement, it is not shown that defective railroad equipment caused or contributed to any grade-crossing accident. Distances within which trains can be stopped depend on numerous factors, and it would be difficult, if not impossible, to fix any accurate stopping distance for trains under all circumstances. Moreover, due to slack action between cars, emergency brake application on a long train would create hazards to men in the caboose, and could cause damage to the locomotive and cars, as well as to the lading through shifting; emergency braking of a passenger train creates similar hazards. In view of existing regulations prescribed under the Power Brake Act of 1958 and the Locomotive Inspection Act, additional regulations in that respect are not needed; owing to impracticability of compliance with any prescribed stopping distance, it is doubtful if they would aid materially in preventing grade-crossing accidents.—Prevention of Rail-Highway Grade-Crossing Accidents, 322 I.C.C. 1 (76-8)*.

Section 2. Automatic couplers.—[Unchanged. See vol. 4, p. 3238.]

Notes of Decisions

Volume 4—p. 3238; Volume 7—p. 6161; Volume 10—p. 8468; Volume 11—p. 9772; Volume 12—p. 10586; Volume 14—p. 11744; Volume 15—p. 12364; Volume 17—p. 13727; Volume 18—p. 14758; Volume 19—p. 16068.

Automatic couplers

1. Purpose.—[Vols. 4, 14, 18].—Specific purpose of statute requirng automatic couplers on cars, evident in its language as well as its legislative history, was to minimize the necessity of having men pass between the cars; however, Congress did not attempt to define a car. While the two units of defendant's car (made out of two conventional hopper cars) are permanently combined, are not intended to be uncoupled, and cannot be uncoupled outside a repair shop, the record is neither clear nor unequivocal that the combined-unit car is a single car within meaning of the statute; the fused couplers serve no other office than they did before modification and, superficially, their appearance is not changed. Record does

not justify summary dismissal of the Government's suggestion that railroad men may not be expected always to recognize that the units are not to be uncoupled; so long as there is likelihood that men will be misled into entry between the cars with resulting risk of lives and limbs, the statute's application cannot be said to be foreign to its purpose; summary judgment for the railroad reversed and remanded.—United States v. Southern Ry. Co., 341 F. 2d 669 (671-2)*.

2. Duty imposed by section.—[Vols. 4, 10, 12, 14, 15, 18, 19].—In action for penalties for violation of this section, whether or not the automatic coupling requirement applies to defendant's combined-unit "articulated" car, made by fusing couplers and hoses at "A" end of each of two conventional hopper cars in a locked position, should be determined in light of apparent Congressional purpose in enacting the statute, i.e., to minimize necessity for men to go between cars to couple or uncouple them. For many purposes, the combination is a single car or is treated as if it were, the two units are not intended to be uncoupled, and they cannot be uncoupled outside a repair shop; however, in absence of chains or other connecting material between the ends near sides of the units, there may well be risk that railroad men might be misled into going between the units to attempt their uncoupling.—United States v. Southern Ry. Co., 341 F. 2d 669 (670-2)*.

While the statute should not be applied when its application has no relation to its purpose, absence of any reasonable relationship must be plain. Complete elimination of need for uncoupling cars is safer by far than providing the safest practical means for coupling and uncoupling, but this is so only if there is adequate warning that particular units are not to be uncoupled. Although the railroad may be able to show that such adequate warning has been given, the record does not support lower court's summary judgment that, considered car being a single car within meaning of the statute, automatic coupling requirement did not apply to "A" ends of the combined units. Reversed and remanded for further factual inquiry.—Id., pp. 670, 672-3.

—Coupling by impact required.—[Vols. 4, 7, 10, 15, 17, 19].—The Safety Appliance Act requires that cars remain coupled until freed by some purposeful act after coupling is effected, and a violation of the act is shown by proof that cars failed to couple automatically by impact. In suit by yardmaster who was injured while assisting train crew to couple the last two of a string of cars, the district judge correctly charged the jury that, if they found that the couplers failed to automatically couple because they were not properly set, such failure would not be a violation of the act, but that there would be a violation if they failed for any other reason, and that, if they found that the couplers were properly set but failed to couple automatically upon impact, they could infer from that fact that the failure was under circumstances constituting a violation of the act. The jury's findings in plaintiff's favor being supported by probative circumstances, judgment of the lower court awarding damages is affirmed.—Cobb v. Union Ry. Co., 318 F. 2d 33 (34-7).

8. Coupling and uncoupling levers.—[Vols. 4, 11].—The commission will consider a recommendation to Congress to clear up its right to prescribe the number, location, dimension, and manner of application of uncoupling levers.—Drawbar Extension on Hydroframe-60 Boxcars, 322 I.C.C. 620 (624).

Section 3. Refusal of insufficiently equipped cars from connecting lines.—[Unchanged. See vol. 4, p. 3244.].

Historical notes, see vol. 4, p. 3225.

Notes of Decisions

Volume 4—p. 3244.

Section 4. Grab irons or handholds for security in coupling and uncoupling cars.—[Unchanged. See vol. 4, p. 3245.]

Historical notes, see vol. 4 p. 3225.

Notes of Decisions

Volume 4—p. 3245; Volume 7—p. 6162; Volume 10—p. 8469; Volume 18—p. 14759; Volume 19—p. 16068.

Section 5. Standard height of drawbars for freight cars; noncomplying cars excluded from traffic.—[Unchanged. See vol. 4, p. 3247.]

Historical notes, see vol. 4 p. 3225.

Notes of Decisions

Volume 4—p. 3247; Volume 17—p. 13728.

Section 6. Failure to equip cars as provided; duty of United States Attorneys and Interstate Commerce Commission; exceptions from operation of provisions.—[Unchanged. See vol. 4, p. 3249; vol. 19, p. 16069].

Historical note, see vol. 4, p. 3249, vol. 18, p. 14760, vol. 19, p. 16069.

Notes of Decisions

Volume 4—p. 3250; Volume 7—p. 6163; Volume 10—p. 8470; Volume 11—p. 9773; Volume 12—p. 10586; Volume 13—p. 11224; Volume 14—p. 11745; Volume 15—p. 12366; Volume 16—p. 13008; Volume 17—p. 13728; Volume 18—p. 14760; Volume 19—p. 16069.

Actions For Penalties

11. Nature of action.—[Vols. 4, 16, 17, 19].—Although intentional violations of Safety Appliance Acts rarely occur, and most cases are disposed of by admission of liability or confession of judgment, unlike other civil actions §6 does not permit an unintentional violator to admit liability and settle or pay the amount due prior to commencement of the action. Costs are properly imposed upon defendants who made a suit necessary by persistence in unjustifiable acts or have unnecessarily increased or enlarged the cost of the contest; and docket fees are a proper item of costs.—United States v. Indiana Harbor Belt R. Co., 209 F. Supp. 245 (246).

12. Jurisdiction of district courts.—[Vols. 4, 10, 14].—In a reorganization proceeding under §77 of the Bankruptcy Act, the bankruptcy court has exclusive jurisdiction of the debtor and its properties wherever located; and though Congress has specifically authorized suits against trustees and debtors-in-possession without leave of court with respect to any of their acts and transactions, the Government's suit to recover penalty for a violation of the Safety Appliance Act which occurred before the railroad filed petition for reorganization is not predicated on any act of the trustees

which would authorize it. The Government's failure to obtain permission of the bankruptcy court to bring the present suit against the trustees was a jurisdictional defect justifying dismissal. Consequently, unless consent to institute suit in the district court for the district wherein the violation occurred is obtained nunc pro tunc from the bankruptcy court within 60 days, the complaint will be dismissed.—United States v. Dorigan, 236 F. Supp. 106 (109).

14. Discretion of courts.—[Vol. 4].—The court is vested with discretion in determining what costs, including docket fees, should be allowed in an action against a railroad for violation of Safety Appliance Acts; but though the Court of Appeals for the Sixth Circuit assessed docket fees because of the practice in that district, the Court of Appeals for the Seventh Circuit has never passed upon that question. Defendant has admitted liability for the violations and is willing to pay the stautory penalty; in the circumstances there is no valid reason, absent a policy to the contrary, for taxing a docket fee in addition to other costs; defendant's motion to disallow taxing of docket fees, granted.—United States v.Indiana Harbor Belt R. Co., 209 F. Supp. 245 (246-7).

16. Complaints.—[Vols. 4, 15, 16, 17, 18, 19].—While Congress cannot have intended that a railroad corporation, by filing petition for reorganization, should escape penalties incurred for violating the laws of the United States, and a judgment for violation of the Safety Applicance Act obtained before appointment of trustees is a provable and preferred claim desipte provisions of §77(j) of the Bankruptcy Act, there is no authorization for such suit after appointment of trustees, for, though Congress has specifically authorized suits against trustees without leave of the bankruptcy court with respect to any of their acts, present suit against railroad's trustees to recover penalty for a violation occurring before reorganization petition was filed is not predicated on any act of the trustees. The Government's failure to obtain permission of the bankruptcy court to bring such suit was a jurisdictional defect justifying dismissal; consequently, the complaint will be dismissed unless consent of that court to institute the present suit is obtained nunc pro tunc within 60 days.—United States v. Dorigan, 236 F. Supp. 106 (109).

18. Sufficiency of evidence.—[Vols. 4, 7, 14].—If a violation of the Safety Appliance Act is established, only the proximate cause of the injury remains as an issue; and if a violation is a contributing proximate cause of the injury, a jury may find for the plaintiff. A violation of the act is shown by proof that cars failed to couple automatically by impact. In suit by yardmaster who was injured while assisting train crew in second attempt to couple the last 2 of 10 cars, by being knocked from top of car where he had mounted after assuming from vibration that an impact had occurred, there were probative circumstances from which the jury could infer that there were three impacts, that the couplers were properly set at time of the second impact, and that the cars failed to automatically couple on that impact but did so on the third, when plaintiff was injured. The district judge having properly charged the jury as to the governing principles of law, judgment of the lower court in plaintiff's favor is affirmed.—Cobb v. Union Ry. Co., 318 F. 2d 33 (34, 36).

21. Admissibility of evidence; generally.—[Vols. 4, 10, 15-18].—Since the original car inspection reports, from which defendant's summary was made, were business records under the rule in 318 US 109, that summary may be admitted in evidencc in railroad employee's action for personal-injury damages at discretion of the trial judge, although it was made for purposes of the litigation, provided it meets certain tests.—Trout v. Pennsylvania R. Co., 300 F. 2d 826 (830).

23. Questions for jury.—[Vols. 4, 10, 11, 13-18].—In action under Safety Appliance Acts and Federal Employers' Liability Act for personal injury allegedly sustained when brake on rail car failed to operate, a jury question is presented under former statute if it can be reasonably concluded from the evidence that the brake failed to operate efficiently while being operated in natural,

normal, and usual manner. Plaintiff need show nothing more, and negligence is an irrelevant consideration; the district court's duty was to separate the two causes of action, and to make this clear to the jury. The court's error in not submitting plaintiff's Safety Appliance Acts claim to the jury was not cured by requiring jury to answer interrogatories concerning inefficient or defective brake in connection with submission of his claim under Federal Employers' Liability Act.—Trout v. Pennsylvania R. Co., 300 F. 2d 826 (828-9).

Section 7. Assumption of risk by employees.—[Unchanged. See vol. 4, p. 3257.]

Historical note, see vol. 4, p. 3225.

Section 8, Provisions of chapter extended.—[Unchanged. See vol. 4, p. 3258.]

Historical note, see vol. 4, p. 3258.

Notes of Decisions

Volume 4—p. 3259; Volume 7—p. 6164; Volume 10—p. 8472; Volume 11—p. 9773; Volume 13—p. 11225; Volume 14—p. 11746; Volume 15—p. 12366.; Volume 16—p. 13009; Volume 17—p. 13730; Volume 18—p. 14761; Volume 19—p. 16069.

Provisions of Chapter Extended

1. Constitutionality.—[Vol. 4].—There is no merit to contention that §132.13(e)(1) of commission's brake regulations, if construed as requiring visual inspection of the brakes on each car of a train, is unconstitutional because of vagueness. There is nothing vague in its requirement of the brake test "to determine that the brakes are applied on each car," and the only method of making that determination is by looking at them individually after they are set by the engineer and before they are released.—Carbon County Ry. Co. v. United States, 309 F. 2d 938 (943)*.

Trains Subject to Acts

6. What constitutes a train.—[Vols. 4, 14, 16, 18].—Though the Power or Train Brake Act of 1958 directs the commission to promulgate rules for installation, inspection, etc., of power brakes on trains, neither the statute nor the regulations defines "train" as used therein; from the decisions, however, it is clear that a movement of cars by a locomotive is a train operation unless it is one of switching, i.e. the assembly, classification, and coupling of cars in a yard for purpose of making up a train. Ordinarily, after a unit is thus made up, neither distance moved, hazards incident to the particular movement. Nor whether it is moved on a mainline track is determinative of whether it is a train; the controlling test is the essential nature of the work performed. Where in each instance normal switching operations had been completed and essential nature of the work was transportation of the cars from one location to another, considered movements were train operations.—Carbon County Ry. Co. v. United States, 309 F. 2d 938 (941-2)*.

In truck driver's action for injuries sustained in railroad crossing accident, the trial court correctly ruled that engine and 37 loaded freight cars, which moved across heavily traveled highway in order to put the last car in the string on the car repair shop track, constituted a "train" within meaning of the Safety Appliance Acts and the commission's rules and regulations thereunder, which together require that a train shall not be operated without having

air brakes functioning on 85 percent of the cars being moved.—DiFrischia v. New York Central Co., 307 F. 2d 473 (475).

7. Trains subject to power or train-brake provisions generally.—[Vols. 4, 7, 10, 15-17, 19].—Operation involving a yard engine traveling 1.6 miles at about 8 miles an hour to pick up empty cars in a cohesive area entirely on defendant railroad's property used for classification and storage of cars, and through which no through trains passed and which is not crossed by any public or private roads or highways or by tracks of any other carrier, constituted a "switching operation" rather than a "train movement"; it was an operation involving sorting, selecting, or classifying of cars and had none of the "characteristics of customary 'train' movement" discussed in 361 US 78. Accordingly, failure to have brakes on each of the cars connected or operable by the engineer did not constitute a violation of the Safety Appliance Acts; judgment in favor of defendant.—United States v. Chesapeake & O. R. Co., 238 F. Supp. 160 (161).

Section of the Safety Appliance Acts requiring power brakes contains no exceptions. Although court decisions have held not to be train movements the switching, classifying, and assembling of cars within railroad yards, or movement of a few cars at a time, involving coupling and uncoupling, movements which, though miniature when compared with main-line hauls, have characteristics of customary train movements and their attendant risks are "train" movements. Movement of engine and 37 loaded freight cars across heavily traveled highway in order to put last car in the string on defendant's car repair shop track was a train movement requiring operable brakes on 85 percent of cars moved; fact that switching operations preceded or followed such movement does not remove it from the statutory requirements.—DiFrischia v. New York Central R. Co., 307 F. 2d 473 (475-6).

See also Monongahela Connecting R. Co. v. Pennsylvania Public Utility Com'n, 45 USC §1, n. 32.

8.—Switching trains.—[Vols. 4, 7, 10, 14-19].—Since §9 of the Safety Appliance Acts, which relates exclusively of power brakes, had long been construed as referring only to train movements, and use of words "used or hauled" in 1958 amendment thereof clearly should be construed as shorthand for "used or hauled in a train movement," defendant railroad had no obligation to to comply with those provisions when it was engaged in switching operations. Therefore, lower court's dismissal of certain counts of the Government's complaint for alleged violations of the power brake requirements of the statute is affirmed.—United States v. Ogden Union Ry. and Depot Co., 370 F. 2d 540 (541-2).

Section 9. [§ *2 as enacted*] Number of cars to be operated with power or train brakes; increase of number.—[Unchanged. See Vol. 18, p. 14762.]

Notes of Decisions

Volume 4—p. 3269; Volume 7—p. 6167; Volume 10—p. 8473; Volume 14—p. 11746; Volume 15—p. 12367; Volume 16—p. 13011; Volume 19—p. 16070.

1. Number of cars to be operated with power or train brakes.—[Vols. 4, 7, 10, 14-16, 18, 19].—Statute pertaining to trains operated with power or train brakes is designed to prevent "slack action"; and that statute is violated whenever even one car, connected on the air brake line, does not have its air brakes operative.—United States v. Atchison, T. & S. F. Ry. Co., 205 F. Supp. 589 (591).

5. Inspection, testing, and maintenance rules.—[Vol. 19].—Since a provision of the

Safety Appliance Acts cannot be satisfied by rendering a performance equivalent to that required, and the Interstate Commerce Commission has no authority to nullify or set aside any provisions of those statutes, compliance with the commission's inspection and testing rules cannot be treated as the equivalent of compliance with the Safety Appliance Acts.—United States v. Atchison, T. & S. F. Ry. Co., 205 F. Supp. 589 (591).

Under §132.13(e)(1) of the commission's brake regulations, determination of whether brakes on "each car" of a train are functioning must be made before the brakes are released and the train moved; adequate air in the brake system at end of the train is no assurance that the brakes on all the cars were applied when the brake pipe pressure was reduced; this can be determined only by visual inspection of the brakes on each car, and failure so to inspect is a violation of the order. Under this interpretation of the rule an absolute, not merely a reasonable, determination is required; while in light of its safety record this requirement may seem arbitrary as to the defendant, it is not for courts to determine whether this safety measure is or is not needed in particular cases; Congress determined the policy that governs application of the law.—Carbon County Ry. Co. v. United States, 309 F. 2d 938 (942-3)*.

Regulations prescribed and enforced by the commission under the Power Brake Act of 1958, requiring not only that airbrakes on all trains be tested and inspected at initial terminal, but also that running tests be made and, if the brakes are found not to be operating properly, that the train be stopped, cause of failure ascertained and corrected, and running tests repeated, adequately meet recommended requirement that all brakes be operative at all times.—Prevention of Rail-Highway Grade-Crossing Accidents, 322 I.C.C. 1 (80)*.

Section 10. Former duties, requirements, and liabilities continued unless specifically amended.—[Unchanged. See vol. 4, p. 3271.]

Historical note, see vol. 4, 3258.

Section 11. Safety appliances required for each car; when hand brakes may be omitted.—[Unchanged. See vol. 4, p. 3272.]

Historical note, see vol. 4, p. 3272.

Notes of Decisions

Volume 4—p. 3272; Volume 7—p. 6168; Volume 10—p. 8475; Volume 12—p. 10587; Volume 13—p. 11225; Volume 14—p. 11747; Volume 15—p. 12368; Volume 16—p. 13011; Volume 17—p. 13730; Volume 18—p. 14763; Volume 19—p. 16072.

11. Purpose.—[Vols. 4, 10, 19].—The Safety Appliance Act is a remedial statute which is to be liberally construed to effect its humanitarian purpose to protect the lives and limbs of those engaged in the hazardous operation of railroading and the safety of the public generally.—United States v. Indiana Harbor Belt R. Co., 224 F. Supp. 219 (222).

2a. Construction and interpretation.—[Vols. 18, 19].—Safety Appliance Act defines standards of care required of a railroad and prescribes absolute liability on behalf of those within its protection; plaintiff, while not a railroad employee, is a member of one class for whose benefit the statute was enacted. Although tank car from which complainant fell, causing his injuries, was resting on siding owned by his employer, and was not being hauled or used on defendant railroad's line at time of the accident, Safety Appliance

Act is applicable; complaint specifically averred that defective condition of tank car's ladder and hand rail was the cause of the accident. Ownership of the siding is not significant, for it was the railroad which spotted the car there and removed it after it was unloaded; there is no evidence that anyone else had control of spotting and removing the car. Judgment in favor of railroad reversed and remanded for new trial.—Barney v. Staten Island Rapid Transit Ry. Co., 316 F. 2d 38 (41-2, 43).

Effect of legislatively establishing violation of a statute as negligence *per se* is to dispense with putting an injured party to the proof that the violation was in fact negligence. Violation of Safety Appliance Acts constitutes negligence as a matter of law, but that does not mean that such violation may not also be negligence as a matter of fact; and negligence clause in sidetrack contract between railroad and coal mining company, which provided that any claim or liability arising from joint or concurring negligence of both parties would be borne equally, included negligence *per se*. Railroad's violation of Safety Appliance Acts in supplying cars with inefficient brakes to the company constituted negligence *per se* and also negligence as used in the sidetrack contract; record supported jury's finding that defective hand brake on car, or cars, was not sole proximate cause of personal injury to company's employee; railroad was entitled to indemnity or contribution for payment it made in settlement of negligence litigation against it by company's employee.—Chicago, M. St. P. & P. R. Co. v. Alva Coal Corp., 365 F. 2d 49 (51, 52, 54-6).

The Safety Appliance Act imposes certain duties on all common carriers in interest of public safety and should be liberally construed to effect its humanitarian purpose. Defendant switching line is a common carrier even though acting at the moment under an agency agreement; the duty of a common carrier to refrain from hauling a defective car is absolute and it cannot, in effecting interchange, claim immunity for doing so under an agency agreement.—United States v. Indiana Harbor Belt R. Co., 224 F. Supp. 219 (222).

Since §11 forbids any common carrier subject to provisions of §§ 11-16 to haul any car not equipped as provided therein, it is immaterial whether defendant, a subject carrier operating an interchange facility owned by another carrier, in moving two defective cars received from the latter, as part of making up of trains in which they were spotted, was acting as agent of the other carrier or as an independent contractor. Defendant is liable under either relationship: the duty to refrain from hauling a defective car is an absolute one which may not be avoided, in effecting interchange, by claim of agency or contract.—United States v. Pacific Electric Ry. Co., 224 F. Supp. 948 (949).

7. Running boards.—[Vols. 7, 12-14, 18, 19].—No necessity is shown in present-day railroading for trainmen, conductors, brakemen, or other operating personnel to move from car to car over their roof running boards; easy stepping distance requirement is therefore unnecessary, and the Safety Appliance Standards should be revised accordingly. Specifics of the revision will be handled in a separate proceeding, wherein any other change that may be appropriately suggested can also be considered.—Drawbar Extensions on Hydroframe-60 Boxcars, 322 I.C.C. 620 (623, 624); all parties concede that running boards on the Hydroframe-60 boxcar compare most favorably for all working positions and practices other than the unnecessary practice of moving over the roof to the next car; and since this conclusion is limited to car-to-car movements over roof running boards, rather than merely going to or riding on the roof of a single car, petitioners' plea that they not be required to go on the tops of cars in any circumstance does not come into play—the two situations being greatly different, safety-wise.—Id., pp. 623-4.

Regulations of the Commission

28 FR 5389, May 30, 1963, Part 131: Safety Appliance Standards (Railroad), a new section, §131.22 Operation of track motor cars, added, effective on date of order.

28 FR 7839, Aug. 1, 1963, Part 131: Safety Appliance Standards (Railroad), effective date of new section, §131.22 Operation of track motor cars, postponed until further order of the commission.

29 FR 12589, Sept. 4, 1964, Part 131: Safety Appliance Standards (Railroad), regulations amended by addition of new section, §131.23 Unidirectional passenger-train cars adaptable to van-type semi-trailer use.

29 FR 15923, Nov. 28, 1964, Part 131: United States Safety Appliance Standards (Railroad), corrected order, effective Oct. 22, 1964, makes §131.1 not applicable on cars with roofs 16 ft. 10 in. or more above top of rail, and promulgates new "Hy-Cube" car classification and standards in §131.24 Box and other house cars with roofs 16 ft. 10 in. or more above top of rail.

30 FR 4062, Mar. 27, 1965, Part 132: Power Brakes and Drawbars (Railroad), §132.12 Initial terminal road train air brake tests, answers or interpretations in response to certain questions as to meaning and application of the regulation.

30 FR 7901, June 18, 1965, Part 131: United States Safety Appliance Standards (Railroad), new §131.25 Track motor-cars (self-propelled 4-wheel cars which can be removed from the rails by men), and §131.26 Pushcars, added, effective Jan. 1, 1967.

32 FR 2701, Feb. 9, 1967, Part 131: United States Safety Appliance Standards (Railroad), amendments not previously published in Federal Register through inadvertence: §131.1 is amended by addition of introductory note immediately before paragraph (a), and §131.27 Box and other house cars without roof hatches, and §131.28 Box and other house cars with roof hatches, are added, effective April 1, 1966.

32 FR 3152, Feb. 22, 1967, Part 131: Safety Appliance Standards (Railroad), §131.27(a)(3)(ii), pertaining to location of hand-brake shaft, amended, effective Feb. 28, 1967.

Section 12. Safety appliances as designated by commission to be standards of equipment; modification of standard height of drawbars.—[Unchanged. See vol. 4, p. 3274.]

Historical note, see vol. 4, p. 3272.

Notes of Decisions

Volume 4—p. 3274; Volume 10—p. 8475; Volume 19—p. 16075.

10. Cars of special construction.—[Vol. 4].—The Hydroframe-60 boxcar is not shown to be in violation of the Safety Appliance Acts or of any valid requirement of the Safety Appliance Standards or any other law or regulation, or to be an unsafe or undesirable car in any respect sufficient to justify any unfavorable action or recommendation by the commission. No present or future danger in its use is apparent that is not an inherent fact of railroading; thus there appears to be no safety hazard peculiar to that car or attributable to it in significantly greater measure than to other cars. However, this conclusion is necessarily based on the present record, and should it develop that that record is based on insufficient experience or is otherwise deficient the commission may still take action within its jurisdiction and responsibilities to meet the needs of the situation; the matter of safety will continue to be under constant scrutiny by Bureau and field personnel.—Drawbar Extensions on Hydroframe-60 Boxcars, 322 I.C.C. 620 (624).

Section 13. Penalty for using car not equipped as provided; hauling car for repairs where equipment becomes defective; liability for death or injury of employee; use of chains instead of drawbars.—[Unchanged. See vol. 4, p. 3277, vol. 18, p. 14764.]

Historical note, see vol. 4, p. 3272.

Notes of Decisions

Volume 4—p. 3278; Volume 7—p. 6169; Volume 10—p. 8476; Volume 13—p. 11226: Volume 14—p. 11747; Volume 16—p. 13012; Volume 17—p. 13731; Volume 19—p. 16075.

2. Construction.—[Vols. 4, 7, 13, 14, 16, 17, 19].—Defendant switching line violated provisions of Safety Appliance Act when it took a defective car received at Gibson yard, Hammond, Ind., and hauled it over tracks regularly used by defendant to Bensenville, Ill., for delivery to the Milwaukee. The fact that it took the defective car as part of a train already classified by New York Central at latter's Elkhart, Ind., yard for delivery to the Milwaukee at Bensenville under an agency agreement providing that for liability purposes such trains should be considered the sole trains of Central does not create an exception which would relieve defendant from penalty for violation of the act. Judgment for plaintiff.—United States v. Indiana Harbor Belt R. Co., 224 F. Supp. 219 (219-20, 222).

Defendant, which operates an interchange facility owned by Southern Pacific, received from latter two defective cars and moved them within the facility other than for purpose of repair, although one car was repaired at the facility and the other could have been. Whether, in moving the cars as part of making up of trains in which they were spotted, defendant acted as Southern Pacific's agent or as independent contractor is immaterial; duty under §11 to refrain from moving defective cars is an absolute one, and in effecting interchange, using Southern Pacific's tracks in execution of its contract, defendant was liable under either relationship. It is no defense that Southern Pacific is being sued for moving the same two cars on same date, since that action is based on Southern Pacific's movement of the cars into the facility and its movement of the unrepaired one out of the facility. Defendant is in violation of the Safety Appliance Acts; judgment for plaintiff.—United States v. Pacific Electric Ry. Co., 224 F. Supp. 248 (249, 250).

6. Proviso as matter of defense.—[Vols. 4, 10, 17, 19].—Provision of statute permitting movement of a defective car to nearest available repair point, without liability for penalty, is only available to excuse violations of the Safety Appliance Acts occurring after discovery of the defect. That proviso did not excuse defendant railroad from liability for penalty during the period of time it hauled boxcar having inoperative brakes, without any knowledge of such defect, before the defect was discovered.—United States v. Atchison, T. & S. F. Ry. Co., 205 F. Supp. 589 (591-2).

Sections 14, 15, 16.—[Unchanged. See vol. 4, p. 3283, 3284.]

Notes of Decisions

§14: Volume 4—p. 3283.

ASH PAN ACT

Sections 17—21. Locomotives to be equipped with safety ash pans; penalty for violation; enforcement.—[Unchanged. See vol. 4, p. 3285, 3286.]

Historical note. see vol. 4, p. 3285.

LOCOMOTIVE INSPECTION ACT

Section 22. Inspection of locomotives and appurtenances; definitions.—[Unchanged. See vol. 4, p. 3287.]

Historical notes, see vol. 4, p. 3287, vol. 11, p. 9774.

Notes of Decisions

Volume 4—p. 3288; Volume 7—p. 6172; Volume 10—p. 8478; Volume 11—p. 9774; Volume 13—p. 11227; Volume 16—p. 13012; Volume 17—p. 13732; Volume 18—p. 14765.

4. Construction.—[Vols. 4, 7, 10, 11, 17].—The Locomotive [Boiler] Inspection Act has been liberally construed in light of its prime purpose, the protection of employees, by requiring use of safe equipment. [317 US 481.] Any employee engaged in interstate commerce who is injured by reason of a violation thereof, has a cause of action under the statute.—Gowins v. Pennsylvania R. Co., 299 F. 2d 431 (433).

5. Relation to other acts.—[Vols. 4, 13, 18].—The Locomotive [Boiler] Inspection Act is substantially, if not in form, an amendment to the Federal Employers' Liability Act and is subject to the same construction.—Gowins v. Pennsylvania R. Co., 299 F. 2d 431 (434).

Section 23. Use of unsafe locomotive and appurtenances unlawful; inspection and tests.—[Unchanged. See vol. 4, p. 3291.] (Feb. 17, 1911, c. 103, §2, 36 Stat. 913; Mar. 4, 1915, c. 169, §1, 38 Stat. 1192; June 7, 1924, c. 355, §2, 43 Stat. 659.)

Historical notes, see vol. 4, p. 3291, vol. 12, p. 10587, vol. 13, p. 11227, vol. 14, p. 11748.

Notes of Dcisions

Volume 4—p. 3291; Volume 7—p. 6173; Volume 10—p. 8478; Volume 12—p. 10588; Volume 13—p. 11227; Volume 14—p. 11748; Volume 15—p. 12369; Volume 16—p. 13013; Volume 17—p. 13733; Volume 18—p. 14765; Volume 19—p. 16077.

1. Construction.—[Vols. 4, 7, 10, 12, 14, 18, 19].—In view of identity of purpose of both the Boiler Inspection and Safety Appliance acts, and the similarity and overlapping of subject matter in dealing with railroad equipment and appliances, cases defining and construing "in use" for purpose of Safety Appliance Act are authoritative for the same purpose under the Boiler Inspection Act. Since defendant's electric, self-propelled mail and baggage car was "in use" at time of accident in question, for purposes of Boiler Inspection Act, that statute is applicable in car inspector's action for personal injuries received when explosion and fire in defective fuse box on the car ignited his clothing and caused him extensive and severe burns.—Holfester v. Long Island R. Co., 360 F. 2d 369 (372-3).

2. Character of duty imposed on carriers.—[Vols. 4, 10, 12, 14, 15, 18-19].—Negligence is not the basis for liability under the act; partial defense of contributory negligence and the bar of assumption of risk are not available to employer. The act requires use of safe equipment for protection of employees; and any employee who is injured by reason of a violation thereof, has a cause of action under the

statute.—Gowins v. Pennsylvania R. Co., 299 F. 2d 431 (433).

Boiler Inspection Act, with its absolute liability, applies to one in plaintiff's position, who, as an inspector for defendant railroad, was engaged in searching out defects on electric, self-propelled mail and baggage car (which was on a track adjacent to the main line for a between-run inspection) so that railroad could comply with the act. Defendant's liability arises from its being unlawful to use locomotives which are defective—not from employee's position or work he may be doing when he is injured, provided the defective equipment is the proximate cause of the injury. Therefore, plaintiff is not barred from seeking damages under the act for injuries received when defective fuse box on the car exploded and resulting fire ignited his clothing, causing severe burns which permanently and seriously disabled him. The record clearly supports judgment of the trail court that defendant railroad had violated the statute and that such violation was proximate cause of plaintiff's injuries; affirmed.—Holfester v. Long Island R. Co., 360 F. 2d 369 (370-2, 373).

While the statute creates an absolute duty on part of defendant railroad, to which contributory negligence is no defense, negligence is not the basis for railroad employee's action for personal injuries suffered in two accidents, the first covered by the Federal Employers' Liability Act and the second by the Boiler Inspection Act. If the court's failure to charge the jury to effect that violation of a commission regulation issued pursuant to the Boiler Inspection Act is per se a violation of the act itself was erroneous, the error was cured by verdict for plaintiff; verdict was large enough to render altogether speculative and utterly untenable plaintiff's argument that the jury awarded nothing for the second accident because of the court's alleged erroneous charge; new trial denied.—Luke v. Pennsylvania R. Co., 207 F. Supp. 550 (551, 552)*.

3. What constitutes violation.—[Vols. 4, 12, 13, 15, 16].—The statute covers not only defects in construction and mechanical operation, but gives protection against presence of dangerous objects or foreign matter. When railroad employee claimed that there was oil on walkways of two diesel locomotives attached to freight train, which he had to use in getting on and off the engines in his required duties, and that when he attempted to get on one of the locomotives he "slipped and tripped," trail court erred in withdrawing from the jury's consideration the employee's claim for damages under the Locomotive [Boiler] Inspection Act. Reversed and remanded for a new trial.—Gowins v. Pennsylvania R. Co., 299 F. 2d 431 (433-4).

Defendant railroad did not violate the Locomotive Inspection Act by permitting a steam locomotive (previously given to a fair association for historical display) to be coupled in front of its locomotive which was hauling an excursion train of railroad fans, and moved a distance of from 100 to 300 feet, so that the railroad enthusiasts could take pictures of the double-heading. Instead of defendant making use of engine in question because its horsepower was needed, or for any other purpose, the excursion passengers were making use of defendant's train to make home-movie records of its rolling in a double heading. Also, since the locomotive was not "used" by any railroad company on occasion in issue, defendant's permitting a non-profit fair association and a non-profit association of railroad enthusiasts to use its tracks for the run thereof, in manner described and without a current inspection, did not violate §91.159 of the commission's rules and instructions for inspection of steam locomotives; therefore did not violate the statute.—United States v. Quincy R. Co., 338 F. 2d 430 (432-3).

4. Locomotives subject to act.—[Vols. 4, 15, 17].—When defendant's electric, self-propelled mail and baggage car had been only temporarily taken off its main line and placed on adjacent train-assembly track for a between-run inspection (but had not been removed to a repair or storage track or removed from service) at time of accident in question, it was still "in use" for purposes of Boiler Inspection Act; thus, car inspector's action against the railroad for in-

juries received when explosion and fire in defective fuse box on the car ignited his clothing, causing him extensive and severe burns, comes within provision of that statute. Lower court's determination that, within meaning of the act, the locomotive was "in use," though motionless, when accident occurred is clearly supported by the record; affirmed.—Holfester v. Long Island R. Co., 360 F. 2d 369 (371-2).

Section 24. Director and assistant directors of locomotive inspection; appointment and salaries.—[Unchanged except as shown in footnote, vol. 17, p. 13733. See vol. 14, p. 11749.]

Amendments, see footnotes, vol. 4, p. 3295, vol. 10 pp. 8482, 8483, vol. 14, p. 11749; vol. 17, p. 13735. Historical note, see vol. 4, p. 3295, vol. 18, p. 14766.

Historical Note

Reorganization Plan No. 3 of 1965, effective July 27, 1965, transferred all functions vested in the director of locomotive inspection, assistant directors of locomotive inspection, and district inspectors of locomotives to the Interstate Commerce Commission; abolished the offices of director, assistant director, and district inspector; and authorized the Commission to make such provisions as it deems appropriate for performance of the functions transferred, for the transfer of records, property, and funds affected by the reorganization plan, and to employ necessary personnel to carry out the transferred functions under the classified civil service and pursuant to the Classification Act of 1949. 30 FR 9351, July 28, 1965.

Sections 25, 26, 27.—[Unchanged. See vol. 14, p. 11749, 11750, vol. 10, p. 8484.]

Section 28. Rules and instructions as to inspection.—[Unchanged. See vol. 10, p. 8486.]

Histroical notes, see vol. 4, p. 3287.

Notes of Decisions

Volume 4—p. 3299; Volume 7—p. 6175; Volume 10—p. 8486; Volume 12—p. 10588; Volume 13—p. 11228; Volume 14—p. 11750; Volume 17—p. 13734; Volume 18—p. 14766; Volume 19—p. 16078.

2. Rules and instructions as to inspection.—[Vols. 4, 7, 10, 17-19].—The commission's rules and instructions governing inspection and testing of locomotives, adopted and issued in the exercise of the authority conferred by the Locomotive Inspection Act, acquire the force of law and become an integral part of the statute. However, when defendant's permitting use of its tracks for run of an old steam locomotive, in the manner described and without a current inspection, did not violate the rule requiring inspection reports for each locomotive used by a railroad company (since neither defendant nor any other railroad "used" the locomotive on that occasion), the statute was not violated.—United States v. Quincy R. Co., 338 F. 2d 430 (433).

In light of current technical developments and operating conditions, petitioner's proposed test operation of 12 specified diesel electric locomotives equipped with 6-I.N. type distributing brake valves for a period of up to 15 months, for purpose of ascertaining whether they can be safely operated for that time without cleaning of those valves, is clearly in in-

terest of progress, provided adequate protection and safety continues throughout duration of the test, which it will if the test is conducted strictly in accordance with the rules, circumstances, and conditions proposed.—Rules for Inspection of Locomotives Other than Steam, 315 I.C.C. 99 (101-103).

Relief granted from Rule 91.208 of inspection and testing rules (which requires cleaning of brake valves every 6 months), subject to the additional conditions that the test be promptly terminated should that appear advisable in interest of safety, that no more than one test unit be used in the same movement, and that records and results of the test be made available for inspection not only by the commission and its employees, but also by all interested rail carriers, Association of American Railroads, protestant employee organizations, and any interested manufacturers of valves and air-brake equipment.—Id., p. 103.

Regulations of the Commission

28 FR 157, Jan. 5, 1963, Part 91: Locomotive Inspection, §91.232 Classification or marker lights, effective date postponed to Apr. 1, 1963 subject to conditions stated, effective on date of order.

28 FR 13400, Dec. 11, 1963, Part 91: Locomotive Inspection, miscellaneous amendments. Relief from requirements of §§91.223, 91.225, 91.226, 91.227, 91.238(d), 91.239(b), and 91.253 revoked, except with respect to certain locomotives used by Iowa Term. R. Co., effective Jan. 1, 1964.

31 FR 11179, Aug. 24, 1966, Part 91: Locomotive Inspection, miscellaneous amendments, §§91.201, 91.206, 91.208, 91.212, 91.247, 91.264, 91.265, 91.266, 91.267, amended; §§91.330, 91.331, 91.334, deleted, effective 60 days from publication in Federal register of Aug. 24, 1966.

32 FR 4360, March 22, 1967, Part 91: Locomotive Inspection, Subpart C—Other Than Steam Locomotives and Appurtenances, miscellaneous amendments and corrections substituted for regulations published at 31 FR 11179, effective 60 days from date of service.

32 FR 8092, June 6, 1967, Part 191 [formerly Part 91]: Locomotive Inspection, Other than Steam Locomotive Rules; pursuant to §12(b) of Dept. of Transportation Act, the stay or postponement of effective date of ICC orders published at 32 FR 4360 and 31 FR 11179 continues in effect until further order of the Federal Railroad Administrator.

Sections 29-33. Duties of district inspectors; inspection and repairs; notice; appeal Powers and duties of inspectors; examinations of inspectors; Reports.—[Unchanged. See vol. 10, pp. 8487-8490.]

Amendments, see footnotes, vol. 10 pp. 8487-9; historical notes, see vol. 4, p. 3287.

Notes of Decisions

§29: Volume 4—p. 3303; Volume 7—p. 6176.

Historical Note

§29. The commission recommends, in view of the prohibitions in 18 USC §1001, that §6 of the Locomotive Inspection Act (45 USC §29) be amended so as to eliminate the mandatory oath provision therein, and that such requirement be made discretionary with the commission.—Annual Report, 1964, p. 72.

Historical Note

§32 and 33. It is recommended that §8 of the Locomotive Inspection Act be amended so as to prohibit (a) use in any damage suit of any report sent by a carrier under that act, (b) introduction in evidence in any damage suit of a report submitted to the commission by its accident investigators, (c) expert opinion testimony by such investigators in damage suits,

and (d) to restrict factual testimony by such investigators to cases where factual evidence is not reasonably available from other sources.—Annual Report, 1963, p. 15, Annual Report, 1964, p. 71-2.

Section 34. Penalty for violations by carrier; duty of United States attorney to sue therefor; director to give information.—[Unchanged. See vol. 10, p. 8490, vol. 18, p. 14770.]

Amendment, see footnotes, vol. 10, p. 8490; historical note, see vol. 4, p. 3287, vol. 18, p. 14771.

Notes of Decisions

Volume 4—p. 3306; Volume 7—p. 6178; Volume 13—p. 11228; Volume 14—p. 11751; Volume 16—p. 13014; Volume 17—p. 13735.

1. Elements of offenses.—[Vols. 4, 7].—Defendant violated the commission's regulations issued to implement the Locomotive [Boiler] Inspection Act (specifically 49 CFR §91.355) by failing to immediately report by wire, as provided therein, an accident causing serious injury to its fireman which resulted from fireman's accidental contact with electrically energized part of its diesel-electric locomotive unit; and committed a second violation of the same regulation by failing to mail written report of same accident to the Director of Locomotive Inspection. Defendant is liable for statutory penalty for each violation and for costs.—United States v. Northern Pac. Ry. Co., 213 F. Supp. 1 (2-3).

BLOCK SIGNAL RESOLUTION

Section 35. Investigation and report by Commission; evidence.—[Unchanged. See vol. 4, p. 3307.]

Historical notes, see vol. 4, p. 3307.

SUNDRY CIVIL APPROPRIATIONS ACT, MAY 27, 1908, SEC. 1

Sections 36, 37. Investigation, testing appliances or systems to promote safety; mail cars.—[Unchanged. See vol. 4, pp. 3309, 3310.]

Historical notes, see vol. 4, pp. 3307, 3309, 3310.

ACCIDENT REPORTS ACT

Section 38. Monthly reports of railroad accidents; duty of carrier to make.—[Unchanged. See vol. 19, p. 16090]

Notes of Decisions

Volume 4—p. 3311; Volume 12—p. 10589.

Historical Note

The commission recommends, in view of the prohibitions in 18 USC §1001, that §1 of the Accident Reports Act (45 USC §38) be amended so as to eliminate the mandatory oath provision therein, and that such requirement be made discretionary with the commission.—Annual Report, 1964, p. 72.

Section 39. Peanlty for failure to make report.—[Unchanged. See vol. 4, p. 3312.]

Section 40. Investigation by commission of accidents; cooperation with State commissions; reports of investigations.—[Unchanged. See vol. 4, p. 3313.]

Historical notes, see vol. 4, p. 3311, vol. 11, p. 9775, vol. 12, p. 10589; vol. 19, p. 16080.

Notes of Decisions

Volume 16—p. 13014; Volume 17—p. 13736; Volume 18—p. 14771; Volume 19—p. 16080.

10. Causes of accidents, generally.—[Vols. 10-19].—Derailment of passenger train resulting in one death and many injuries was caused by the train entering a curve on a descending grade at rate of speed which exceeded the theortical overturning speed on the curve as well as maximum authorized. Due to their physical condition (lack of sufficient rest together with effects of beverages consumed) engine crew was not alert; culpable human failure, not mechanical failure, was the primary cause of the accident; there was no defective condition of track structure or train's brake system which could have caused or contributed to the cause of the accident, and no appropriate action to stop the train or reduce speed prior to derailment was taken.—Accident near Evaro, Mont., 318 I.C.C. 199 (199, 209).

The primary cause of grade-crossing accidents is failure of the motor-vehicle operator to exercise due caution or to comply with existing laws and regulations and obey warning signs or signals; mechanical difficulties, weather conditions, and speeds of trains or motor vehicles are not shown to be significant factors. Some 73 percent of such accidents involve private automobiles, while only about 19.4 percent involve commercial vehicles; of the latter, while the heavy types are involved in the more serious accidents, regulated carriers generally present no problem the principal offender against safety being the exempt, unregulated, or irresponsible carrier; and though any type vehicle may be involved in a serious accident, the most severe are those involving vehicles hauling flammable, explosive, or other dangerous commodities. But while human failure causes most grade-crossing accidents, inadequate protection or maintenance of crossings, restricted visibility or sight distance, and insufficient warning time given by approaching trains are also contributing factors.—Prevention of Rail-Highway Grade-Crossing Accidents, 322 I.C.C. 1 (13-21, 63-6, 73, 86)*.

While the Bureau of Safety and Service's accident-reporting procedure has no direct bearing on prevention of grade-crossing accidents, it is significant in formulating recommendations for their prevention; statistical studies made from such reports are indispensable to a sound legislative policy and in formulation of adequate safety regulations. Statement of the cause or causes of a grade-crossing accident would be more meaningful if it gave more complete and detailed information, although in many instances, owing to death of members of the train crew and the truck driver involved, the best evidence is not always available and the commission must rely on

secondary evidence in determining the cause of the accident. The commission will therefore consider revision of its accident reporting procedure and include in its reports a more detailed analysis of the causes of accidents—Id., p. 81.

Section 41. Reports not evidence in suits for damges.—[Unchanged. See vol. 4. p. 3313.]

Notes of Decisions

Volume 19—p. 16081.

Historical Note

It is recommended that §4 of the Accident Reports Act be amended so as to prohibit the introduction in evidence in any damage suit of a report submitted to the commission by its accident investigators, expert opinion testimony by such investigators in damage suits, and to restrict factual testimony by such investigators to cases where factual evidence is not reasonably available from other sources.—Annual Report, 1963, p. 15, Annual Report, 1964, p. 71-2.

Section 42. Rules and regulations; form of reports.—[Unchanged. See Vol. 19, p. 16081.]

Section 43. Definitions.—[Unchanged. See Vol. 19, p. 16082.]

MEDALS OF HONOR ACT

Section 44. Medals of honor for persons saving lives on railroads and highways.—[Unchanged. See vol. 18, p. 14772.]

Historical notes, see vol. 4, p. 3315, vol. 11, p. 9775, vol. 12, p. 10589, vol. 13, p. 11229, vol. 14, p. 11751, vol. 15, p. 12371, vol. 16, p. 13015, vol. 17, p. 13736, vol. 18, 14773.

Historical Notes

By Executive Order 11382 of November 28, 1967, Executive Order No. 10765, governing award of life-saving medals under Medals of Honor Act (22 FR 2783), is amended so as to transfer certain functions, and assign certain authority and duties concerned with transportation, to the Department of Transportation. 32 FR 16247, Nov. 29, 1967.

The commission recommends that the Medals of Honor Act be repealed, in view of the more comprehensive recognition of heroism presently afforded by the Carnegie Hero Fund Commission.—Annual Report, 1964, p. 62-3.

Section 45. Rosettes and ribbons.—[Unchanged. See vol. 4, p. 3318.]

Section 46. Payment of expenses.—Appropriations for the Interstate Commerce Commission are hereby made available for carrying out the provisions of this act. (Feb. 23, 1905, c. 744, §3, 33 Stat. 743; June 13, 1957, S. 1463, 71 Stat. 69.)

HOURS OF SERVICE ACT

Chapter 3.—Title 45

Section 61. Carriers and transportation subject to provisions of chapter; "railroad" and "employees" defined.—[Unchanged. See vol. 4, p. 3321.]

Historical notes, see vol. 4, p. 3321, vol. 10, p. 8493, vol. 11, p. 9775, vol. 12, p. 10589.

Notes of Decisions

Volume 4—p. 3322; Volume 7—p. 6185; Volume 10—p. 8493; Volume 13—p. 11229; Volume 14—p. 11752; Volume 15—p. 12372.

Character of Act; Construction

3. Nature of act; whether civil or penal in character.—[Vol. 4].—The Hours of Service Act is civil rather than criminal and should be given broad construction in order that its purpose may be fulfilled.—United States v. Northern Pac. Ry. Co., 224 F. Supp. 303 (304).

4.—Purpose of the act.—[Vols. 4, 7, 13-15].—Purpose of the statute is to promote safety in train operation by preventing excessive physical and mental strain which usually results from remaining too long at an exacting task; it must be construed and applied in view of that purpose.—United States v. Detroit, T. & I. R. Co., 205 F. Supp. 860 (863, 864)*.

Purpose of the Hours of Service Act is to promote the safety of railroad passengers and employees by making mandatory release from duty for a period sufficient to allow adequate rest for those engaged in the movement of trains; a tired worker creates an unnecessary risk to himself, his fellow workers, and passengers of the railroad, as well as a potential danger to property. The act is merely designed to limit a railroad's right to require its employees to work overtime, not to control activities of employees with regard to "moonlighting"; it was enacted to prevent patterns of employment which would cause fatigue among employees who participate in movement of trains.—United States v. Northern Pac. Ry. Co., 224 F. Supp. 303 (304, 305).

The purpose of the Hours of Service Act was to reduce dangers to the public incident to the strain of excessive hours spent on duty by employees of the class covered. All such employees are restricted to a maximum of 16 on-duty hours in a 24-hour period; and in further providing that employees carrying out the exacting work of handling orders affecting train movements shall not be permitted or required to remain on duty more than nine hours in any 24-hour period. Congress obviously felt that an employee working more than nine hours at such duties would suffer a loss of efficiency which might be dangerous to other employees and the public.—United States v. Great Northern Ry. Co., 248 F. Supp. 88 (90-91).

Purpose of the limitation of hours of service is to promote safety in the operation of trains by preventing excessive mental and physical strain which usually results from remaining at an exacting task. The evil to be remedied is excessive labor by employees which makes them dangerous to themselves and the public.—United States v. Alabama, T. & N. R. Co., 252 F. Supp. 526 (528).

7.—Character of duty imposed upon the carrier.—[Vol. 4].—Requirements of the Hours of Service Act are absolute and lack of knowledge, lack of wilfulness, inadvertence, etc., will not excuse violations thereof.—United States v. Detroit, T. & I. R. Co., 205 F. Supp. 860 (863)*.

8.—Remedial character.—[Vols. 4, 10].—The Hours of Service Act is a remedial statute and must be liberally construed to effectuate its purpose.—United States v. Detroit, T. & I. R. Co., 205 F. Supp. 860 (863, 864)*; and the Act was enacted for protection of the public and railroad employees from the dangers inherent in long, uninterrupted periods of time on duty by railroad employees.—Jopek v. New York Central R. Co., 353 F. 2d 778 (781).

9.—Liberal construction.—[Vols. 4, 7, 13].—The statute should be construed in the light of its purpose, which means that it should be liberally construed. In definition of an employee as a person actually engaged in or connected with movement of any train, the work "actually" differentiates those who are from those who are not within its scope. Meaning of the words chosen by Congress is plain, and it is clear that the purpose of the act to eliminate or reduce railroad accidents caused by overwork could be effectuated only by encompassing all employees who are "actively" or "presently" engaged in or connected with the movement of trains; and an employee's services or duties must proximately relate to a train or trains already in motion or about to move. Thus, sweeping and cleaning certain switches on railroad's main line which were to be operated because of an approaching train and which, due to cold weather and snow, were not functioning properly, were duties intimately and directly connected with the movement of trains.—Jopek v. New York Central R. Co., 353 F. 2d 778 (781-3).

Persons Subject to Act

23. Employees subject to Act.—[Vol. 13].—In action under Federal Employers' Liability Act to recover for death of railroad employee, predicated on general negligence and violation of Hours of Service Act, trial court did not err in deciding as a matter of law that employee whose duties were to sweep and clean certain switches was actually engaged in or connected with movement of trains within meaning of the act when he suffered a fatal heart attack. Employee's duties were to sweep and clean only those switches on railroad main line which were to be operated because of an approaching train and which, due to cold weather and snow, were not functioning properly; as those duties were intimately and directly connected with movement of trains, he was an employee within scope of the statute. And, since testimony of witnesses concerning the employee's duties was consistent, undisputed and raised no question of credibility, the court could properly decide the question of his status without invading province of the jury.—Jopek v. New York Central R. Co., 353 F. 2d 778 (780-4).

Section 62. Hours of service limited.—[Unchanged. See vol. 4, p. 3331.]

Historical note, see vol. 4, p. 3321.

Notes of Decisions

Volume 4—p. 3322; Volume 7—p. 6186; Volume 10—p. 8493; Volume 11—p. 9775; Volume 12—p. 10590; Volume 13—p. 11230; Volume 14—p. 11752; Volume 15—p. 12372; Volume 17—p. 13737.

2. What constitutes being or remaining on duty, in general.—[Vol. 4].—An employee is on duty under the Hours of Service Act when under orders and not at liberty to go away; he is none the less on duty even though inactive if the time is not his own. Time performing work required preparation for work, is time on duty. Obvious purpose of the statute is defeated if an employee is required or permitted to occupy

hours intended for rest and relaxation with service of another kind; and particular character of such other service is immaterial.—United States v. Detroit, T. & I. R. Co., 205 F. Supp. 860 (863)*.

3.—Acts constituting service on duty.—[Vol. 4].—Time spent by railroad brakeman in driving his own car from place of call to place of duty was directly related to his employment to such an extent that it may not be considered "hours off duty"; under the particular circumstances, those hours were necessary to the employee's tour of duty.—United States v. Detroit, T. & I. R. Co., 205 F. Supp. 860 (862, 864)*.

However, after he finished his assigned job and had been released from duty, he was not on duty until he again reported for work the following morning; and when 8 hours had elapsed between the time he went off duty and the time he next reported for work, defendant railroad was not guilty of violation of the Hours of Service Act. During that 8 hours, the brakeman was free to do as he pleased; if he did not get enough rest, he alone was responsible. Judgment of the lower court reversed, and cause remanded with instructions to dismiss the complaint.—Id., 315 F. 2d 802 (804)*.

5.—Commingling of duties connected and not connected with train operation.—[Vols. 4, 14].—Policy behind the Hours of Service Act is best served by including all work performed for the railroad by its employees in determining violation. The statute was violated when employee worked over 17 hours in a 24-hour period although the last 8 hours was in non-covered work as assistant yardmaster, in which work he was not engaged in movement of trains. Shifting of duties should not be a method of circumventing the law; an employee will not feel more rested because part of his work involved duties not connected with movement of trains. And fact that the employee could work for another employer is irrelevant; the act is merely designed to limit railroad's right to require employees to work overtime.—United States v. Northern Pac. Ry. Co., 224 F. Supp. 303 (304-5).

In action alleging that two of defendant's employees were required to remain on duty for more than 9 out of 24 hours, in violation of the statute, the 9-hour restriction of on-duty time of employees handling train orders did not require inclusion of both time spent in that (covered) work and subsequent time spent in non-covered work when latter duties replaced former and at no immediate subsequent time were the employees shifted back to employment requiring handling of train orders. Neither employee worked with train orders at a time when he had already been on duty, in any capacity, more than 9 in the past 24 hours; neither was required to work, in any capity, more than 16 hours in the 24-period; and as they did not return to duties dealing with train movements at any time material to the case, there is no evidence of any "pattern of the shifting of duties as "a method of circumventing the law." [Citing 224 F. Supp. 303.] Judgment in favor of defendant.—United States v. Great Northern Ry. Co., 248 F. Supp. 88 (89-90, 91).

Commingling of duties will not avoid application of the Hours of Service Act; thus, when action to recover for railroad employee's death is predicated, in part, on violation of the act, and the railroad concedes that he had been on duty more than 16 hours at the time he suffered a fatal heart attack, duties of the employee at that time must be scrutinized to ascertain coverage or nonapplicability of the statute.—Jopek v. New York Central R. Co., 353 F. 2d 778 (781).

14.—Definiteness of respite as affecting continuity of service.—[Vols. 4, 10].—Short interruptions in service do not break continuity of on duty time; to break that continuity, time off duty must provide opportunity for substantial rest and relaxation. That an employee is absolutely relieved from service is not of controlling importance if the time is so short, or opportunities for rest so meager, that for all practical purposes he cannot recuperate from fatigue. Brief interruptions such as time for meals, waiting for orders, etc., cannot be considered off duty.—United States v. Detroit, T. & I. R. Co., 205 F. Supp. 860 (863)*.

Statutory provision that no telegraph operator may work more than nine hours in

any 24-hour period, if station is in the day-and-night class, nor more than 13 hours in any such period if station is in daytime class, is directed toward preventing an employee from exceeding the maximum time in any 24 hours, regardless of how computed. The phrase "any twenty-four hour period" is not used with reference to computation of class of station, and this should not be read into the statute. Computing the hours of use of defendant's telegraph station (operated with one employee on duty for periods of more than 9 but less than 13 hours) from time the sole operator commenced his daily shift, as logic requires, there is no proof that it was in use for more than 13 hours in a 24-hour period; therefore, there was no violation of the Hours of Service Act.—United States v. Alabama, T. & N. R. Co., 252 F. Supp. 526 (527-8).

Section 63. Penalty; suits therefor; exceptions from operation of act.—[Unchanged. See vol. 4, p. 3346, vol. 18, p. 14773.]

Historical notes, see vol. 4, pp. 3321, 3346, vol. 18, p. 14773.

Notes of Decisions

Volume 4—p. 3347; Volume 13—p. 11230.

Recovery of Penalties; Proceedings

5.—**Questions for the jury.**—[Vol. 4].—In action to recover statutory penalty from railroad for violation of the Hours of Service Act, whether or not one hour break in which railroad fireman was not actually working should be counted as on duty or off futy depends on whether it afforded a substantial and opportune period of rest under all the circumstances; and generally, the question of whether such a release is sufficient to break the continuity of service, in the particular circumstances, is one of fact for of fact for the jury. District court erred in directing a verdict for the railroad when, in light of the evidence and of all the other circumstances in the case, a question of fact was presented for the jury's determination as to whether the one hour afforded a substantial and opportune period of rest; reversed and remanded.—United States v. Mississippi Export R. Co., 321 F. 2d 583 (585-6).

Section 64. Enforcement by Interstate Commerce Commission.—[Unchanged. See vol. 4, p. 3359.]

Historical notes, see vol. 4, pp. 3321, 3359.

Notes of Decisions

Volume 4—p. 3359.

Regulations of the Commission

27 FR 6716, July 14, 1962, Part 61: Hours of Service of Railroad Employees, §61.1 Method and form of monthly report, revised, commencing with report for month of August, 1962.

ADAMSON EIGHT-HOUR ACT

Sections 65, 66. Establishment of eight-hour day; Penalty for violation.—[Unchanged. See vol. 4, p. 3361.]

Historical note, see vol. 4, p. 3361

Notes of Decisions

Volume 4—p. 3362; Volume 7—p. 6187; Volume 13—p. 11231.

Chapter 5.—GOVERNMENT-AIDED RAILROADS

Section 84. Interstate communication.—[Unchanged. See vol. 4, p. 3365.]

Historical note, see vol. 4, p. 3365; vol. 16, p. 12715.

Notes of Decisions

Volume 4—p. 3365.

Chapter 8.—RAILWAY LABOR ACT

Section 151. Definitions.[Unchanged. See vol. 7, p. 6193, vol. 15, p. 12373.]

Historical note, see vol. 7, p. 6194.

Notes of Decisions

Volume 4—p. 3374; Volume 10—p. 8495; Volume 11—p. 9776; Volume 12—p. 10591; Volume 13—p. 11232; Volume 14—p. 11753; Volume 15—p. 12373; Volume 16—p. 13016; Volume 17—p. 13738; Volume 18—p. 14774.; Volume 19—p. 16084.

3. Representatives.—[Vols. 10, 19].—In approving railroad merger, the Interstate Commerce Commission imposed conditions for protection of railroad employees adversely affected thereby, but did not undertake to determine the rights of individual employees or groups of employees; disputes as to entitlement of protective benefits are to be resolved by arbitration in accordance with implementing agreements, and arbitration machinery provided therein, between railroads and the duly authorized representative of their employees, as defined by the Railway Labor Act. The court lacks jurisdiction to adjudicate claims of individual employees or groups thereof.—Louisville & N. R. Co. v. Cantrell, 215 F. Supp. 229 (232-6, 240)*.

5. Construction, generally.—[Vols. 10-19].—Principle of per se illegality is to be applied only to conduct which of necessity produces consequences violative of the statute under consideration, or which produces proscribed consequences in such an overwhelming proportion of cases that minute inquiry in every instance would be wasteful of judicial and administrative resources. Railroads' participation in considered strike insurance plan did not constitute a per se violation of the Railway Labor Act.—Kennedy v. Long Island R. Co., 319 F. 2d 366 (370-2)*.

Purpose of the Railway Labor Act is to set up procedure to avert interruption to commerce, not to prescribe or proscribe the labor activities of parties. Defendant railroads' strike insurance plan, providing for daily indemnity for loss due to work stoppages designed to enforce demands of labor unions, was not a violation of railroads' duty to bargain in good faith under the statute; indeed it might well be viewed as an attempt by railroads to follow procedures of the act in an effort to reach a peaceful settlement and avoid a strike.

Considered strike insurance plan does not violate the statute.—Kennedy v. Long Island R. Co., 211 F. Supp. 478 (486-8)*.

National Mediation Board has no authority to determine whether persons employed by Alabama State Docks Department are railroad employees as defined in certain orders of Interstate Commerce Commission, or to define certain work as that of a railroad employee or subordinate official; that authority is vested exclusively in the commission. But the board has the right to ascertain initially whether persons in the employment of a carrier fall within the orders of the commission; it is not required to defer its proceedings and submit to the commission the question whether certain designated employees are or are not within the classifications covered by the Commission's orders.—United States v. Feaster, 330 F. 2d 671 (675).

And failure to allege that the commission has determined the State Docks Department to be a carrier subject to Part I of Interstate Commerce Act is not fatal to complaint seeking injunction to compel certain officials of the Docks Department to permit the board to examine its records to determine whether persons involved in labor dispute are performing work defined by the Commission as that of an employee. The complaint alleges that the Docks Department is a carrier within meaning of the act; that allegation is subject to proof like any other, and prior determination by the commission that the particular functions performed by appellees constitute them a carrier is unnecessary.—Id., pp. 675-6.

RAILROAD RETIREMENT ACT OF 1937

Sections 228a (a), (e), (j), (k), (m), 228r.—Definitions.—[Unchanged, with respect to jurisdiction of commission.]

Notes of Decisions

Notes of Decisions

Volume 4—p. 3407.

PUERTO RICO

Chapter 4.—Title 48

Section 751. Interstate commerce and certain other laws inapplicable to Puerto Rico.—[Unchanged. See vol. 11, p. 9781.]

Title 50—WAR

Chapter 8.—Federal Explosives Act

Section 127. Transportation.—[Repealed. § 123 of the act supersedes the transportation provision, and is quoted in volume 11, at page 9763.]

GENERAL RULES OF PRACTICE

[Unchanged except Rules 4(e), 5(d)(j)(k), 8(a)(c), 9, 10, 11, 12, 13, 17, 19, 21, 34, 35, 42, 44, 45, 49, 50, 53(a), 55, 56, 70(a)(b), 73, 88, 91(d), 92, 93, 94, 101(a)(2), (e), (g), 102, 225, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250.]

NOTES OF DECISIONS

Volume 12—p. 10593; Volume 13—p. 11235; Volume 14—p. 11757; Volume 15—p. 12376; Volume 16—p. 13018; Volume 17—p. 13769; Volume 18—p. 14778; Volume 19—p. 16086.

Rule 2. Liberal construction.—While rule 1.2 provides that the Rules of Practice shall be liberally construed to secure just, speedy, and inexpensive determination of issues, application of liberality would be misplaced where nearly 10 years elapsed between filing of informal and formal complaints, during which time complainants failed to take further action following initial telegrams, or to correct deficiencies in mailed informal complaint after notification thereof by the commission, or otherwise to follow a course leading to a "speedy" or "just" determination.—Plaswood Corp. v. Alton & S.R., 321 I.C.C. 434 (439-40, 441).

See also 99 M.C.C. 797; 109 M.C.C. 830; 111 M.C.C. 347; 319 I.C.C. 393.

Rule 4. (d) *Objectionable matter.*—See 91 M.C.C. 25; 91 M.C.C. 179.

(e) *Ex parte communications prohibited; penalties provided.* Ex parte communications as defined in Appendix C to these rules are prohibited and any person violating the prohibitions set out in such Appendix is subject to the penalties as therein provided.

(28 FR 7095, July 11, 1963. New subparagraph (e) added, effective 30 days after date of publication.)

Rule 5. Definitions.—(d) The term "pleading" means a complaint, answer, reply, application, protest, motion (other than motion orally made at hearing or argument), petition, document supplementing oral hearing as described in §1.86 and all documents filed under modified procedure.

See 89 M.C.C. 471 (478).

* * * * * * *

(j) Text deleted.

(k) Redesignated as (j).

Effective 30 days after date of publication. 28 FR 9353, Aug. 24, 1963.

(k) The term "transcript" shall include either a written or electronically recorded statement of all proceefings at an oral hearing.

Effective 30 days from date of service. 32 FR 5273, March 29, 1967.

Rule 7. Register of practitioners.—See 321 I.C.C. 460.

Rule 8. Practitioners' qualifications and requirements.—The following persons shall be permitted to practice before the Commission:

(a) *Attorneys at Law.* Any person who is a member in good standing of the bar of the highest court of any state, possession, territory, commonwealth or the District of Columbia may represent others before the Commission upon filing with the Commission a written declaration so stating that he is currently qualified. The written declaration shall contain the declarant's full name, address and telephone number. A declaration may be filed with the Secretary of the Commission in the form as shown in Appendix D to this part, in which event the attorney's name will be entered in the Register of Attorneys-at-Law. Attorneys may also file declarations with the Secretary or a Hearing Officer when making an initial appearance in any proceeding and the Attorney's name will be entered in the Register of Attorneys-at-Law. Once an attorney's name is entered in the Register of Attorneys-at-Law no further declaration of qualification will be required except in those instances where an attorney's right to practice has been suspended in which event a written declaration will be required that he is now properly qualified in accordance with this subsection.

* * * * * * *

(c) *Appearances.* Petitioners who met the requirements set forth in paragraphs (a) and (b) of this section shall also file a declaration that they are authorized to represent the particular party in whose behalf they propose to act at the time of making an initial appearance in any proceeding. This requirement will be met by the practitioner entering his name as the representative of an applicant in the appropriate space on an application form; by signing any complaint, petition, protest, reply, or other pleading with a designation following the practitioner's signature that he is the attorney or other representative of a party therein named; by entering an appearance on the form provided at any hearing; or by filing a letter with the Secretary of the Commission stating that he is authorized to represent a party, whose name and address is given in a particular proceeding which shall be identified.

Caption and paragraph (a) amended, and paragraph (c) added, effective Dec. 29, 1967. 32 FR 20778, Dec. 23, 1967.

Rule 9. Non-attorneys' applications for admission to practice.—An application under oath for admission to practice shall be addressed to the Commission, Washington, D.C. 20423, and must state the name, residence address, and business address of the applicant, and the nature of his qualifications. Such application shall also state whether the applicant has ever been suspended or disbarred as an attorney, or whether his right to practice has ever been revoked by any court, commission, or administrative agency, in any jurisdiction. Such application shall be accompanied by a certificate signed by three or more practitioners as sponsors for the applicant, which certificate shall recite that applicant possesses all the requisite qualifications under this section and under Rule 8(b), and the sponsors shall incorporate in their certificate a recommendation and motion that applicant be admitted to practice under this section.

Effective Dec. 29, 1967. 32 FR 20778, Dec. 23, 1967.

Rule 10. Additional certificates by applicant's sponsors; hearing; abandonment of application.

* * * * * * *

Caption of rule amended, effective Dec. 29, 1967. 32 FR 20778, Dec. 23, 1967.

Rule 11. Application fee.—An application filed under Rule 9 must be accompanied by a fee of $25. Payment must be made either in cash, or by check, or money order payable to

the Interstate Commerce Commission. The fee will be returned if applicant is not admitted to practice.

Effective June 17, 1968; 33 FR 7821.

Rule 12. Applicant's oath.—No applicant under Rule 9 shall be admitted to practice before the Commission until he shall have subscribed to an oath or affirmation that he will demean himself, as a practitioner before the Commission, uprightly, and according to law; and that he will support the Constitution of the United States and laws of the United States and will conform to the rules and regulations of the Commission.

Effective Dec. 29, 1967. 32 FR 20778, Dec. 23, 1967.

Rule 13. Denial of admission, censure, suspension, or disbarment of practitioners.—The Commission may, in its discretion, deny admission, censure, suspended, or disbar any person not an attorney who, it finds, does not possess the requsite qualifications to represent others, or is lacking in character, integrity or proper professional conduct. All persons whether or not admitted to practice under Rules 8 or 9, must, in their representations before the Commission conform to the code of ethics for Practitioners, which code is set forth as Appendix A to this part. If for good cause shown, the Commission shall be of the opinion that any attorney is not conforming to such standards, or that he has been otherwise quilty of conduct warranting disciplinary action the Commission may issue an order requiring such attorney to show cause why he should not be suspended or denied the right to practice before the Commission. If such attorney shall fail to show good cause why he should not be suspended or denied the right to practice, he may be censured, suspended or disbarred. Any person who has been admitted to practice may be suspended or disbarred only after he is afforded an opportunity to be heard.

Effective Dec. 29, 1967. 32 FR 20778, Dec. 23, 1967.

The commission has jurisdiction to consider charges against respondent practitioners relating, not to a proceeding before it, but to their business of auditing freight bills; and it is relatively unimportant whther they were bound literally by the practitioners' association's code of ethics. Although provision of Rule 1.13 that practitioners must conform to the code did not become effective until November 1955, it replaced similar language in Rule 71(b) of the 1942 Rules of Practice, and in respondents' actions prior to effective date of that portion of Rule 1.13 they were chargeable with knowledge of the code under former Rule 71(b).—In Re Pollack and Axelrod, 315 ICC 391 (397, 398).

Few changes have been made in the code of ethics since its adoption in 1930; its canons are not limited to conduct in actual proceedings, since some of them apply where proceedings are anticipated for foreseeable, whether or not they actual ensue, and others seek to guide practitioners' conduct in circumstances where litigation is not intended or even possible. Even if respondents need not have complied with the letter of the code, they were required at least to uphold the spirit thereof; it would be anomalous to hold that class B practitioners, though having the same privileges as attorney practitioners, have a lesser degree of responsibility. The code of ethics provides adequate guidelines which, if observed, will serve to keep all practititioners before the commission within the bounds of propriety.—Id., pp. 397-8, 400.

While the services of freight bill auditors and freight bureaus, properly conducted, are in public interest, those functions are independent of, and can be carried on apart from, the professional activities of a practitioner; ethical considerations require their separation, and it is incumbent on all practitioners to recognize the distinction between them. This is not to hold that a transportation consultant may not advise clients of rate situations that need adjusting; what is condemned is the employment of a practitioner's title to solicit business, either directly or by letterheads using the term "Registered Practitioners before the Interstate Commerce Commission," or a similar designation; all practitioners are admonished to refrain from using their status as such in furtherance of the advertising and solicitation activities of traffic bureaus.—Id., p. 400.

See also 315 I.C.C. 359, 319, I.C.C. 224 and 91 M.C.C. 827.

Rule 15. Typographical specifications generally.—Rule 1.15 was initiated for the commission's convenience in binding pleadings; and the commission is usually liberal in its application and rejects only such pleadings as cannot be bound properly. Although the requirement as to margins was not observed, considered exceptions are brief and their acceptance was reasonable.—Cooper's Exp., Inc.—Purchase—Ferguson Motor Transp., 90 M.C.C. 613 (616).

Rule 17 Attestation and Verification.—Heading of rule amended to read as above, effective June 12, 1962.

27 FR 5797, June 20, 1962.

* * * * * * *

(b) *When no practitioner's signature.*—See 213 F. Supp. 205.

Rule 19. Pleadings part of record.—Recitals of material and relevant facts in a pleading filed prior to oral hearing in any proceeding, unless specifically denied in a counterpleading filed under these rules, shall constitute evidence and be a part of the record without special admission or incorporation therein, but if a request is seasonably made, a competent witness must be made available for cross-examination on the evidence so included in the record. Pleadings may contain specific references to or quotations from the tariffs or schedules containing the several rates, fares, charges, schedules, classifications, regulations or practices alleged to be material. A filing under §1.42, Petitions for suspension of tariffs or schedules, shall not be considered a pleadings for purposes of this rule.

* * * * * * *

Effective upon publication in the Federal Register. 28 FR 11016, Oct. 15, 1963

See 89 M.C.C. 471 (478); 89 M.C.C. 750; 95 M.C.C. 483; 206 F. Supp. 835.

Rule 20. Amendments.—See 315 I.C.C. 152

Rule 21. Time—(a) *Computation*—See 338 I.C.C. 717.

* * * * * * *

(b) *Modification.* Paragraph amended by deleting the third reference to "10 days" and substituting in lieu thereof the word "time."

* * * * * * *

Effective Oct. 1, 1964, 29 FR 11500, Aug. 11, 1964.

See 317 I.C.C. 166; 92 M.C.C. 135.

* * * * * * *

(c) *Five days additional.* Paragraph deleted, effective July 16, 1962.

27 FR 5797, June 20, 1962.

See 335 I.C.C. 142 (143)

Rule 23. Replies.—(a) *Time for filing.*—Protestants' petition that the commission take official notice of certain tariffs filed by applicants pursuant to recent grants of authority to transport mixed loads of frozen and unfrozen commodities, alleging that they provide no limit on amount of frozen commodities that may be included in a mixed shipment, merits consideration, and applicants' motion to strike the petition on ground that it constitutes a reply to a reply in violation of Rule 1.23 of Rules of Practice is overruled; issues raised on petition specifically were not treated on exceptions, and the petition therefore complies with the rules.—Wilson Bros. Truck Line Extension, 92 M.C.C. 497 (499).

Although a reply by one protestant to the exceptions of another may be somewhat unusual, motion to strike on the grounds that parties were not "adverse parties" within the provisions of Rule 1.23(a) denied; since the two groups of protestants—passenger carriers and automobile transporters—had little interest in common, one group may advance an argument in its own interest that is "adverse" to the interest of the other.—Adams, 94 M.C.C. 280 (292).

As Bureau of Inquiry and Compliance did not receive copy of exceptions until 4 days after date when replies were due, in absence of objection Rule 1.23(a) is waived and the Bureau's late-filed reply accepted for consideration.—Caton Transfer Co.—Lease—Caton, 93 M.C.C. 416.

(b) *Replies to petitions under rule 101 and exceptions.*—Inasmuch as the Bureau of Inquiry and Compliance was not served with a copy of applicant's exceptions to the examiner's recommended order until after the due date for filing a reply thereto had expired, rule 1.23(b) of the Rules of Practice is waived and the Bureau's late-tendered reply is accepted for filing.—Gibney Distributors, Inc., 95 M.C.C. 733.

See also 89 M.C.C. 663 (664); 91 M.C.C. 21 (25); 97 M.C.C. 38, 109 M.C.C. 895; 111 M.C.C. 435; 115 M.C.C. 866; 205 F. Supp. 831 (833-4).

Rule 25. Informal complaints seeking damages.—(b) *Content.*—See §16(3), n. 30, 34, or 213 F. Supp. 199 (205).
See 321 ICC 434

(d) *Copies.*—Compliance with requirement of Rule 25(d) for furnishing of copies of informal complaints for service on all defendants is mandatory. Complainants failed to comply with commission requests for written confirmation of 5 telegraphic informal complaints, accompanied by copies required by Rule 25(d). Also, a sixth informal complaint submitted in writing, with copies, named certain defendants which, as appeared from the routing, were not parties to the transportation; though correction of that defect was essential to apprise the commission of the proper defendants to be served, it was not done. Defendants were threfore unaware that those 6 informal complaints had been filed with the commission, until shipments specified therein were included in formal complaint filed nearly 10 years later, following declination of other informal complaints. In view of complainants' failure over so long a period to perfect the 6 informal complaints as requested, they are deemed to have *abandoned them.*—Plaswood Corp. v. Alton & S. R. 321 I.C.C. 434 (439-42).

(e) *Special docket proceedings.*—See 213 F. Supp. 199, or 318 I.C.C. 501; 315 I.C.C. 680.

(f) *Six months' rule.*—Rule 25 of the commission's Rules of Practice must be strictly construed in conjunction with §16(3)(b): since payment of reparation under special docket order terminated informal complaint as provided in Rule 25(e), it was unnecessary that any further action be taken, or advice given, by the commission under Rule 25(f). And since complainant's subssequent letters requesting reopening of the informal complaint did not submit any additional fact basis as required by Rule 25(f), the commission's perfunctory reopening thereof was improper.—Atlantic Coast Line R. Co. v. United States, 213 F. Supp. 199 (205)*. [But see Thomson Phosphate Co. v. Atlantic Coast Line R. Co., 282 F. Supp. 698, aff'd 434 F. 2d 180.]

Rule 1.25(f) does not conflict with §16(3)(b) and (c) of the Act, since it merely provides a means whereby the 2- and 3-year limitation periods specified in those paragraphs are tolled pending informal consideration of a complaint.—Atlantic Creosoting Co., Inc. v. Southern Ry. Co., 323 I.C.C. 533 (535); and provision of rule 1.25(f) that the parties will be "notified in writing by the commission" upon declination of an informal complaint was satisfied by letters signed by the Secretary of the commission. Complaint admits that a "writing" on the commission's letterhead and stationery was received; though the signature was subscribed "Secretary," it is unnecessary that commission communications, to be valid, be signed by a commissioner; for that purpose §18(1) provides that the commission "shall appoint a

Secretary," and an obvious duty of the Secretary thus appointed would be the signing of communications.—Id., p. 535, Note.

But complaint's letters written within 6 months of the commission's first letter of declination do not constitute a resubmission of the matter on an additional-fact basis as required by rule 1.25(f), since they contain no new or additional facts but are merely repetitive of the original submission.—Id., p. 535.

See also 315 I.C.C. 680 (681); 323 I.C.C. 509.

Rule 28. Formal complaints; allegations generally.—See 329 I.C.C. 332.

Rule 29. Formal complaints; when damages sought.—213 F. Supp. 205.

Rule 30. Formal complaints; discrimination, preference, and prejudice.—(a) *Generally.*—See 316 I.C.C. 305; 316 I.C.C. 600.

Rule 34. Service of formal and cross complaints.—The Commission will serve formal complaints. It will also serve supplemental, amended, and cross complaints and specific amendments to all complaints when it has granted leave to file such pleadings. Such service will be made personally upon a carrier or freight forwarder or upon an agent thereof designated for purposes of service, or by mail addressed to the carrier or freight forwarder or to the agent thereof at the address filed. If no agent has been designated, service may be made by posting in the office of the Secretary of the Commission, and if the defendant be a carrier subject to part II of the Act, by also posting in the office of the secretary or clerk of the motor-carrier regulatory board of the State wherein the motor carrier maintains headquarters. If the complaint involves only the lawfulness of rates, fares, charges, classifications, or practices, service in the manner indicated in the third sentence of this section may be made upon an attorney in fact of a carrier or freight forwarder who has filed a tariff or schedule in behalf of such carrier or freight forwarder, but such service will not be made upon a carrier subject to part I unless such carrier has failed to designate an agent for service in the city of Washington.

Effective 30 days after date of publication. 28 FR 9353, Aug. 24, 1963.

Rule 35. Answers and cross complaints to formal complaints.—(a) *Generally.*—An answer may simultaneously be responsive to a formal complaint and to any amendment or supplement thereof. It must be drawn so as fully and completely to advise the parties and the Commission of the nature of the defense, including, if a departure from the requirements of section 4(1) of the Act is involved, the number of the particular application or order, if any, which protects such departure; and must admit or deny specifically and in detail each material allegation of the pleading answered. An answer may embrace a detailed statement of any counter-proposal which a defendant may desire to submit. Unless the issue is such that separate answers are required, answer for all defendants may be filed on their behalf by one defendant in one document, in which event the answer must show clearly the names of all defendants joining therein, and their concurrence.

Effective 30 days after date of publication. 28 FR 9353, Aug. 24, 1963.

See 319 I.C.C. 86.

Rule 40. Protests against applications. (a) *Content.*—See 90 M.C.C. 623.

Rule 42. Petitions for suspension of tariffs or schedules.—(b) *When filed.* Protests against, and requests for suspension of, tariffs or schedules filed under the act will not be considered unless made in writing and filed with the Commission at Washington, D.C. Such protests and requests for suspension shall reach the Commission at least 12 days (except as provided in paragraph (c) of this rule) before the effective dates of the tariffs, schedules, or parts thereof to which they refer, unless the protested publications were filed on less than 30-days notice under the authority of this Commission, in which event the protests should be filed not less than 5 days before such effective dates. In an emergency, telegraphic protests will be acceptable if received within the time limits herein specified, provided

they also fully comply with paragraph (a) of this section and copies thereof are immediately telegraphed by protestants to the respondent carriers or their publishing agents. Six copies of such telegrams should immediately be mailed by the protestants to the Commission at Washington.

(c) *Motor carrier revenue proceedings.* When motor common carrier tariff bureaus file schedules of proposed general increases in rates and charges, or of a proposed rate restructuring, which proposals are subject to the special procedures prescribed in Ex Parte No. MC-82, New Procedures in Motor Carrier Rev. Proc., 339 I.C.C. 324, and set forth in 49 CFR 1104, protestants thereto shall reach the Commission at least 20 days before the published effective dates of those schedules. To assure consideration, replies to protests should reach the Commission not later than the seventh workday prior to the effective date of the protested schedules.

(d) *Copies; service.* Designation of paragraph (c) changed to (d).

(e) *Reply to protest.* Designation of paragraph (d) changed to (e).

Effective 30 days after publication in the Federal Register. 36 FR 7134, April. 15, 1971.

Rule 44. Petitions seeking institution of rulemaking proceedings.—Any person may file a petition requesting the Commission to institute a proceeding for the purpose of issuing statements, rules, or regulations of general applicability and significance designed to implement or interpret law, or to formulate general policy for future effect. No reply to such a petition may be filed. Whether a proceeding shall be instituted as requested is within the discretion of the Commission and the ruling on the petition will be final.

Effective 30 days after date of publication. 28 FR 9353, Aug. 24, 1963.

[Note: Current Rule 44. Shortened procedure, deleted by this order]

Rule 45. Modified procedure; how initiated.—(a) *Commission's initiative or by request.* Modified procedure (see §1.5(j)) will be ordered in a proceeding upon the Commission's initiative or upon its approval of a request filed by any party that the modified procedure shall be observed.

* * * * * * *

Effective 30 days after date of publication. 28 FR 9353, Aug. 24, 1963.

Rule 46. Modified procedure; effect of order.—(b) *Default where failure to comply.* See 112 M.C.C. 314.

Rule 49. Modified procedure; content of pleadings.—(a) *Generally.* A statement filed under the modified procedure after that procedure has been directed shall state separately the facts and arguments and include the exhibits upon which the party relies. If no answer has been filed pursuant to the waiver provision of §1.46, defendant's statement must admit or deny specifically and in detail each material allegation of the complaint. In addition defendant's statement and complainant's statement in reply shall specify those statements of fact and arguments of the opposite party to which exception is taken, and include a statement of the facts and arguments in support of such exception. Complainant's statement of reply shall be confined to rebuttal of defendant's statement.

* * * * * * *

Effective 30 days after date of publication. 28 FR 9353, Aug. 24, 1963.

See 115 M.C.C. 865, 315 I.C.C. 60; 316 I.C.C. 194; 316 I.C.C. 230; 316 I.C.C. 578; 318 I.C.C. 298; 322 I.C.C. 418; 329 I.C.C. 326; 340 I.C.C. 340.

Rule 50. Modified procedure; verification.—Heading of rule amended to read as set forth above, effective June 12, 1962, 27 FR 5797.—Protestant's and respondents' statements of fact were certified by responsible officials as true and correct "except as to matters and things, if any, stated on information and belief"; mere presence of the words

"information and belief" does not constitute noncompliance with the rule where the statement itself and tenor of the attestation indicate that the witness is attesting to the truth of the information presented, and the matter offered is such as may reasonably be expected to become known to him in his official capacity; considered statements are in substantial compliance with Rule 1.50.—Magazines, Old Saybrook, Conn., to New Eng., N.Y. & N.J., 315 I.C.C. 281 (282).

Complainants' statements of fact and argument do not lack proper verification as required by rule 1.50 because the verifications refer to the "complaint" rather than the preceding statement; verifications attached to the statements are in same form as those accompanying the complaints, and intention clearly was to verify the statements preceding the certifications. Mere technicalities should not be permitted to abort the administrative process. Moreover, each complaint is supported by an additional verified statement by an appropriate official of the individual complainant, wherein reference is made to all shipments inditified in the complaints, the witnesses having stated under oath that all freight charges thereon were paid or borne by the complainants.—Steel, Inc. v. Chicago, B. & Q.R. Co., 323 I.C.C. 509 (510).

See also 109 M.C.C. 578; 112 M.C.C. 118; 115 M.C.C. 406; 315 I.C.C. 152; 315 I.C.C. 689; 315 I.C.C. 744; 315 I.C.C. 182; 315 I.C.C. 519, 315 I.C.C. 695; 316 I.C.C. 194; 316 I.C.C. 243; 316 I.C.C. 626; 323 I.C.C. 525; 325 I.C.C. 200; 329 I.C.C. 326; 338 I.C.C. 283; 789.

Rule 51. Modified procedure; when pleadings filed and served.—See 95 M.C.C. 627; 115 M.C.C. 866; 315 I.C.C. 60.

Rule 53. Modified procedure; hearings.—(a) *Request for cross examination or other hearing.* If cross examination of any witness is desired the name of the witness and the subject matter of the desired cross examination shall, together with any other request for oral hearing, including the basis therefor, be stated at the end of defendant's statement or complainant's statement in reply as the case may be. Unless material facts are in dispute, oral hearing will not be held for the sole purpose of cross examination.

* * * * * * *

28 FR 8211, Aug. 9, 1963. Effective on date of order.

Rule 1.53 requires that a request for oral hearing or cross-examination of any witness, along with basis therefor, be stated at end of the statement of facts and argument. Defendants' statements in many instances amounted to no more than a mere objection to receipt of complainants' evidence and a request for oral hearing; thus there was actually no statement placing the material facts in issue. Defendants' failure to file a complete statement of facts and argument places them in position of failing to show that they are not fully protected under modified procedure; but parties to a proceeding have a right to oral hearing and cross-examination only when it is shown that they are not fully protected or that their case cannot be presented under modified procedure.—Steel, Inc. v. Chicago, B. & Q. R. Co., 323 I.C.C. 509 (516).

See also 111 M.C.C. 757; 800; 315 I.C.C. 184; 316 I.C.C. 788; 322 I.C.C. 418.

(b) Hearing issues limited. See 91 MCC 93.

Rule 54. Modified procedure; subsequent procedure.—See 112 M.C.C. 767.

Rule 55. Notice of hearing.—*(a) Assignment; service and posting of notice; electronically recorded transcript.* In those proceedings in which a hearing is to be held, the Commission will, by order or otherwise, assign a time and place for hearing. Such action will include notice when the transcript is to be made by electronic recording. Notice of such hearing will be posted in the Office of the Secretary of the Commission and will be served upon the parties and such other persons as may be entitled to receive notice under the act.

(b) Reqeusts for changes in assignment. Requests for postponements of date of hearing will be granted only for good and sufficient cause. After notice of the use of electronic recording, any request for stenographic transcript by the Commission's official reporter in lieu thereof must be made in writing to the Secretary of the Commission not less than 20 days prior to the date of the hearing. Such request will contain a statement that the requestor will provide the Commission with the original and one copy of such stenographic transcript at his own expense in accordance with the schedule of charges in the official reporting contract. In the event a request is made for a written transcript of an electronic recorded proceeding at a later date, the requestor will furnish at no expense to the Commission, an original and one copy of such written transcript for the Commission's use, in accordance with the schedule of charges in the official reporting contract.

(c) Service of notice of assignment change. The Commission may confine the service of notice of a change of time or place assigned for hearing (other than by publication or posting), or of any adjourned, further, or supplemental hearing to those only who have indicated to the Commission a desire to be notified, at their own expense if telegraphic advice becomes necessary, of any such change.

Effective 30 days from date of service. 32 FR 5273, March 29, 1967.

See 111 M.C.C. 420; 317 I.C.C. 623; 230 F. Supp. 700.

Rule 56. Subpenas— * * * *(e) Witness fees.* A witness who is summoned and responds thereto is entitled to the same fee as is paid for like service in the courts of the United States. Such fee is to be paid by the party at whose instance the testimony is taken at the time the subpena is served, except that when the subpena is issued on behalf of the United States or an officer or agency thereof, fees and mileage need not be tendered at the time of service.

Effective June 12, 1962, 27 FR 5797, June 20, 1962.

See 216 F. Supp. 561; 230 F. Supp. 700.

Rule 57. Depositions; preliminary.—See 216 F. Supp. 561; 230 F. Supp. 700.

Rule 68. Prehearing conferences.—*(a) Purposes.* * * *

* * * * * * *

(7) Such other matters, including disposition of requests for discovery, as may aid in the simplification of the evidence and disposition of the proceeding.

* * * * * * *

Effective Oct. 23, 1967; 32 FR 14696, Oct. 24, 1967.

(a) See 316 I.C.C. (362).

Rule 69. Stipulations.—See 79 M.C.C. 731; 85 M.C.C. 443; 94 M.C.C. 96.

Rule 70. Authority of officers.—*(a)* * * *. The officer shall regulate the procedure in the hearing before him and take all measures necessary or proper for the efficient performance of the duties assigned him, including the disposition of requests for discovery.

Effective Oct. 23, 1967; 32 FR 14696, Oct. 24, 1967.

(b) At any oral hearing conducted before the Commission, or before an Administrative Law Judge of the Commission, at which an official record of the proceeding is made, the recording of the hearing by means of live or delayed television, radio, or the use of a tape recorder or other electronic or photographic equipment by any person other than the official reporter will not be permitted without special permission of the Chairman of the Commission.

Effective April 20, 1973 38 FR 7563, March 23, 1973.

Irrespective of its merits, motion to dismiss complaint for failure of complainants to conform to pleading specifications set forth in rules 1.28 and 1.30 cannot be ruled on by

the examiner because it is beyond his power under rule 1.70—Natl. Motor Freight Traffic Assn. v. Delaware Valley, 323 I.C.C. 560 (570)*.

See 111 M.C.C. 757; 315 I.C.C. 292; 319 I.C.C. 605.

71. Appearances, standard of conduct; absence from hearing.—*(a) Who may appear.*—Although under rule 1.71(a) a bona fide officer or full-time employee of a corporation may appear for the corporation only by permission of the officer presiding at hearing, practitioner who was applicant's counsel sent applicant's president to represent it at hearing, but did not attend himself, and in subsequent court proceeding to set aside the commission's orders admitted that he had deliberately taken this course "as a matter of strategy" because shipper witnesses supporting application were unavailable. The practitioner should have been present at hearing so that he could take exception to any ruling of the examiner which he considered prejudicial to his client's interests and thus provide a basis for court review of the ruling in the manner provided by statute; his conduct thus violated the code of ethics for practitioners.—In re Bernard, 323 I.C.C. 649 (652, 654).

See also 91 M.C.C. 827; 111 M.C.C. 421; 315 I.C.C. 551.

(c) Standard of conduct.—Applicant asserts that witnesses appearing without a practitioner or a prepared written statement are not precluded from engaging in practices forbidden by the code of ethics for practitioners. However, Rules 1.71(c) and 1.13 of Rules of Practice clearly apply, and all parties, whether practitioners or not, are bound to conduct themselves in the manner so specified.—Blythe Extension, 91 M.C.C. 827 (830, 832).

See also 91 M.C.C. 827.

Rule 72. Intervention; petitions.—*(a) Content generally.*—See 109 M.C.C. 7; 114 M.C.C. 228, 836; 338 I.C.C. 797.

(b) When filed.—See 338 I.C.C. 797.

(c) Broadening issues; filing.—See 318 I.C.C. 529; 226 F. Supp. 635.

(e) Disposition.—See 97 M.C.C. 105.

Rule 73. Participation without intervention.—In an investigation proceeding, [in a proceeding under paragraphs (18) to (20) inclusive of Section 1, or Sections 5 and 13a of part I, in application proceedings under parts II, III, and IV], and in a proceeding of any one of the characters herein enumerated when heard on a consolidated record with a complaint proceeding, but in no other proceeding, an appearance may be entered at the hearing without filing a petition in intervention or other pleading, if no affirmative relief is sought, if there is full disclosure of the identity of the person or persons in whose behalf the appearance is to be entered, if the interest of such person in the proceeding and the position intended to be taken are stated fairly, and if the contentions will be reasonably pertinent to the issues already presented and any right to broaden them unduly is disclaimed. A person in whose behalf an appearance is entered in this manner becomes a party to the proceeding.

Effective June 12, 1962, 27 FR 5797, June 20, 1962.

See 93 M.C.C. 11; 94 M.C.C. 514; 319 I.C.C. 230; 321 I.C.C. 460; 226 F. Supp. 635.

Rule 74. Witness examination; order of procedure.—Applicant's interpretation of provision of Rule 74 that witnesses be "orally examined under oath" as meaning interrogation in specific question and answer form, and that if witness is allowed to testify orally in narrative form there is in fact no "examination" within meaning of the term, rejected; past usage and a reasonable construction of the Rules of Practice militate against such a narrow interpretation. "Examined" is used in its generic sense to include both the offering of testimony and the cross-examination thereon, and has been consistently so used and interpreted by the commission for three quarters of a century; to interpret it

otherwise would seemingly preclude the right of cross-examination (which is inherent in proceedings on operating applications), since no such right is expressly provided for in this or other applicable rules.—Blythe Extension, 91 M.C.C. 827 (829, 830).

Though Rule 74 of Rules of Practice provides that respondents may be required to open and close in presentation of evidence at a formal hearing in an investigation when consolidated with other proceedings, notwithstanding that they may not have the burden of proof, such procedural obligation to go forward initially with the production of evidence under that rule is not to be construed as creating a burden of proof where none exists.—Terminal Charge on Order Bills of Lading Shipments, 319 I.C.C. 772 (773)*.

See also 316 I.C.C. 525; 319 I.C.C. 123.

Rule 75. Evidence; admissibility generally.—See 89 M.C.C. 753; 99 M.C.C. 797; 111 M.C.C. 347; 112 M.C.C. 68.

Rule 76. Evidence; cumulative restriction.—See 89 M.C.C. 720; 94 M.C.C. 153; 95 M.C.C. 457.

Rule 77. Evidence; prepared statements.—See 91 M.C.C. 827.

Rule 78. Evidence; official records.—See 89 M.C.C. 196.

Rule 79. Evidence; entries in regular course of business.—See 89 M.C.C. 241; 90 M.C.C. 629; 93 M.C.C. 498; 104 M.C.C. 143; 329 I.C.C. 326.

Rule 80. Evidence; documents containing matter not material.—See 114 M.C.C. 541.

Rule 81. Evidence; documents in Commission's files.—*(a) In general.*—See 319 I.C.C. 107.

Rule 82. Evidence; records in other Commission proceedings.—See 89 M.C.C. 196; 92 M.C.C. 566; 95 M.C.C. 576; 99 M.C.C. 797; 111 M.C.C. 347; 114 M.C.C. 462; 319 I.C.C. 123; 323 I.C.C. 709; 325 I.C.C. 168; 205 F. Supp. 833, 834.

Rule 83. Evidence; abstracts of documents.—See 89 M.C.C. 153; 316 I.C.C. 478.

Rule 84. Evidence; exhibits.—*(b) Reference to tariff authority, routes, and distances.*—See 330 I.C.C. 260.

Rule 86. Evidence; filing of subsequent to hearing; copies.—See 92 M.C.C. 566; 97 M.C.C. 38; 104 M.C.C. 141; 109 M.C.C. 787; 111 M.C.C. 320; 112 M.C.C. 127; 117 M.C.C. 686; 316 I.C.C. 272; 318 I.C.C. 429; 323 I.C.C. 525, 672; 209 F. Supp. 233-4.

Rule 87. Evidence; objections to—See 91 M.C.C. 827; 93 M.C.C. 11; 318 I.C.C. 646; 323 I.C.C. 258; 340 I.C.C. 219.

Rule 88. Oral argument before officer.—If oral argument before the officer is desired, he should be so notified at or before the hearing and may arrange to hear the argument at the close of the testimony within such limits of times as he may determine, having regard to other assignments for hearing before him. Such argument will be recorded and made a part of the transcript of testimony, and will be available to the Commission for consideration in deciding the case. The making of such argument shall not preclude oral argument before the Commission and request therefor may be made as provided in Rule 98.

Effective 30 days from date of service. 32 FR 5273, March 29, 1967.

Rule 91. Briefs: content and arrangement.—* * * *(d) Evidence abstract.* A brief filed after a hearing should contain an abstract of the evidence relied upon by the party filing it, preferably assembled by subjects, with reference to the pages of the record, if written, or exhibit where the evidence appears. The abstract should follow the statement of the case and precede the argument. In the event the party elects not to include a separate abstract in his brief, he should give specific reference to the portions of the record, whether transcript or otherwise, relied upon in support of the respective statements of fact made throughout the brief.

* * * * * * *

Effective 30 days from date of service. 32 FR 5273, March 29, 1967.

(d) Evidence abstract.—See 90 M.C.C. 607.

(e) Requested findings.—See 94 M.C.C. 625.

Rule 92. Briefs; when officer's report is served.—In a proceeding which has been the subject of oral hearing, and in which an officer's report is to be prepared and served, which fact will be stated by the officer on the record, only one brief shall be filed by each party. The officer shall fix for all parties the same time within which to file briefs, which time shall not exceed 45 days from the close of the hearing unless otherwise ordered by the Commission. Reply briefs are not permitted unless ordered by the Commission.

Effective June 1, 1965. 30 FR 6485, May 11, 1965.

Rule 93. Briefs; when officer's report is not served.—In a proceeding which has been the subject of oral hearing, and in which no officer's report is to be prepared and served, which fact will be stated by the officer on the record, only one brief shall be filed by each party. The officer shall fix for all parties the same time within which to file briefs, which time shall not exceed 45 days from the close of the hearing unless otherwise ordered by the Commission. Reply briefs are not permitted unless ordered by the Commission.

Effective June 1, 1965. 30 FR 6485, May 11, 1965.

Rule 94. Briefs of interveners.—Briefs of interveners shall be filed and served within the time fixed for the brief of the party in whose behalf the intervention is made.

Effective June 1, 1965. 30 FR 6485, May 11, 1965.

Rule 96. Exceptions to officer's report.—*(a) Generally.*—Where exception raised essentially one ground for exception, that examiner erred in recommending approval of purchase application after finding that vendee is presently unfit, and did not allege errors in his findings of fact, there was no need for separate statements or numbering.—Cooper's Exp., Inc.—Purchase—Ferguson Motor Transp., 90 M.C.C. 613 (616).

Exceptions by protestants to examiner's findings were stricken for failure to comply with rule 96 of the Commission's General Rules of Practice which requires that such exceptions be specific and be stated and numbered separately.—Howard's Exp., Inc.—Purchase—Exchange Trucking Corp., 97 M.C.C. 341 (344).

See also 87 M.C.C. 740; 89 M.C.C. 37, 38, 213, 761; 91 M.C.C. 179; 94 M.C.C. 402, 625, 96 M.C.C. 285, 357; 112 M.C.C. 127, 139, 626; 114 M.C.C. 462; 317 I.C.C. 645; 323 I.C.C. 740.

(b) When filed.—87 M.C.C. 740; 95 M.C.C. 338; 114 M.C.C. 816; 316 I.C.C. 237, 444; 244 F. Supp. 881, note.

Rule 98. Oral argument before Commission.—See 112 M.C.C. 298; 208 F. Supp. 661.

Rule 99. Compliance with Commission's orders.—See 91 M.C.C. 513; 94 M.C.C. 15; 98 M.C.C. 166; 113 M.C.C. 103; 114 M.C.C. 316; 115 M.C.C. 104, 809, 831, 845; 117 M.C.C. 905.

Rule 100. Statements of claimed damages based on Commission findings.—See 318 I.C.C. 35.

Rule 101. Petitions for rehearing, reargument, or reconsideration.—*(a) In general.*—Analysis of paragraphs (1)-(9) of §17, construed in pari materia, is convincing that the commission did not exceed its statutory authority in adopting the amendment of February 1, 1961, which added paragraphs (2) and (3) to Rule 101(a).—Malone Freight Lines, Inc. v. United States, 204 F. Supp. 745 (748-50)*.

Amendment to §1.101 of Rules of Practice, precluding reconsideration of a proceeding wherein hearing officer's report is affirmed by division and the matter is not determined to involve an issue of general transportation importance, by its terms is inapplicable to any proceeding in which exceptions to the officer's report were filed prior to effective date thereof; thus, objection to petitions for reconsideration filed after effective date of such amendment is not well taken when exceptions were filed several months prior thereto.—Eldon Miller, Inc., Extension—Memphis, Tenn., to Three States, 88 M.C.C. 309 (311), note*.

See also 109 M.C.C. 244.

(2) Administrative finality of division and employee board decision. * * *. Decisions of an employee board, whether original or on review, are not administratively final. Such employee board decisions shall be subject to review by an appropriate appellate division of the Commission upon the filing of a timely petition in accordance with these rules of practice.

* * * * * * *

Heading amended and sentence added at end of paragraph, effective Sept. 5, 1967.
32 FR 12757, Sept. 6, 1967.

Applicant's motion to divide the issues of value and price of stock from that of consistency of the merger is granted and the latter issue may be considered administratively final upon affirmance of the examiner's findings in view of the examiner's recommended approval which none of the exceptions vitiates. Additionally, the possible range of prices payable to minority stockholders does not seem to threaten surviving carrier's financial and operating abilities.—Yellow Transit, Inc.—Merger—Wilson, Inc., 104 M.C.C. 737 (755).

See also 91 M.C.C. 312, 313; 109 M.C.C. 16, 173; 112 M.C.C. 567; 316 I.C.C. 732; 220 F. Supp. 337; 221 F. Supp. 106; 244 F. Supp. 642.

(3) Limitations on petitions for review of division decisions.—In prior report, 107 M.C.C. 201, commission reversed decision of the examiner and denied the application. Protestant seeks to have the order granting reconsideration vacated contending that applicants' petition for reconsideration, pursuant to rule 101(a)(3), should be referred to division 1, "as constituted", when the prior decision was rendered or be referred to the entire commission for disposition; but nothing in such rule requires that a petition for reconsideration go to a division. Had the commission intended otherwise, there is no reason that the words "as constituted" could not have been added to the words "same division" in the rule. Commission is an institutional agency and the appeal must be to the institution, not to the predilection of individual members. Petition denied as no issues of general transportation importance are contained requiring reconsideration of the entire commission.—Dallas & Mavis Forwarding Co., Inc., Ext. Canadian Ports of Entry, 108 M.C.C. 295 (296-7)*.

Since petitions for reconsideration allege that railroad subsidiary applicant is participating in movement of traffic in an all-motor service in violation of the rail-auxiliary restriction in its certificate, the proceeding involves the question of need for modification of a condition similar to that contained in a number of other certificates; therefore, pursuant to rule 101(a)(3), the proceeding was designated as one involving an issue of general transportation importance by order of the commission.—Santa Fe Trail Transp. Co. Extension, 108 M.C.C. 16 (17)*.

See also 225 F. Supp. 973; 228 F. Supp. 793.

(4) Petitions seeking a finding that an issue of general transportation importance is involved; 3-page limitation; time for filing; no reply permitted.—As set forth in published notice of Interpretation of Three-Page Limitation (34 FR 9006, June 5, 1969), the 3-page limitation on General Transportation importance petitions shall be construed as meaning three pages of substantive pleading exclusive of a title page or a certificate of service page.

Plaintiff's request for reconsideration of decision of the Operating Rights Review Board having been denied by an appellate division of the commission, it had no right to petition the commission to make a finding that an issue of general transportation importance was involved. There is no statutory basis for the filing of such a petition; such authority as exists is in Rule 101(a)(4) of the Rules of Practice which authorizes filing of such a petition only if the proceeding involves taking of evidence at oral hearing or by modified procedure. In

proceeding under review no oral evidence was taken and modified procedure was not followed.—Transamerican Freight Lines, Inc. v. United States, 258 F. Supp. 910 (913)*.

Also, the rule seemingly recognizes that reconsideration by the commission of an appellate division decision is not authorized by §17, for it expressly states that a petition for a finding that an issue of general transportation importance is involved shall not be considered an application for reconsideration; nevertheless, by stating that the commission may make such a finding "on its own motion," it would make statutory finality of an appellate division decision subject to a condition subsequent—commission review and the consequent possibility of reversal or modification. Under the rule, once the commission determines that an issue of general transportation importance is involved and decides to review the decision, all semblance of finality is lost, and the purpose of the statute is defeated. Therefore, being inconsistent with the statute, the rule can be given no effect.—Id., pp. 918-9.

See also 91 M.C.C. 214.

(b) Rehearing or further hearing.—Greyhound's bare assertions of changed economic conditions which, in its view, precludes consummation of considered purchase and control transactions along the lines proposed by applicants and which supports its request for further hearing (to adduce evidence showing changed economic conditions) falls far short of satisfying rule 1.101 of the Rules of Practice which requires such a request to be supported by a brief statement of the noncumulative evidence sought to be adduced, and an explanation of why such evidence was not previously adduced. Therefore, the request, treated as a motion for further hearing, is denied.—Greyhound Corp.—Control—Tex., N. Mex. & Okla. Coaches, 104 M.C.C. 652 (654, 656)*.

See also 94 M.C.C. 153; 97 M.C.C. 38; 322 I.C.C. 103; 323 I.C.C. 601; 221 F. Supp. 106; 224 F. Supp. 894; 295 F. Supp. 112.

(e) Time for filing. Except for good cause shown, and upon leave granted, petitions under this section must be filed within 30 days after the date of service of a decision or order, except as otherwise provided in the Special Rules of Practice.

* * * * * * *

Effective Sept. 5, 1967. 32 FR 12752, Sept. 6, 1967.

See 89 M.C.C. 567; 92 M.C.C. 642; 212 F. Supp. 659; 232 F. Supp. 330; 236 F. Supp. 354; 241 F. Supp. 535; 283 F. Supp. 866.

(f) Successive petitions on same grounds, not entertained. See 102 M.C.C. 178.

(g) Petitions for reconsideration of appellate division decisions on review of board decisions. When an appellate division has denied a petition seeking a reversal, change or modification of a determination whether original or on review by a board of employees, any further petition for reconsideration by the same party or parties upon substantially the same grounds will not be entertained. * * *

* * * * * * *

First sentence of Rule 101(g) amended, effective Sept. 5, 1967. 32 FR 12752, Sept. 6, 1967.

Plaintiff's argument that the language in Rule 101(g) of the commission's Rules of Practice should be interpreted as barring an Appellate Division from reconsidering its orders must be rejected; that regulation merely means that the Appellate Division is not compelled to entertain the pettion.—Resort Bus Lines, Inc. v. I.C.C. 264 F. Supp. 742 (754, Note)*.

Rule 102. Petitions not otherwise covered.—When the subject matter of any desired relief is not specifically covered by the rules in this part, a petition seeking such relief, which relief shall be construed as including appropriate discovery procedures, and stating the reasons therefor may be served and filed.

Effective Nov. 1, 1963. 28 FR 10518, Oct. 1, 1963.

When employee union sought clarification of prior commission order (as to scope of employee-protective conditions imposed in the *Richmond Terminal* proceedings which it contended extended to certain railroad junior employees) under Rule 102 of the commission's Rules of Practice, fact that its petition was not filed for over three years after date of the order did not warrant denial of the relief sought for failure to comply with the Rules of Practice, particularly Rule 101, as plaintiff contends. Rule 102 permits petitions seeking relief, other than that specifically covered under other commission rules, without imposing a time limit; thus, 30-day limitation in Rule 101(e) on petitions for rehearing does not apply. However, even considering proceeding and order under attack to be a "rehearing," such petitions are addressed to the agency's discretion and, apart from Rules 101 and 102, there is adequate statutory authority for the commission's action and the result it reached was proper. Complaint dismissed.—Seaboard Coast Line R. Co. v. United States, 283 F. Supp. 866 (868-9)*.

Inasmuch as the District Court for the Eastern District of Virginia issued a temporary restraining order staying the commission's cease and desist order against applicant pending further action of the commission on applicant's petition for extraordinary relief and reconsideration, the tendered petition is hereby accepted for filing pursuant to § 102 of the Rules of Practice.—Jetco, Inc.—Investigation and Revocation of certificate 108 M.C.C. 498*.

See also 109 M.C.C. 141; 112 M.C.C. 8; 117 M.C.C. 77, 319 I.C.C. 725; 232 F. Supp. 339.

SPECIAL RULES OF PRACTICE

Rule 200. Special rules of practice governing procedure in certain suspension and fourth-section matters.—Since no unusual circumstances were set forth in plaintiff's petition for reconsideration of decision of the Board of Suspension not to suspend proposed reduced rates (which plaintiff had protested as unreasonable), the commission on appeal was confined, under its rules, to the record before the Board of Suepension. Therefore, allegation that proposed rates were illegal in that they were filed in violation of defendant rate bureau's §5a agreement, first made in the petition for reconsideration, was not before Division 2, acting as an appellate division, when it considered that petition and thereafter decided not to suspend the rates.—Movers' and Warehousemen's Ass'n v. United States, 227 F. Supp. 249 (250).

See 246 F. Supp. 335.

Rule 225. Special rules of practice governing the procedure of the Motor Carrier Board,[1] the Finance Board,[1] the Operations Boards,[1] the Special Permission Board,[1] the Released Rates Board,[1] Tariff Rules Board,[1] and the Operating Rights Board[1]—(a) The proceedings of the Motor Carrier Board, the Finance Board, the Operations Boards, the Special Permission Board, the Released Rates Board, Tariff Rules, Board and the Operating Rights Board shall be informal. No transcript of such proceedings will be made. Subpoenas will not be issued and, except when applications, petitions, or statements are required to be attested, oaths will not be administered.

(b) A petition for reconsideration of an order of one of the following boards may be filed by any interested person:

[1]The General Rules of Practice apply to the procedure of all employee boards except to the extent specifically provided for in Rules 200 and 225.

(1) The Motor Carrier Board, an Operations Board, the Special Permission Board, the Released Rates Board, or the Tariff Rules Board; or

(2) The Operating Rights Board only with respect to matters arising pursuant to the Commission's Deviation Rules as set out in part 1042 of this chapter.

(c) A petition for reconsideration of the Operating Rights Board, except as provided in paragraph (b) of this section, and the Finance Board may only be filed by a party to the proceeding.

(d) A petition for reconsideration pursuant to paragraphs (b) and (c) of this section and reply thereto will be governed by the Commission's general rules of practice, except as provided in paragraphs (e), (f), and (g) of this section.

(e) The original and six copies of every pleading, document, or paper permitted or required to be filed under this section, shall be furnished for the use of the Commission.

(f) A petition seeking reconsideration of an order of the Motor Carrier Board entered under section 210a (a) or 311 (a) or of the Finance Board entered under section 210a (b) or 311 (b) of the Interstate Commerce Act must be filed within 20 days after the date of service of the order. Within 20 days after the filing of such petition with the Commission any interested person may file and serve a reply thereto.

(g) A petition seeking reconsideration of an affirmative order of the Motor Carrier Board entered pursuant to the rules and regulations governing transfers of property brokers' licenses, Part 1045 of this chapter, passenger brokers' licenses, Part 1133 of this Chapter, motor carrier operating rights, Part 1132 of this chapter, water carrier operating rights, Part 1141 of this chapter, and freight forwarder permits, Part 1151 of this chapter, must be filed within 20 days following publication of a synopsis of such order in the *FEDERAL REGISTER*. In such a petition the matters claimed to have been erroneously decided and the alleged errors must be specified with particularity. If the petition contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted in adfidavit form. Within 20 days after the final date for filing of such petitions with the Commission, any interested person may file and serve a reply thereto.

Effective upon publication in the Federal Register: 32 FR 20654, Dec. 21, 1967.

Note: The heading, and paragraphs (a), (b)(1), (f), and (g) were amended by inserting "Motor Carrier Board" in lieu of "Temporary Authorities Board" and "Transfer Board." Effective Jan. 21, 1969 34 FR 441, Jan. 11, 1969.

The heading, paragraph (a), and paragraph (b)(1) were amended by adding thereto "Tariff Rules Board." Effective July 1, 1970. 35 FR 10448, June 26, 1970.

See 109 M.C.C. 733. 312 I.C.C. 799, Note 2.

Rule 240(c)(1). Protests and requests for hearing under section 5(2).—Rule 1.240(c)(1) describes two classes of protestants: those who file a protest and those who appear at a hearing, and it is part of the scheme of certain proceedings before the commission, including §5(2) applications, that protesting carriers can appear without filing a petition for leave to intervene. Plaintiffs' position that Rule 240(c) should not be construed so as to confront an applicant with unexpected protestants, and that a person may appear to protest only an application for temporary authority without filing a protest, cannot be accepted in face of the clear language that failure to file seasonable protest is a waiver of oppotition "unless an oral hearing is held." Rules complained of were adopted by the commission under procedures of the Administrative Procedure Act and were apparently applied to plaintiffs in same manner as to others; plaintiffs have not shown how they were thereby deprived of property without the process due them.—Hart v. I.C.C., 226 F. Supp. 635 (644-5)*.

See also 90 M.C.C. 531, 623.

Rule 240. Special rules governing notice of filing of applications by motor carriers of property or passengers under sections 5(2) and 210a(b) of the Interstate Commerce Act and

certain other procedural matters with respect thereto.—*(a) Scope of special rules.* These special rules govern the filing and handling of (1) applications under section 5(2) of the Interstate Commerce Act respecting control, lease, and unification of operating rights and properties of motor carriers of property or passengers, and (2) applications for approval under section 210a(b) of the act of the temporary operation of motor carrier properties sought to be acquired in an application under section 5(2) of the act. Except as otherwise herein provided, the General Rules of Practice shall apply.

(b) Notice to interested persons. (1) Notice of the filing of applications under section 5(2) will be given by the publication of a summary of the authority sought in FEDERAL REGISTER. Such summaries will be prepared by the Commission, and it shall be the responsibility of applicants proptly to advise the Commission if the summary does not properly describe the authority sought.

(2) If applicants propose that any portion of the operating rights involved in the transaction be canceled or restricted, such proposal will be included in the summary.

(3) The summary will state whether an application has or has not been filed for temporary authority under section 210a(b) of the act.

(4) No notice by applicants to interested persons is required, except that applicants are not relieved from the obligation to file copies of applications with Governors, State Boards, and Regional Directors of the Commission's Bureu of Operations as may be required by the prescribed form of application, and except as hereinafter provided in paragraph (d)(3) of this section.

(5) Except for good cause shown, amendments to applications which broaden the scope of the proposed transaction will not be allowed if tendered after notice of the filing of an application has been published in the FEDERAL REGISTER. Restrictive amendments may be submitted at any time, but if tendered after such publication, they may be allowed only in the discretion of the Commission, or by the hearing officer if the matter is assigned for hearing or prehearing conference.

(c) *Protests and requests for hearing under section 5(2).* (1) Protests to the granting of an application under section 5(2) of the act shall be filed with the Commission within 30 days after the date notice of the filing of the application is published in the FEDERAL REGISTER. A protest filed under these rules shall be served upon applicants' representatives named in the notice of filing published in the FEDERAL REGISTER. Unless otherwise specified in the notice, the original and one copy of the protest shall be filed with the Commission. Protests not in reasonable compliance with the requirements of these rules may be rejected in the discretion of the Commission.

(2) Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding.

(3) A protest against an application shall set forth specifically the grounds upon which it is made and the protestant's interest in the proceeding, shall request an oral hearing if one is desired, and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally.

(4) Any request for an oral hearing shall be supported by a specific explanation as to why the evidence to be presented cannot reasonably be submitted in the form of affidavits, and shall set forth the approximate number of witnesses who would be presented by the protestant, an estimate of the hearing time required for such presentation, and whether a hearing at Washington, D.C., would be objectionable, and, if so, what place would be more suitable; and protestant shall certify in its protest that, if an oral hearing is held, it will appear and present evidence.

(5) Where a person has a limited interest in an application, which possibly could be eliminated by a restrictive amendment of the proposed transaction, such person may also include in a protest filed in conformity with this paragraph an offer to withdraw the protest in the event of acceptance by applicants of such amendment.

(6) Except as provided in paragraph (5) above, or for good cause shown, the failure of any person filing a protest to an application to appear at a hearing scheduled thereon shall be construed as a waiver of his right to participate further in the proceeding; such person shall no longer be considered as a party to the proceeding, and such person and any representative responsible for his participation in the proceeding may be subject to censure for failure to appear.

(7) Any interested person, not a protestant, desiring to receive notice of the time and place of any hearing, conference, or other proceedings shall notify the Commission by telegram or letter within 30 days from the date of the publication of the notice of the filing of the application in the FEDERAL REGISTER.

(d) *Procedure to be followed under section 210a(b).* (1) Subject to paragraph (4) below, protests to the granting of an application for temporary authority under section 210a(b) may be filed by persons who oppose, or intend seasonably to oppose, the application under section 5(2).

(2) The protest to temporary approval may be by telegram, letter, or other writing, of which only an original need be filed, or may be included in a protest filed under paragraph (c). It should state the interest of the protestant and the grounds for the position taken in opposition to temporary approval, and should show service upon applicants' representatives.

(3) If an application for temporary authority is filed in a contested proceeding after the period for filing protests under paragraph (c) has expired, applicants are required to furnish copies of such application to protestants. Notice will not thereafter be given by publication in the FEDERAL REGISTER.

(4) Applications for temporary authority under section 210a(b) will be disposed of without hearings or other proceedings, and without necessarily awaiting expiration of the period allowed for protests.

(5) Unless circumstances requiring immediate action are shown, applications for temporary authority under section 210a(b) will not be disposed of before 10 days after the date the notice of filing of the application under section 5(2) is published in the FEDERAL REGISTER, or 10 days after the date an amended notice is published, if the application for temporary authority is filed within 30 days after the date of initial publication; or, if the application for temporary authority in is filed after expiration of the 30 days from the date of initial publication of notice of the section-5 application, and protests have been filed, copies of the temporary authority application should be served on protestants, and action will not be taken in less than 20 days from the date of such service, unless circumstances require immediate action.

(e) *Hearing or other procedures under section 5(2).* (1) The Commission will determine whether an assignment for oral hearing should be made, after notice to interested persons of the filing of the application has been published in the FEDERAL REGISTER and the period for filing protests has expired. At or prior to such time, applicants who do not intend to prosecute their application should promptly request dismissal thereof.

(2) Applicants who believe their application is not susceptible of handling without oral hearing may request oral hearing when the application is filed, or later, if additional evidence which cannot reasonably be submitted in the form of affidavits is required.

(3) If applicants request an oral hearing and show that such hearing is necessary, or if the proceeding is contested, applicants shall advise the approximate number of witnesses who will be presented, furnish an estimate of the hearing time required for such presentation, and state whether a hearing at Washinoon, D.C., would be objectionable, and, if so, what place would be more suitable.

(f) *Notice of hearing, conference or other proceedings.* (1) Notice of the time and place of any hearing, conference, or other proceedings will be given to applicants' representatives, applicants, protestants, and other interested parties by mailing to them the order or notice assigning the application for hearing, conference, or other procedure.

(2) A request by any party for a change in the time or place of an assigned hearing must set forth good and sufficient cause for the action requested, must be in writing and filed with the Commission not less than 10 days before the assigned hearing date, except in emergency circumstances, and must be served on all known parties of record at the same time and by the same method of communication as service is made on the Commission. Where such requests are filed less than 10 days before the date of hearing, the petitioning party shall state the reasons for this failure to make such request within the prescribed time.

(3) The applicants' representatives, protestants, and those who request notice of changes in time or place of hearing, conference, or other proceeding will be informed of such changes if notice is given by mail. If telegraphic notice becomes necessary, notice of such changes will be given by telegram only to those who request telegraphic notice at their expense.

(4) Upon receipt of an order or notice of a hearing assignment, applicants who no longer intend to proceed to hearing shall immediately and jointly request dismissal of their application, with appropriate notification to all protestants, failing in which applicants or their representatives, or both, may be subject to censure.

(g) *Intervention.* Rule 73 relating to participation without intervention is inapplicable to applications subject to this section, except with respect to persons seeking to intervene in support. No person who fails to file a protest as provided in these rules will be permitted to intervene in opposition except upon a showing of substantial reasons in a petition submitted in accordance with Rule 72.

Effective Oct. 1, 1964, 29 FR 11499, Aug. 11, 1964.

Rule 241. (By order dated April 6, 1966, Ex Parte No. 55, Rule 241 deleted. Effective May 20, 1966.

Rule 242. Special Rule 242 deleted, effective Sept. 5, 1967; 32 FR 12752, Sept. 6, 1967.

Rule 243. Special Rule 243 deleted, effective Sept. 5, 1967, 32 FR 12752, Sept. 6, 1967.

Rule 244. Special Rule 244 deleted, effective Sept. 5, 1967, 32 FR 12752, Sept. 6, 1967.

Rule 245. Special rules governing procedures for the issuance to single-State common carriers by motor vehicle of Certificates of Registration under section 206(a)(6) of the Interstate Commerce Act, as amended October 15, 1962, authorizing motor common carrier operations in interstate and foreign commerce, and certain other procedural matters with respect thereto.—(a) *Scope of special rules.* These special rules govern (1) the matter of giving notice to interested persons, by publication in the Federal Register, of the filing of applications for State certificates of public convenience and necessity authorizing motor common carrier operations in the transportation of property or passengers in *intrastate commerce,* in connection with which the applicant also desires to engage in transportation in interstate and foreign commerce under the provisions of section 206(a)(6) of the Inerstate Commerce Act, as amended October 15, 1962, and certain related matters.

(2) The filing with the Interstate Commerce Commission of applications for Certificates of Registration based upon intrastate certificates of public convenience and necessity issued by a State Commission which contain a concurrent finding that the public convenience and necessity require operations in interstate and foreign commerce in accordance with the provisions of section 206(a)(6) of the Interstate Commerce Act, as amended October 15, 1962.

(3) The filing with, and the handling by, the Interstate Commerce Commission of petitions for reconsideration of the decisions of State Commissions, made pursuant to the provisions of section 206(a)(6) of the Interstate Commerce Act, as amended October 15, 1962, finding that the public convenience and necessity require motor common carrier operations in the transportation of property or passengers, in interstate and foreign commerce, which do not exceed the scope of the concurrently authorized motor common carrier operations in intrastate commerce contained in certificates of public convenience

and necessity issued by such State Commissions. Except as otherwise herein provided, the General Rules of Practice shall apply.

(b) *Notice to interested persons of the filing of State Applications.* In accordance with such rules and regulations as may be prescribed by the State Commissions, any person seeking an intrastate certificate of public convenience and necessity, who or which also desires to engage in transportation in interstate and foreign commerce pursuant to section 206(a)(6) of the Interstate Commerce Act, as amended October 15, 1962, shall so notify the State Commission with which the intrastate application is filed at the time of filing the intrastate application. Notice to interested persons of the filing of such an application, and of the applicant's desire also to engage in transportation in interstate and foreign commerce, shall be given by the publication in the FEDERAL REGISTER of a summary of the authority sought as prepared by the State Commission and transmitted to the Interstate Commerce Commission at Washington, D.C. (See approved form in appendix hereto.) In order to afford interested persons a reasonable opportunity to be heard, such summaries must be forwarded to the Interstate Commerce Commission sufficiently in advance of any hearings that may be scheduled on the application so noticed. Except as otherwise may be required by the State Commission, no other notice by applicant to interested persons is necessary.

(c) *Conduct of, and participation in, State Commission application proceedings.* Subject to the requirement of section 206(a)(6) of the Interstate Commerce Act, as amended October 15, 1962, that interested persons be afforded a reasonable opportunity to be heard, the rules and regulations of the State Commission with which the intrastate application is filed shall govern the conduct of, and participation in, any State hearings or other State Commission proceedings that may be held with respect to such application, notice of the filing of which has been published in the FEDERAL REGISTER pursuant to paragraph (b) above. Protests and requests for information concerning the time and place of State Commission hearings or other proceedings, any subsequent changes threin, and any other related matters shall be directed to the State Commission with which the application is filed and shall *not* be addressed to or filed with the Interstate Commerce Commission. The record made in the State Commission proceeding shall be made available to the parties to such proceeding upon payment of such costs as may be fixed or prescribed by the State Commission.

(d) *Applications to the Interstate Commerce Commission for Certificates of Registration.*

(1) Within 30 days after service by the State Commission of a certificate of public convenience and necessity authorizing motor common carrier operations in intrastate commerce and containing the recitations required by section 206(a)(6) of the Interstate Commerce Act, as amended October 15, 1962, the holder of such State certificate shall file with the Interstate Commerce Commission at Washington, D.C., an Application For Motor Carrier Certificate of Registration, Form BOR-100, 49 CFR 7.100. Such application shall be prepared in accordance with and contain all information called for in the form of application and the instructions thereto. Copies of such application shall be furnished in such number, and be filed and served in the manner and upon the persons specified in the form of application.

(2) Upon receipt, an application for a Certificate of Registration will be assigned a docket number; and thereafter notice of the date of filing of the application and the docket number assigned thereto will be transmitted by the Interstate Commerce Commission to the applicant and those persons upon whom copies of the application were served by the applicant as specified in the form of application; and thenceforth all further proceedings therein before the Interstate Commerce Commission will be under such docket designation.

(3) Any party in interest, who or which opposed in the State Commission proceeding the authorization of operations in interstate or foreign commerce, shall be deemed to be a party

in the corresponding application proceeding instituted in accordance with paragraph (d)(1) above. No other person will be permitted to participate in such proceeding except upon a showing of substantial reasons in a petition submitted in accordance with §1.72 of the Commission's General Rules of Practice.

(4) Except for good cause shown, and upon leave granted, failure to file an application for a Certificate of Registration within the 30-day time period specified in paragraph (d)(1) above shall be construed as a waiver of any right thereafter to file for and obtain such a certificate.

(e) *Petitions for reconsideration of State Commission decisions made the subject of applications for Certificates of Registration.*

(1) *Parties.* Any party in interest, who or which opposed in the State Commission proceeding the authorization of operations in interstate or foreign commerce, may file with the Interstate Commerce Commission at Washington, D.C., a petition seeking reconsideration of the State Commission decision which is the basis for an application for a Certificate of Registration.

(2) *Filing Requirements.* Except for good cause shown, and upon leave granted, petitions under this rule shall be filed within 30 days after the date of the filing of an application with the Interstate Commerce Commission pursuant to paragraph (d)(1) above for a Certificate of Registration authorizing motor common carrier operations in interstate and foreign commerce under the provisions of section 206(a)(6) of the Interstate Commerce Act, as amended October 15, 1962, and such petition shall be filed under the docket number assigned to the related application proceeding.

(3) *Contents.* Any such petition shall specify with particularity the facts, matters, and arguments relied upon; and unless a copy of such record already has been submitted by another petitioner, such petition shall be accompanied by a certified copy of the complete record made before the State Commission, including a transcript of any testimony taken and any exhibits filed before such State Commission, such copy to be provided by, and at the expense of, the petitioner. The petition shall conform in all respects to requirements of §1.15 and 1.17 of this Commission's General Rules of Practice. The original and 6 copies of the petition, and one certified copy of the record made before the State Commission, shall be furnished for the use of the Interstate Commerce Commission.

(4) *Replies to petitions.* A reply to a petition filed under these rules may be filed and served within 20 days after the final date for filing such petitions. The original and 6 copies of the reply shall be furnished for the use of the Interstate Commerce Commission.

(5) *Service of petitions and replies.* Copies of each petition and reply filed under these rules shall be served on the State Commission involved and on all other parties to the State Commission proceeding in accordance with the requirements of Section 1.22 of the Commission's General Rules of Practice.

(6) *Effect of petitions.* The filing under these rules of a petition for reconsidertation shall not preclude or affect the institution of the motor carrier operations in *intrastate commerce* authorized by the State certificate; and failure seasonably to file a petition for reconsideration under these rules will be construed as a waiver of opposition and further participation in the related application proceeding for a Certificate of Registration.

(f) *Disposition of Applications for Certificates of Registration and related petitions for reconsideration.* Applications for Certificates of Registration and related petitions for reconsideration filed under these rules will be handled together and processed in a single proceeding and will be disposed of by the division of the Interstate Commerce Commission to which these matters may be assigned, acting as an Appellate Division. Except as the Interstate Commerce Commission may, in its discretion, otherwise direct, a decision or order issued by the Appellate Division disposing of such an application and petition will be administratively final and petitions by any of the parties for reconsideration of such Division's actions will not be entertained.

(g) *Disposition of Unopposed Applications for Certificates of Registration.* Where the State Commission proceeding which resulted in the issuance of the State Certificate sought to be made the basis of a Certificate of Registration was unopposed, or where petitions for reconsideration of the finding of the State Commission that the public convenience and necessity require operations in interstate and foreign commerce are not seasonably filed, the application for a Certificate of Registration will be disposed of in the most expeditious manner and, so far as practicable and legally permissible, without formal hearings or other proceedings.

Effective March 18, 1963. 28 FR 3533, Apr. 11, 1963.

Rule 246. Special rules pertaining to proceedings for the discontinuance or change of train or ferry service.—(a) *Scope of special rules.* These special rules govern procedure before the Commission in proceedings commenced by carriers subject to part I of the Interstate Commerce Act, under and pursuant to the provisions of section 13a of said Act, upon a notice under paragraph (1) of said section or by a petition under paragraph (2) thereof, with respect to a proposed discontinuance or change, in whole or in part, of the operation or service of any train or ferry.

(b) *General rules otherwise applicable.* Except as provided otherwise in these special rules, proceedings upon notices and petitions filed under section 13a shall be governed by the Commission's General Rules of Practice.

(c) *Notices and petitions by carriers.* A notice filed under paragraph (1), and a petition under paragraph (2), of said section 13a shall be prepared in accordance with and contain the information called for by rules and regulations then in force with respect to such a notice or petition. See 49 CFR, Part 43.

(d) *Notice to interested parties.* Notice of the institution of any investigation or of the time and place of any hearing, conference, or other proceeding will be given by the Commission to the carrier or carriers involved, the Governor and appropriate regulatory agency of each State in which the train or ferry affected is operated, protestants, and other interested parties of record, by mailing to them the order or notice instituting the investigation or assigning the hearing, conference, or other proceeding. Similar notice will be given to the same parties of changes in the time or place of hearing, conference, or other proceeding when time permits notice by mail; but, if telegraphic notice becomes necessary, notice of such changes will be given by telegram only to those who have requested telegraphic notice at their expense.

(e) *Participation at hearings without intervention.* In an investigation proceeding under section 13a(1), or in proceedings upon a petition filed under section 13a(2), an appearance may be entered at the hearing without filing a petition in intervention or other pleading, if there is full disclosure of the identity of the person or persons in whose behalf the appearance is to be entered, if the interest of such person in the proceeding and the position intended to the taken are stated fairly, and if the contentions will be reasonably pertinent to the issues already presented. A person in whose behalf an appearance is entered in this manner becomes a party to the proceeding.

(f) *Complaints and protests.* When a notice is filed with the Commission pursuant to the provisions of section 13a(1), proposing to discontinue or change, in whole or in part, the operation or service of any train or ferry operating from a point in one State to a point in any other State or in the District of Columbia, or from a point in the District of Columbia to a point in any State, any interested person opposed to such proposal may make his opposition known by filing with the Commission a complaint or protest. The compliant or protest may be by telegram, letter, or other writing, of which only an original need be filed. Service of copies thereof upon the carrier proposing the discontinuance or change is not required. A complaint or protest should identify the proceeding by reference to the name of the carrier and to the particular train or ferry involved, and should state the interest of the complainant or protestant and the grounds for the position taken in opposition to the

proposal. In order to be considered by the Commission, a complaint or protest must be filed with the Commission in Washington, D.C., not later than 15 days before the date when the carrier proposes to make effective the subject discontinuance or change. Replies to a protest or complaint are not contemplated, and failure to reply will not be construed as an admission of any allegations contained therein.

(g) *Petitions for reconsideration of orders instituting an investigation.* Petitions for reconsideration of an order instituting an investigation in relation to a proposed change or discontinuance may be filed by the carrier or carriers affected within 15 days after the date of service of the order. An original and 6 copies shall be furnished for the use of the Commission, and copies thereof shall be served upon the persons to whom copies of the notice of the carrier were required to be mailed by the rules and regulations prescribed by the Commission. See 49 CFR 43.5. Any interested person may file and serve a reply to any petition for reconsideration permitted under this paragraph within 15 days after the filing of such petition with the Commission.

(h) *Reconsideration of decision not to institute an investigation.* A decision not to institute an investigation concerning a proposed discontinuance or change of service may be made the subject of a petition for reconsideration by any interested person, provided the petition reaches the Commission at least two work-days prior to the effective date of the proposed discontinuance or change of service. If an order is desired requiring continuance of the service pending hearing and decision upon investigation, the petition should reach the Commission at least two work-days before the Commission's authority to enter such an order will expire.[1] For the purposes of this section, a work-day shall be considered any day except Saturday, Sunday, or a legal holiday in the District of Columbia. (A legal holiday of less than one day shall be considered a work-day within the meaning of this section.) Petitions submitted under this paragraph shall be filed with the Secretary of the Commission by 4:00 p.m., United States Standard Time (or by 4:00 p.m., Local Daylight Saving Time if that time is observed in the District of Columbia). Written or telegraphic communication in intelligible form requesting reconsideration will be sufficient. The request for reconsideration shall contain the following prefatory statement: "This matter requires expedited handling under the Commission's Special Rules of Practice." If in writing, an original and six copies of the petition shall be furnished for the use of the Commission. Telegraphic notice or its equivalent must be given by the petitioner to the carrier or carriers affected, and certification that such notice has been given must accompany the request for reconsideration. Action may be taken upon the petition without awaiting a reply, but if a reply is received prior to a decision upon the petition it will be given consideration. A petition not timely filed will be rejected by the Secretary.

(i) *Protests.* As the applicable statute requires a full hearing in the State involved before the Commission may grant a petition under the provisions of section 13a(2), for authority to discontinue or change the operation or service of any train or ferry operated wholly within the boundaries of a single State, it is not necessary that persons opposed to such a petition file a protest in order to obtain a hearing on the proposal, but interested persons may file protests by complying with §1.40 of the Commission's General Rules of Practice, or they may register their opposition by letter addressed to the Secretary, Interstate Commerce Commission, Washington 25, D.C., for the purpose of receiving notice of the time and place of hearing when assigned. See paragraph (e) of this section in regard to participation at hearings.

Effective May 15, 1963. 28 FR 3399, Apr. 6, 1963.

Rule 247 Special rules governing notice of filing of applications by motor carriers of property or passengers and brokers under sections 206 (except section 106(a)(6) relating to

[1]Under the provisions of section 13a(1) of the Act, an order of the Commission requiring continuance of the operation or service, pending hearing and decision in an investigation, must be served upon the carrier or carriers affected thereby at least 10 days before a discontinuance or change would otherwise become effective.

Certificates of Registration), 209 and 211, by water carriers under sections 302(e), 303, and 309, and by freight forwarders under section 410 of the Interstate Commerce Act, and certain other procedural matters with respect thereto. (Rule 247)—(a) *Scope and applicability of special rules*—(1) *Scope.* These special rules govern the filing and handling pursuant to the provisions of the Interstate Commerce Act of (i) applications for certificates, permits, and licenses respecting the transportation of property or passengers under sections 206 (except section 206(a)(6) relating to Certificates of Registration), 209, and 211, (ii) applications for certificates, permits, and exemptions respecting the water transportation of property or passengers under sections 302(e), 303, and 309, and (iii) applications for permits to operate as freight forwarders and for certificates of abandonment under section 410. Except as otherwise herein provided, the general rules of practice shall apply.

(2) *Applicability.* These special rules shall apply to all applications enumerated in subparagrpah (1) of this paragraph and filed with the Commission on and after May 20, 1966, and to such of those applications filed prior to that time as the Commission may designate by appropriate publication in the FEDERAL REGISTER.

(b) *Applications*—(1) *Form and content.* An application filed with the Commission under these special rules shall be prepared in accord with and contain the information called for in the form of application prescribed by the Commission or in instructions which may have been issued by the Commission with respect to the filing of such an application.

(2) *Copies and service.* Copies of an application filed under these special rules shall be furnished in such number and shall be filed and served in the manner and upon the persons specified in the form or instructions.

(3) *Requests for handling applications without oral hearing.* An applicant who believes its application is susceptible of handling without oral hearing may request such handling when the application is filed. If such a request is made at that time, the applicant shall submit with its application original verified statements of the facts to which its witnesses would testify at an oral hearing if one were held, together with one copy thereof which need not be verified. Applicant shall furnish copies of its verified statements to interested persons upon request from such interested persons.

(c) *Notice to interested persons.* (1) Notice of the filing of applications to competitors and other interested persons will be given by the publication of a summary of the authority sought in the FEDERAL REGISTER. Such summaries will be prepared by the Commission, and it shall be the responsibility of applicant promptly to advise the Commission if the summary does not properly describe the authority sought. No other notice by applicants to interested persons is required, except that applicants are not relieved from the obligation to file copies of applications with Governors, State Boards, and Regional Directors of the Commission's Bureau of Operations as may be required by the prescribed form of the application.

(2) *Amendments.* Except for good cause shown, amendments to applications which broaden the scope of the proposed operations will not be allowed if tendered after notice of the filing of an application has been published in the FEDERAL REGISTER. Restrictive amendments acceptable to the Commission may be submitted at any time, but if tendered after such publication, they may be allowed only in the discretion of the Commission or by the hearing officer if the matter is assigned for hearing or prehearing conference.

(d) *Protests and request for hearing.* (1) Protests to the granting of an application shall be filed with the Commission within 30 days after the date notice of the filing of the application is published in the FEDERAL REGISTER. A protest filed under these rules shall certify that it has been served upon applicant's representative (or applicant, if no practitioner representing him is named in the notice of filing published in the FEDERAL REGISTER). Unlesss otherwise specified in the published notice, the original and one copy of the protest shall be filed with the Commission. Protests not in reasonable

compliance with the requirements of these rules may be rejected in the discretion of the Commission.

(2) Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding.

(3) A protest against any application shall set forth specifically the grounds upon which it is made and contain a detailed statement of the protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describing in detail the method (whether by joinder, interline, or other means) by which protestant would use such authority to provide all or part of the service proposed), shall request an oral hearing if one is desired, and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests phrased in general terms and not complying with these specifications may be rejected.

(4) Any request for an oral hearing shall be supported by a specific explanation as to why the evidence to be presented cannot reasonably be submitted in the form of affidavits, and shall set forth the number of witnesses which would be presented by the protestant and an estimate of the hearing time required for such presentation. Protests embracing a request for oral hearing shall contain the following certification without further qualification:

The undersigned hereby certifies that, if an oral hearing is held, protestant(s) will appear and present evidence of protestant(s) own operations and particular interest(s) in the outcome of this application unless this application is amended so as to eliminate the interest(s) of protestant(s) as set forth in this protest.

(5) Where a person has a limited interest in an application, which possibly could be eliminated by a restrictive amendment to the application, which amendment must be acceptable to the Commission, it may also include in a protest filed in conformity with this paragraph an offer to withdraw the protest in the event of acceptance by applicant and the Commission of such amendment.

(6) Except where a restrictive amendment has been made as provided in subparagraph (5) of this paragraph, or for good cause shown, the failure of any person filing a protest to an application to appear at a hearing scheduled thereon shall be construed as a waiver of its right to participate further in the proceeding; such person shall no longer be considered as a party to the proceeding, and it and any representative responsible for its participation in the proceeding may be subject to censure for failure to appear. In addition, the mere appearance of protestant without the presentation of evidence of protestant's own operations and particular interest in the application may, in the absence of good cause shown, subject protestant and its representative to similar censure.

(7) An interested person, not a protestant, desiring to receive notice of the time and place of any hearing, conference, or other proceedings shall notify the Commission by telegram or letter (original and one copy) within 30 days from the date of the publication of the notice of the filing of the application in the FEDERAL REGISTER.

(8) A person (carrier) who does not file a protest as required by the regulations in this part, or who otherwise fails to remain a proper party to an application proceeding filed under the regulations in this part (by withdrawal of a previously filed protest, by failure to file verified statements in opposition as required by an appropriate order, by failure to appear at a scheduled oral hearing, or by other means), and who is not granted leave to intervene pursuant to the provisions of paragraph (h) of this section, except for good cause shown, may not personally, or through a representative, appear as a witness for a party protestant, except as provided hereafter. This provision shall not preclude the filing of a proper joint protest on behalf of several opposing carriers, or the presentation of evidence of service by bona fide connecting carriers through a duly qualified protestant as to the nature and extent of their joint services, or other probative evidence, provided the party

protestant's original protest contains a clear statement that its opposition is based, in part at least, upon a transportation service performed by it jointly with connecting carriers.

(e) *Hearing or other procedures to be followed*—(1) *Determination.* The Commission will determine whether an assignment for oral hearing should be made after notice to interested persons of the filing of the application has been published in the FEDERAL REGISTER and the period for filing protests has expired. At or prior to such time, any applicant who does not intend to prosecute its application should promptly request dismissal thereof.

(2) *Uncontested proceedings.* Proceedings in which no protests are filed within 30 days after publication of notice in the FEDERAL REGISTER, and which are not assigned for oral hearing, will be determined on the basis of verified statements submitted by applicant. Where not submitted previously along with the application as provided in paragraph (b) (3) of this section, such statements, by order, will be required to be filed by the applicant with the Commission within the time prescribed in said order, failing which the application may be summarily dismissed for want of prosecution.

(3) *Contested proceedings.* In those contested proceedings which the Commission determines that assignment of an application for oral hearing is unnecessary, thereafter the procedure shall be in accordance with Rules 45(b), 46(b), and 47-54, inclusive, of the general rules of practice, except that only the original and one copy of any statement made pursuant to Rule 51 need be filed with the Commission. All other contested proceedings which are subject to these rules will be assigned for oral hearing, unless other procedures are ordered.

(f) *Withdrawal or dismissal of contested applications.* If protests to its application have been filed, applicant shall, within 30 days after the period for filing protests has expired, notify the Commission in writing (1) that it is ready to proceed and prosecute the application, or (2) that it wishes to withdraw the application. Failure so to notify the Commission will be construed to mean that applicant has no further interest in the application, and the application will thereupon be dismissed by the Commission. Withdrawal of the application after the 30-day period or failure by applicant to appear at a hearing scheduled thereon will, except for good cause shown, subject applicant and its representative to censure.

(g) *Notice of hearing, conference or other proceedings*—(1) *Initial assignment.* Notice of the time and place of any hearing, conference, or other proceedings will be given to applicant's representative, applicant, protestants, and other interested parties by mailing to them the order or notice assigning the application for hearing, conference, or other procedure.

(2) *Assignment of an application for hearing concurrently with notice of its filing.* For the convenience of the Commission in handling applications related to one or more applications which already have been noticed in the FEDERAL REGISTER, when, in the Commission's discretion, the public interest would be served, an application may be concurrently noticed and assigned for hearing provided appropriate publication in the FEDERAL REGISTER can be made at least 1 week prior to the assigned date of hearing. Where such action is taken, and regardless of any prior publication of the application, any interested person may, without filing a protest prior to the assigned hearing, appear at the hearing in opposition to the application so assigned and become a party and be entitled to participate in that proceeding.

(3) *Requests for change.* A request by any party for a change in the time or place of an assigned hearing must set forth good and sufficient cause for the action requested, must be in writing and filed with the Commission not less than 10 days before the assigned hearing date, except in emergency circumstances, and must be served on all known parties of record at the same time and by the same method of communication as service is made on the Commission. Where such requests are filed less than 10 days before the date of hearing,

the petitioning party shall state the reasons for his failure to make such request within the prescribed 10 days.

(4) *Notice of changes.* The applicant's representative (or applicant if it has no representative), protestants, and those who request notice of changes in time or place of hearing, conference, or other proceeding will be informed of such changes if notice is given by mail. If telegraphic notice becomes necessary, notice of such changes will be given by telegram only to those who request telegraphic notice at their expense.

(h) *Intervention.* Rule 73 relating to participation without intervention is inapplicable to applications subject to this section, except with respect to those persons seeking to intervene in support. No person who fails to file a protest as provided in these rules will be permitted to intervene in opposition in a proceeding except upon a showing of substantial reasons in a petition submitted in accordance with Rule 72.

(i) *Drafting of recommended order and report by prevailing party.* Applications in which oral hearings are held and in which the hearing officer can announce his decision, either (1) on the record after the close of the taking of testimony or (2) by appropriate notification to the parties after the filing of briefs, may be made the subject of a report and recommended order, prepared by the party or parties in whose favor the hearing officer decides, within a period specified by the hearing officer. The hearing officer will make such changes as he considers appropriate in the draft prepared for him.

[32 F.R. 20066, Dec. 20, 1967, as amended at 33 F.R. 9259, June 22, 1968]

NOTE: The following General Policy Statement Concerning Motor Carrier Licensing Procedures (Ex Parte No. 55) was published May 3, 1966, at 31 F.R. 6600:

The number of applications filed for authority to conduct operations, in interstate or foreign commerce, as common and contract carriers by motor vehicle, long has been on the increase. The rate of this increase has accelerated markedly in recent years and shows no signs of abating. Motor carrier applications alone, which now make up about 85 percent of the Commission's formal case docket, increased from 5,655 new filings in 1964 to 7,658 new filings in 1965. In the first quarter of 1966, 2,454 motor carrier applications already have been opened. The pending docket of this category of cases alone on April 1, 1966, totaled 6,534.

Motor carrier application proceedings involve issues of substantial interest not only to the regulated transportation industry, but to every shipper and receiver of goods, regardless of the size of his operation; to manufacturers, wholesalers, distributors, and retailers; and to all members of the general public, both as buyers and consumers, and as travelers over the lines of the Nation's common carriers of passengers. To delay a determination that a newly proposed motor transportation is required by the public convenience and necessity or would be consistent with the public interest and the national transportation policy can result in an irretrievable loss of sales and can unjustifiably deprive the public of needed products and transportation services. For the regulated surface transportation industry to continue to thrive, to grow, and to keep pace with the expanding national economy, the mechanic of regulation must be such that administrative decisions are not only fair and impartial, but are rendered with reasonable dispatch and efficiency. The regulatory process in which competing claims are considered and adjudicated must be geared to the type of proceeding involved, and must not entail an expenditure of time and money, either for the parties or the Government, which is disproprtionate to the scope, importance, and economic significance of the particular proceeding.

Operating under its present procedures, the Commission no longer is able to deal with motor carrier application proceedings with the promptness and efficiency to which the parties are entitled, and which the nature of the proceedings themselves and the public interest require. The due and timely execution of the Commission's functions, therefore, imperatively and unavoidably, requires that these procedures be modified to eliminate those steps and procedural requirements which result in undue and unnecessary delay and in unjustified expense.

To achieve the foregoing ends and to insure that application proceedings are adjudicated with the maximum possible speed and efficiency consistent with requirements of due process of law, this Commission has adopted, among other things, a number of general policies and internal procedures governing the handling and processing of motor carrier operating authority applications. A new form for applying for operating rights has been approved and released, and revised special rules of practice have been issued.

In processing the motor carrier caseload, the scheduling of unnecessary oral hearings will be avoided to the extent possible. Where the issues presented are well defined or where the matters involved are not of sufficient moment to justify the expense of an oral hearing, parties will be required to submit their evidence in the form of verified statements under the modified procedure, and the issuance of an initial report by a hearing officer will be dispensed with. Oral hearings for the sole purpose of cross-examination will be scheduled only where material facts are in dispute.

All applications for motor carrier operating rights will be noticed in the FEDERAL REGISTER as at present. After the 30-day period for filing protests has expired, the Commission will determine whether an application should be placed on the hearing docket or the modified procedure docket.

All unopposed applications will be assigned directly to the Commission's Operating Rights Board, as is done at present. Where the necessary supporting information has not been filed with the application, an order will be entered

calling for the filing of the necessary supporting verified statements, after which the case will be disposed of by that Board.

All opposed applications will be placed either on the hearing docket or the modified procedure docket. To the hearing docket will be assigned the more complex cases, and those which, for one reason or another, might be handled more expeditiously and effectively with an oral hearing. Applications placed on the hearing docket will be processed through oral hearing and the issuance of a report and recommended order.

To the modified procedure docket will be assigned those applications in which an oral hearing is not deemed necessary for their proper disposition. Assignments to the modified procedure docket will be followed by the entry of an order requiring the submission of the supporting and opposing evidence under the present general rules of practice. Such order will provide that "except for good cause shown" all preliminary motions or other requests for relief filed prior to a decision will not be handled separately but will be acted upon by those making the decision in the case.

Following the filing of all verified statements under the modified procedure in opposed application proceedings, the cases will be submitted to one of the five existing Review Boards, in rotation, to the extent practicable, for the issuance of final reports. The Boards' decision will be subject to petitions to Appellate Division 1.

A request for cross-examination by any party will be disposed of by the Review Board. If the Board concludes that the request has merit, it will have the authority to refer the case for hearing for the purpose of cross-examination. Requests which are found to be without merit will be denied in the Board's report, with the reasons for the action taken. The Review Board also will have authority to refer for full oral hearing any case in which it believes such treatment is warranted.

(d) *Protests and request for hearing.*—RP 247(d)(3) as amended in May, 1966, precludes a party protestant from introducing, in support of its protest, evidence of operations and services of a non-party carrier, which had not been specified in its protest. This rule specifically requires protestant to indicate in its protest the evidence it will seek to introduce and failure to do so is grounds for a motion to strike. Thus, since protestant failed in its protest to indicate that it would introduce evidence in behalf of another carrier, its attempt to broaden the basis of its protest by bringing in this evidence violates the Rules of Practice now in force. Therefore, applicant's motion is granted and verified statement of non-party carrier stricken.—Legion Warehouse Corp.—Contract Carrier Application, 105 M.C.C. 111 (112).

On reconsideration, precise language of amended rule 247(d)(3) failed in its purpose of preventing party protestants from bringing other existing carriers not of record into a case and did not provide adequate notice to interested persons of the commission's goal to terminate this objectionable pratice; accordingly, protestant's evidence which was rejected in the prior report will be accepted in accordance with the prevailing understanding of the rule as it existed prior to its amendment. The rules of practice governing proceedings of this type are concurrently amended to provide that a formal protest must be filed by each opposing carrier who expects to participate as a party and present evidence in opposition to an application except as provided in the rules governing intervention, joint protest and evidence proffered by protestant's bona fide connecting carriers. Noncompliance will, in future, result in disallowance of the testimony and evidence. In the interim, those applications published in the Federal Register prior to service of this report will be decided on the same basis as applied to the proceedings herein considered.—Legion Warehouse Corp.—Contract Carrier Application, 107 M.C.C. 419.

On reconsideration, precise language of amended rule 247(d)(3) failed in its purpose of preventing party protestants from bringing other existing carriers not of record into a case and did not provide adequate notice to interested persons of the commission's goal to terminate this objectionable practice; accordingly, protestants' evidence which was rejected in the prior report will be accepted in accordance with the prevailing understanding of the rule as it existed prior to its amendment. The rules of practice governing proceedings of this type are concurrently amended to provide that a formal protest must be filed by each opposing carrier who expects to participate as a party and present evidence in opposition to an application except as provided in the rules governing intervention, joint protest and evidence proffered by protestant's bona fide connecting carriers. Noncompliance will, in future, result in disallowance of the testimony and evidence. In the interim, those applications published in the Federal Register prior to service of this report

will be decided on the same basis as applied to the proceedings herein considered.—Id. 107 M.C.C. 419.

Verified statements of 12 motor carriers not parties to the proceedings will be considered since the present application was published in the Federal Register prior to service of the Legion Warehouse report supra.—Osborn, Inc., Extension, Rugs and Textile Products, 107 M.C.C. 854 (858).

Commission reversed a prior denial since the examiner relied on evidence in an exhibit that properly had been excluded from the record because of protestant's noncompliance with Rule 247(d)(3) regarding full disclosure in its protest of the scope of its interest in the proceeding.—Chieppo Petition for Modification of Certificate, 117 M.C.C. 358 (378)*.

See also 106 M.C.C. 1, 22,885, 109 M.C.C. 83, 341 I.C.C. 178, 321 F. Supp. 821.

(e) *Hearing or other procedures to be followed.*—See 115 M.C.C. 866; 332 F. Supp. 1076.

(f) *Withdrawal or dismissal of contested applications.*—See 111 M.C.C. 421.

(i) *Drafting of recommended order and report by prevailing party.*—See 115 M.C.C. 287.

Rule 248 Implementation of Public Law 91-375, Postal Reorganization Act (Motor Carrier Licensing Provisions). *(a) Scope of special rules.* These special rules govern the filing and handling of applications seeking the right to operate pursuant to either a Postal Certificate of Public Convenience and Necessity or a General Postal Certificate of Exemption authorizing operation, in interstate or foreign commerce by motor vehicle in the transportation of mail.

(b) *Applications for postal certificates of public convenience and necessity.* (1) The application form (Op-Or-10) shall be available from the Secretary, Interstate Commerce Commission, and shall be completed in duplicate, and transmitted to the Secretary, Interstate Commerce Commission, Washington, D.C. 20423, and a copy thereof shall be sent to the transportation regulatory commission (or, if none, the Governor) of each State within which operations are sought to be performed.

(2) Attached to the application shall be a true copy of applicant's contract with the Postal Service (or its predecessor Post Office Department), which contract must have been in force on the effective date of section 5215 of the Postal Act.

(3) If applicant is a successor in interest to a qualifying star route carrier, evidence of continuity of star route service and carrier identity must be furnished (this may be done in letter form duly sworn and notarized).

(4) The application form provides space for a description of the territory served by the applicant on or before the effective date of section 5215. Here, applicant should describe the territorial extent of operations performed pursuant to its contract in force on the effective date, such description being in terms of the appropriate political division or subdivision (i.e., State, country, city, village, et cetera) within which service was authorized by contract. Authority may be granted only commensurate with the service covered by applicant's contract; therefore, applicants are cautioned to be specific in delineating the territory sought, in order to avoid delays in processing their applications.

(5) Notice to the public of any such application will be made by publication in the FEDERAL REGISTER. Provision will be made for the filing of protests within 30 days from the date of publication, although it is not contemplated that protests will, in fact, be filed.

(6) Upon determination that an applicant is qualified to receive "grandfather" authority, and upon compliance by applicant with sections 215 and 221(c) of the Interstate Commerce Act, and with the rate-filing procedures established by this Commission, a Postal Certificate of Public Convenience and Necessity will be issued, authorizing the transportation of mail from, to, or between points in the involved territory.

(7) All further proceedings, including petitions for reconsideration, shall be handled in the manner specified in this Commission's general rules of practice.

(c) *Applications for inclusion within general postal certificate of exemption.* The class of carriers to which such certificate of exemption is applicable is defined as all star route, mail messenger, and contract motor vehicle operators, whose for-hire motor carrier operations are confined to a single State, and who, on the effective date of section 5215 of the above-entitled Postal Act, hold a contract for the transportation of mail wholly within a single State. Upon submission to this Commission of a copy of such contract, the name of the carrier's representative to whom inquiries may be made, and the carrier's written request therefor, such carrier shall be included within the terms of the general postal certificate of exemption which reads as follows:

GENERAL POSTAL CERTIFICATE OF EXEMPTION DESIGNATED SINGLE-STATE MOTOR CARRIERS AFFECTED BY THE POSTAL REORGANIZATION ACT (PUBLIC LAW 91-375)

At a general seesion of the Interstate Commerce Commission, held at its office in Washington, D.C., on the 3d day of March 1971.

After due investigation, it appearing that any motor carrier having complied with all applicable provisions of the Interstate Commerce Act, and the requirements, rules, and regulations prescribed thereunder, and having complied with all the requirements established by this Commission in its report in Ex Parte No. MC-86, and lawfully engaging in operations solely within a single State in the transportation of mail; That the transportation of mail in interstate or foreign commerce performed by him is in fact of such nature, character, or quantity as not substantially to affect or impair uniform regulation by this Commission of transportation by motor carriers engaged in interstate or foreign commerce in effectuating the national transportation policy declared in the Interstate Commerce Act; that he, therefore, is entitled to inclusion within a general postal certificate of exemption in accordance with the provisions of section 204(a)(4a) of part II of said act; and this Commission so finding:

It is ordered, That the said motor carrier be, and it is hereby, granted this general postal certificate of exemption, which during the period it shall remain effective and unrevoked, shall exempt the said motor carrier from compliance with the provisions of part II of said act in respect of transportation of mail in interstate or foreign commerce, and it is hereby issued to said motor carrier.

It is further ordered, That this general postal certificate of exemption shall be effective from the date hereof and shall remain in effect until revoked in accordance with the provisions of said act.

By the Commission.

[SEAL] ROBERT L. OSWALD,
Secretary,

(Secs. 204, 206, 207, 208, and 210; 49 Stat. 546, as amended, 551, as amended, 552, as amended, 554, as amended; 49 U.S.C. 308, and 310) [36 F.R. 5913, Mar. 31, 1971]

Rule 249 Special rules governing the filing of motor carrier mail transportation service orders or determinations under subsection (f) of section 5203 of title 39, United States Code, 84 Stat. 768, 39 U.S.C. 5208 (Rule 249). (a) *Definitions.* For the purposes of this section the following words and terms, except as otherwise indicated in the context of this section, are to be construed as follows:

(1) "Postal Service" means the U.S. Postal Service, 39 U.S.C. 201.

(2) Whenever a "section" is cited, it refers to a provision of title 39, United States Code, as revised and reenacted.

(3) "Commission" means the Interstate Commerce Commission.

(4) "Motor carrier" or "carrier" means a common carrier by motor vehicle as defined in subsection (5) of the section 5201 of title 39, United States Code, 39 U.S.C. 5201.

(b) *Applicability.* The provisions of this section shall apply to all orders or determinations of the Postal Service under section 5203 (39 U.S.C. 5203) directing a motor carrier to transport mail.

(c) *Filing and content of orders or determinations*—(1) *General.* All orders or determinations shall be filed by the Postal Service with the Commission at its office in Washington, D.C., and shall conform to the provisions of subparagraphs (2) and (3) of this paragraph.

(2) *Content.* Each order or determination of the Postal Service shall include: (i) The full and correct name and business address of the motor carrier, (ii) a description of the mail transportation service required, (iii) a specification of the operating authority held by the carrier which corresponds to the mail transportation service required, and (iv) a showing that the order or determination is consistent with orders of the Commission under sections 5207 and 5208 (39 U.S.C. 5207 and 5208), if any, or that the Postal Service and the carrier have agreed that the compensation for the transportation and service connected therewith is fair and reasonable. Further, each order or determination issued shall set forth in a conspicuous place on the face thereof, in bold face type, a clear statement that the order or determination is concurrently filed with the Interstate Commerce Commission at Washington, D.C., that it is being simultaneously deposited with the Director, Office of the Federal Register, and that any protest seeking termination thereof under subsection (f) of section 5203 (39 U.S.C. 5203) must be filed with the Commission in accordance with this §1100.249 within 15 days of the date of publication in the FEDERAL REGISTER. This statement may also include reference to the penalty provisions of section 5206 (39 U.S.C. 5206), and such other information as the Postal Service deems appropriate.

(3) *Copies; service.* The original and seven copies of each order or determination issued under this section shall be filed with the Commission, and one copy of the order or determination, simultaneously shall be served upon the motor carrier specified therein and upon any person known to be interested, in such a manner so as to be received on the date the original is filed with the Commission, and a copy also shall be simultaneously deposited with the Director, Office of the Federal Register, for publication therein as notice to all other interested persons. A certificate shall be executed by an authorized official of the Postal Service, showing upon whom simultaneous service has been made. The order or determination filed with the Commission and the envelope of transmittal to the Commission should be clearly marked: "Mail Transportation Service Order (or Determination)."

(d) *Protests seeking termination of Postal Service order or determinations, and replies thereto*—(1) *General.* A motor carrier subject to an order of determination of the Postal Service, or any of the carrier's other customers, may protest to the Commission and request termination of the order of determination. Such protests shall be restricted to the matter of showing that performance by the carrier of the required mail transportation service would be detrimental to the carrier or to its other customers, or that the carrier does not operate equipment suitable for the transportation of mail, and shall conform to the provisions of subparagraphs (2), (3), and (4) of this paragraph.

(2) *Content.* The protest for termination of an order or determination filed under this section must identify the issued order or determination (i) by reference to the name and address of the motor carrier shown in the order or determination, (ii) the order number or other identification assigned thereto by the Postal Service, and (iii) specific citation to the volume, page, and date of publication in the FEDERAL REGISTER, i.e., "------ F.R. ------, ----------197—." Facts relied upon in support of the protest must be verified as provided in Rule 50 of the Commission's general rules of practice (§1100.50).

(3) *When filed.* Protests requesting termination of an order or determination filed under this section will not be considered unless made in writing and filed with the Commission at Washington, D.C., within 15 days of the date of publication of the order or determination in the FEDERAL REGISTER.

(4) *Replies.* Replies confined to rebuttal of such protests may be filed within 10 days of the date on which the protest was filed with the Commission.

(5) *Copies; service.* The original and seven copies of each protest or reply shall be filed with the Commission, and one copy simultaneously shall be served on the opposing party(ies). A certificate shall be executed stating that simultaneous service has been made. The protest or reply and the envelope of transmittal to the Commission should be clearly marked: "Protest (Reply)—Mail Transportation Service Order (or Determination)," and be delivered free of all charges. (Copies for service on the Postal Service shall be addressed to the Assistant General Counsel, Transportation, U.S. Postal Service, Washington, D.C. 20260, as agent for the Postmaster General.)

(e) *Petitions for reconsideration.* Petitions for reconsideration (1) of an order terminating an order or determination of the Postal Service, or (2) of a notice declining to order termination of such an order or determination, may be filed by any interested person within 20 days after service of the order or notice of the Commission. As no replies to the petitions for reconsideration under this rule are contemplated in view of the statutory time limitation, petitioners will be expected, except in unusual circumstances, to rely wholly on the information previously filed with the Commission. Such petitions for reconsideration must be clearly marked: "Petition for Reconsideration—Mail Transportation Service Order (or Determination)." Petitioners shall file an original and seven copies of the petition with the Commission and one copy thereof shall be served simultaneosly on the opposing party(ies) and a certificate of service shall be executed to that effect.

(f) *Withdrawal of Postal Service orders or determinations.* If, within 90 days after the filing of an order or determination by the Postal Service, the motor carrier cited in the order or determination voluntarily agrees and undertakes to perform the required mail transportation service, the Postal Service shall promptly notify the Commission of such action and shall withdraw the Postal Service order forthwith.

(Sec. 5203, 84 Stat. 769, 39 U.S.C. 5203; sec. 17, 40 Stat. 270, 49 U.S.C. 17) [36 F.R. 6426, Apr. 3, 1971]

Rule 250. Special rules pertaining to all proceedings before the Commission to insure that environmental amenities and values are given appropriate consideration.—(a) *Scope of special rules.*—These special rules are applicable to all proceedings before the Commission. They are intended to assist the Commission in discharging its duties under the National Environmental Policy Act of 1969 (Public Law 91-190, 83 Stat. 852) which authorizes and directs that, to the fullest extent possible, the policies, regulations, and public laws of the United States shall be interpreted and administered in accordance with the policies for the protection of the environment declared in that act.

(b) *Detailed environmental statement.*—It shall be the general policy of the Interstate Commerce Commission to adopt and adhere to the objectives and aims of the National Environmental Policy Act in performing its regulatory duties and powers under the Interstate Commerce Act and related statutes. Among other things, the National Environmental Policy Act requires, to the fullest extent possible, a detailed environmental statement in all reports and recommendations on legislative proposal and other major Federal actions which will significantly affect the quality of the human environment.

In compliance with this requirement, a detailed environment statement will be made when the regulatory action taken by the Commission under the applicable statutes will have such a significant environmental impact. The detailed statement, which statement shall be made as part of the initial decision in the proceeding and shall become final (with or without modification) when a final decision or order is entered by the Commission, shall fully develop the five factors listed below, among other relevant factors including the justification of a proposed action as compared to its alternatives. The following factors are listed merely to illustrate the kinds of values that *must* be considered in the statement, and in no respect is this listing to be construed as covering all factors relevant to the disposition of any particular proceeding:

(1) The environmental impact of the requested action;

(2) any adverse environmental effects which cannot be avoided should be requested action be granted;

(3) alternatives to the requested action;

(4) the relationship, if any, between local short-term uses of man's environment and maintenance and enhancement of long-term productivity; and

(5) any irreversible and irretrievable commitments of resources which would be involved in the requested action should it be granted.

The procedures set forth in this rule are intended to encourage, to the fullest extent possible, public and governmental participation in those formal proceedings which might significantly affect the quality of the human environment, and to the end of insuring that a complete record is developed which will enable the Commission to consider fully the environmental impact of a contemplated action.

(c) *Applicable general and special rules not affected.*—The Commission's general and/or special rules heretofore applicable to a proceeding shall remain in effect and govern the procedure therein. These special rules shall supplement the applicable existing rules.

(d) *Papers to show effect of subject matter of proceeding on the quality of human environment.*—

(1) In all initial papers filed with this Commission by a party, there shall be filed a statement indicating the presence or absence of any effect of the requested Commission action on the quality of the human environment. If any such effect is alleged to be present., the paper shall include, but not be limited to, statements relating to each of the relevant factors set forth in part (b)(1)-(5) above.

(2) In all proceedings determined or alleged to have a significant effect on the quality of the environment, all parties shall file statements submitting information relating to the relevant factors set forth in part (b)(1)-(5) above.

(e) *Notice to appropriate governmental agencies.*—

(1) All papers submitted in compliance with these rules, and affirmatively alleging a substantial environmental impact, beneficial or adverse, shall be served by the person or persons submitting it on those governmental bodies given notice pursuant to paragraph (1) of this section. The person or persons submitting the statement also shall supply 10 copies of the statement to the Council on Environmental Quality.

(2) A notice of all proceedings determined to have a significant effect on the quality of the human environment will be transmitted by the Commission as promptly as possible to the Council on Environmental Quality and to appropriate governmental bodies—Federal, regional, State, and local—(as identified in the guidelines promulgated by the Council on Environmental Quality) with a request for public comments on the environmental considerations listed in part (b)(1)-(5) above.

(3) All interveners, including other government agencies, taking a position on environmental matters shall file with the Commission an explanation of their environmental position, specifying any differences with the original party's detailed statement upon which intervener wishes to make its views known, and including therein a discussion of that position in the context of the factors enumerated in part (b) above. All interveners shall be responsible for filing 10 copies of their submission with the Council on Environmental Quality at the time they file with the Commission and shall also supply a copy of such submission to all participants to the proceeding. Nothing herein shall preclude an intervener from filing a detailed environmental statment. The Commission will consider all representations submitted prior to the final disposition of the proceeding.

(4) The views of the Council on Environmental Quality, if any, should be made in a written statement served upon the Secretary of the Commission and all parties of record.

(f) *Official notice.*—The Commission may take official notice of any facts relating to the environmental situations before it. This shall include, but not be limited to, scientific studies, governmental reports, and maps which have not been presented in evidence by any of the parties of record.

(g) *Determinations.*—The determinations in all proceedings which investigate environmental issues should include an evaluation of the environmental factors enumerated in part (b)(1)-(5) above, and the views expressed in conjunction therewith by all persons making formal comment pursuant to the provisions of this section. Specific findings should be made in each such proceeding as to whether the relief sought is or is not environmentally advantageous.

(h) *Review of initial decision on environmental impact.*—Any decision with respect to the environmental issue will be subject to Commission review in the same manner as other issues in the proceeding.

(i) *Proceedings in progress.*—With respect to those proceedings already in progress, the Commission recognizes that it may not be possible to comply fully with the procedures outlined herein and, in particular, that it may not be possible in every instance to include within the record all of the material relating to the environmental impact of the contemplated action which might otherwise be developed. Nonetheless, it is the policy of the Commission to apply these procedures to the fullest extent possible to proceedings already in progress.

when justified: United States v. Northern Pac. Ry. Co., 288 US 490, in 95 MCC 220

ASSOCIATION OF SHIPPERS

Agents of: ABC Frt. Fwdg. Corp. v. US, 125 F. Supp. 926, aff'd 348 US 967, in 316 ICC 259 (282)

Agricultural cooperatives: ICC v. Jamestown Farmers Union etc., 151 F. 2d 403, in 96 MCC 293

"Compensation" what constitutes: I.C.C. v Shippers Cooperative, Inc., 196 F. Supp. 8, affd. 308 F. 2d 888, in 94 MCC 440.

Corporate status: Hecht v. Malley, 265 US 144, Schenley Distillers v. US, 61 F. Supp. 981, aff'd 326 US 432, ICC v. Shippers Cooperative, 169 F. Supp. 8, Caminetti v. US, 242 US 470, Morrissey v. Commissioner, 296 US 344, in 316 ICC 259 (284, 287); Freight Consolidators Cooperative v. US, 230 F. Supp. 692, in 323 ICC 619 (634)

Forwarders vs.: Pac. Coast Wholesalers' Assn. v. US, 81 F. Supp. 991, aff'd 338 US 689, ABC Frt. Fwdg. Corp. v. US, 125 F. Supp. 926, aff'd 348 US 967. US v. Drum, 368 US 370, ICC v. Stickle, 41 F. Supp. 268, in 316 ICC 259 (276-7, 279); Pac. Coast Wholesalers' Assn. v. US 81 F. Supp 991, aff'd 338 US 689, in 318 ICC 507, 323 ICC 619 (635); US v. Pac. Coast Wholesalers' Assn., 338 US 689, in 323 ICC 658 Freight Consolidators Cooperative v. US, 230 F. Supp. 692, in 323 ICC 619 (635)

323 ICC 619 (635)

ANTITRUST ACTS

Annual-Volume rates for public utilities, not monopoly: Tampa Electric Co. v. Nashville Coal Co., 365 US 320, in 323 ICC 75

Consolidation, merger, etc.: McLean Trucking v. US, 321 US 67, in 87 MCC 637 (650), NYC Securities Corp. v. US, 287 US 12, McLean Trucking v. US, 321 US 67,

ANTITRUST ACTS—Continued

Georgia v. Penn. R., 324 US 439, Schwabacher v. US, 334 US 182, St. Joe Paper Co. v. ACL R, 347 US 197, Minneapolis & St. L. R. v. US, 361 US 173, California v. EPC, 369 US 482, Brown Shoe Co. v. US, 370 US 294, Pan American v. US, 371 US 296, US v. Phila. Nat's Bank, 374 US 321, in 320 ICC 122 (128-9, 131, 134, 166)

BARGE, BARGE LINES

Exempt, discrimination against: ICC v. Mechling, 330 US 567, Blue Line, Inc. v. US, 100 F. Supp. 66, aff'd 342 US 951, Dixie Carriers v. US, 351 US 56, Arrow Transp. v. US, 176 F. Supp. 411, aff'd 361 US 353, in 316 ICC 759

BILLS OF LADING

Instrumentality of commerce: US v. Ferger, 250 US 199, in 323 ICC 168

BROKERS

Broker not a carrier: National Bus Traffic Assn. v. US, 143 F. Supp. 689, aff'd 352 US 1020, in 88 MCC 455

BURDEN OF PROOF

Contract-carrier application: ICC v. J-T Transport, 268 US 81, in 89 MCC 209, 91 MCC 36 (40), 91 MCC 489, 92 MCC 189, 92 MCC 266, 92 MCC 293, 95 MCC 312

Intrastate rates: Public Serv. Comm. of Utah v. US, 356 US 421, in 318 ICC 151

Procedural effect: Pacific Portland Cement Co. v. Food Mach. & Chem. Corp., 178 F. 2d 541, in 315 ICC 327

Upon defendants: A. T. & S.F. Ry. v. US, 218 F. Supp. 359, in 323 ICC 601

CAR-HIRE SETTLEMENTS

Chicago, R.I. & P. Ry. Co. v. US, 284 US 80, in 318 ICC 555

CERTIFICATE

Application by railroad's motor subsidiary, policy: American Trucking Assns. v. US, 355 US 141, in 88 MCC 703

Commodity description: Arrow Trucking Co. v. US, 181 F. Supp. 775, in 88 MCC 87, 94 MCC 711

"Grandfather" clauses: Act of 1958, commodities; Willis Shaw Frozen Exp., v. US, 256 F. Supp. 257, in 102 MCC 616

actual performance: US v. Carolina Freight Carriers, 315 US 475, in 91 MCC 211

commodities formerly exempt: Milk Transport v. ICC, 190 F. Supp. 350, aff'd 368 US 5, in 89 MCC 471

holding out: Willis Shaw case, 256 F. Supp. 257, in 102 MCC 616

Greater scope than requested: C., St. P., M. & O. v. US, 322 US 1, in 88 MCC 3, 89 MCC 651

Interpretation: by commission: Service Stor. & Transfer Co. v. Virginia, 359 US 171, in 94 MCC 221

commodities included, see What, below

grammatical construction: Dart Transit v. US, 110 F. Supp. 876, aff'd 345 US 980, Brown v. Brown, 42 Del. 157, 29 A. 2d 149, Service Investment v. Dorst, 232 Wis. 574, 288 N.W. 169, Greenough v. Phoenix Ins. Co., 206 Mass. 247, in 89 MCC 5

intended use test: Mitchell Bros. Truck Lines v. US, 225 F. Supp. 755, in 99 MCC 621

judicial review: Parkhill Truck Co. v. US, 198 F. Supp. 362, Worster Motor Lines, Inc. v. US, 226 F. Supp. 603, in 94 MCC 711

CERTIFICATE—Continued

plain language: US v. Standard Brewery, 251 US 210, in 89 MCC 5 Andrew G. Nelson v. US, 355 US 554, in 91 MCC 635; Sims Motor Transport Lines v. US, 183 F. Supp. 113, Nowinsky v. US, 195 F. Supp. 748, in 92 MCC 516

trade usage: Black v. ICC, 167 F. 2d 825, certiorari denied 335 US 818, in 88 MCC 723, 91 MCC 259; Hancock Mfg. Co. v. US, 155 F 2d 827, in 91 MCC 259; Converse v. US, 109 F. Supp. 807, J.B. Acton, Inc. v. US, 221 F. Supp. 174, in 99 MCC 621

Interstate, issued by State, not eligible for registration: Gulf Coast Motor Frt. Lines v. US, 35 F. Supp. 136, in 88 MCC 357

Modification, revocation: Andrew G. Nelson v. US, 355 US 554, Floyd & Beasley Transfer Co. v. US, 185 F. Supp. 390, Sims Motor Transport Lines v. US, 183 F. Supp. 113, in 91 M.C.C. 635

Operation without: Crichton v. US, 56 F. Supp. 876, in 91 MCC 221, (228); Atlanta-New Orleans Motor Frt. Co. v. US, 155 F. Supp. 68, in 91 MCC 221 (228)

Public need determining factor: Chesapeake Motor Lines, Inc. v. US, 176 F. Supp. 98, in 91 MCC 667

Rail or motor carrier: Schaffer Transp. Co. v. US, 355 US 83, in 88 MCC 403, 316 ICC 609

Revocation:

violation State regulations: Castle v. Hayes Freight Lines, Inc., 348 US 61, in 96 MCC 347

willful violation, APA inapplicable: Great Western Food Distr. v. Brannan, 201 F. 2d 476, Walker v. CAB, 251 F. 2d 954, Eastern Produce Co. v. Benson, 278 F. 2d 606, in 91 MCC 936 (949)

What commodities included: Dart v. ICC, 110 F. Supp. 876, aff'd 345 US 980, in 89 MCC 59, 91 MCC 919;Union Cartage v. US, 193 F. Supp. 645, aff'd 368 US 143, in 318 ICC 859, 96 MCC 285; Converse v. US, 109 F. Supp. 807, in 92 MCC 167, 99 MCC 621

CHARTER OR SPECIAL OPERATIONS

Incidental authority, under §208(c): Safeway Trails v. ICC, 176 F. Supp. 201, in 96 MCC 1

"Special" operations defined: Bingler Vacation Tours v. US, 132 F. Supp. 793, aff'd 350 US 921, in 96 MCC 1

CLASSIFICATION (FREIGHT)

Reasonableness, basic standards, Ann Arbor R. v. US, 281 US 658, in 315 ICC 419

CLASSIFICATION (MOTOR CARRIERS)

By commodities transported: W.J. Dillner Transfer Co. v. ICC, 193 F. Supp. 823, affd. 368 US 6, in 91 MCC 91 (101).

intended use test: Mitchell Bros. Truck Lines v. US, 225 F. Supp. 755, in 99 MCC 621

COMMERCIAL ZONES

New England type towns: Palmer Lines v. US, 179 F. Supp. 629, in 88 MCC 491

COMMON CARRIER

Defined: Alexandria, B. & W. Transit v. US, civil No. 2023, E.D. Va., July 10, 1961 and Jan. 22, 1962, in 88 MCC 767 (772)

COMMON CONTROL, MANAGEMENT, OR ARRANGEMENT

Within §1(1)(a); US v. Munson S.S. Line, 283 US 43, in 321 ICC 564

Within §5: See *Consolidation—Control*

COMPENSATION

Shipper association's expense repayment constitutes: I.C.C. v. Shippers Cooperative, Inc., 196 F. Supp. 8, aff'd 308 F. 2d. 888, in 94 MCC 440.

COMPETITION

Commodities carried, causing: North Carolina Natural Gas Corp. v. US, 200 F. Supp. 745, in 323 ICC 75

Destructive practice: New York Central v. US, 194 F. Supp. 947, in 315 ICC 311;ICC v. New York, N.H. & H. R., 372 US 744, in 319 ICC 310, 319 ICC 335, 319 ICC 357,319 ICC 379, 319 ICC 390,319 ICC 396, 319 ICC 424, 319 ICC 431, 319 ICC 534 (561), 319 ICC 577 (594), 319 ICC 340, 321 ICC 154, 321 ICC 121, 321 ICC 637, 323 ICC 215, 323 ICC 698, 323 ICC 468, 323 ICC 746; Missouri Pac. R. Co. v. US, 203 F. Supp. 629, Cooper-Jarrett v. US, 226 F. Supp. 318, aff'd 379 US 6, US v. Chicago, M., St. P. & P.R., 294 US 499, in 323 ICC 746

Existing carriers, protection: Gregg Cartage & Stor. Co. v. US, 316 US 74, in 93 MCC 38

Market, justifying reductions: North Carolina Natural Gas Corp. v. US, 200 F. Supp. 745, in 323 ICC 75

National transportation policy: New York Central v. US, 194 F. Supp. 947, in 315 ICC 311 (322); McLean Trucking v. US, 321 US 67, in 317 ICC 261 (292)

Need for different type of service: Schaeffer Transp. Co. v. US, 355 US 83, in 88 MCC 299, 88 MCC 403, 91 MCC 82

Public interest: Texas & P. Ry. v. Gulf, C. & S.F. Ry., 270 US 266, McLean Trucking v. US, 321 US 67, in 320 ICC 122 (126, 129, 167, 212)

COMPLAINANTS

Rights, nature of interest not determinative: Southern Ry. v. US, 186 F. Supp. 29, in 323 ICC 75

COMPLAINTS

States, by, under § under §204(c): Castle v. Hayes Frt. Lines, 348 US 61, Service Stor. & Transfer v. Va., 359 US 171, in 88 MCC 745

CONNECTING LINES

Defined: Atlantic Coast Line v. US, 284 US 288, A. T. & S.F. v. Chicago, 240 F. 2d 930, in 316 ICC 795, 319 ICC 431 (440), 321 ICC 283, 321 ICC 314; Thompson v. US, 343 US 549, in 319 ICC 431 (440); Chicago, I. & L. Ry. v. US, 270 US 287, in 319 ICC 431 (443); Arrow Transp. Co. v. US, 176 F. Supp. 411, in 319 ICC 431

Discrimination between: see *Discrimination*

Water carrier: Arrow Transp. Co. v. US, 176 F. Supp. 411, aff'd 361 US 353, in 315 ICC 89, 319 ICC 431 (440)

CONSOLIDATION-CONTROL

Antitrust laws: McLean Trucking v. US, 321 US 67, in 87 MCC 637 (650); NY Central Securities Corp. v. US, 287 US 12, McLean Trucking v. US, 321 US 67, Georgia v. Penn. R., 324 US 439, Schwabacher v. US, 334 US 182, St. Joe Paper Co. v. ACLR, 347 US 197, Minneapolis & St. L. R. v. US, 361 US 173, Maint. Employees v. US, 366 US 169, California v. EPC, 369 US 482, Brown Shoe Co. v. US, 370 US 294, Pan American v. US, 371 US 296, US v. Phila. Nat'l Bank, 374 US 321, in 320 ICC 122 (128-9, 132-4, 166)

Conditions, modifications, required: NY Central Securities Corp. v. US, 287 US 12, Wiley & Sons v. US, 85 F. Supp. 542, in 320 ICC 122 (127, 130)

CONSOLIDATION-CONTROL—Continued

Common control, question of fact: US v. Marshall Transport, 322 US 31, in 90 MCC 407; Rochester Telephone Corp. v. US, 307 US 125, in 90 MCC 679, 90 MCC 777

Contracts, binding while outstanding: Watson Bros. Transp. v. Jaffa, 143 F. 2d 340, in 90 MCC 96

Control, construed: US v. Marshall Transport, 322 US 31, in 87 MCC 681 (694) Rochester Telephone Corp. v. US, 307 US 125, in 316 ICC 615 (618); Alleghany Corp. v. Breswick, 353 US 151, in 90 MCC 11, 320 ICC 271

alternative proposals: Minneapolis & St. L. R. v. US, 361 US 173, in 90 M.C.C. 96

Employee protection: Maintenance of Way Employees v. US, 189 F. Supp. 942, aff'd 366 US 169, Brotherhood of Maint. of Way Emps. v. US, 221 F. Supp. 19, in 320 ICC 122 (200-5)

Merger:

involuntary, may not be required: St. Joe Paper Co. v. Atlantic Coast Line, 347 US 298, in 317 ICC 261 (290), 320 ICC 122; Schwabacher v. US, 334 US 182, in 320 ICC 122

stock exchange ratio: Schwabacher, 334 US 182, in 320 ICC 122 (193)

Minority stockholders: Schwabacher v. US, 334 US 182, Ahlenius v. Bunn & Humphreys, 358 Ill. 155, 192 N.E. 824, in 87 MCC 637; Schwabacher case, 334 US 182, in 90 MCC 87

Orders, modification: US v. Rock Island M. Transit, 340 US 419, US v. Texas & P. M. Transport, 340 US 450, in 317 ICC 469 (482)

Percentage, stock, for control: US v. Union Pac., 226 US 61, North American Co. v. SEC, 327 US 686, Alleghany Corp. v. Breswick, 353 US 151, in 320 ICC 122 (195)

Power to exercise:

increase in: Alleghany Corp. v. Breswick, 353 US 151, in 317 ICC 550

Public interest: Pacific Power & Light v. FPC, 111 F. 2d 1014, in 317 ICC 261 (285), 320 ICC 122 (130); NY Central Securities Corp. v. US, 287 US 12, in 317 ICC 557 (570), 320 ICC 122 (130, 205); In re Chicago, R.I. & P. Ry., 168 F. 2d 587, in 320 ICC 122

Routes, irregular, maintenance: Falwell v. US, 69 F. Supp. 71, aff'd 330 US 807, in 87 MCC 674

Substantiality test, acquired operations: US v. Carolina Freight Carriers, 315 US 475, in 93 MCC 244

commodities transported: US v. Carolina Freight Carriers, 315 US 475, in 93 MCC 265

Unlawful: US v. Marshall Transport, 322 US 31, in 90 MCC 407

Violations barring approval: Gilbertville Trucking v. US, 196 F. Supp. 351, aff'd 371 US 115, in 90 MCC 381, 90 MCC 419, 90 MCC 759

CONSPIRACY

Evasion of regulation: Hitchman Coal & Coke v. Mitchell, 245 US 229, in 316 ICC 259 (283)

CONSTITUTIONALITY:

See *Interstate Commerce Act*

CONSTRUCTION

Railroad line, duty in determining need for: Texas & C.R.R. v. Northside Ry., 276 US 475, C. & O. Ry. v. US, 283 US 35, Schaffer Transp. v. US, 355 US 83, ICC v. J-

CONSTRUCTION—Continued

T Transport, 368 US 81, N.Y. Central v. Southern Ry., 226 F. Supp. 463, in 324 ICC 208 (232-3, 235)

Replacement of abandoned line: Purcell v. US, 315 US 381, in 317 ICC 225 (237)

CONTINUITY OF MOVEMENT

Construed: Baltimore & O. R. v. US, 24 F. Supp. 734, Central R. of N.J. v. US, 257 US 247, Baltimore & O.S.W.R. v. Settle, 260 US 166, in 94 MCC 495; Texas & N.O.R. v. Sabine Tram, 227 US 111, Baltimore & O.S.W.R. v. Settle, 260 US 166, Buckingham Transp. v. Black Hills Transp., 281 N.W. 94, in 323 ICC 740

Intent of shipper: Seaboard Air Line v. Lee, 14 F. 2d 439, aff'd 276 US 591, in 323 ICC 740

Passing of title not controlling: Baltimore & O.S.W.R. v. Settle, 260 US 166, US v. Erie R., 280 US 98, in 323 ICC 740

CONTRACT CARRIERS

Application of §209(b) criteria: ICC v. J-T Transport, 368 US 81, in 88 MCC 767 (775), 91 MCC 289, 91 MCC 275, 91 MCC 543, 91 MCC 489, 91 MCC 349, 91 MCC 585, 91 MCC 618, 91 MCC 864, 92 MCC 293, 92 MCC 471, 94 MCC 227, 94 MCC 386, 95 MCC 331, 95 MCC 312, 95 MCC 412, 93 MCC 695

Other factors considered: American Trucking Assns. v. US, 364 US 1, in 91 MCC 507 (511),

Defined: ICC v. J-T Transport, 368 US 81, in 88 MCC 767

association of shippers: ICC v. Shippers' Cooperative, 196 F. Supp. 8, in 88 MCC 575

Shipper's distinct need for specialized service: ICC v. J-T Transport, 368 US 81, in 88 MCC 767 (774, 779), 89 MCC 687, 89 MCC 777 (783-4), 91 MCC 235, 91 MCC 543, 91 MCC 489, 91 MCC 349, 92 MCC 707, 95 MCC 331, 95 MCC 412

CONTRACT OR AGREED (GUARANTEED) RATES

Destructive competitive practice: New York Central v. US, 194 F. Supp. 947, in 315 ICC 311 (322)

CONTROL

See also *Consolidation-Control*

Alternative proposals considered: Minneapolis & St. L. R. v. US, 361 US 173, in 90 MCC 96

Construed: Alleghany Corp. v. Breswick, 353 US 151, in 90 MCC 11, 320 ICC 271

Divestiture, authority to require: Gilbertville Trucking v. US, 371 US 115, in 93 MCC 89

Unlawful, termination: Gilbertville Trucking v. US, 371 US 115, in 97 MCC 151

CONVENIENCE AND NECESSITY

Operations under color of right: Crichton v. US, 56 F. Supp. 876, in 91 MCC 221; Atlanta-New Orleans Motor Frt. Co. v. US, 155 F. Supp. 68, in 91 MCC 221 (228)

Relocation of line: Purcell v. US, 315 US 381, in 317 ICC 225 (237)

Purpose: Texas & C.R.R. v. Northside Ry., 276 US 475, Chesapeake & O. Ry. v. US, 283 US 35, New York Central v. Southern Ry., 226 F. Supp. 463, in 324 ICC 208 (232-3, 235)

COORDINATED SERVICE

Burden of proof: Schaffer Transp. v. US, 335 US 83, in 94 MCC 414

COORDINATED SERVICE—Continued

Imposition of restrictions: American Trucking Assns. v. US, 364 US 1, in 89 MCC 645, 91 MCC 61, 91 MCC 167 (173)

Key-point condition: ICC v. Parker, 326 US 60, in 89 MCC 389 (407)

CORPORATE ENTITIES

Through form to reality: US v. Reading Co., 253 US 26, Schenley Distillers v. US, 61 F. Supp. 981, aff'd 326 US 432, in 88 MCC 147 (158)

CORPORATE IDENTITY

Separate from carrier operations, when: Schenley Distillers Corp. v. US, 326 US 432, in 91 MCC 535, in 318 ICC 737

CORPORATION

Shippers' association, barred from status of: Hecht v. Malley, 265 US 144, Schenley Distillers v. US, 61 F. Supp. 981, aff'd 326 US 432, ICC v. Shippers Cooperative, 169 F. Supp. 8, Caminetti v. US, 242 US 470, Morrissey v. Commissioner, 296 US 344, in 316 ICC 259 (284, 287)

COST OF SERVICE

As inherent advantage: see *Inherent Advantages*

Charges below cost: Pennsylvania R. v. US, 216 F. Supp. 199, in 321 ICC 356

Not sole consideration: General Motors v. US, 207 F. Supp. 641, in 321 ICC 519 (545)

Out-of-pocket: comparisons based on: ICC v. New York, N.H. & H.R., 372 US 744, in 319 ICC 335

widespread adjustment: Baltimore & O.R. v. US, 345 US 146, in 322 ICC 581 (604)

Savings from train discontinuance: City of Philadelphia v. US, 197 F. Supp. 832, in 317 ICC 519 (539)

DAMAGES

Motor carrier rates, jurisdiction: T.I.M.E. v. US, 359 US 464, in 318 ICC 492, 323 ICC 416

Person paying charges: Southern Pac. v. Darnell-Taenzer, 245 US 531, Adams v. Mills, 286 US 397, in 321 ICC 434, 323 ICC 509

Retroactive award: Arizona Grocery case, 284 US 370, in 315 ICC 743, 318 ICC 415

Total charges: Great Northern Ry. v. Sullivan, 294 US 358, in 315 ICC 259

DELIVERY

What constitutes: Pennsylvania R. v. Ohio Commission, 298 US 170, in 321 ICC 434

DISCONTINUANCE OR CHANGE, OPERATIONS, SERVICES

"Any train" defined: State of N.J. v. US, 168 F. Supp. 324, aff'd County of Bergen v. US, 359 US 27, in 317 ICC 111

Interstate vs. intrastate status of trains: New Jersey v. N.Y., S. & W. R., 372 US 1, in 317 ICC 737

Losses from operation: Southern Ry. v. North Carolina, 376 US 93, in 320 ICC 648 (665)

DISCRIMINATION

By consent judgments, waiver of defenses: Phillips v. Grand Trunk, 236 US 662, in 316 ICC 417

Complaint, when unnecessary: US v. Chicago Heights Trucking Co., 310 US 344, in 321 ICC 452

Connecting lines: ICC v. Mechling, 330 US 567, Dixie Carriers v. US, 351 US 56, in 315 ICC 89; Atlantic

DISCRIMINATION—Continued

Coast Line v. US, 205 F. Supp. 360, aff'd 371 US 6, in 316 ICC 795; Ilwaco Ry. v. Oregon Short Line, 57 F. Supp. 673, in 319 ICC 431 (440); Southern Ry. v. US, 166 F. Supp. 78, in 321 ICC 314

exempt water carriers: ICC v. Mechling, 330 US 567, Blue Line v. US, 100 F. Supp. 66, aff'd 342 US 951, Dixie Carriers v. US, 351 US 56, Arrow Transp. v. US, 176 F. Supp. 411, aff'd 361 US 353, in 316 ICC 759.

shipper discrimination distinguished: Arrow Transp. v. US, 176 F. Supp. 411, aff'd 361 US 353, in 318 ICC 815

Equality of treatment, similar circumstances: Lynchburg Traff. Bureau v. US, 225 F. Supp. 874, aff'd 377 US 370, in 323 ICC 75

Ex-barge traffic: ICC v. Mechling, 330 US 567, Jas. McWilliams Blue Line v. US, 100 F. Supp. 66, aff'd 342 US 951, in 321 ICC 519 (549)

Infrequent shippers: Railway Exp. Agency v. US, 153 F. Supp. 738, aff'd 355 US 270, in 89 M.C.C. 709 (743)

Like and contemporaneous service: Louisville N. R. v. US, 282 US 740, Warehouse Co. v. US, 283 US 501, in 322 ICC 301 (336)

Passengers: see Preference-Prejudice

Potential: Southern Pac. v. ICC, 200 US 536, in 322 ICC 541

Purpose, enforcement of equality between shippers: ICC v. Alabama Midland, 168 US 144, in 316 ICC 325 (349); 322 ICC 456 (470)

DISTURBANCE OF ADJUSTMENT

Change of rate, by: US v. Chicago, M., St. P. & P., 249 US 499 in 325 ICC 669

DIVISIONS OF RATES

Bearing on lawfulness of rates: L. & N. R. v. Sloss-Sheffield, 269 US 217, in 319 ICC 123

Cost: US v. Abilene & S. Ry., 265 US 274, in 316 ICC 351

Determination by commission: Baltimore & O. R. v. US, 298 US 349, in 316 ICC 351, 322 US 491; Boston & M. R. v. US, 208 F. Supp. 661, aff'd 371 US 26, in 321 ICC 17 (70), 322 US 491, 325 ICC 1 (47, 49); ICC v. Hoboken R. Co., 320 US 368, in 322 ICC 491

Elements considered: Baltimore & O. R. v. US, 298 US 349, Boston & M. R. v. US, 208 F. Supp. 661, in 316 ICC 351; Boston & M. R. v. US, 208 F. Supp. 661, affirmed 371 US 26, in 319 ICC 639 (657), 321 ICC 17 (67), 322 ICC 491; New England Divisions Case, 261 US 184, in 322 ICC 491

Retroactive adjustment: Brimstone R. & Canal Co. v. US, 276 US 104, in 319 ICC 639 (662)

Revenue needs: Baltimore & O.R. v. US, 298 US 349, in 325 ICC 1 (49); US v. Abilene & S. Ry., 265 US 274, Atchison, T. & S. F. Ry. v. US, 225 F. Supp. 584, in 325 ICC 1 (44)

Uniformity not required: Atchison, T. & S. F. Ry. v. US, 225 F. Supp. 584, New England Divisions case, 261 US 184, in 325 ICC 1 (27)

EMPLOYEES

Abandonment: ICC v. Ry. L. E. Assn., 315 US 373, in 312 ICC 797

representatives, right to intervene: Brotherhood of Railroad Trainmen v. B. & O., 331 US 519, in 312 ICC 797

EMPLOYEES—Continued

Jurisdiction of commission: Carpenters' Union v. NLRB, 357 US 93, Burlington Truck Line v. US, 371 US 156, in 322 ICC 301 (382-3)

Protective conditions, on whom imposed: St. Joe Paper Co. v. Atlantic Coast Line R. Co., 347 US 982, in 317 ICC 619 (626)

ENFORCEMENT

Decisions of commission: Parkhill Truck Co. v. US, 198 F. Supp. 362 in 85 MCC 5

ERRORS

Ministerial, inadvertent, correction: American Trucking Assns. v. Frisco Transp. Co., 358 US 133, in 96 MCC 160

EVIDENCE

Admissibility:

business records: US v. Olivo, 278 F. 2d 415, US v. Merritt-Chapman & Scott, 305 F. 2d 121, in 93 MCC 498

Commission employee's, inadmissible without production of memoranda and reports he made on his investigation; Jencks v. U.S., 353 US 657, National Labor Rel. Bd. v. Adhesive Products Co., 258 F. 2d 403, Great Lakes Air Lines, Inc. v. C.A.B., 291 F. 2d 354 in 96 MCC 29

Diligence in presenting: United States v. Northern Pac. Ky. Co., 288 US 490, in 95 MCC 220

Informed judgment: US v. Louisiana, 290 US 70, So. Carolina v. US, 136 F. Supp. 897, 351, US 944, Alabama v. US, 141 F. Supp. 488, in 315 US 223 (240)

Witnesses:

cross-examination: Banning v. US, 130 F. 2d 330, cert. denied 317 US 695, in 90 MCC 527; Fay v. Douds, 172 F. 2d 720, in 323 ICC 509

qualifications: Public Utilities Co. v. Handorf, 112 N.E. 775, 185 Ind. 254, in 93 MCC 498

refreshing recollection: Putnam v. US, 162 US 687, Breese v. US, 106 Fed. 680, Dowling Bros. Distrilling Co. v. US, 153 F. 2d 353, US v. Riccardi, 174 F. 2d 883, Tatum v. US, 249 F. 2d 129, in 89 MCC 750

unavailability, use of records: Nichols v. Webb, 8 Wheat. 326, in 93 MCC 498

EXAMINERS

Assignment: different, at further hearing; Democrat Printing Co. v. FCC, 202 F. 2d 298, Gamble-Skogmo, Inc. v. FTC, 211 F. 2d 106, in 92 MCC 8

out of rotation: Tractor Training Service v. FTC, 227 F. 2d 420, Ramspeck v. Fed. Trial Examrs. Conf., 345 US 128, in 318 ICC 180

EX-BARGE RATES

ICC v. Mechling, 330 US 567, Dixie Carriers v. US, 351 US 56, Arrow Transp. v. US, 176 F. Supp. 411, Aff'd 361 US 353, in 321 ICC 519 (542).

EXEMPTION

Agricultural cooperatives: ICC v. Jamestown Farmers Union etc., 151 F. 2d 403, in 96 MCC 293

Bulk water carriers, discrimination against: ICC v. Mechling, 330 US 567, Blue Line v. US, 100 F. Supp. 66, aff'd 342 US 951, Dixie Carriers v. US, 351 US 56, Arrow Transp. v. US, 176 F. Supp. 411, aff'd 361 US 353, in 316 ICC 759

EXEMPTION—Continued

Exempt, nonexempt, in same vehicle, same time: ICC v. Dunn, 166 F. 2d 116, ICC v. Service Trucking, 186 F. 2d 400, in 89 MCC 471

Fish, shellfish: ICC v. Love, 77 F. Supp. 63, 172 F. 2d 224, in 89 MCC 471 (486)

Frozen fruits and vegetables: Home Transfer & Storage Co. v. US, 141 F. Supp 599, aff'd 352 US 884, in 89 MCC 237

"Incidental-to-air" motor carriage, commission's jurisdiction over: City of Philadelphia v. Civil Aeronautics Board, 289 F. 2d 770, in 98 MCC 145.

Passengers, incidental-to-air, within a State: United States v. Yellow Cab., 332 U.S. 218, New York Central R.R. Co. v. Mohney, 252 US. 152, Pennsylvania R. Co. v. Knight, 192 U.S. 21, Cederblade v. Parmalee Transp. Co., 94 F. Supp. 965, Mateo v. Auto Rental Company, 240 F. 2d 831, in 95 M.C.C. 526

Shippers' association, see *Association*

Terminal Areas: City of Philadelphia v. Civil Aeronautics Board, 289 F. 2d 770, in 95 MCC 71

Tracks, spur, switch, etc.: Texas & P. Ry. v. Gulf, C. & S. F. Ry., 270 US 266, Piedmont & N. Ry. v. ICC, 286 US 299, US v. Idaho, 298 US 105, Lancaster v. Gulf, C. & S. F., 298 Fed. 488, ICC v. Piedmont & N. Ry., 51 F. 2d 766, NY Central v. Chicago & E.I.R., 222 F. 2d 828, Chicago, M., St. P. & P. R. v. Northern Pac., 120 F. Supp. 710, Chicago, R. I. & P. R. v. Thompson, 135 F. Supp. 43, Georgia v. US, 156 F. Supp. 711, in 320 ICC 25

EXPRESS AGENCY

Motor service by, restrictions: US v. Rock Island Motor Transit, 340 US 419, American Trucking Assns. v. US, 355 US 141, in 91 MCC 311 (327, 339)

Status: US v. American Ry. Exp., 265 US 425, in 91 MCC 311 (330)

EXPRESS SERVICE

Construed: Bird Trucking v. US, 159 F. Supp. 717, in 91 MCC 311 (326); Arrowhead Frt. Lines v. US, 114 F. Supp. 804, Auclair Transp. v. US, 221 F. Supp. 328, aff'd 376 US 514, in 323 ICC 468

EXTENSION

Defined: Texas & P. Ry. v. Gulf, C. & S. F., 270 US 266, Piedmont & N. Ry. v. ICC, 286 US 299, US v. Idaho, 298 US 105, Lancaster v. Gulf, C. & S. F., 298 Fed. 488, ICC v. Piedmont & N., 51 F. 2d 766, NY Central v. Chicago & EIR, 222 F. 2d 828, Chicago, M. St. P. & P. v. Northern Pac., 120 F. Supp. 710, Chicago, R. I. & P. v. Tompson, 135 F. Supp. 43, Georgia v. US, 156 F. Supp. 711, in 320 ICC 25

Territory of other carrier: Pennsylvania R. v. US, 40 F. 2d 921, Indian Valley R. v. US, 52 F. 2d 485, in 320 ICC 25

FINDINGS

Requirements of APA, §8: County Board of Arlington v. US, 101 F. Supp. 328, in 88 MCC 715

FOR-HIRE CARRIAGE

Common plan—Partnership, effected by: Hitchman Coal & Coke Co. v. Mitchell, 245 US 229, in 318 ICC 345 (355)

One-way, to reduce private-carrier cost: Church Point Wholesale Beve. Co. v. US, 200 F. Supp. 508, in 89 MCC 281

FOR-HIRE CARRIAGE—Continued

Ownership of goods not controlling: ICC v. Tank Car Oil Corp., 151 F. 2d 834, in 88 MCC 77, 89 MCC 281

Partnership theory: Allen v. United States, 197 F. Supp. 625, in 89 MCC 33

Substance, not form, determines: Georgia Truck System v. ICC, 123 F. 2d 210, ICC v. A.W. Stickle & Co., 41 F. Supp. 268, US v. Drum, 368 US 370, in 89 MCC 33 US v. LaTuff Transfer Service, Inc., 95 F. Supp. 375, Allen v. US, 187 F. Supp. 625, US v. Drum, 368 US 370, in 91 MCC 377 (386) US v. Drum, 368 US 370, Georgia Truck System, Inc. v. ICC, 123 F. 2d 210, US v. LaTuff Transfer Service, Inc., 95 F. Supp. 375, in 94 MCC 402 US v. Drum, 368 US 370, in 96 MCC 29

FOREIGN COMMERCE

Defined: Texas & N.O.R. v. Sabine Tram, 227 US 111, Baltimore & O.S.W.R. v. Settle, 260 US 166, US v. Erie R., 280 US 98, Seaboard Air Line v. Lee, 14 F. 2d 439, aff'd 276 US 591, Buckingham Transp. v. Black Hills Transp., 281 N.W. 94, in 323 ICC 740

FOREIGN vs. DOMESTIC COMMERCE

US v. Erie R., 280 US 98, Southern Pac. Co. v. Van Hoosear, 72 F. 2d 903, in 323 ICC 400

FOURTH-SECTION

Construction-interpretation: Intermountain Rate Cases, 234 US 476, Addison v. Holly Hill Co., 322 US 607, in 318 ICC 449

FREIGHT FORWARDERS

Associations, exemption: see *Associations*

Common plan-partnerships: Hitchman Coal & Coke Co. v. Mitchell, 245 US 229, in 318 ICC 345 (355)

GATEWAY ELIMINATION OR CHANGE

Youngblood Truck Lines v. US, 221 F. Supp. 809, in 93 MCC 439

GENERAL REVENUE CASES

Standards of proof: E. Brooke Matlack v. US, 119 F. Supp. 617, in 319 ICC 792

GOVERNMENT TRAFFIC

Agencies, instrumentalities entitled to §22 rates: US v. Chicago, N.S. & M.R., 288 US 1, Ashwander v. TVA, 297 US 288, Inland W'ways Corp. v. Young, 309 US 517, in 319 ICC 497

Benefit to government direct and entire: Sands v. Calmar S.S. Corp., 296 N.Y. Supp. 590, in 323 ICC 347

Discrimination favoring, not illegal: Emergency Fleet Corp. v. Western Union, 275 US 415, Inland W'ways Corp. v. Young, 309 US 517, US v. Benjamin M. Exp., 147 F. Supp. 15, Aff'd 251 F. 2d 547, N.Y. Tel. Co. v. Siegel-Cooper, 96 N.E. 109, Kansas City S. Ry. v. Louisiana Pub Serv. Comm., 73 So. 2d 188, in 319 ICC 497

Government ownership not essential: US v. Georgia Pub. Serv. Comm., 371 US 285, in 323 ICC 347

Rate quotations under §22, limited jurisdiction over: Atchison, T. & S. F. Ry. Co. v. Aircoach Transp. Ass'n., 253 F. 2d 877, 361 US 930, in 323 ICC 396

optional: N., C. & St. L. Ry. v. Tennessee, 262 US 318, in 323 ICC 347

Special treatment affirmatively declared: ICC v. Baltimore & O.R., 145 US 263, N. C. & St. L. Ry. v. Tennessee, 262 US 318, US v. ICC, 352 US 158, Pub. Util. Comm. of Calif. v. US, 355 US 534, US v. Georgia

GOVERNMENT TRAFFIC—Continued

Pub. Serv. Comm., 371 US 285, Great Northern v. US, 312 F. 2d 901, in 319 ICC 497

Subcontractors, privity of contract necessary: Kern-Limerick v. Scurlock, 347 US 110, Sullivan v. US, 129 Ct. Cl. 63, General Elevator Co. v. US, 122 Ct. Cl. 467, in 323 ICC 347

"GRANDFATHER" CLAUSES:

See *Certificate*

HEARING:

See also *Rehearing*

Commission employee's memoranda and reports in re his investigations, production at: Jencks v. U.S., 353 US 657, National Labor Rel. Bd. v. Adhesive Products Co., 258 F. 2d 403, Great Lakes Air Lines, Inc. v. C.A.B., 291 F. 2d 354, in 96 MCC 29

Full, requisites: ICC v. L. & N., 227 US 88, Morgan v. US, 304 US 1, in 318 ICC 507

Oral, whether required: Mortgage Underwriting & Realty Co. v. Bowles, 150 F. 2d 411, Fay v. Douds, 172 F. 2d 720, in 322 ICC 418, 323 ICC 509

HOCH-SMITH RESOLUTION

Ann Arbor R. v. US, 281 US 658, in 321 ICC 519 (547)

HOUSEHOLD GOODS

Articles included: ICC v. United Van Lines, 110 F. Supp. 273, in 88 MCC 25

INHERENT ADVANTAGES

Lower costs: Schaffer Transp. Co. v. US, 355 US 83, in 89 MCC 709 (739) ICC v. New York, NH & HR, 372 US 744, in 321 ICC 121, 321 ICC 582

burden of proof: ICC v. New York, NH & HR, 372 US 744, in 319 ICC 465 (480)

Motor compared with rail: Schaffer Transp. Co. v. US, 355 US 83, in 89 MCC 139, 94 MCC 573; American Trucking Assns., Inc., v. United States, 364 U.S. 1, in 96 M.C.C. 699

INTERCHANGE

Cost of, bearing: Baltimore & O.R. v. US, 277 US 291, in 321 ICC 720

INTERSTATE COMMERCE

Billing: interstate and intrastate traffic commingled: Minnesota Rate cases, 230 US 352, in 319 ICC 748

Congressional power: Gibbons v. Ogden, 9 Wheat. 1, in 319 ICC 745

Determination, essential character: ACL R. Co. v. Std. Oil of Ky., 275 US 257, in 91 MCC 497, 92 MCC 581; Chicago, M. & St. P. Ry. v. Iowa, 233 US 334, Southern Pac. v. US, 272 US 445, in 319 ICC 745

State regulation:

economic, not within State powers: Buck v. Kuykendall, 267 US 307, Galveston Truck Line v. Allen, 2 F. Supp. 488, aff'd 289 US 708, in 88 MCC 357

INTERSTATE COMMERCE ACT

Constitutionality: Public Utilities Comm. of Calif. v. US, 355 US 534, in 320 ICC 85

Subterfuge operations as violation of: Service Stor. & Transfer v. Va., 359 US 171, in 88 MCC 745

INTERSTATE COMMERCE COMMISSION

Employees furnishing assistance to: US v. Morgan, 313 US 409, T.S.C. Motor Frt. Lines v. US, 186 F. Supp. 777, aff'd Herring Transp. v. US, 366 US 419, in 325 ICC 1

INTERSTATE COM. COM.—Con.

Inadvertent errors, authority to correct: American Trucking Assn. v. Frisco Transp. Co., 358 US 133, in 96 MCC 160

Rulemaking powers: Assigned Car Cases, 274 US 564, American Trucking Assns. v. US, 344 US 298, US v. Pennsylvania R., 323 US 612, in 322 ICC 301 (324)

INTRASTATE COMMERCE

Abandonment, needs considered; Colorado v. US, 271 US 153, in 312 ICC 791

Comingling:

with interstate; Minnesota Rate Cases, 230 US 352, in 319 ICC 745

Evasion of state regulation: Eichholz v. Mo. Pub. Serv. Comm., 306 US 268, Castle v. Hayes Frt. Lines, 348 US 61, Service Stor. & Transfer v. Va., 359 US 171, in 88 MCC 745; Service Stor. & Transfer Co. v. Virginia, 359 US 171, Hudson Transp. v. US, 219 F. Supp. 43, aff'd Arrow Carrier Corp. v. US, 375 US 452, in 97 MCC 144

Passengers, segregation on vehicles or in terminals: Baldwin v. Morgan, 287 F. 2d 750, Browder v. Gayle, 142 F. Supp. 707, aff'd 352 US 903, Morgan v. Virginia, 328 US 373, in 86 MCC 743

Routing over interstate route, bona fides: Service Stor. & Transfer Co. v. Virginia, 359 US 171, Jones Motor v. US, 218 F. Supp. 133, aff'd Highway Exp. Lines v. Jones Motor, 377 US 217, in 97 MCC 144

INTRASTATE RATES

Burden on interstate commerce: Public Serv. Com. of Utah v. US, 356 US 421, in 318 ICC 151

Revenue effect: US v. Louisiana, 290 US 70

MOTOR CARRIER

Leasing, rental operations, whether: US v. La Tuff Transfer, 95 F. Supp. 375, ICC v. Gannoe, 100 F. Supp. 790, in 88 MCC 437, 89 MCC 155; Georgia Truck System v. ICC, 123 F. 2d 210, in 89 MCC 305; Empire Box Corp. v. Willard Sulzberger Motor Co., 104 F. Supp. 762, ICC v. Gannoe, 100 F. Supp. 790, in 89 MCC 183

NATIONAL TRANSPORTATION POLICY

Competition among different forms of carriage; American Trucking Assns., Inc., v. United States, 364 U.S. 1, in 96 M.C.C. 699

National defense: ICC v. New York, NH & HR, 372 US 744, in 319 ICC 493

NOTICE

Sufficiency: Dart Transit Co. v. I.C.C., 110 F. Supp. 876, aff'd 345 U.S. 980, in 96 MCC 29

OFFICIAL NOTICE

Carriers' quarterly reports: Market Street R. v. Commission, 324 US 548, State of Wis. v. FPC, 201 F. 2d 183, in 87 MCC 665

ORDERS

Cease and desist, entry: US v. National City Lines, 134 F. Supp. 350, National Lead Co. v. FTC, 227 F. 2d 825, in 86 MCC 767

remedial nature: FTC v. Cement Institute, 333 US 683, in 96 MCC 409

Compliance: Service Stor. & Transfer v. Va., 359 US 171, in 88 MCC 745

Consolidation—control, modification, US v. Rock Island Motor Transit, 340 US 419, US v. Texas & P. Motor Transp. 340 US 450, in 317 ICC 469 (482)

Remedial, commission's duty of choice: Burlington Truck Lines v. US, 371 US 156, Gilbertville Trucking Co. v. US, 371 US 115, in 322 ICC 743 (773)

PARTIES

Defendant, trustee as: Carpenter v. International-G.N.R., 5 F. Supp. 768, in 318 ICC 35 318 ICC 107; Robinson v. Trustees of New York, N.H. & H. R. Co., 60 N.E. 2d 593, in 318 ICC 35

Protestant, proper, motor application proceedings: Alton R. Co. v. US, 315 US 15, in 91 MCC 211

Respondent in investigation, notice as to issues: Dart Transit Co. v. I.C.C., 110 F. Supp. 876, aff'd 345 US 980, in 96 MCC 29

PASSENGER SERVICE

Discontinuance not subject to §1(18): Sludden v. US, 211 F. Supp. 150, in 320 ICC 85

one-State motor operations to and from airports, railroad station, etc.: U.S. v. Yellow Cab Co., 332 U.S. 218, New York Central Railroad Co. v. Mohney, 252 U.S. 152, Pennsylvania R. Co. v. Knight, 192 U.S. 21, Cederblade v. Parmalee Transp. Co., 94 F. Supp. 965, Mateo v. Auto Rental Co., 240 F. 2d 831, in 95 M.C.C. 526

Race segregation, see *Preference-Prejudice*

Terminal facilities, motor: Boynton v. Virginia, 364 US 454, in 86 MCC 743

PERMIT

Adequacy of existing service: ICC v. J-T Transport, 368 US 81, in 88 MCC 767, 89 MCC 209, 91 MCC 911, 91 MCC 953

Cost advantage to shipper: ICC v. J-T Transport, 368 US 81, in 88 MCC 767

Effect of grant or denial: ICC v. J-T Transport, 368 US 81, in 91 MCC 911, 91 MCC 953

Inadvertent ministerial error in, correction: American Trucking Assns. v. Frisco Transp. Co., 358 US 133, in 96 MCC 160

Interpretation: commodities authorized: Bird Trucking v. US, 159 F. Supp. 717, in 88 MCC 391

. usage: Black v. ICC, 167 F. 2d 825, 335 US 818, in 96 MCC 306

Protestants, burden of proof: ICC v. J-T Transport, 368 US 81, in 92 MCC 189

Scope, determination of: Black v. ICC, 167 F. 2d 825, 335 US 818, in 96 MCC 306

PICKUP AND DELIVERY

Incidental-to-air, exemption: City of Philadelphia v. Civil Aeronautics Board, 289 F. 2d 770, in 95 MCC 71

PORTS

Preference, prejudice: Louisville & N.R. v. US, 282 US 740, in 319 ICC 54 (65)

PRACTICES

Construction: Northern Pac. Ry. v. US, 41 F. Supp. 439, in 322 ICC 565

PREFERENCE-PREJUDICE

Carrier's control: Texas & P. v. US, 289 US 627, in 315 ICC 471, 318 ICC 5(11); Central R. Co. of N.J. v. US, 257 US 247, in 319 ICC 776

Difference in rates: Feinstein v. US, 209 F. Supp. 613, aff'd 317 F. 2d 509, in 318 ICC 815 (846)

Ex-barge traffic: ICC v. Mechling, 330 US 567, Jas. McWilliams Blue Line v. US, 100 F. Supp. 66, aff'd 342 US 951, in 321 ICC 519 (549)

Geographical handicap: ICC v. Diffenbaugh, 222 US, 42, in 319 ICC 497

Localities: ICC v. Diffenbaugh, 222 US 42, US v. Illinois Central, 263 US 515, Board of Trade of K.C. v. US, 314 US 434; New York v. US, 331 US 284, in 315 ICC 459; Louisville & N.R. v. US, 282 US 740, in 319 ICC 54 (65); New York v. US, 331 US 284, in 321 ICC 738 (751), 323 ICC 185

Passengers, race: general order to remove: American Trucking Assns. v. US, 344 US 298, in 86 MCC 743

intrastate, in interstate vehicle, terminal: Baldwin v. Morgan, 287 F. 2d 750, Browder v. Gayle, 142 F. Supp. 707, aff'd 352 US 903, Morgan v. Virginia, 328 US 373, in 86 MCC 743

terminal facilities, defined: Boynton v. Virginia, 364 US 454, in 86 MCC 743

Reasonableness: American Exp. Co. v. South Dakota ex rel. Caldwell, 244 US 617, in 318 ICC 5(10); New York v. US, 331 US 284, in 323 ICC 601

Transit points: identical treatment not required: Kansas City Board of Trade v. US, 314 US 534, in 322 ICC 743 (771)

Transportation differences: Board of Trade v. US, 314 US 534, in 321 ICC 356

PRESUMPTIONS

Right conduct: C., N.O. & T.P. Ry. v. Rankin 241 US 584, in 90 MCC 195

PRIVATE CARRIER

Defined: US v. Drum, 368 US 370, in 91 MCC 705

Ownership of goods not controlling: ICC v. Tank Car Oil Corp., 151 F. 2d 834, in 88 MCC 77, 89 MCC 281

Primary business test: Scott v. ICC, 213 F. 2d 300, A.W. Stickle & Co. v. ICC, 128 F. 2d 155, ICC v. Asphalt Supply Co., 152 F. Supp. 550, in 86 MCC 759; Brooks Transp. Co. v. US, 93 F. Supp. 517, aff'd 340 US 925, in 86 MCC 767, 88 MCC 671, 89 MCC 281, 91 MCC 231, 92 MCC 595

Substantiality test: US v. Drum, 368 US 370, in 88 MCC 740, 91 MCC 377, 92 MCC 728.96 MCC 29 US v. La-Tuff Transfer Service, Inc., 95 F. Supp. 375, in 91 MCC 377 (386), Allen v. US, 187 F. Supp. 625, in 91 MCC 377 (386), US v. Dru, 368 US 370, Georgia Truck System, Inc. v. ICC, 123 F. 2d 210, US v. LaTuff Service, Inc., 95 F. Supp. 375, in 94 MCC 402

PROPORTIONAL RATES

Compensativeness: Great Northern v. Sullivan, 294 US 458, in 315 ICC 249

PROTECTIVE SERVICE

Inclusion in line-haul rate: Atchison Ry. v. US, 232 US 199, in 319 ICC 113

PUBLIC INTEREST

Consolidation-control: New York Central Securities Corp. v. US, 287 US 12, in 317 ICC 557 (570)

PUBLIC INTEREST—Continued

Rate structure, all carriers, shippers, consumers, considered: Tampa Electric Co. v. Nashville Coal Co., 365 US 320, in 323 ICC 75

PURCHASE

Violations warranting denial: Gilbertville Trucking v. US, 196 F. Supp. 351, aff'd 371 US 115, in 90 MCC 381

RACES:

See *Preference-Prejudice*

RAIL SUBSIDIARY vs. INDEPENDENT OPERATION

American Trucking Assns. v. US, 355 US 141, in 88 MCC 703, 89 MCC 199, 89 MCC 41, 89 MCC 645, 91 MCC 363. American Trucking Assn. v. US, 364 US 1, in 92 MCC 106

Restriction of rail entry into motor carrier field: American Trucking Assn., Inc., v. United States, 364 U.S. 1, in 96 M.C.C. 699

RATEMAKING BUREAUS

Participation in proceedings: Nat'l Motor Frt. Traffic Assn. v. US, 372 US 246, in 321 ICC 460

Protests by: Eastern Railroads Presidents Conference v. Noerr Motor Freight, 365 US 127, Assn. of Western Railroads v. Riss, 299 F. 2d 133, 370 US 916, in 321 ICC 460

RATES AND RATE STRUCTURE

Adjustment, change of rate, effect on: US v. Chicago, M., St. P. & P., 294 US 499 in 325 ICC 669

Comparisons of rates: Norfolk & W. Ry. v. US, 145 F. Supp. 25, in 318 ICC 771

Costs not controlling: Kansas City Board of Trade v. US, 314 US 534, in 318 ICC 371 (389) General Motors Corp. v. US, 207 F. Supp. 641, in 321 ICC 519 (545)

Flexible limits of judgment: Kansas City Board of Trade v. US, 314 US 534, in 318 ICC 371 (389)

Initiation: US v. Chicago, M., St. P. & P. R., 294 US 499, Lynchburg Traffic Bureau v. US, 225 F. Supp. 874, in 323 ICC 746

Minimum rates: Baltimore & O.R. v. US, 298 US 349, Sec. Agriculture v. US, 347 US 645, in 318 ICC 771 (785-6)

Motor-carrier, past shipments, commission's jurisdiction limited: T.I.M.E. case, 359 US 464, in 319 ICC 383

Ownership of goods shipped: ICC v. DL & WR, 220 US 235, in 316 ICC 224

Prescription, commission's power: Ayrshire Collieries v. US, 335 US 573, in 319 ICC 141 (156)

Reasonableness: compensativeness: Baltimore & O.R. v. US, 345 US 146, in 322 ICC 218

relative: Baltimore & O.R. v. US, 345 US 146, in 321 ICC 738 (746) New York v. US, 331 US 284, in 321 ICC 519 (545)

Reduction for less than complete service: Cooper-Jarrett v. US, 226 F. Supp. 318, in 323 ICC 75

REGULATION

Subterfuge to evade: US v. La Tuff Transfer, 95 F. Supp. 375, ICC v. Gannoe, 100 F. Supp. 790, in 88 MCC 437, 89 MCC 155; Georgia Truck System v. ICC, 123 F. 2d 210, in 89 MCC 305; Hitchman Coal & Coke v. Mitchell, 245 US 229, in 316 ICC 259 (283)

intrastate commerce, State regulation: Service Stor. & Transfer Co. v. Virginia, 359 US 171, Hudson Transp. v. US, 219 F. Supp. 43, aff'd Arrow Carrier Corp. v. US, 375 US 452, in 97 MCC 144

REGULATIONS

Of general application: American Trucking Assns. v. US, 344 US 298, in 86 MCC 743

REHEARING

New facts, circumstances: ICC v. Jersey City, 322 US 503, in 323 ICC 619 (640)

REPORTS OF COMMISSION

Prior, repetition of rulings: Virginia Stage Lines v. US, 48 F. Supp. 79, in 317 ICC 550

REORGANIZATION

Trustee, proper party defendant, when: Carpenter v. International-G. N.R., 5 F. Supp. 768, in 318 ICC 35, 318 ICC 107; Robinson v. Trustees of New York, N.H. & H. R. Co., 60 N.E. 2d 593, in 318 ICC 35

RES JUDICATA

Baltimore & O.R. v. US, 298 US 349, in 318 ICC 771 (785)

RESTRICTIONS

Tacking: Cope v. US, 222 F. Supp. 596, in 93 MCC 712

ROUTES

Combination, service route: Consolidated Freightways v. US, 176 F. Supp. 599, in 318 ICC 395

Irregular, conversion to regular: Falwell v. US, 69 F. Supp. 71, aff'd 330 US 807, in 87 MCC 674

separate carrier classification: Brady Transfer & Stor. v. US, 80 F. Supp. 110, aff'd 355 US 875, in 88 MCC 415 (428)

Tacking restrictions: Cope v. US, 222 F. Supp. 596, in 93 MCC 712

SAFETY OF OPERATIONS

Accident records and reports, Motor carriers: Schechter Corp. v. US, 295 US 495, in 91 MCC 141 (146); ICC v. Goodrich Transit Co., 224 US 194, in 91 MCC 141 (146); Levison v. Spector Motor Service, 330 US 649, in 91 MCC 141 (146); Pyramid Motor Freight Corp. v. Ispass, 330 US 695, in 91 MCC 141 (146)

SCHEDULES, TARIFFS

Conflicting rates: US v. Gulf Refining Co., 268 US 542, in 314 ICC 737

Departure forbidden: L. & N. v. Maxwell, 237 US 94, in 315 ICC 537, 318 ICC 415, 318 ICC 501

Effect, binding as statute: Penn. R. Co. v. International Coal Mining Co., 230 US 184, in 315 ICC 537

Error in: Armour v. A., T. & S.F. Ry., 254 F. 2d 719, Davis v. Portland Seed Co., 264 US 403, in 315 ICC 537

Express service: Bird Trucking v. US, 159 F. Supp. 717, in 91 MCC 311 (326)

Legal rate: Beaumont, S.L. & W. Ry. v. Magnolia, 26 F. 2d 73, in 315 ICC 537

Reasonableness of rate immaterial: Penn. R. v. International, 230 US 184, in 315 ICC 537

Strict compliance with tariff rules: Beaumont, S.L. & W. Ry. v. Magnolia Provision Co., 26 F. 2d 73, in 315 ICC 537

SECURITIES

Jurisdiction: Schwabacher v. US, 334 US 182, Evans v. FCC, 113 F. 2d 166, in 90 MCC 246

STARE DECISIS

Administrative interpretations, change in: Norwegian Nitrogen Co. v. US, 288 US 294, in 322 ICC 301 (331)

STATE

Interstate certificate, permit, issued by, not eligible for registration: Gulf Coast Motor Frt. Lines v. US, 35 F. Supp. 136, in 88 MCC 357

STATE COURTS

ICA, rights under, may not determine: Castle v. Hayes Frt. Lines, 348 US 61, Service Stor. & Transfer Co. v. Virginia, 359 US 171, in 88 MCC 357

STATE LAW

Subterfuge operations to defeat: Castle v. Hayes Frt. Lines, 348 US 61, Service Stor. & Transfer v. Va., 359 US 171, in 88 MCC 745

STATE POWERS

Interstate commerce, economic regulation not within: Buck v. Kuykendall, 267 US 307, Galveston Truck Line v. Allen, 2 F. Supp. 488, aff'd 289 US 708, in 88 MCC 357

Weight and size regulations: Castle v. Hayes Freight Lines, Inc., 348 US 61, in 86 MCC 347

STOCKHOLDERS

Minority stockholders: Schwabacher v. US, 334 US 182, Ahlenius v. Bunn & Humphreys, 358 Ill., 192 N.E. 824, in 87 MCC 637; Schwabacher case, 334 US 182, in 90 MCC 87

SWITCH CONNECTIONS AND TRACKS

§1(9): Cleveland, CC & St. L v. US, 275 US 401, Pennsylvania R. v. Pittsburgh, L & W, 83 F. 2d 861, New York Central v. Southern, 226 F. Supp. 463, in 323 ICC 65

SWITCHING

Centralized supervision agreement: Railway Labor Executives Assn. v. US, 151 F. Supp. 108, in 317 ICC 502

TERMINAL AREA

Airline, commission jurisdiction: City of Philadelphia v. Civil Aeronautics Board, 289 F. 2d 770, in 95 MCC 71

Defined: Acme Fast Frt. v. US, 154 F. Supp. 239, in 89 MCC 389 (399)

TERMINAL SERVICES

Waht included in line-haul rates: Great Northern v. Sullivan, 294 US 458, in 321 ICC 720

TERMINALS

Passenger facilities, motor: Boynton v. Virginia, 364 US 454, in 86 MCC 743

THROUGH ROUTES

Barge-rail: Virginian R. v. US, 272 US 658, Thompson v. US, 343 US 549, in 316 ICC 759

Closed, legally vs. commercially: Virginian Ry. v. US, 272 US 658, in 321 ICC 314

Defined: Thompson v. US, 343 US 549, Denver & RGW v. Union Pac., 351 US 321, Chicago, M., St. P. & P. v. US, 366 US 745, in 316 ICC 795; Thompson v. US, 343 US 549, in 318 ICC 522, 322 ICC 423; Thompson and Denver & RGW, in 321 ICC 283, 321 ICC 314

Reestablishment: Atlantic Coast Line v. US, 205 F. Supp. 360, aff'd 371 US 6, in 321 ICC 283

Short-hauling: US v. Mo. Pac. R., 278 US 269, in 320 ICC 430

Test of existence: Denver & R.G.W.R. v. Union Pac., 351 US 321, Thompson v. US, 343 US 549, in 322 ICC 301 (335)

TOWAGE

Freighting distinguished: Cornell Steamboat Co. v. US, 321 US 634, in 317 ICC 661

TRAILER-ON-FLATCAR SERVICE

Plan I: contract, unregulated carriers may not use: Acme Fast Frt. v. US, 30 F. Supp. 968, aff'd 309 US 638, in 322 ICC 301 (350)

TRAILER-ON-FLATCAR SERVICE—Con.

Plans III and IV: lawfulness: Cooper-Jarrett v. US, 226 F. Supp. 318, in 322 ICC 301 (370)

Substitution for motor, circuity limitations: Consolidated Freightways v. US, 176 F. Supp. 559, Strickland Transp. v. US, 209 F. Supp. 618, in 322 ICC 301 (362)

TRANSFER OF OPERATING RIGHTS

Consistency with public interest: Ratner v. US, 162 F. Supp. 518, aff'd 356 US 368, in 317 ICC 661

Misrepresentation or concealment: FCC v. Woko, Inc., 329 US 223, in 93 MCC 272

TRANSIT

Cause of action accrues on final delivery: Ark. Oak Flooring Co. v. La. & A. Ry., 166 F. 2d 98, 334 US 828, in 315 ICC 259

Fiction, continuous shipment: Baltimore & O. R. Co. v. US, 24 F. Supp. 734, Central R. Co. of N.J. v. US, 257 US 247, in 94 MCC 495

Intent of parties: Baltimore & O.S.W. R. Co. v. Settle, 260 US 166, in 94 MCC 495

TRUCKLOADS

Construed: totality of circumstances considered: US v. Drum, 368 US 370, in 325 ICC 128

TRUSTEE

Defendant, proper with court permission: Carpenter v. International-G. N.R., 5 F. Supp. 768, in 318 ICC 35; Robinson v. Trustees of New York, N.H. & H. R. Co., 60 N.E. 2d 593, in 318 ICC 35

UNITED STATES

Agencies, instrumentalities, governmental capacity: Ashwander v. TVA, 297 US 288, Tenn. Power Co. v. TVA, 306 US 118, Fed. Land Bank v. Bismark Co., 314 US 95, US v. Welch, 327 US 546, Fed. Land Bank v. Kiowa County, 368 US 146, Ramsey v. United Mine Workers, 27 F.R.D. 423, in 319 ICC 497

VIOLATION OF ACT

Cognizable circumstances indicating: American Trucking Assns., Inc. v. US, 344 US 298, in 94 MCC 402

Participants, individual responsibility: Hitchman Coal & Coke Co. v. Mitchell, 245 US 229, in 318 ICC 345, 318 ICC 507

§1(18), court's exclusive jurisdiction: Powell v. US, 300 US 276, in 324 ICC 272

VOLUME OF TRAFFIC

Annual volume rates for public utilities: Tampa Electric Co. v. Nashville Coal Co., 365 US 320, in 323 ICC 75

WATER CARRIERS

Towage operators: Cornell Steamboat Co. v. US, 321 US 634, in 317 ICC 661

WILLFUL

Violations, §9(b) of APA inapplicable: Great Western Food Distr. v. Brannan, 201 F. 2d 476, Walker v. CAB, 251 F. 2d 954, Eastern Produce Co. v. Benson, 278 F. 2d 606, in 91 MCC 936 (949)

WITNESSES

Cross-examination: Banning v. US, 130 F. 2d 330, cert. denied 317 US 695, in 90 MCC 527; Market St. R. v. Comm'n, 324 US 548, in 92 MCC 383

Unavilability, use of records: Nicholls v. Webb, 8 Wheat. 326, in 93 MCC 498

Use of documents to refresh memory: Putnam v. US, 162 US 687, Breese v. US, 106 Fed. 680, Dowling Bros. Distilling Co. v. US, 153 F. 2d 353, US v. Riccardi, 174 F. 2d 883, Tatum v. US, 249 F. 2d 129, in 89 MCC 750

without producing them at hearing, testimony inadmissible: Jencks v. US., 353 US 657, National Labor Rel. Bd. v. Adhesive Products Co., 258 F. 2d 403, Great Lakes Air Lines, Inc. v. C.A.B., 291 F. 2d 354 in 96 MCC 29

Qualifications: Public Utilities Co. v. Handorf, 112 N.E. 775, 185 Ind. 254, in 93 MCC 498

TABLE OF CASES
